Information on environmental policy and guidelines

Environmental policy and guidelines

Environmental policy and guidelines	:	Yes
Environmental guidelines	:	Electricity management, Fuel management, Renewable/clean energy management, Water resources and water quality management, Waste management, Biodiversity management, Greenhouse gas and climate change management, Air quality management, Noise pollution management

Supalai Public Company Limited and its subsidiaries are committed to becoming a business leader through innovation and sustainable development. Recognizing that effective environmental management is a crucial factor driving long-term business growth, the company has established an environmental policy to serve as a framework for effective operations in line with international standards. This policy covers business operations throughout the value chain, from procuring environmentally friendly materials, developing and delivering products, marketing and sales, after-sales services, supply chain management, to waste management. It aims to reduce environmental impacts, promote efficient resource utilization, conserve biodiversity, and manage climate change in alignment with the company's greenhouse gas emission reduction targets.

The Company integrates an environmental management system as part of its business operations, emphasizing the assessment of material issues. The Company conducts a "Double Materiality Assessment," covering both the impact of business activities on the environment (Impact Materiality) and environmental risks/opportunities that may affect financial position, cash flow, and enterprise value (Financial Materiality), in accordance with ESRS, IFRS S1, and TNFD guidelines. This is reviewed and reported to the Board of Directors annually to ensure that environmental management is genuinely linked to business strategy.

Concurrently, the Company is committed to continuous development and evaluation. The results of these materiality assessments are used to define concrete strategies, targets, and environmental and climate indicators, as well as to promote knowledge and awareness among employees, customers, partners, and stakeholders, to embed environmental operations as a sustainable part of the organizational values.

For more information, please visit: *Environmental Policies and Guidelines*

Efficient Resource Utilization and Environmental Conservation

The Company recognizes the importance of conserving natural resources, which are continuously declining. Therefore, it aims to instill a sense of value in resource utilization among all employees to achieve maximum resource efficiency, foster sustainable behavior, and apply it in daily life, which will lead to positive long-term impacts on society and the environment. It also promotes valuable resource utilization through communication and activities under the 3Rs concept (Reduce, Reuse, Recycle) to enhance resource efficiency, reduce waste, minimize pollution, and decrease greenhouse gas emissions. Furthermore, it supports the design, research, and development of products that consider energy and environmental conservation, including the application of the polluter pays principle in accordance with environmental governance.

The Company has established policies and guidelines for efficient resource utilization, covering energy, water, office supplies, transportation, and waste management, to ensure that all directors, executives, and employees, including subsidiaries, operate in a tangible and unified manner.

For more information, please visit: Policy on Efficient use of Resources

Resource and Waste Management

The Company recognizes the importance of sustainable business operations, considering environmental and social impacts. Efficient resource and waste management is therefore an integral part of good corporate governance. A policy for resource and waste management has been established to serve as a framework for overseeing resource utilization, waste management, and pollution from business operations in an efficient, transparent, and auditable manner, aiming to enhance understanding and participation among personnel at all levels.

This policy covers inbound material management, waste management, pollution management, water management, and support for research and development to reduce environmental impacts throughout the value chain. It also includes data collection, target setting, and performance monitoring in accordance with GRI Standards (Global Reporting Initiative) for sustainability reporting, specifically GRI 103: Energy 2025,GRI 302: Energy 2016, GRI 303: Water and Effluent, GRI 305: Emissions, and GRI 306: Waste. Operations under this policy enable the Company to utilize resources efficiently, reduce environmental impacts, and enhance long-term business sustainability.

For more information, please visit: Policy on Resource and Waste Management

Environmental Policy	Guidelines

1. Electricity Management Policy	The Company adheres to the principle of operating a business that is friendly to the environment, focusing on tangible improvements in the energy efficiency of electricity consumption within the organization. This is achieved through a comprehensive resource management approaches covering lighting systems, air conditioning systems, and smart use of office equipment, to reduce unnecessary energy consumption and support long-term greenhouse gas emission reduction targets. In terms of lighting systems, the Company promotes maximum utilization of natural light by arranging workspaces connected to external light sources, coupled with switching to energy-saving light bulbs that meet industrial product standards. A segmented switch control system is implemented to allow activation only in necessary areas. Furthermore, regular measurement of light intensity and equipment maintenance are mandated to ensure optimal lighting efficiency and operational safety for employees. The Company has set a standard for air conditioning temperature at no less than 25 degrees Celsius, while also controlling the environment to reduce the workload of air conditioners. This includes regularly checking for refrigerant leaks, managing spaces to reduce heat sources, and continuously cleaning air filters, which significantly improves air circulation efficiency and saves energy. Furthermore, it aims to foster an organizational culture through employee participation in office equipment management, promoting the practice of "switching off and unplugging" when not in use for a specified period. This also includes selecting high-efficiency energy-saving computer technology and peripherals, as well as utilizing network systems to reduce redundant equipment. All these efforts are to ensure that the Company's electricity management is maximally efficient, aligns with international sustainability standards, and reflects a sustainable responsibility towards natural resources. *For more information, please visit:* Policy on Efficient use of Resources

2. Fuel Energy Management Policy (GRI: 103-1)	The Company focuses on efficient fuel energy consumption to reduce environmental impacts and control operational costs. Measures are implemented to maintain vehicles in optimal condition, including regular engine inspections and oil changes according to specified intervals. Emphasis is also placed on monthly tire pressure checks and wheel alignment to reduce friction and enhance fuel combustion efficiency. Employees are encouraged to drive correctly at legal speeds, avoid aggressive acceleration or revving the engine in neutral, and are mandated to switch off engines when idling or loading/unloading goods. Additionally, in-car air conditioning systems are controlled at appropriate levels to reduce engine workload and minimize atmospheric pollution. Furthermore, it promotes proactive travel planning through the use of shortcuts and carpooling systems. It also leverages technological innovations to replace travel, such as video conferencing and online document submission, to reduce vehicle usage frequency and move towards the overall goal of sustainable fuel energy savings for the organization. *For more information, please visit:* Policy on Efficient use of Resources
3. Water Resource and Water Quality Management Policy	Environmental ISO 14001:2015 strictly. Furthermore, in some areas where the Company operates, which are water-stressed areas, the Company has assessed water resource risks using the Aqueduct Water Risk Atlas from the World Resources Institute (WRI), an internationally recognized tool. Measures for water risk management have been defined, such as reducing water consumption (Reduce), treating wastewater to meet standards or for reuse, and water for recycle, as well as supporting equitable access to water sources with communities. The Company has verified and established a resource and waste management policy, including a water management plan to reduce water usage and improve water use efficiency for maximum benefit. It also promotes awareness among employees and communities around projects regarding the importance of and adherence to environmental policies and practices to foster environmental sustainability. *For more information, please visit:* Policy on Resource and Waste Management

4. Waste Management Policy	The Company is committed to systematically and comprehensively elevating waste management standards to reduce environmental impacts and drive the organization towards a Circular Economy. It has established guidelines emphasizing data integration and transparent verification. By managing data through digital systems and verification processes, waste management becomes efficient. Relevant key departments are mandated to collect data on inbound materials, general waste, and hazardous waste via a specially designed digital platform for accurate recording and reporting of ledger data in each fiscal year. Additionally, independent external agencies are engaged to verify the accuracy of waste generation data, including reused waste, recycled waste, and hazardous waste, to build confidence in data management standards among stakeholders. Proactive targets and monitoring are set for reducing or avoiding waste generation at the source. Relevant departments are required to develop operational plans and set clear quantitative targets within specified timelines, and to continuously report progress to compare actual performance against targets. This approaches enables the Company to assess process effectiveness and appropriately improve waste management methods, both those implemented by the Company and through external agencies. To affirm environmental responsibility, key departments are encouraged to consider evaluating the management system standards. Environmental ISO 14001, an international standard certification from external assessors. Such operations reflect the commitment of the Company's efforts to develop highly efficient waste management systems to minimize ecological impacts and promote valuable resource utilization. *For more information, please visit:* Policy on Resource and Waste Management

5. Biodiversity Management Policy	The Company has integrated collaboration among various internal departments to jointly establish criteria for assessing biodiversity risks and opportunities for new and significant projects. Our goal is to achieve a net positive impact on biodiversity or to offset unavoidable impacts. This involves preparing reports on biodiversity habitats, both within and near project areas, and developing a Biodiversity Action Plan (BAP), which is strictly audited by the sustainability department. Furthermore, we coordinate with external agencies, including government, private sector, and non-profit organizations (NGOs), to collectively reduce biodiversity loss in all areas related to our operations. The Company believes that accurate and transparent biodiversity management will be a crucial foundation for passing on a rich natural heritage to future generations, alongside stable business growth. To achieve truly sustainable outcomes, the Company prioritizes building a knowledge base and developing personnel and partners in terms of biodiversity continuously, to foster understanding and correct implementation. It also mandates transparent data disclosure through reporting aligned with TNFD (Taskforce on Nature-related Financial Disclosures) recommendations and other international standards. *For more information, please visit:* Policy on Biodiversity Management

6. Climate Change Management Policy	The Company recognizes the urgency of the situation regarding global warming. Therefore, guidelines have been established under the Climate Change Management Policy to elevate operations in line with international standards and concretely move towards becoming a low-carbon organization. By assessing risks and defining climate strategies, the Company monitors and analyzes risk factors and opportunities that may arise from climate change in the short, medium, and long term, to integrate them into the organization's main risk management plan. Additionally, a Climate Scenario plan is developed, and sub-projects are defined to promote adaptation to climate fluctuations. sustainable climate. Greenhouse gas inventories and reporting are conducted to ascertain the true status of greenhouse gas emissions. The Company mandates the collection and reporting of internal greenhouse gas emissions (Scope 1 and 2), covering key activities such as construction processes, operations in the Company's assets, and open space management. This is further extended to reporting external greenhouse gas emissions from upstream and downstream partners (Scope 3). Additionally, the carbon intensity per unit of production is calculated to serve as an indicator for measuring operational efficiency. This includes setting clear quantitative targets for greenhouse gas emission reduction to control both the process and the volume of emissions. Financial mechanisms are also adopted, such as implementing an Internal Carbon Price and disclosing financial information in accordance with TCFD guidelines in the annual report, to ensure transparency for stakeholders. stakeholders. To build confidence in operational data, the Company also mandates the engagement of independent verifiers from internationally certified external agencies to regularly audit greenhouse gas emission data, alongside measures to reduce investment in high-carbon assets or products, thereby reflecting the organization's clear stance on mitigating climate change. *For more information, please visit:* Policy on Climate Change Management

7. Air Quality Management Policy	The Company is committed to systematic air pollution management to enhance quality of life and the environment. It has established comprehensive guidelines covering empirical data collection and setting impact reduction targets in a tangible manner, by mandating relevant key departments to implement collects and reports significant pollution generation data via a specially designed digital platform. Ledger entries are created for all operational activities throughout each fiscal year, providing the Company with an accurate database for efficient pollution analysis and management planning. Relevant departments are tasked with jointly setting clear quantitative targets and timelines for each process to reduce or avoid pollution from organizational activities. Progress reports are continuously prepared to compare actual performance against set targets, ensuring transparency and allowing for adjustments to operational guidelines to align with the Company's sustainability goals. Furthermore, it emphasizes controlling emissions that affect air quality by mandating the implementation of pollution management methods, both through self-operation and by engaging specialized external agencies. These measures include monitoring and collecting emission data. significant air pollutants, including Nitrogen Oxides (NOx), Sulfur Oxide (SOx), and Volatile Organic Compounds (VOCs) continuously, to ensure that the Company's operations comply with relevant standards and regulations, and to contribute to maintaining air quality and the well-being of surrounding communities. *For more information, please visit:* Policy on Resource and Waste Management

Governance Structure

The Company has a governance structure related to environmental matters and efficient resource utilization to ensure continuous policy compliance and operational effectiveness. This includes regular review and improvement of guidelines, with all levels of employees mandated to strictly adhere to them, under the supervision of key stakeholders as follows:

- **Board of Directors** is responsible for overseeing and approving policies, setting strategic directions, and annually reviewing the effectiveness of environmental management systems and efficient resource utilization.
- **Sustainability Committee** comprising the management committee and representatives from the sustainability working group, is responsible for developing policies and strategies, overseeing, and regularly monitoring environmental performance and efficient resource utilization to align with organizational goals and direction.
- **Sustainability Working Group** comprising representatives and department heads, is responsible for overseeing, monitoring, reporting, and establishing environmental and efficient resource utilization guidelines in accordance with laws and the Company's policies. Monthly meetings are held to communicate policies,

discuss with key internal and external stakeholders, share perspectives or initiatives for improving environmental management systems and efficient resource utilization, and promote cooperation and awareness among employees, contractors, partners, regulatory bodies, and other relevant stakeholders.

Information on review of environmental policies, guidelines, and/or objectives over the past years

Review of environmental policies, guidelines, and/or goals over the past year

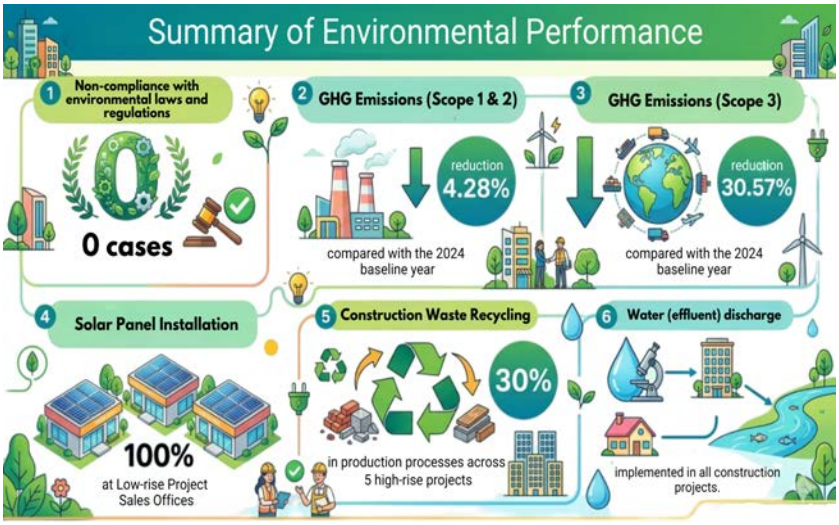
Review of environmental policies, guidelines, and/or goals over the past year	:	Yes
Changes in environmental policies, guidelines, and/or goals	:	Electricity management, Fuel management, Renewable/clean energy management, Water resources and water quality management, Waste management, Biodiversity management, Greenhouse gas and climate change management, Air quality management, Noise pollution management

In 2025, the Company reviewed its environmental policies and practices related to its operational processes to align with laws, international standards, and sustainability goals. Key issues reviewed included greenhouse gas emission reduction, energy management, water management, waste management, pollution control, and biodiversity. The Board of Directors and the Sustainability Committee are primarily responsible for establishing guidelines, approving, and monitoring operational performance. Reviews are conducted to update these guidelines and to consistently comply with environmental social responsibility standards.

Environmental Performance 2025

Environmental Performance

- 0 cases of environmental law violations
- Reduce greenhouse gas emissions by 4.28% (Scope 1 and 2) Compared to the base year 2024
- Reduce greenhouse gas emissions by 30.57% (Scope 3) Compared to the base year 2024
- Low Rise Projects sales offices installed Solar panels 100%
- 30% of recycled construction waste used in the production process per High Rise Projects area across 5 projects.
- All Low Rise Projects and High Rise Projects have wastewater quality control.
- 51% of the Green Procurement.



Risk and Opportunities

Key Sustainability Issues	Impacts, Risks, and Opportunities
Resource Utilization ● Energy management ● Waste management ○ Construction material quality ○ Circular economy or reuse ● Water management ● Air pollution management **FTSE Russell EGS Theme:** Pollution & Resource **Supporting SDGs goals** 	The Company focuses on transforming resource challenges into opportunities for sustainability. Recognizing the risks from rising energy costs, water scarcity, and stricter environmental regulations, the Company integrates resource and waste management policies into its operational strategies through the selection of high-quality, environmentally friendly construction materials and the adoption of smart technologies to enhance energy management efficiency and reduce greenhouse gas emissions. Despite facing challenges in investment capital and personnel behavior change, the Company sees significant opportunities to elevate to Green Building standards and expand resource circularity innovations, such as reusing condensate water from air conditioning systems, which will help reduce long-term operating costs and create a competitive advantage that meets the needs of modern consumers. In terms of waste and pollution management, the Company manages risks related to community and ecosystem impacts using circular economy principles Reduce, Reuse, Recycle and stringent air quality control measures in all construction projects to reduce particulate matter pollution and preserve biodiversity. The transition from legal compliance to proactive innovation, such as smart wastewater treatment systems and real-time air quality monitoring, not only helps mitigate negative environmental impacts but also presents an opportunity to create social value (CSV), elevate the organization's image as a leader in sustainable real estate, and concretely drive the organization towards its Net Zero goals.

Strategies and Management Approaches

Strategies Approaches

1. Certification of quality management system according to international standards

The Company is committed to conducting business with environmental conservation in mind, through systematic and integrated efficient resource management. This encompasses establishing operational frameworks according to international standards, environmental impact assessment, risk management, as well as continuous monitoring and improvement. The Company has defined an environmental management framework and efficient resource

management that aligns with internationally recognized standards, covering the entire organization, including subsidiaries, partners, and contractors under the Company's control. The Company's environmental management guidelines comply with relevant national and international laws, regulations, and standards.

The Company has been certified according to the international standard ISO 14064-1:2018, which is an international standard for the measurement, quantification, reporting, and verification of Carbon Footprint of Organization (CFO). Furthermore, the Company has also been certified for its quality management system according to the international standard ISO 9001 since 2002 until the present, covering planning, design, construction, sales, and after-sales services for both low rise projects and high rise pojects. This commitment aims to continuously improve work systems, establish standards that reduce environmental impact, and utilize resources with maximum efficiency. All of this is to create satisfaction and meet the needs and expectations of the Company's customers and stakeholders. Additionally, the Company adheres to the principles of environmental management (ISO 14001:2015), which serves as a guideline for supervising and enhancing environmental performance, and is currently preparing to assess, improve, and prepare in various aspects in the next phase.

For more information, please visit: https://www.supalai.com/about/quality-policy

2. Environmental impact assessment according to legal requirements

The Low Rise Projects and High Rise Projects conduct comprehensive environmental impact studies and assessments, considering potential impacts on natural resources, economy, society, and community health. This is to establish guidelines for preventing and mitigating project impacts, as well as to develop measures for environmental impact prevention and remediation, monitoring measures, and environmental action plans during the construction and operational phases. The Company has prepared Environmental Impact Assessment (EIA) reports as required by law for eligible projects, and also prepared Initial Environmental Examination (IEE) reports. Furthermore, the Company continuously implements measures to prevent, mitigate, reduce, monitor, and inspect environmental quality, such as annual water quality testing.

3. Risk Management, Assessment, and Environmental Performance Enhancement

The Company continuously monitors and analyzes environmental performance, covering the development and improvement of environmental indicator databases to be clear, complete, consistent, and standardized across all construction projects and the head office. Strategic goals and success indicators are also set at the project and organizational levels to guide efficient planning and operations, emphasizing the reduction of environmental impacts and the most valuable and efficient use of natural resources. The Company regularly reviews its performance and implements continuous process improvements.

Management Approaches

Projects supporting environmentally friendly construction

The Company has ensured that the project's utility systems comply with laws related to project development, including conducting environmental impact studies within the project as required by law, and developing various utilities in accordance with the study's findings. For projects where government agencies do not mandate an environmental impact study, the Company still considers environmental impacts and nearby communities, especially the quality of wastewater discharged from the project. This includes providing household wastewater treatment systems for every home before discharge into the project's drainage pipes, and having a collective wastewater treatment pond, as well as a pond for checking water quality to meet legal standards before discharging into public waterways, to prevent impacts on public water sources and neighboring communities. Additionally, some provinces require public hearings before submitting construction permit applications. Projects are designed for efficient energy use or water management to be environmentally friendly and reduce customers' water usage costs, including reducing electricity consumption by switching to natural energy sources, significantly increasing energy and cost savings, such as the use of Solar Roofs in common areas and homes within the project.

Furthermore, the Company also emphasizes design and construction management, taking into account the management of various materials and equipment to minimize waste, adhering as closely as possible to manufacturer standards, thereby reducing material waste within construction projects. The Company's projects also provide green spaces exceeding the legal standard criteria for recreational benefits and to mitigate the impact of PM 2.5 dust.
In 2025, the Company has projects investing in research and development of products to reduce pollution, waste, and promote efficient resource utilization. Examples include:

SUPALAI EXPERIENCE HOME project: Integrating environmentally friendly innovations into the construction process

The Company adheres to a residential development approaches that considers environmental impacts throughout the building's life cycle, through innovative design and internationally standardized construction processes, under the concept of "SUPALAI EXPERIENCE HOME" at Supalai Lake Ville SrisamarnPathum Thani project. This aims to deliver sustainable value to residents and society by focusing on creating well-being alongside reducing environmental impacts. Innovative construction work is designed using high-quality and high-standard materials that are also beneficial for quality of life and the environment, including:

- Autoclaved aerated concrete (AAC) bricks, which have outstanding heat insulation properties and help reduce electricity consumption within the home, are integrated with a reinforced concrete staircase structural system finished with real oak wood veneer to provide a natural touch that is safe for health.
- Exterior paint with 96.7% heat reflection properties, reducing indoor temperature by up to 5.5 degrees Celsius, saving over 27.5% on electricity bills.
- Interior paint is Organic Care, low odor, 0% VOCs.
- Windsor Smart Series vinyl doors and windows help reduce heat entering the house, saving approximately 9,144 Baht/year in electricity costs, and from a health perspective, help prevent pollution and PM 2.5 dust.
- The roofing system utilizes a galvanized steel frame with recycled fiberglass insulation, reflecting up to 95% of heat and reducing indoor temperatures by 3-4 degrees Celsius, saving approximately 47% on electricity from air conditioners with Energy Label No. 5.
- Vinyl eaves ceilings can ventilate and reduce indoor temperatures by up to 7 degrees Celsius.
- The structure is designed to support the installation of a Solar Roof system with a real-time tracking display, enabling residents to manage the production and use of clean energy with maximum efficiency, saving up to 20,000 - 33,000 Baht/year on electricity bills.
- Water resource management includes the installation of drainage pipe systems that prevent backflow odors for the good hygiene of residents.

SUPALAI EXPERIENCE HOME is a project that involves actual construction and provides in-depth details of homes based on engineering standards and structural integrity, from foundations, walls, stairs, to roofing systems. Every component is meticulously designed and calculated according to engineering principles to ensure that all homes can safely and sustainably support usage. This includes selecting construction materials that meet international standards, quality-controlled construction at every stage, and testing and inspection (QC) that comply with the Company's specified standards and ISO 9001. This not only reflects transparency in the design and construction process but also confirms the Company's commitment to maximizing resource utilization and creating a sustainable quality of life for society in the long term.

Information on compliance with environmental management principles and standards

Compliance with environmental management principles and standards

Environmental management principles and standards	:	BCG Model

Compliance with water management principles and standards

Water management principles and standards	:	3Rs or 5Rs

Compliance with waste management principles and standards

Waste management principles and standards	:	3Rs, 5Rs or 7Rs

Compliance with greenhouse gas or climate change management principles and standards

Greenhouse gas or climate change management principles and standards	:	Thailand Greenhouse Gas Management Organization (TGO), Thailand Greenhouse Gas Management Organization (TGO), Thailand Greenhouse Gas Management Organization (TGO), The Greenhouse Gas Protocol, The Greenhouse Gas Protocol, The Greenhouse Gas Protocol, ISO 14064 - Greenhouse gases, ISO 14064 - Greenhouse gases, ISO 14064 - Greenhouse gases

Information on other environmental management

Biodiversity

Impacts, Risks, and Opportunities

Key Sustainability Issues	Impacts, Risks, and Opportunities
Biodiversity and Ecosystem Preservation ● Protection and Restoration of Ecosystems ● Management of Biodiversity Impacts **FTSE Russell ESG Theme:** Biodiversity **Supporting SDG Goals** 	The Company places the highest priority on environmental management and biodiversity conservation, recognizing that maintaining natural balance is fundamental to the quality of life for residents and surrounding communities. The Company is committed to operating under the concept of sustainable development alongside the preservation of natural value by integrating plant and animal conservation, appropriate land utilization, and ecosystem restoration to achieve completeness. The approaches covers land selection and acquisition processes, project planning and design that avoids impacts on habitats, the creation of interconnected green spaces, as well as continuous environmental maintenance and monitoring. This ensures that biodiversity within the project area can be sustained and developed in the long term, thereby creating value for residents, communities, and the environment as a whole.

By 2030, the Company aims for 100% of projects located in high biodiversity-risk areas to implement Biodiversity Loss Mitigation Plans. These plans are designed to manage, prevent, and mitigate the impacts of business operations on biodiversity. To ensure measurable outcomes, the Company utilizes Habitat Area, Habitat Condition, and the Species Richness Index as its primary Key Performance Indicators (KPIs).

Goals for 2030	Performance in 2025
Low Rise Projects shall have a green area to saleable area ratio of ≥ 5%.	100% of all Low Rise Projects have green space to a saleable area of ≥ 5%.

Plans, performance, and outcomes related to other environmental management

Biodiversity

Policy and Commitment (GRI 101-1)

The Company has established the "Biodiversity Management Policy" and implemented board-level oversight to manage significant sustainability risks, including biodiversity issues. This aligns with the sustainability disclosure principles of IFRS S1. The Risk Management Committee is assigned the responsibility of providing governance oversight on the following areas:

1. Material issues, nature-related risks, and opportunities.
2. Integration of biodiversity into strategies, investment decisions, and project designs.
3. Risk management processes and internal controls, including Internal Control & Disclosure Readiness.
4. Metrics, targets, and monitoring of results.

The Committee reviews these matters at least once a year, or upon the occurrence of significant events or changes, and regularly reports to the Board of Directors. Meanwhile, the management team is responsible for driving implementation, allocating resources, and enhancing the capabilities of relevant departments to ensure operations align with the policy.

The Company has integrated biodiversity issues into its Enterprise Risk Management (ERM) and investment decision-making processes. This ensures that Nature-related Risksboth Physical Risks and Transition Risksare assessed and managed at a strategic level. Furthermore, cross-functional collaboration has been fostered to co-establish biodiversity risk and opportunity assessment criteria for new and significant projects.

The Company has established a strategic commitment to achieving a Net Positive Impact on biodiversity or implementing offsets for unavoidable impacts in high-biodiversity risk areas. The Mitigation Hierarchy (AvoidMinimizeRestoreOffset) serves as the core operational framework. The Company requires the reporting of Biodiversity Habitats within and adjacent to project sites and the development of a Biodiversity Action Plan (BAP), verified by the Sustainability Department. This process involves establishing baseline biodiversity conditions prior to project development and monitoring changes in Habitat Area, Habitat Condition, and Species Richness Index to evaluate quantitative outcomes, with progress disclosed annually.

Additionally, the Company collaborates with external stakeholders, including government agencies, the private sector, and non-profit organizations, to collectively reduce biodiversity loss across all operational areas.

To achieve authentic sustainability outcomes, the Company prioritizes building a knowledge foundation and continuously developing the capabilities of personnel and business partners regarding biodiversity to ensure accurate understanding and practice. The Company is also committed to transparent disclosure by preparing reports aligned with the recommendations of the Taskforce on Nature-related Financial Disclosures (TNFD) and disclosing sustainability data in accordance with the international GRI Standards (GRI 101: Biodiversity 2024). The Company firmly believes that managing biodiversity with integrity and transparency is a vital foundation for passing on a rich natural heritage to future generations alongside stable business growth.

For more information, please visit: Policy on Biodiversity Management

Strategies and Management Approaches

Green Space and Ecosystem Management through Big Tree Management Techniques (GRI 101-2)

The Company recognizes that large trees are invaluable natural assets, offering immense ecological and economic benefits. Beyond being long-lived flora, these trees serve as the pillars of the ecosystem and are vital to creating lush, resilient landscapes. Consequently, the preservation and professional relocation of large trees generate a net positive impact on biodiversity by providing essential habitats, shelters, and breeding grounds for diverse urban wildlife, thereby maintaining the balance of the urban food chain.

Furthermore, their root systems and expansive canopies play a crucial role in stormwater management by slowing runoff, preventing localized flooding, and mitigating soil erosion. From a business perspective, preserving these natural features enhances real estate value and elevates the long-term quality of life for residents. To safeguard existing trees within project development areas, the Company integrates strategic species selection tailored to functional utility with advanced tree transplanting and relocation techniques, ensuring the continuity of precious natural resources.

Biodiversity Conservation and Restoration (GRI 101-2, 101-4, 101-5, 101-8)

The Company has established comprehensive guidelines for the conservation and restoration of biodiversity across all current and future development projects. These measures are integrated throughout the entire project lifecycle from land acquisition and construction to post-construction phasesto mitigate potential negative impacts on biodiversity.

Our framework is aligned with the International Union for Conservation of Nature (IUCN) standards regarding Biodiversity Offsets and strictly adheres to the Mitigation Hierarchy. This structured approaches consists of four sequential levels designed to manage environmental impacts effective: Avoidance, Minimization, Restoration, Offsetting

Biodiversity Risk Assessment Process

The Company recognizes that nature and biodiversity are fundamental factors that directly influence the quality of life for our residents and the long-term growth potential of our business. Consequently, we have integrated nature-related risk and opportunity assessments into our corporate strategy. Our approaches is aligned with the international framework of the Taskforce on Nature-related Financial Disclosures (TNFD), ensuring that project development proceeds in harmony with the natural context and meets the evolving expectations of our stakeholders.

The company conducts assessments using the LEAP Approach (Locate, Evaluate, Assess, Prepare), which begins with considering the project's location and its connection to the surrounding ecosystem (Locate); analyzing the dependence on and impacts on natural resources and biodiversity (Evaluate and Assess); and utilizing the assessment results to manage biodiversity risks, coupled with strategic planning to enhance business opportunities and long-term value (Prepare).

The assessment covers the Double Materiality principle, considering both (1) the impact of the Company's activities on nature (Impact Materiality) and (2) the risk or opportunity that degradation of nature may affect the Company's operating results, cash flow, asset value at risk, and cost of capital (Financial Materiality). The analysis is currently in the process of data collection and uses scenario analysis consistent with the TNFD and IFRS S1 frameworks to assess the resilience of the business model under nature-related transition risks.

The results of these assessments are utilized to analyze Business Model Resilience under various Scenario Analyses. These scenarios specifically focus on ecosystem changes and water-related risks, ensuring that the Company can adapt and maintain operational continuity amidst evolving environmental challenges.

Furthermore, this approaches enables the Company to mitigate operational and environmental transition risks. It also serves as a catalyst for designing and developing residential projects that prioritize green space enhancement,

urban ecosystem restoration, and resource efficiency. These initiatives collectively generate added value for our projects, bolster consumer and investor confidence, and drive sustainable business growth while preserving the intrinsic value of nature for the long term.

1. Spatial Connectivity and Natural Value Assessment

The Company prioritizes land selection and project development rooted in the responsibility toward natural resources. We conduct systematic spatial assessments involving nature and biodiversity data to gain a profound understanding of the environmental context and the natural value of a site prior to development. This process is carried out in tandem with identifying design and development opportunities that harmonize with the sites unique natural characteristics.

The assessment process encompasses a comprehensive review of both national and international reference data. This includes verifying the presence of Reserved and Protected Wildlife as mandated by the Ministry of Natural Resources and Environment (MNRE), as well as identifying rare or endangered flora and fauna listed by the Office of Natural Resources and Environmental Policy and Planning (ONEP) under the Thailand Red List and the IUCN Red List. This rigorous screening supports project planning by proactively identifying legal constraints and enhancing business decision-making clarity from the initial stages.

Furthermore, the Company evaluates the context of water resources by utilizing water risk maps from the United Nations (UN) as a key decision-support tool. This ensures that project developments do not exacerbate water stress in local areas and enables effective long-term water management planning.

Regarding ecosystem structure, the Company prioritizes analyzing the areas surrounding its projects to avoid impacts on protected or sensitive areas. This includes carefully considering migration corridors, foraging grounds, and habitat connectivity to maintain ecological balance alongside urban development.

The Company operates with full respect for the rights of local communities and their traditional use of natural resources. We ensure that access to resources is not restricted without proper engagement and consent, adhering to the principle of Free, Prior, and Informed Participation. Furthermore, the Company provides dedicated channels for environmental and community-related grievances, ensuring a systematic monitoring and resolution process through the Supalai Contact Center 1720.

2. Identification of Dependencies and Impacts on Nature and Biodiversity (GRI 2-6, GRI 3-1 3-3)

The company recognizes that real estate development projects are interconnected with nature in many dimensions, both as a user of resources and as a potential impact on ecosystems. Therefore, the company conducts analyses of the dependencies and impacts of project development activities on nature and biodiversity in order to comprehensively identify business risks and opportunities.

The assessment encompasses dimensions of natural resource utilization, such as water, soil, and ecosystem services, as well as potential impacts from land restructuring, construction, and project operation, including habitat loss, alterations to ecosystem structure, and impacts on the capacity to withstand natural disasters such as floods, storms, or landslides.

Furthermore, the Company prioritizes strict pollution control and rigorous compliance with environmental laws and policies. We also meticulously consider potential reputational risks arising from biodiversity-related issues. These risks are formally integrated into the Enterprise Risk Management (ERM) framework for systematic monitoring and evaluation. The assessment results are utilized to formulate robust prevention and mitigation measures, supported by continuous risk monitoring and review. This ensures that all strategic decision-making and project implementations are deeply rooted in the consideration of nature and biodiversity, fostering long-term resilience and sustainability.

The scope of the Companys biodiversity management and disclosure encompasses the entire project development lifecycle: from site selection and land acquisition to design, construction, and post-occupancy management. This also extends to material issues within the value chain, including contractors, material suppliers, and the management of green spaces and water resources within the projects. To ensure the accuracy and auditability of its disclosures, the Company employs an evidence-based approaches and utilizes material assumptions tailored to the specific context of

each project site. This commitment to data integrity supports transparent reporting and enables stakeholders to verify the Companys environmental performance effectively.

3. Risk Level Analysis and Biodiversity Action Plan (BAP)

The company systematically analyzes biodiversity risk levels using data from spatial assessments and impact identification, considering key factors such as project location, distance from areas of high natural value, and the importance of plant and animal species that may be affected.

For projects identified as high-risk, the Company mandates the development of a Biodiversity Action Plan (BAP). This plan establishes comprehensive measures for the prevention, mitigation, and monitoring of impacts throughout the entire project development lifecycle. Beyond risk management, the BAP serves as a strategic framework that enables the Company to innovate in design and management, ultimately generating added value for both the development site and the surrounding communities.

The operational plan will be based on the mitigation hierarchy principle, prioritizing avoidance as the first priority, followed by reduction, restoration, and compensation, in that order. This ensures that the company's operations do not cause significant loss of biodiversity and are consistent with international best practices in sustainable development.

4. Implementation of the Mitigation Hierarchy for Impact Prevention and Reduction

The Company implements stringent management protocols in areas identified with high biodiversity impacts and risks, strictly adhering to the Mitigation Hierarchy. Our primary objective is to ensure that residential development results in minimal ecological disruption while actively supporting long-term nature restoration. By integrating these protective measures into our operational workflow, we strive to balance urban expansion with the preservation of vital ecosystem functions.

Avoid

The company prioritizes planning from the initial stages of each project, selecting locations and designing project layouts that harmonize with the natural context of the area. This includes preserving existing vegetation and topography as much as possible, avoiding the cutting down of large and valuable trees, and emphasizing the use of innovative construction methods such as low-carbon concrete and precast systems. For High Rise Projects, pile driving techniques are employed to minimize the risk of dust, noise pollution, and environmental contamination.

Minimize

The Company implements rigorous control measures for construction activities and project management to minimize impacts on the environment and surrounding communities. These include systematic management of dust, noise, construction waste, soil, materials, and wastewater. Furthermore, the Company prioritizes the selection of energy-efficient appliances and equipment, reducing resource consumption and mitigating footprints on local ecosystems. In

addition to operational controls, the Company promotes sustainability throughout its value chain through Green Procurement. We prioritize the sourcing of eco-friendly building materials and products that minimize natural resource depletion, ensuring that our commitment to environmental stewardship extends to our partners and suppliers.

Restore and Regenerate

The Company designs its green spaces with an ecological-centric approaches, aiming to restore ecosystem functions that support both biological diversity and human well-being in a balanced manner. Our operational framework focuses on creating ecological corridors that integrate seamlessly with the surrounding natural context. This includes the strategic selection of native plant species and vegetation suited to the local environment, which reduces resource consumption and enhances long-term ecosystem resilience.

Offset

The Company is committed to elevating its operations beyond mere impact mitigation toward driving systemic transformation. Our goal is to scale up positive outcomes for nature and biodiversity in the long term by integrating this transformative mindset into every stage of project design, development, and management. By embedding ecological restoration into our core operational fabric, we ensure that our growth contributes meaningfully to the resilience and regeneration of the natural environment.

The Companys operational approaches extends to active collaboration with diverse stakeholders, including local communities, government agencies, and civil society organizations. This synergy aims to develop and expand ecological green spaces, restore natural habitats, and enhance urban ecosystem connectivity.

Furthermore, the Company fosters innovation in resource and waste management, prioritizing eco-friendly materials throughout the value chain. We also emphasize transparent communication and awareness-building among employees, business partners, contractors, and residents. These collective efforts ensure that our residential developments play a pivotal role in delivering a Positive Contribution to Nature and supporting long-term sustainable urban development.

5. Regular Monitoring, Evaluation, and Auditing

The Company consistently monitors, measures, and reviews its performance regarding biodiversity and ecosystem services. This ensures that the environmental measures and management guidelines established during the project assessment phase are effectively implemented. By maintaining this rigorous oversight, the Company guarantees that its operational actions remain fully aligned with its overarching corporate sustainability goals, enabling continuous improvement in environmental stewardship.

Covers 100% of projects within the company's environmental assessment scope, verifying the compliance of project development with relevant environmental conditions, measures, and requirements related to land use, green spaces, water resource management, and biodiversity mitigation at least once a year or whenever significant changes occur during the project development phase.

The Company utilizes results from its monitoring and evaluation processes as critical input for reviewing project-level environmental performance. This review serves to confirm total compliance with relevant measures and regulations. Furthermore, these insights act as a primary reference for refining future design and development approaches. By leveraging this feedback loop, the Company aims to enhance operational suitability and focus on preventing and mitigating environmental and biodiversity risks to an acceptable level. This proactive approaches ensures that lesson learned from current developments drive superior environmental outcomes in all future projects.

Audit findings and lessons learned are systematically reviewed to continuously refine future project design and development guidelines. This commitment aims to elevate compliance with environmental measures, minimize risks to nature and biodiversity, and reinforce corporate transparency in sustainable business practices. By institutionalizing these insights, the Company ensures that every new development reflects an evolved standard of environmental stewardship.

Performance and Outcome of Biodiversity

The Company is steadfast in its commitment to conducting business in harmony with the preservation of natural resources. We prioritize comprehensive Environmental Impact Assessments (EIA) at every stage of development to prevent and mitigate potential negative impacts on biodiversity. This process is not merely a protocol for establishing targeted prevention and mitigation measures from the outset; it serves as a critical governance mechanism in the project approval process. By embedding biodiversity considerations into our core decision-making, we ensure that every project contributes to genuine, long-term sustainability.

In 2025, the Company continued to demonstrate full compliance with national environmental regulations. A total of 6 projects successfully received official approval for their Environmental Impact Assessment (EIA) reports from the Office of Natural Resources and Environmental Policy and Planning (ONEP). This milestone ensures that these developments have met rigorous government standards for environmental protection and biodiversity mitigation before commencing construction.

Biodiversity risk assessment (GRI 101-2, 101-4, 101-5, 101-8)

The Company conducted a comprehensive biodiversity due diligence and risk assessment for future project developments, specifically within the Lum Sam Kaeo Forest Park area in Pathum Thani Province. This assessment involved a detailed survey of local species to evaluate their extinction risk levels. The Company utilized the internationally recognized IUCN Red List of Threatened Species as the primary benchmark to categorize the conservation status of all identified flora and fauna. This proactive measure ensures that the Company has a clear scientific baseline to develop appropriate mitigation and conservation strategies prior to any site development, thereby minimizing potential impacts on vulnerable species and their habitats.

EX	Extinct
EW	Extinct in the wild
CR	Critically Endangered
EN	Endangered
VU	Vulnerable
NT	Near Threatened
LC	Least Concerned
DD	Data Deficient
NE	Not Evaluated

Environmental Context and Land Use

The surveyed area is situated in Lum Sam Kaeo Sub-district, Lam Luk Ka District, Pathum Thani Province. The site encompasses a rectangular plot totaling 20 Rai (approximately 3.2 hectares). This land has undergone a significant transformation under the Companys operations, evolving from an underutilized vacant plot into a dedicated green space designed to enhance the local environment and community well-being. The sites development incorporates strategic environmental engineering, including the afforestation of perennial trees and the integration of interconnected water channels. These features serve multiple critical functions: providing a sustainable irrigation system for the vegetation, acting as temporary detention basins to manage stormwater runoff during the rainy season, and establishing aquatic sanctuaries for the natural breeding and habitat of local species.

Furthermore, given its strategic locationbordered by residential communities, commercial hubs, agricultural zones, and government officesthis ecological development holds profound significance for the surrounding stakeholders in the following aspects:

1. Social and Community Benefit
    - Serves as infrastructure that helps trap PM 2.5 particulate matter and acts as a carbon sink in the city.

- Helps reduce the urban heat island effect, lowering the surrounding temperature.
- Serves as a recreational area for relaxation, leisure, and exercise for the community, contributing to improved quality of life and mental health for its residents.

2. Enhancement of Infrastructure and Public Utilities
   - Water distribution stations and flood protection routes utilize ditches dug in the temporary water storage areas of the Public Republic during periods of high water levels. Problems occurring on roads and access points to surrounding communities can be investigated.
   - Wastewater treatment using physical and biological methods Channels allow suspended solids to settle, and plants around the channels absorb organic matter, resulting in cleaner water before it is released into natural water sources or public canals.
   - Maintaining water security is crucial. Storing water for watering plants reduces reliance on public water supplies, ensuring the long-term sustainability of green spaces without depleting public water resources.
3. Safety and Long-term Sustainability
   - The survey found that most trees have high structural stability due to their strong root systems and adequate water supply, which reduces the likelihood of causing damage to buildings or community infrastructure during storms.
   - Well-managed green spaces with organized drainage systems enhance the aesthetics and increase the value of land or residential projects in the surrounding area.

Biodiverse Habitats

1. Variety of plant species

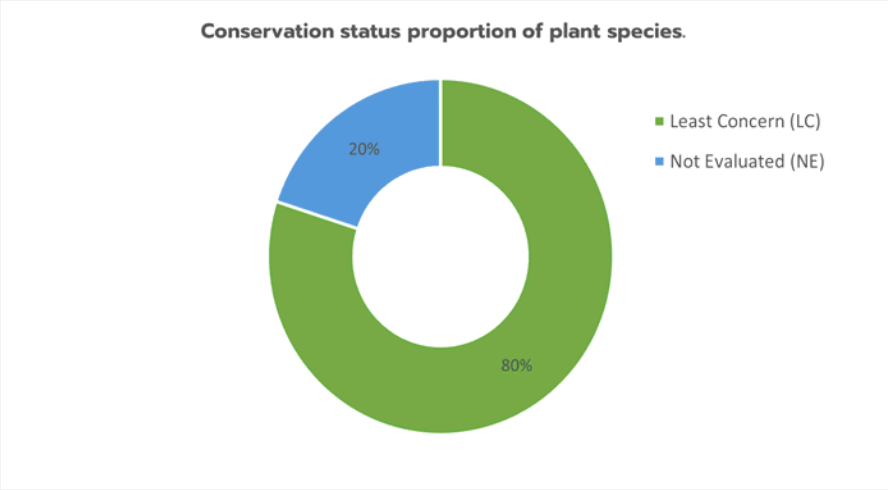
A survey of understory and herbaceous plants in the Lam Sam Kaeo forest area revealed a total of 5 plant species. These can be classified into 2 main groups based on their cotyledon structure, reflecting the diversity of food sources and shelters for insects and soil organisms, as follows:

- The survey identified four species of dicots: Water Dead-and-awake, Black honey shrub, Sensitive Plant, and Coat buttons. These plants play a crucial role in soil cover. They typically have taproot systems that help anchor the soil and prevent erosion, especially Sensitive Plant and Coat buttons, which are highly resistant to environmental conditions and help retain soil moisture.
- The biodiversity survey identified 1 key species of monocotyledonous plant: Para Grass (*Brachiaria mutica*). Despite being a single species, it plays a disproportionately significant role in the projects ecological balance, particularly within the riparian and wetland zones

No.	Local/Vernacular Names	Scientific name	Plant Habit	Status IUCN	Role in the ecosystem
1	Water Dead-and-awake	*Neptunia plena* (L.) Benth.	Herbaceous Plants	NE	Helps maintain water quality and serves as a food source and habitat for insects and small animals.
2	Black honey shrub	*Phyllanthus reticulatus* Poir.	Small Shrubs	LC	It helps to stabilize the topsoil and protect it from erosion.
3	Sensitive Plant	*Mimosa pudica* L.	Herbaceous Plants	LC	It helps fix nitrogen and improve soil quality.
4	Coat buttons	*Tridax procumbens* L.	Herbaceous Plants	LC	It is an important source of nectar for pollinating insects.
5	Para Grass	*Brachiaria mutica* (Forsk.) Stapf.	Amphibious plants	LC	Protects riverbanks from erosion and provides a hiding place for animals.

Based on the conservation status assessment of the 5 identified plant species within the project area, the Company has verified that there is currently no immediate risk of species loss. The survey results indicate that the predominant plant species found on-site are categorized as Least Concern (LC). The assessment confirms that all identified species are aligned with IUCN international standards, reflecting their status as robust local flora with high adaptive capacity.

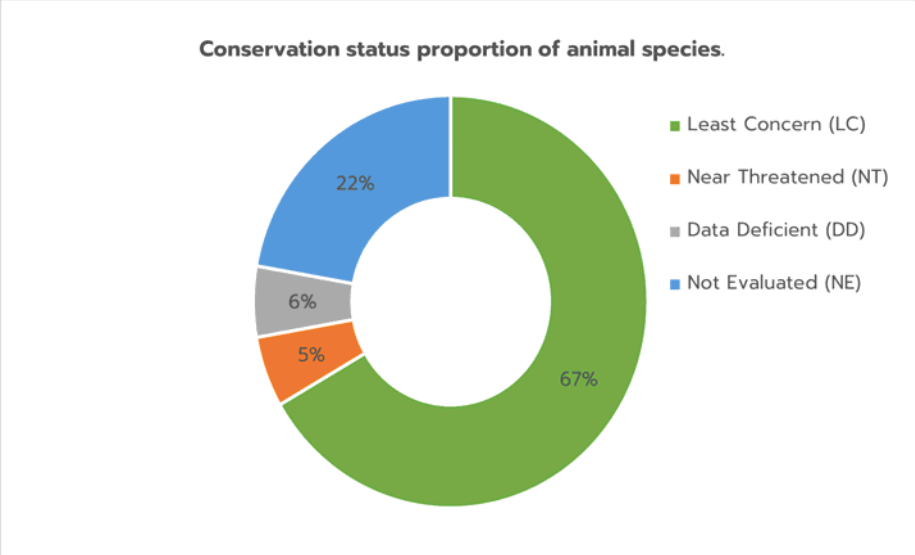
Although classified as Not Evaluated (NE), Water Dead-and-awake is a common plant with a crucial role in ecosystem restoration. These plants are not only secure in terms of conservation status but also serve as vital ecological foundations, supporting insect pollination through the provision of nectar, helping to retain moisture, and preventing soil erosion.



2. variety of animal species

The biodiversity survey within the project area identified a total of 18 fauna species of ecological significance. These species can be categorized by their populations and specific roles within the food web, reflecting the overall biological richness and ecological health of the site as follows

Group of animals	Species name	Scientific name	Status IUCN	Role in the ecosystem
Poultry	Common Tailorbird	*Orthotomus sutorius*	LC	Controls insect populations and helps in the dispersal of plant seeds.
	White-breasted Waterhen	*Amaurornis phoenicurus*	LC	
	Rock Pigeon	*Columba livia*	LC	
	Eurasian Tree Sparrow	*Passer montanus*	LC	
Aquatic animals	Striped snakehead	*Channa striata*	LC	It is an indicator of water quality and a component of the food chain.
	Minnow	*Rasbora borapetensis*	LC	
	Siamese fighting fish	*Betta splendens*	DD	
	Golden Apple Snail	*Pomacea canaliculata*	LC	
Insect	Dragonfly	*Pantala flavescens*	LC	They function in pollination and act as natural predators, preying on insect pests for food throughout their lives, as well as being decomposers in the ecosystem.
	Damselfl	*Pseudagrion microcephalum*	LC	
	Common Parasol	*Neurothemis fluctuans*	LC	
	Arboreal Bicolored Ant	*Tetraponera rufonigra*	NE	
	Black Garden Ant	*Paratrechina longicornis*	NE	
	Lesser Mealworm	Alphitobius diaperinus	NE	
	Lesser Grass Blue	*Zizina otis otis*	LC	
Reptile	Mekong snail-eating turtle	*Malayemys subtrijuga*	NT	They help maintain the balance of the ecosystem because they are both consumers and natural food sources for other predators.
	Changeable Lizard	*Calotes versicolor*	LC	
Small aquatic animals	Water Striders	*Aquarius remigis*	NE	Indicates the cleanliness of the water surface and surface tension.



The biodiversity assessment confirms that the project area serves as a safe and thriving habitat for various species. Evaluation based on the IUCN Red List of Threatened Species indicates that the majority of the identified fauna are classified as Least Concern (LC). Key groups include: Common Tailorbird, White-breasted Waterhen, Striped snakehead, Minnow, Siamese fighting fish, and Various groups of dragonflies

In addition, some important organisms were found during the survey: The rice field turtle, which is classified as Near Threatened (NT) This includes the Siamese fighting fish, which, although classified as Data Deficient (DD), is considered an endemic species in the area. Because they may be less common or no longer found in some urbanized areas, their presence indicates the creation of urban ecosystems that can serve as natural refuges, helping to preserve local animal species. In addition, groups of insects and small aquatic animals, although not yet evaluated (Not Evaluated: NE), such as Water striders, were found, which are indicators of water cleanliness in the project area.

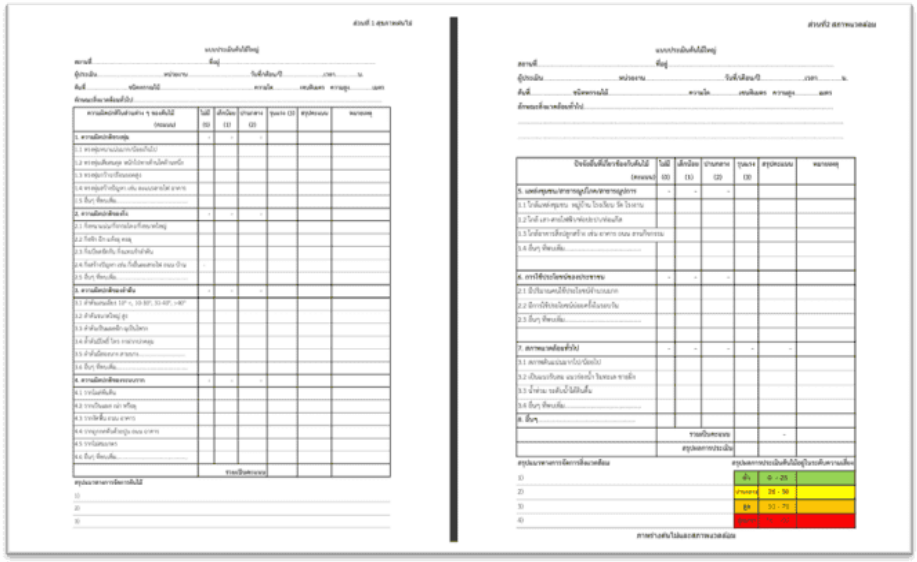
Biodiversity Mitigation Hierarchy: Avoid, Minimize, and Offset

The results of the biodiversity survey in the Lam Sam Kaeo forest area, Pathum Thani Province, were incorporated into an assessment of the extinction risk level of each species found in the area. The company is committed to protecting species diversity by focusing on maintaining ecological balance through the preservation of specific habitats, such as water sources and wetlands, to provide shelter for amphibians and pollinators, as well as monitoring for invasive species that may disrupt the original ecosystem of the area.

Furthermore, the project area has been surveyed and found to contain local animals with a Near Threatened (NT) conservation status, Mekong snail-eating turtle. These animals typically live and forage in stagnant, shallow water sources such as rice fields, ponds, or swamps covered with vegetation, and they are quite sensitive to water quality and changes in their primary food source. To avoid operations that would impact the habitat and food sources of this species, the company relocated Mekong snail-eating turtle to a nearby water source with similar physical characteristics and implemented restoration measures to enhance the area's fertility. This included planting nine tree species in the

area to create shelter and food sources that encompass the surveyed animal groups, and digging ditches to maintain the trees and create an ecological link.

The company monitors the adaptability and growth potential of the planted tree species in the project area by assessing their health and risks using the tree health assessment form from the Forest Research and Development Bureau, Department of Forestry.



The assessment revealed that all tree species are in excellent and stable condition, safe for both area users and surrounding organisms, and healthy enough to serve as habitats and food sources for the local ecosystem.Due to the low risk of species loss, native plant species found in the area are conserved for use in environmental restoration. For example, Sensitive Plant helps fix nitrogen and improve soil quality, and Water Dead-and-awake helps treat water quality and provides a food source for animals in the area.

No.	Plant species	Health score (0-100)	Risk level
1	Royal Poinciana	18	Low
2	Suicide Tree	13	Low
3	Mangium Tree	25	Low
4	Trumpet Tree	13	Low
5	Burma Padauk	12	Low
6	Siamese Neem Tree	22	Low
7	Mahogany	14	Low
8	East Indian walnut	19	Low
9	Queen's Crape Myrtle	14	Low

In terms of mitigating impacts through the risk assessment process, the company uses the results of individual tree health assessments as a database for grouping care according to risk levels, especially for tall and large tree species such as: Royal Poinciana and Mangium The structural integrity of the facility will be regularly inspected to prevent the risk of species loss, and management practices will be upgraded to align with international standards, ensuring its sustainable function as both a carbon sink and a biodiversity conservation area.

Green space management

The Company manages green spaces across the entire project lifecycle, beginning from the initial stages of site survey, master planning, and residential design that strictly avoids encroachment on forest or wetland areas. Our approaches integrates green spaces, public parks, and 'Green Corridors' to ensure ecological connectivity, while

employing construction methods that minimize environmental impact through to final delivery and ongoing maintenance. We recognize that green space management in real estate development transcends mere aesthetics or resident demands; it represents the creation of 'Green Infrastructure' a fundamental element that plays a critical role in environmental sustainability and the long-term quality of life.

Preservation of Existing Trees

Prior to project development, the Companys specialized Landscape department conducts a comprehensive survey of every tree through Tree Mapping. This process meticulously records coordinates, dimensions, species, age, and health status, alongside an assessment of each tree's ecological and social value to the overall ecosystem. This data serves as the foundation for master planning to avoid felling significant trees, establishing Tree Protection Zones (TPZ), and designing drainage and root protection systems that accommodate natural growth.

Following construction and preservation efforts, the Company consistently monitors success through Key Performance Indicators (KPIs), including the retention rate of existing trees, the number of compensatory plantings, and the survival rate of transplanted trees. In 2025, the Company achieved a milestone by preserving and planting perennial trees covering an average of 35% of the total project area.

The selection of native plant species

At the Suphawatthanalai Project in Saraburi Province, the strategic selection of native plant species combined with the preservation of existing perennial trees serves as the cornerstone of a self-sustaining ecosystem. These plants have co-evolved with local fauna and insects, acting as primary food sources and habitats that effectively maintain the food chain balance and enhance biodiversity. From a management perspective, native flora exhibits high resilience to local climates, pests, and diseases. This inherent strength leads to significant resource optimization reducing water consumption, minimizing chemical dependency, and lowering long-term maintenance costs. Consequently, these green spaces transcend mere ornamental landscaping; they function as sustainable 'Natural Infrastructure' that ensures a safe and resilient environment for both residents and the surrounding ecology.

Creating a horizontal ecosystem in areas with limitations

The Palm Ville Bang Khaem (Nakhon Pathom) and Lake Ville Srisaman (Pathum Thani) projects exemplify innovative land management by transforming space-constrained areas into high-functioning ecological corridors. The development of pocket gardens beneath high-voltage power line easements effectively expands green coverage while strictly adhering to safety standards. Furthermore, the integration of ground cover plants around water bodies serves as a 'Natural Riparian Buffer', which stabilizes soil banks, filters pollutants before they reach the water, and provides a vital sanctuary for amphibians. When integrated with perimeter cycling tracks, these elements establish a strategic 'buffer zone' that balances human activity with ecological preservation, minimizing habitat disturbance. This holistic management approaches harmonizes urban infrastructure with biodiversity, fostering a self-sustaining and resilient ecosystem that encourages residents to appreciate the intrinsic value of nature through daily interaction.

Creating a transitional area between land and water

The Lake Ville Chanthaburi project demonstrates sustainable resource management by repurposing on-site soil from existing excavation for project elevation and landscaping. The development of lush greenery around these water bodies fosters a thriving habitat for diverse species. This strategic planting creates a 'Microclimate' that effectively reduces ambient heat and increases humidity, supporting a healthy biological cycle. Furthermore, the roots of aquatic and riparian plants act as a Natural Filtration System, absorbing residues and maintaining water quality balance. By designating these pond areas as non-allocated zones, the Company ensures the long-term protection of the ecosystem from future disturbance. This approaches transforms the water bodies into vital retention basins and biological sanctuaries serving as a 'pocket forest' that enriches the residential environment with sustainable natural infrastructure.

Selecting plant species to prevent soil erosion

The selection of native plant species with deep-root systems and flood-resilient properties serves as a natural reinforcement for the soil structure. These extensive root networks penetrate and bind soil particles, creating both vertical and horizontal mechanical stabilization that prevents soil subsidence and erosion. Furthermore, during the rainy season, these roots act as biological traps for suspended sediments. This process facilitates sedimentation and the gradual accumulation of new nutrient-rich soil layers, ultimately enhancing soil fertility and restoring the ecological equilibrium of riparian areas.

Rooftop space management

At Supalai ICON Sathorn, the rooftop has been transformed into an expansive elevated green space through the strategic integration of perennial trees. These species are meticulously selected based on their high wind resistance, structural integrity, and broad foliage, effectively offsetting the spatial limitations of an urban setting. This rooftop ecosystem serves as a vital sanctuary for small fauna, such as birds and insects, facilitating 'Vertical Ecological Connectivity' across the cityscape. Beyond biodiversity, this elevated greenery acts as a thermal buffer, significantly reducing the buildings heat gain while providing natural stormwater retention to mitigate runoff into the urban drainage system. By converting concrete surfaces into a living landscape, the Company is not merely enhancing aesthetic appeal, but creating a resilient natural network that restores urban biodiversity and effectively alleviates environmental challenges in high-density areas.

The Forest for Happiness Project, Year 3

The Company actively promotes engagement to mitigate biodiversity loss through the 'Forest of Happiness' project, collaborating with both internal and external stakeholders across all development areas. By selecting plant species in accordance with the guidelines of the Royal Forest Department and relevant government agencies, we aim to preserve and enhance the richness of flora and fauna within the local ecosystems. The strategic planting of diverse perennial trees, shrubs, and native flora creates a complex forest structure that serves as a vital food source, habitat, and breeding ground for animals, insects, birds, and microorganisms. This initiative not only restores fresh air for surrounding communities but also fulfills the Companys core mission to balance urban development with natural resource conservation. Over the past three years, this commitment has driven positive ecological change, resulting in the planting of over 6,650 trees across 55 rai in Pathum Thani and Prachuap Khiri Khan provinces.

Benefits for the restoration of local ecosystems	Benefits to the community
Community forests play a pivotal role in balancing soil, water, and air quality while effectively reducing soil erosion and enhancing fertility. This restoration of natural resources enables diverse species to return and thrive sustainably. Furthermore, these community forests establish essential 'Habitat Connectivity', serving as vital corridors that link fragmented green spaces and natural forests. By facilitating the movement and genetic exchange of wildlife, these corridors significantly mitigate the long-term risk of species extinction and strengthen the overall resilience of the ecosystem.	Community involvement in the proper care and use of forest resources, such as food plants, medicinal herbs, or wild mushrooms, helps reduce deforestation and maintain species biodiversity.

Training and Capacity Building in Biodiversity Management

The Company organized a specialized training session on 'Biodiversity Management and Environmental Impact Valuation for the Real Estate Business' for executives, supervisors, and employees. The session featured Associate Professor Dr. Santi Sanglertsawai from the Department of Agricultural and Resource Economics, Faculty of Economics, Kasetsart University, as the keynote speaker. The primary objective was to foster a profound understanding of biodiversity management and provide insights into responsible natural resource stewardship. This initiative empowers various departments to apply these principles across the entire value chain, reinforcing the Companys commitment to assessing and mitigating biodiversity impacts. By integrating these considerations, the Company aims to elevate business standards while ensuring sustainable growth and ecological balance. Held on December 19, 2025, the training was conducted in a hybrid format (onsite and online), with a total of 328 participants.

Air pollution management

Air Pollution Management (GRI: 305-7)

Strategies and Management Approaches

With a commitment to sustainable development, the Company has established comprehensive guidelines and practices for both air quality management in construction projects and air quality management within its head office. This focuses on proactive pollution control, continuous monitoring and evaluation, communication with communities, and fostering an environmentally conscious organizational culture, to ensure business growth alongside genuine environmental preservation and a good quality of life for society.

Therefore, to ensure the Company's air quality management is efficient and effective, preventing problems and impacts on communities and stakeholders, the Company strictly adheres to its environmental management policy. It emphasizes comprehensive control and management across all processes, from design and construction in accordance with EIA principles, to promoting the use of low-emission construction materials, air treatment with technology, and air quality monitoring for evaluation and transparent data disclosure. This operation involves the Product Creation and Development Department, the Construction Department (for Low Rise Projects and High Rise Projects), the Building Management Department in collaboration with the Sustainability Working Group, and the Risk Management Team, to comprehensively oversee the management of pollution and potential future impacts.

The Company is committed to continuously developing its pollution and air quality management processes, emphasizing proactive integration of regular air quality monitoring to enhance efficiency. It also promotes the participation of employees and stakeholders in pollution and air quality management processes to foster strong and sustainable cooperation in environmental protection.

The Company recognizes that maintaining good air quality is a crucial factor for the well-being of communities and ecosystems. To elevate environmental operations in line with international standards, we have set clear long-term targets for the year 2030, demonstrating our commitment to reducing negative operational impacts, as follows:

Details	Goals for 2030	Performance in 2025
Control and prevent air pollutant emissions in all projects	PM2.5 not exceeding 0.05 mg/cubic meter PM10 not exceeding 0.12 mg/cubic meter PM100 not exceeding 0.33 mg/cubic meter	PM2.5 not exceeding 0.05 mg/cubic meter PM10 not exceeding 0.12 mg/cubic meter PM100 not exceeding 0.33 mg/cubic meter
Number of times air pollution exceeded standard limits	0	0

Pollution Prevention and Control Operations

1. Air Quality Risk Assessment

The Company has comprehensively assessed air quality risks, considering various factors that may directly and indirectly impact its business operations, such as odors, dust, chemicals, and various contaminants that may arise from production processes, transportation, or raw material storage. Based on this assessment, the Company has established the following preventive and corrective measures:

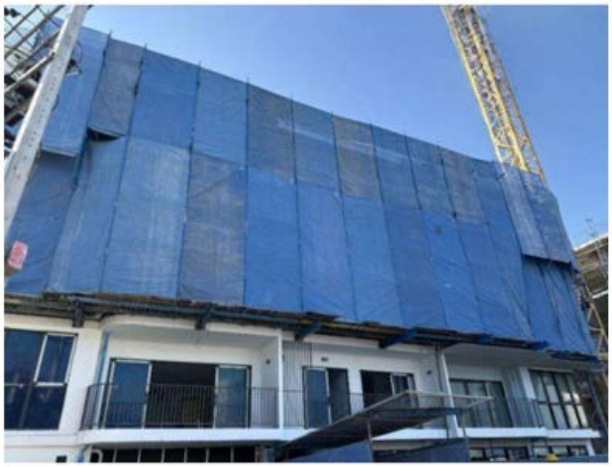
Period	Risk factors	Preventive and corrective measures for impacts
Construction phase	1. Dust/Pollution From construction processes	● Install Metal Sheet fences around the project and water mist curtains on the uppermost internal fence structure. Water misting is performed continuously during work activities and continues until landscaping is completed. ● Fire-retardant mesh sheets are used to cover the building to its current construction height, and their stability, strength, and integrity are regularly inspected to prevent and reduce dust dispersion and falling debris. ● Utilize pre-fabricated or semi-finished materials to minimize on-site concrete casting. ● Trucks transporting materials or debris must be securely covered with tarpaulins. Transportation times are scheduled outside of peak hours, and vehicle wheels are cleaned with a water jet before leaving the project site. ● Install PM2.5 meters with real-time digital display boards at the construction site entrance, and measure TSP, PM10, SO_2 , CO and NO_2 At specified points and times.
	2. Chemicals/Volatile substances/Paint odors from construction processes	● Cement bags or chemical containers must be tightly sealed, stored properly, and removed immediately when full or on a weekly basis.

	3. Odors from wastewater treatment.	● Measures are in place to monitor and mitigate impacts from odors or aerosols (from wastewater treatment systems and waste rooms), along with maintaining treatment areas by planting ground cover, tilling the soil for good aeration, and adding nutrients to the soil to enhance natural odor treatment efficiency.
	4. Noise and vibration from construction processes	● Provide soundproof and dustproof rooms for cutting and grinding floor tiles and various materials, along with sound and dust protection equipment for workers. ● Sensor-based noise level monitoring devices are installed for surveillance, with sensors positioned near noise measurement points within the project area, starting from demolition activities. Noise levels are displayed on a real-time screen at the front of the project. ● Sensor accuracy is verified by comparing with the results of environmental quality monitoring equipment installed by analytical laboratories, to initially check the sensor's accuracy and precision, and to arrange for validation of sensor calibration results for accuracy and precision. ● Manage the use of machinery and trucks by scheduling their operation at non-concurrent times to reduce the simultaneous use of machinery, thereby mitigating vibrations from machinery that could affect neighboring residents.

After partial completion of construction	5. Air pollution from operational phase activities	• Planting perennial trees at various levels in the common areas of the project, selecting species effective in absorbing carbon dioxide and reducing light reflection, along with regular annual pruning and maintenance of the trees. • Design and maintain adequate and legally compliant indoor ventilation systems, ensuring the systems are always ready for use and opening certain building doors for convenient air circulation. • Install campaign signs promoting immediate engine shutdown upon parking, in both Thai and English, in clearly visible locations, to reduce engine emissions.

Air quality and vibration monitoring from construction work

Dust monitoring from construction activities, Installation of project fences to prevent impacts on surrounding areas.



Installation mesh sheet to prevent dust and falling debris.

Noise level monitoring during construction

2. Research and development to prevent pollution impacts

The Company focuses on construction quality by adhering to strict engineering and safety standards. It conducts environmental research and development, designs structural systems and utilities with environmental considerations, and emphasizes increasing green spaces to mitigate the urban heat island effect and reduce impacts on air quality. Furthermore, it prioritizes the well-being of residents by designing for natural light access and good ventilation. The project's construction materials are designed and developed to protect against pollution, for example, using an Air Flow system for indoor air supply to enhance air circulation within homes, thereby reducing the concentration of pathogens, dust, smoke, and carbon dioxide that could be harmful to residents' health.

3. Collaborate with partners to reduce water and air pollution.

The collaboration between the Company and DOS LIFE in developing new innovations that sustainably meet the needs of modern lifestyles. One such innovation is the "WHOLE HOUSE WATER FILTER SYSTEM," which originated from

the feedback of the Company's employees and was further developed with Thammasorn's engineering team into an ALL IN ONE water storage tank with an integrated water filtration system. This system saves space around the house and is convenient to use, with easily replaceable filter cartridges. This innovation has been developed into the DOS DUPONT Water Filter product, which improves water quality by up to 97.6% by effectively reducing contaminants, sediment, and impurities in the water storage tank. Importantly, it also helps reduce greenhouse gas emissions by up to 3.65 tCO2eq, calculated from changing filter cartridges twice a year in 17 pilot projects of the Company in 2025.

4. Reducing impacts from soil and water pollution

The Company promotes the use of organic fertilizers as an alternative to chemical fertilizers in green area maintenance activities within the common areas of Low Rise Projects, starting with projects in Bangkok and its vicinity. This involves applying integrated nutrient management principles to reduce reliance on synthetic chemical fertilizers, as well as enhancing soil mineral retention. The use of organic fertilizers enriches the soil with organic matter and improves soil fertility, thereby reducing water and soil pollution.

- Reduce water pollution by minimizing the leaching of nitrogen and phosphorus into natural water sources, thereby reducing the risk of water degradation and the deterioration of aquatic ecosystems.
- Reduce greenhouse gas emissions into the atmosphere, especially nitrous oxide, from production processes and soil application.

Strategies and Management Approaches

The Company places great importance on designing and developing projects with energy efficiency in mind at every stage, from project planning, building design, material selection, to the installation of various systems within the building, to ensure that projects can concretely reduce energy consumption. The organization has adopted Green Building design principles according to international standards, such as LEED, as a key guideline in design, covering aspects of efficient energy use, resource management, and creating an environment conducive to the well-being of residents.

Furthermore, in building construction and decoration, the Company prioritizes the installation of energy-saving systems and equipment, such as high-efficiency air conditioning units that reduce energy consumption, air conditioning systems that can appropriately control energy usage according to the actual needs of each area, and LED lights that consume less energy but provide high brightness. The Company also selects construction materials that help reduce heat accumulation and improve ventilation, such as thermal insulation materials, energy-saving glass, and heat-reflective materials, to enable occupants to use energy most efficiently, reduce cooling loads, decrease reliance on fossil fuels, and increase the production and use of energy from renewable sources, as well as promote and support partners in efficient energy management to reduce greenhouse gas emissions throughout the supply chain.

The Company has established policies and guidelines for efficient resource utilization, covering various company policies such as electricity and lighting usage policy, office equipment usage policy, air conditioning and ventilation fan

usage policy, to ensure that all directors, executives, and employees, including subsidiaries, operate in a concrete and unified manner.

Performance and outcomes of energy management

Performance and outcomes of energy management : Yes

1. House design and selection of energy-saving materials

1.1 Smart Energy-Saving Homes

The Company is committed to developing sustainable residential projects. Every component of each home is designed to be environmentally friendly and support future technologies, reflecting the concept of "Smart Living for Sustainable Future," which integrates intelligent living with energy and environmental conservation for long-term sustainability. The Company has designed smart energy-saving home projects, such as Supalai Tuscany Rama 2Wongwaen, which received efficiency certification with an honorary shield for cooperation in promoting sustainable energy conservation from the EGAT No. 5 House and Building Project by the Electricity Generating Authority of Thailand (EGAT).

The Company received the EGAT No. 5 House and Building Project Award, emphasizing enhanced energy efficiency. Homes must achieve a total score of no less than 85% or a combined score of 100-125 points from energy efficiency criteria such as walls, roofs, lighting, air conditioning, and nature-dependent design innovations. In 2025, all 7 house types, namely MONTANA, ROSSELLA, GROSSO, JASMINE, GRANDINO, REGINA, and RICCO, received the award.

Energy Efficiency Criteria	Innovation and Nature-Dependent Design Criteria	Evaluation Result	Selection of Renewable Energy
1. Building envelope system for walls	1. Passive Design (Designed to reduce heat)	Meets criteria	1. Home system installation Automation & Security reduces electricity consumption and enhances convenience and safety within the home.
2. Building envelope system for roofs	2. Electricity Generation (Self-generated electricity, e.g., solar cells)	Meets criteria	2. Installation of Solar Cell systems to help save electricity.
3. Lighting System	3. Smart control system	Meets criteria	3. Installation of EV Chargers to support the continuous growth of electric vehicle usage.
4. Air Conditioners	4. Active Ventilation System	Meets criteria	-
-	5. Energy Saving Innovation and other	Meets criteria	-

2. Enhancing Energy Efficiency

2.1 Use of Renewable Energy

The Company promotes the use of renewable energy by installing solar power generation systems (Solar Cells) within its projects to integrate clean energy into its operations and enhance energy efficiency. This also helps reduce reliance on fossil fuels, lower greenhouse gas emissions, and mitigate environmental impacts. Furthermore, the Company has incorporated the concept of clean energy into its design and marketing communications to add value to its products, encourage energy saving among residents, and foster participation in environmental care, aligning with long-term climate change goals and sustainable development.

In 2025, the Supalai Primo Anusawari Phuket project was developed, featuring a project layout and wind direction design, as well as the selection of construction materials that help reduce global warming, such as lightweight

bricks and insulation to cool down indoor temperatures, leading to electricity savings. Renewable energy is also utilized through the installation of a 3.3 kW solar power generation system per house, reducing greenhouse gas emissions by 3.0 tCO_2e and saving electricity costs* of 22,000 Baht/year.

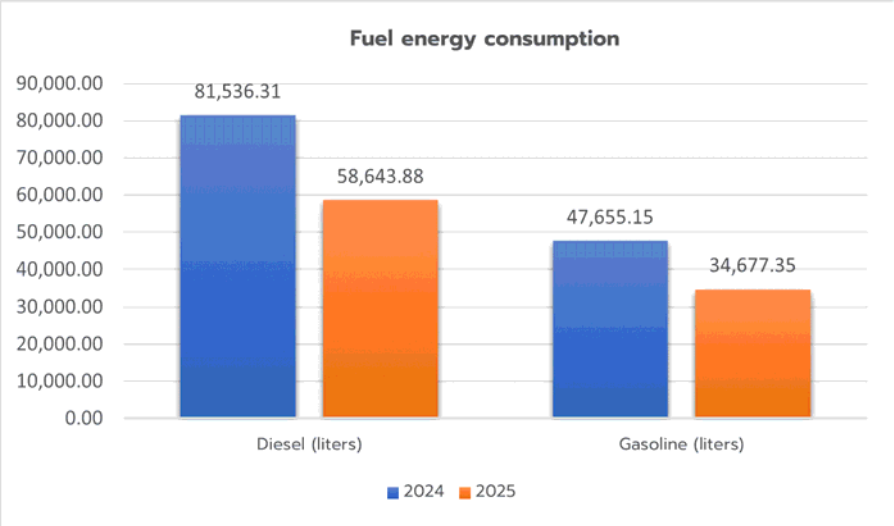
(*Referencing the calculation results for greenhouse gas emission reduction and annual electricity generation in residential homes by the Thailand Greenhouse Gas Management Organization: TGO)

2.2 Reducing reliance on fossil fuel energy sources

- **Transition to Electric Vehicles (EVs)**

The Company is committed to sustainable business operations, supporting efficient energy use, and transitioning to a low-carbon economy in the long term. By 2025, it promotes the adoption of Electric Vehicles (EVs) to replace fossil fuel-powered vehicles in its operations, aiming to enhance energy efficiency and reduce environmental impacts from transportation activities, which are significant sources of greenhouse gas emissions. This helps reduce fuel consumption, carbon dioxide emissions, air pollution, and noise from vehicle use.

Department	Original quantity (Units)	Increased quantity (Units)	Total (Units)
1. Headquarters	3	1	4
2. Project Department	1	2	3
Total	4	3	7



Budget / Investment Proportion	1,094,170 Baht
Benefits to the Company	Reduces long-term fuel and maintenance costs.
	Reduction of direct greenhouse gas emissions from transportation activities (Scope 1) 91.33 tCO_2e
Benefits to the community and environment	Reduces environmental impact, air pollution (PM2.5, NOx)

- **Promoting the use of fuel-efficient vehicles for security operations.**

The Company encourages partners to reduce fuel consumption from oil use to support sustainable development and minimize environmental impact, while also focusing on reducing noise and air pollution. by using bicycles 3 units and Electric Motorcycles 34 units A total of 37 units are used for security operations in projects, such as tracking external contacts and patrolling within the project area, which aligns with sustainable development guidelines.

Number of projects implemented	37 Projects
Benefits to the Company	Building relationships and collaborations with security system partners: 12 Suppliers
Benefits to the community and environment	● Reduces greenhouse gas emissions and air pollution caused by motorcycle fuel combustion. ● Reduces noise pollution disturbing residents, especially during night patrols.

2.3 Energy Conservation in Office Buildings and Rental Properties

The Company promotes efficient electricity use by selecting standard and energy-saving light bulbs, such as LED bulbs, to conserve energy in common areas and restrooms of Supalai Grand Tower, replacing older, less efficient bulbs. Additionally, light intensity is regularly measured to ensure appropriate lighting levels for work, and light bulbs are checked for cleanliness to reduce unnecessary energy consumption, aiming for energy savings, reduced organizational costs, and fostering a culture of efficient and sustainable energy use.

Information on water management plan

Water management plan

The Company's water management plan	:	Yes

Water Management and Water Security

Key, Sustainability Issues	Impacts, Risks, and Opportunities
Resource Utilization Water Management Water Consumption Effluent Discharge Management	The Company has conducted a Double Materiality assessment of its water-related issues, considering both (1) the organization's impact on water resources and ecosystems (Impact Materiality) and (2) the financial risks and opportunities arising from water-related risks such as drought, flooding, water quality limitations, and regulatory changes (Financial Materiality), which may affect construction costs, business continuity, asset value, and stakeholder confidence. The assessment results were integrated into the Enterprise Risk Management (ERM) process and long-term strategic planning to align with TCFD, IFRS S1/S2, and ESRS E3 Water and Marine Resources. The company demonstrates a clear commitment to managing water usage and wastewater through a comprehensive environmental policy that encompasses various aspects of its business operations, particularly the wise and sustainable use of water. An example reflecting this commitment is the Supalai Grand Tower headquarters building. This initiative reuses condensed water from the air conditioning system, both in split-system units and for watering plants within the project area. This practice not only reduces water usage from natural sources but also serves as a model for resource management that considers long-term environmental impact.
FTSE Russell EGS Theme: Water Security **Supporting SDGs goals** 3 6 12 13	

	However, despite the establishment of policies and pilot projects reflecting a commitment to water management, expanding this approaches to other company projects still faces limitations and challenges in several dimensions. These include technical aspects, budget, and the infrastructure of water systems in each project, which may vary depending on the characteristics of the buildings and residents. Furthermore, cultivating a culture of water conservation and promoting the reuse of wastewater remains a challenge, requiring continuous communication, stakeholder participation at the project level, and the development of effective tools and monitoring systems. While challenging, these contexts also present opportunities for the company to enhance its water management practices, setting an example for the real estate sector. In particular, developing innovative water reuse, rainwater harvesting, and installing real-time water usage measurement systems can be expanded from pilot projects to cover more projects in the future. Furthermore, these initiatives are crucial in reinforcing the company's image as a leading real estate developer committed to sustainable development and meeting the needs of today's environmentally conscious consumers. These actions directly align with the United Nations' Sustainable Development Goals, especially SDG 6, which focuses on access to clean water, wastewater treatment, and integrated water management. Expanding collaboration with the government or external organizations to bring technology or funding to support water management at the project or community level will further empower the company to drive its environmental strategy towards true sustainability.

Details	Goals for 2030	Performance in 2025
Recycled Water Ratio	More than 15% of total water consumption	Data collection in progress
Water Intensity per sqm.	No less than 25 % from the 2025 baseline	Data collection in progress
Reduce wastewater discharge compared to the 2024 baseline*	20%	17%

*Only water used in Supalai Grand Tower Rama 3 building

Policy and Commitment

The Company is committed to caring for and protecting water resources throughout its supply chain, as well as reducing impacts and systematically managing water-related risks. This includes strict adherence to the wastewater discharge standards of the Pollution Control Department and guidelines of ISO 14001:2015 environmental standards, and transparent disclosure of water and effluent sustainability reports GRI 303: Water and Effluents according to international GRI Standards (Global Reporting Initiative). Furthermore, in some of the Company's areas, which are high water-stress areas, the Company has conducted water resource risk assessments using the internationally recognized Aqueduct Water Risk Atlas tool from the World Resources Institute (WRI). Measures for water risk management have been defined, such as reducing water consumption (Reduce), treating wastewater to meet standards or for reuse and recycling water for new use, as well as supporting equitable access to water sources with communities. The Company has verified and established a resource and waste management policy, with water management plans to reduce water consumption and improve water use efficiency for maximum benefit. It also promotes awareness among employees and communities around projects about the importance of and adherence to environmental policies and practices to foster environmental sustainability.

The Company recognizes that clean water and sanitation are fundamental human rights in accordance with the UN Guiding Principles on Business and Human Rights (UNGP) and relevant ILO standards. Therefore, the Company has established measures to prevent business operations from affecting the access to water for surrounding communities, and has implemented a transparent, accessible, and effective Grievance Mechanism for issues related to water quality and usage.

For more information, please visit: Policy on Resource and Waste Management

Governance Structure

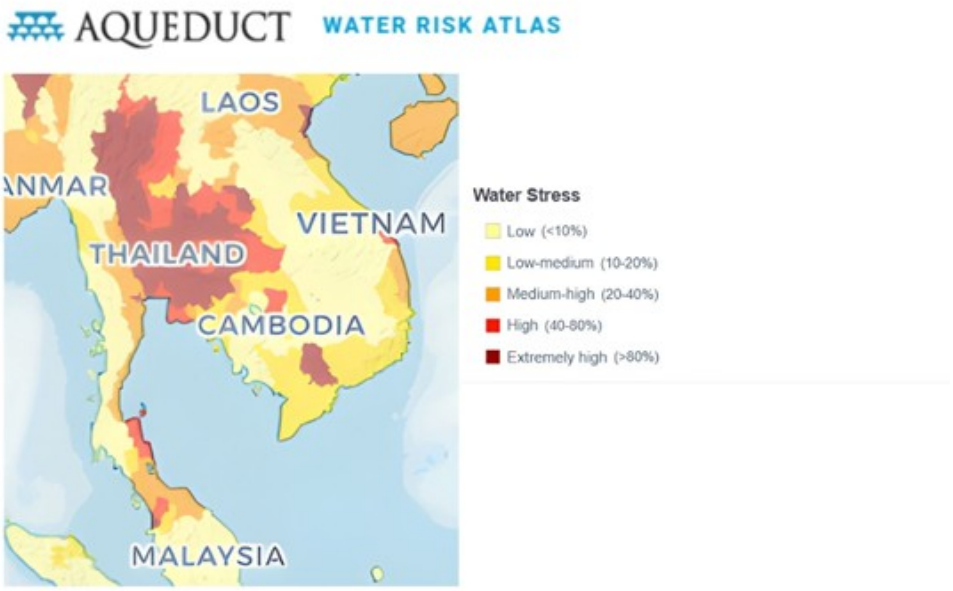
The Company has established a Sustainability Working Group, comprising representatives from the Corporate Governance and Quality Systems Department, Construction Department, Building Management Department, and Human Resources Department. This group is responsible for assessing and analyzing water situation trends, evaluating risks related to water management, developing work plans and operational plans, and monitoring water-related performance efficiently and for maximum benefit, in alignment with organizational goals. It also procures water sources and expands areas for water reserves for the Company's use during normal and crisis situations, and communicates to raise awareness among employees about efficient water use. The group reports directly to the Chairman of the Sustainability Committee and submits performance reports to the Executive Committee annually.

Water Management

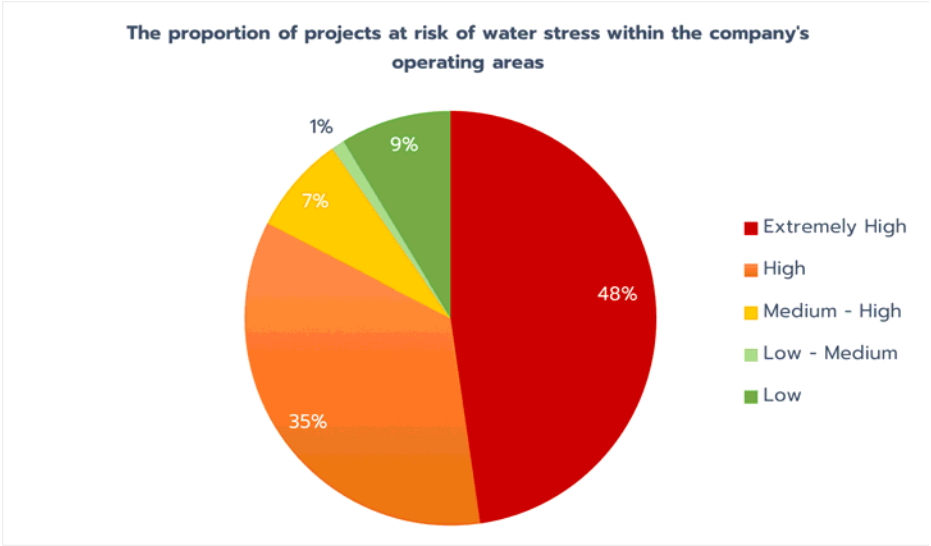
Strategies and Management Approaches (GRI: 303-1, 303-2)

The Company conducts basin-level risk assessments for project areas located in Water Stress areas, using the Aqueduct Water Risk Atlas tool and climate scenario data SSP2-4.5 to assess physical risk and transition risk.

The assessment results are used to define risk reduction measures, project design, and allocation of backup water sources, in line with the TNFD framework (LEAP Approaches: Locate, Evaluate, Assess, Prepare)



From the assessment of all projects within the Company's operational areas, it was found that risks are concentrated in economically strategic regions, namely the Central region, with over 41 projects facing extremely high water stress risks. In the Eastern region, most projects fall into the high-risk category, totaling 23 projects, due to the area's sensitivity to uncertain rainfall and competition for water resources between industrial and agricultural sectors. Therefore, the organization prioritizes increasing water use efficiency and water recycling to reduce the burden of drawing water from natural sources. In the Northern and Northeastern regions, although the overall risk level is distributed, major provinces such as Chiang Mai, Khon Kaen, and Nakhon Ratchasima still have projects in the extremely high-risk group, necessitating systematic backup water management plans during the dry season. Conversely, the Southern and Western regions generally maintain low to moderate risk levels, indicating relatively high water resource security. Nevertheless, the organization continues to adhere to water-saving practices to prevent potential risks arising from future climate change conditions.



The Company has established short-term and long-term operational plans to reduce water consumption and to mitigate potential impacts from climate change. The operational plans are as follows:

1) Establish processes to identify opportunities for reducing water consumption without impacting construction processes and surrounding communities.

2) Monitor and develop new technologies and innovations to enhance water use efficiency.

3) Regularly review and evaluate water conservation areas.

Furthermore, the Company has enhanced water use efficiency in its production processes by recycling water through projects to improve water systems within construction sites, such as wastewater quality monitoring projects and the excavation of retention ponds to collect rainwater for use during droughts.

Drought and Water Scarcity Preparedness: The Company manages water by monitoring situations, planning and implementing various measures, and managing water crises. There are two key approaches to water management, which are expected to reduce water consumption costs through water reduction plans and ensure sufficient water for production processes.

Water Management Task Force	
Reduce Water Consumption	The Company evaluates the entire production process to identify opportunities for reducing water consumption without affecting construction quality. It applies technology and innovation to enhance production efficiency, reduce water usage, and recycle water within construction sites to ensure sufficient water for business operations. Additionally, the Company regularly reviews its operations and develops new knowledge to continuously improve its water conservation capabilities.
Monitor water situations to reduce risks and impacts of water scarcity.	The Company systematically monitors water situations, including both internal and external factors, continuously assessing potential risks and impacts such as relevant regulations, water quantity, water quality, and national and local water policies. It also collaborates closely with government agencies, local authorities, and stakeholders in managing water demand and supply to promote sustainable water resource management throughout the supply chain. Furthermore, the Company has expanded its water risk assessment to the supply chain, evaluating contractors and key material suppliers, especially in Water Stress Areas, to prevent risks of construction material disruptions. It also establishes guidelines for efficient water use for key partners and transparently and regularly communicates its water management performance and progress to stakeholders.

Effluent discharge management (GRI: 303-1, 303-2, 303-5)

Strategies and Management Approaches

The Company has a wastewater management process, providing specific wastewater treatment systems within projects before discharge into public areas. The discharge must meet quality criteria according to the Ministry of Natural Resources and Environment's announcements, and wastewater volume and quality values are reported as per legal requirements. Both low Rise Projects and high Rise Projects undergo wastewater quality inspections before public discharge. Control and inspection of wastewater quality from construction activities are performed before discharge into public water sources.

Information on setting goals for water management

Setting goals for water management

Does the company set goals for water management : Yes

Details of setting goals for water management

Target(s)	Base year(s)	Target year(s)
Increase of recycled water for consumption	2024	2030 : Increased by 15% Cubic meters

Information on performance and outcomes of water management

Performance and outcomes of water management

Performance and outcomes of water management : Yes

Performance Results 2025 (GRI: 303-1, 303-2)

In 2025, the company received no complaints from the community or government agencies regarding wastewater or causing nuisance to the community and environment.

1. Water Security

The company recognizes the significant water usage in construction processes, which poses a risk of water scarcity if climate conditions change severely. Therefore, it has established backup water sources within the company's area to ensure operations do not rely on external water sources. A retention pond has been constructed to temporarily store large volumes of rainwater during heavy rainfall, slowing down water flow to prevent simultaneous discharge into public drainage systems beyond their capacity. This helps prevent flash floods in the project area and reduces impacts on adjacent areas, as well as storing water for use during the dry season.

2. Engagement with Stakeholder of Water-Stressed Areas

The company recognizes the importance of water resource management in collaboration with stakeholders, community groups, and schools, especially in Chonburi province, where allocated projects under the management of affiliated legal entities are located. This area experiences water stress and has physical limitations due to being a brackish water area, which negatively impacts agriculture as water salinity is a significant problem preventing most horticultural crops from growing normally. Therefore, the company initiated a collaborative approaches with stakeholders, including surrounding communities and educational institutions, to integrate resource utilization efficiently and reduce the rate of water extraction from public sources. This is carried out through the "Good Eating

Vegetable Garden Project," which applies hydroponics agricultural innovation to the area. This system is a closed-loop plant cultivation process that facilitates the recycling of water resources and nutrient solutions, resulting in a reduction of water usage by up to 90%* compared to traditional soil-based agriculture.

The achievements from project implementation not only involve managing water resource risks with the community but also enhance the quality of life for community members through promoting food security. This reflects the company's commitment to driving the organization according to the principles of maximizing resource utilization and fostering sustainable growth alongside the community.

(*Reference data from Service Center, Thailand Department of Agricultural Extension)

The Company engage with its stakeholders at water stressed sites

3. Wastewater Management and Recycling

The company recognizes environmental and community risks, thus it has developed a water management plan and implements wastewater management from organizational consumption, including all construction processes, to properly and efficiently manage wastewater as follows:

3.1 Wastewater Treatment

The company has established a drainage system from all areas generating wastewater within the company. The installation of an efficient wastewater treatment system helps reduce pollutant discharge into public water sources, prevents water and soil contamination, reduces impacts on ecosystems and surrounding communities, and promotes responsible water resource management.

- Supalai Grand Tower uses both aerobic and anaerobic wastewater treatment systems to achieve maximum efficiency in wastewater treatment. All 5 cubic meters per day of treated water (100%) is sent to a treated water reservoir for reuse in production processes and for watering green areas, with no discharge into public water sources, adhering to the principle of Zero Water Discharge.

- Construction projects have a management plan and wastewater treatment process starting from households. Wastewater undergoes preliminary treatment in individual household septic tanks. The treated water then flows to the project's central wastewater treatment plant for further treatment and quality control to meet standards before being discharged into public water sources.

4. Reducing Water Usage and Loss in the Organization

4.1 Water Resource Management at Supalai Grand Tower

The company aims to reduce water consumption at Supalai Grand Tower and has developed a water management plan to reduce water usage, improve water efficiency, and encourage all employees to participate in water resource conservation and efficient water use in all activities. The building management team controls and monitors the progress of various project activities as follows:

- The project involves collecting wastewater from the Chiller system, which is still of suitable quality, for reuse in watering plants and maintaining green areas. This helps reduce tap water consumption, increases resource efficiency, and supports sustainable water resource conservation.
- Improving water efficiency of equipment and sanitary ware. The company selects water-saving sanitary ware and installs sensor-activated faucets to reduce excessive water usage. This helps control water consumption efficiently and reduces water loss.

- Inspection and repair of water leaks in equipment and piping systems. The company regularly inspects equipment and piping systems weekly and encourages all employees to participate in monitoring and reporting repairs for immediate action if any water leaks are observed within the company, such as dripping faucets or sanitary ware in restrooms.

Educating and raising awareness among employees about water usage and conservation in all offices. Campaign signs are created and publicized to remind employees to turn off water whenever not in use and to regularly check for water leaks to reduce unnecessary water loss.

Water Management Performance and Results 3 years retrospective (GRI: 303-3, 303-4, 303-5)

Detailed of action taken to reduce water withdrawal/consumption: to specific for Supalai Grand Tower

Water consumption volume	Unit	2023	2024	2025
Total water used	Cubic meters	108,750	111,528	96,610
Tap water or water from other organizations	Cubic meters	108,750	111,528	96,610
Surface water	Cubic meters	0	0	0
Groundwater	Cubic meters	0	0	0
Recycled water	Cubic meters	0	0	1,320
Water consumption per unit area	Cubic meters/square meter	1.17	1.20	1.04
Percentage of treated wastewater	%	100	100	100
Total wastewater volume	Cubic meters	83,554.96	86,332.96	71,934.96

4.2 Water Recycling in Construction Projects (Water Reuse)

Maintaining the cleanliness of public roads is crucial. All trucks leaving the project must undergo wheel washing to prevent soil debris or dust from spreading outside. Without proper management, this process can lead to significant water wastage from road cleaning and accumulate wastewater in construction projects. Therefore, a wheel wash pond with a preliminary treatment system has been designed within the project. This system allows soil particles to settle and separates debris, after which the settled water is recycled for washing subsequent truck wheels, instead of using tap water and discharging it as wastewater. This method significantly reduces new water consumption. Furthermore, the settled soil is managed beneficially; soil debris and sediment separated from the recycled water pond are collected for

management with other waste materials in the project, such as mixing with concrete scraps to form a road subbase or for site improvement.

5. Water Quality Control Discharge

The company monitors and analyzes effluent water quality to control it before public discharge and to ensure water values comply with legal standards. Water samples are collected correctly and sent to reliable laboratories to ensure no toxic substances contaminate natural water sources and ecosystems. This also helps determine the composition and efficiency of the treatment system for targeted problem-solving, reducing health risks to the community and environment.

- Supalai Grand Tower requires effluent water quality to be measured as legally mandated before leaving the building, twice a year. Results are reported electronically on the 15th of every month, in accordance with ministerial regulations issued under Section 80, to the local official, Pollution Control Department, Ministry of Natural Resources and Environment.
- The company sets a goal and investment in R&D Investment in R&D to mitigate water-related risks for all Low Rise Projects and High Rise Projects to establish guidelines for controlling effluent water quality. This includes installing equipment, checking, and maintaining treatment systems before discharging wastewater into public water sources. Additionally, there are preventive maintenance plans and systematic repair plans to comply with legal requirements, ensuring that effluent water quality measurement results meet standard criteria.

6. Wastewater Management (GRI: 303-1, 303-2, 303-5)

6.1 Quality Measurement Project

The company closely monitors water quality to prevent potential water quality issues and nuisances to the environment or surrounding communities. It has an efficient wastewater management system that complies with the environmental regulations of the Pollution Control Department, Ministry of Natural Resources and Environment. The

wastewater treatment process begins at the household level, passing through each house's septic tank before collecting wastewater into the project's central wastewater treatment system. It is treated to meet legal quality standards before being discharged into the public system. Treated wastewater samples are collected before public discharge and submitted to the local Environmental and Pollution Control Office annually to report data according to effluent quality standards, ensuring continuous water quality, transparency, and compliance with environmental laws.

6.2 Establishing measures for preventing and mitigating environmental impacts related to wastewater management

The company has established measures to prevent and mitigate environmental impacts and wastewater management for High Rise Projects and Low Rise Projects, categorized by priority and activity characteristics at each project stage, as follows:

1) Project Construction Phase

During the construction phase, the main measures will focus on managing contaminated water from construction activities and worker accommodation to prevent impacts on natural water sources around the project area.

- Provide restrooms within the worker's accommodation, positioned away from adjacent buildings, with separate restrooms for male and female workers. The wastewater treatment system includes a septic tank, an anaerobic filter, and aeration, sized to accommodate the expected wastewater before discharge into the public drainage system, and sludge is pumped out of the septic tank annually.
- A foreman or supervisor is assigned to ensure workers regularly maintain restroom cleanliness to prevent foul odors and the breeding of germs.
- After construction, the project must properly dismantle the construction-phase utility systems for workers according to standards. This involves pumping all sludge from the septic and filter tanks, disinfecting with lime before permanent backfilling.
- Provide drainage channels around the construction area and a sediment trap with a trash screen before discharging to public areas.
- Sediment/cement/mud trap pond to capture sediment/cement/mud before discharging only water out of the project area into the public drainage system.
- Prepare an area for washing truck wheels before leaving the project site, using a high-pressure water jet to remove soil debris from the truck wheels, and provide a rubber squeegee to direct the wash water back into the project area, preventing it from flowing into the public drainage system outside the project.
- Clean the work area to prevent soil, cement, and construction debris from clogging or obstructing water flow and public drainage systems.

2) Project Operation Phase

When the project becomes operational, measures will focus on the continuity and stability of the treatment system to accommodate wastewater from building operations.

- Provide a centralized activated sludge wastewater treatment system (Conventional type) with aeration, sized to accommodate the expected wastewater. It is buried underground within the project's internal roads. The treated water will meet the Ministry of Natural Resources and Environment's effluent quality standards before being discharged into the public drainage system.
- Regularly inspect the amount of fat in the grease trap monthly and pump out fat waste from the grease trap according to the scheduled time.
- Regularly inspect the volume of sewage monthly. Pump sewage from the septic tank according to the scheduled time.
- Regularly pump accumulated sludge from the sludge tank monthly or when the sludge tank is full. Authorized private companies are contracted to collect and dispose of it.
- Eliminate methane gas generated from the wastewater treatment system and treat wastewater aerosols from the aeration pond using the Soil Bed method.

- Two points are designated for measuring pre-treatment effluent water quality and one point for post-treatment effluent water quality. Measurements are taken once a month for one year to record comparative data of water quality before and after entering the centralized wastewater treatment system. After one year, measurements of treated effluent water quality will be taken at one point, with parameters conforming to the Ministry of Natural Resources and Environment's announcement.

Water Management Performance and Results 3 years retrospective (GRI: 303-3, 303-4, 303-5)

Detailed of action taken to effluent Discharge: to specific for Construction project in Phuket Province

Construction project in Phuket Province	Unit	2023	2024	2025

Information on waste management plan

Waste management plan

The company's waste management plan	:	Yes

Waste Management (GRI: 306-1, 306-2, 306-3, 306-4, 306-5)

Details	Goals for 2030	Performance in 2025
Reduce construction waste generation (Calculated based on 5 ongoing high-rise construction projects)	30% compared to the standard value	4.23%
Increase the proportion of waste diverted from landfills, compared to the 2025 baseline year	75 %	Data collection in progress
100% of projects use eco-friendly concrete	100%	100%

Strategies and Management Approaches

The Company is a member of the Circular Economy in Construction Industry (CECI) in Thailand and has applied the concept of Circular Economy in its operational processes. This involves focusing on waste design and management to promote the most efficient use of resources, including reuse, recycling back into production processes, and reducing pollution, in line with the 3Rs principles (ReduceReuseRecycle) and the Supalai Self-Proved design concept. The Company is committed to continuously implementing these practices, especially in environmental aspects, where it operates diligently at every step to reduce waste volume through innovative construction and good management planning. This aims to minimize resource loss, reduce waste volume, and mitigate long-term environmental impacts. The Company has adopted circular economy principles in its planning and operational processes, such as increasing the proportion of renewable energy from renewable sources, reducing the use of new raw materials, extending the lifespan of equipment, repurposing waste, and exploring collaborative approaches for efficient resource utilization.

Information on setting goals for waste management

Setting goals for waste management

Does the company set goals for waste management : Yes

Details of setting goals for waste management

Target(s)	Base year(s)	Target year(s)	Waste management methods
Reduction of waste generation Waste type: Non-hazardous waste and hazardous waste	2025	2030 : Reduced by 30%	• Reuse • Recycle

Information on performance and outcomes of waste management

Performance and outcomes of waste management

The company's performance and outcomes of waste management : Yes

1. Waste management in construction projects

1.1 Project Supalai Self-Proved

The Company is implementing the "Supalai Self-Proved" project for its third year, innovating to reduce waste and waste materials by maximizing the reuse of construction waste and circular resources through the construction process. The main objectives are:

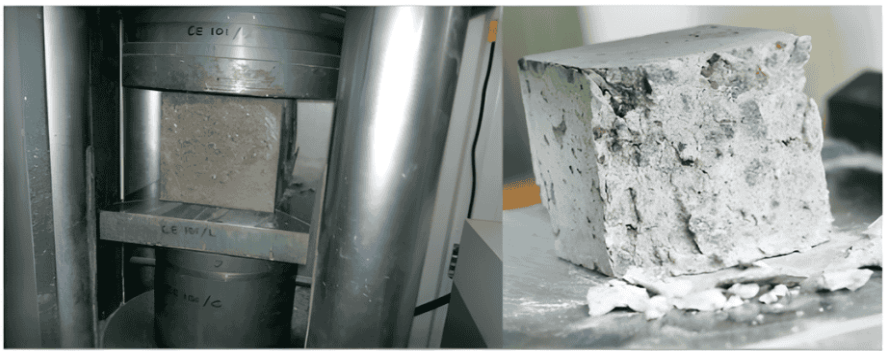
1. To manage construction waste through various processes such as recycling, reuse, etc.
2. To reduce the amount of waste sent to landfills
3. To help reduce costs associated with construction waste disposal
4. To minimize impacts on society and the external environment of the organization
5. Innovation Development and Business Partnerships

In 2025, 5 high-rise construction projects will be implemented, incorporating eco-friendly construction concepts at the project sites. This includes waste and waste materials management processes from source to landfill, as well as promoting collaboration among stakeholders throughout the supply chain to foster

knowledge and understanding of waste management processes, collection, segregation, and recycling, thereby promoting operational sustainability in accordance with Circular Economy principles, as follows:

- **Reduce**

1) Reducing waste at the source by changing the size of concrete cube molds, which helps reduce the amount of concrete needed for testing and decreases concrete waste by up to 70%



2) PIPE FITTING Innovation: Inventing and developing an innovative method for installing steel fire pipes, moving away from the traditional method that required numerous joints and metal welding at every connection point. This new technique involves connecting pipes without using joints. This method not only increases work efficiency but also reduces resource consumption, such as welding wire, and decreases pollution generated from the metal welding process. Currently, this innovation has been further applied to three additional projects: Supalai Sense Srinakarin, Supalai Blu Sathorn Ratchaphruek, and Supalai Tyme Charoen Nakhon.

3) Use of saddle clamps for PPR (Polypropylene Random Copolymer) pipe connections by Using saddle clamps instead of tee joints to reduce pipe connections PPR, also reducing the chance of leaks and saving working time.

- **Reuse**

1) Creating a road subbase layer from concrete waste

Transforming concrete waste from construction into valuable materials by utilizing concrete scraps from three main sources: concrete waste from flushing sediment from drilled pile holes, concrete waste from cleaning concrete mixer trucks, and scraps from concrete cubes and slump test work, which often contain soil mixtures. All resulting waste is adapted into "Soil Cement" to form a reinforced subbase layer and protect the subgrade of road works. This technique not only reduces waste volume but also lowers the cost of purchasing crushed rock and decreases the number of trips required to transport waste off-site. Furthermore, it strengthens the soil in the area, reducing problems of road cracking due to soil subsidence.

2) Pouring concrete to flush out sediment from the bottom of drilled pile holes

During drilled piling, concrete is poured to overflow from the steel casing to flush out sediment and soil remaining at the bottom of the hole, preventing it from mixing with the main concrete body of the pile. This technique thus reduces the amount of concrete waste that needs to be transported off-site by up to 120 cubic meters, equivalent to 8 truckloads for off-site disposal.

3) PVC pipe scrap management process

PVC pipe scraps are often generated in large quantities from cutting pipes to the required sizes in plumbing and sanitary systems. These short pipe scraps are often considered valueless waste that must be landfilled or disposed of. To elevate waste management according to Circular Economy principles, the project has adopted the concept of Repurpose, applying it to various sizes. All sizes of pipe scraps, whether small or large, can be reused by adapting them into equipment for other tasks as appropriate for the worksite. This reduces the import of new materials and minimizes waste generation from the source, for example, by using pipe scraps to make sleeves for phones or other devices, thereby transforming waste materials into functional support equipment.

4) Reusing plastic pallets in transportation and construction processes

Plastic pallets are used to replace wooden pallets in material transportation, serving as supports for materials throughout the project, such as lightweight bricks, floor tiles, wall tiles, and other construction materials. This allows for multiple reuses. Additionally, plastic pallets are used as primary material supports for the entire project, covering both architectural and structural works, leading to an efficient material management system. Once materials on a pallet are used up, the pallet is stored and immediately returned for new materials. As of 2025, this has been implemented in 10 projects.

For construction materials whose packaging cannot yet be switched from wooden pallets to plastic pallets, the Company has repurposed wooden pallets into multi-purpose trays to extend their lifespan and maximize the utility of waste materials.

- **Recycle**

1) Reprocessing concrete waste into new products

In addition to using concrete waste for temporary roads to reduce waste disposal from testing processes, the Company has repurposed excess concrete from compression strength test samples into new functional and decorative products. These are utilized and distributed to internal and external communities, such as plant pots, office supply boxes, and paving slabs for public works.

Small brick scraps that cannot be made into products are processed through crushing to be used as a component in potting soil. Due to their lightweight and high porosity, when mixed with soil, lightweight bricks help improve soil structure, making it airy, loose, and well-draining. pH measurements of the soil have shown it to be more suitable for cultivation.

- **Renewable**

1) Management of excess soil from condominium construction projects

The Company manages excess soil from high rise projects by utilizing it in low rise projects to reduce waste volume, minimize the need for soil disposal, and promote efficient resource circulation. This helps reduce the need to source soil from external suppliers for nearby low rise projects, decreases transportation, saves costs, and reduces pollution from fuel for long-distance transportation. It also represents sustainable excess soil management and efficient resource utilization, reducing environmental impact.

*Image of excess soil delivery between projects

2) Management of drilled pile head waste

In the condominium construction process, the drilled piling stage generates excess concrete waste (pile heads) that is extracted, crushed, and transported off-site, representing both a loss of resources and increased management costs. The project therefore developed the "Life of Pile" innovation, transforming pile head waste into valuable material. This was tested by arranging all pile head scraps to form a retaining wall around Victoria Pond, replacing the

need to construct an entirely new retaining wall. This also reduced the work process from the original 57 days for crushing, transporting, and rebuilding. Through this innovative use of circular resources in the project, the work time was reduced to 26 days. Furthermore, it reduced waste management costs and the construction of retaining walls using the traditional system, which would have cost approximately 2 million baht, to only hundreds of thousands of baht. This resulted in efficient waste management, reduced pollution from transportation, and decreased the amount of waste sent to landfills.

- **Management of non-hazardous waste and debris**

1) Waste management in construction projects

The Company systematically manages waste within the project, with designated waste bins for each waste type, totaling 8 bins with labels clearly defined waste types to support proper waste segregation and management behavior for employees, workers, and contractors. Each waste bin type includes food waste, plastic, plastic bottle caps, glass bottles, foam, paper, cans, and hazardous waste. This enhances waste management efficiency, reduces waste contamination, and promotes greater utilization of waste.

2) Segregation of construction material waste

The Company prioritizes the segregation of construction material waste generated from construction work, aiming to minimize waste sent to landfills. This is achieved through systematic segregation by type, categorizing materials that can be reused, materials that can be recycled (e.g., scrap metal, formwork, PVC pipes, and various packaging), and construction materials that cannot be reprocessed within the project, such as those used to produce alternative fuels, which are then sent to certified buyers or disposal companies for appropriate management.

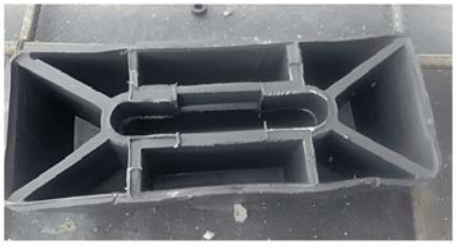
3) Food waste management

The Company encourages employees and construction workers to digest and compost food waste from construction sites and worker camps into fertilizer to reduce the amount of waste that needs to be disposed of outside the project. This is done by adapting used paint buckets from within the project into food waste composting bins. This process yields compost used to nourish and improve soil quality within the project area, which also supports a space for growing vegetables for the workers.

- **Hazardous waste and debris management**

The Company manages hazardous waste with Terms of Reference (TOR) to serve as guidelines for social and environmental contractors throughout the construction supply chain, aiming to reduce risks and negative impacts on environment. There is a proper hazardous waste management plan, including items like thinner cans, silicone tubes, and the use of PVC to replace foam for filling anchorage heads. This reduces the use of foam materials and pollution generated from melting foam with gasoline. Furthermore, these materials can be reused in subsequent work, and this has already been implemented in 3 condominium construction projects.

In 2025, the amount of hazardous waste was 343.50 kilograms.



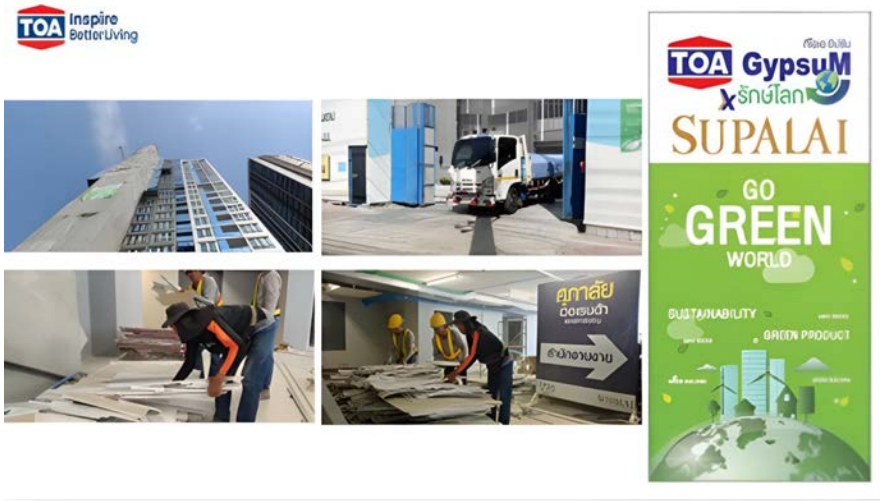
Summary of waste statistics

Waste and garbage volume for 5 projects	Unit	2023	2024	2025
Amount of non-hazardous waste and garbage from construction work	Ton	N/A	N/A	144.53
Amount of hazardous waste and garbage construction work	Ton	N/A	N/A	0.34
Amount of waste and garbage reused / recycled in the construction process	Ton	N/A	N/A	139.58
Proportion of recycled waste and garbage to total construction area used in the production process	%	N/A	N/A	30

- **Collaboration with business partners to reduce waste**

1) Gypsum board waste management in collaboration with TOA Paint (Thailand) Co., Ltd.

The project manages gypsum board waste through two main strategies in collaboration with its partner, TOA Paint (Thailand) Public Company Limited, 1) Waste Reduction by ordering custom-sized gypsum boards to fit actual usage areas instead of standard sizes, coupled with 2) Recycling by segregating waste materials from the construction site and returning them to the factory to minimize gypsum board waste. This reduces the amount of gypsum board waste, allowing it to be reused. It addresses the problem of gypsum, which is a construction waste with a high volume of up to 3,950 kg, helping to reduce waste materials by 37.5%. It also reduces joints and working time by 20%, enabling the circulation of over 15.14 tons of material. This is considered an environmental impact reduction and an increase in economic efficiency by lowering material and time costs, and fostering social and environmental responsibility collaboration for sustainable, eco-friendly business operations.



2) Waste Bank Project: Waste management in collaboration with contractors and construction workers

The Company recognized the problem of waste accumulation in construction projects, which not only pollutes the environment but also affects cleanliness, orderliness, and incurs transportation costs. Therefore, the "Waste Bank" project was initiated, focusing on reducing construction material loss and creating a waste management system that can add value to waste materials. A key feature of this project is exchanging waste for food ingredients to incentivize construction workers to voluntarily participate in waste segregation. This includes establishing waste segregation points. clearly defined types, including glass bottles, plastic bottles, cans, and construction waste (e.g., cement bags, lightweight brick scraps, cardboard boxes). Workers who dispose of waste according to the specified types receive a stamp on a loyalty card. Cement sacks are used as standard containers for waste to be exchanged for items based on accumulated points, such as rice, instant noodles, canned fish, cooking oil, etc. This helps reduce living expenses and boosts morale for cooperating workers, and also reduces the cost of hiring trucks to transport waste off-site, as most waste is segregated for recycling or systematically managed.

Summary of waste volume by waste type and management

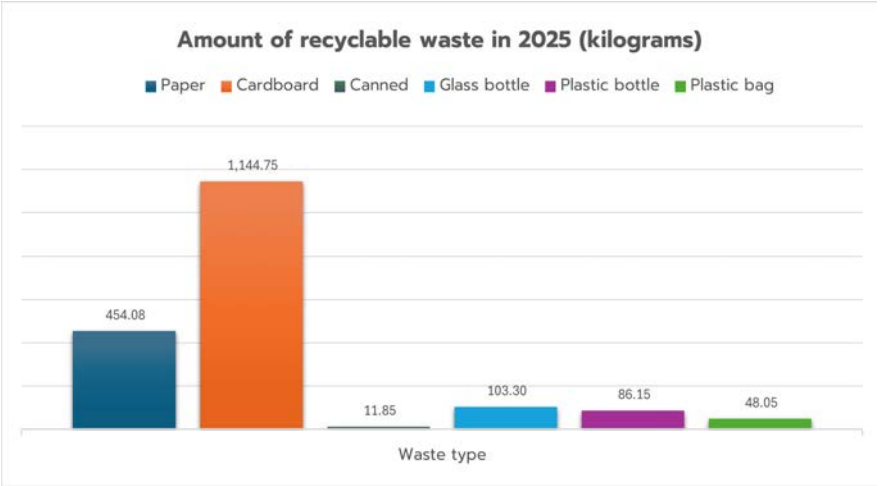
Waste type	Number of projects	Waste volume				Total quantity		Rate of Recycle
		Recycled		Landfill				
		(kg)	(ton)	(kg)	(ton)	(kg)	(ton)	(%)
Construction waste	5	139,581	139.58	5,001	5.00	144,582	144.58	96.54%
Consumer waste	5	15,068	15.07 *	56	0.06	15,124	15.12	99.68%
Total		**154,649**	**154.65**	**5,057**	**5.06**	**159,706**	**159.70**	**96.83%**

* Recycled consumer waste includes glass bottles, plastic bottles, and aluminum cans.

2. Waste and garbage management in the office

2.1 Activities SUPALAI: The More You Segregate, The More You Gain

Social and environmental responsibility promotion activities: The Company communicates and educates employees and tenants in Supalai Grand Tower to participate in transforming waste into value. This includes establishing Recycling Stations and managing waste collection in collaboration with Recycle Day Thailand, a comprehensive waste management startup focused on changing waste segregation behavior at the source through an application to channel waste into the recycling process, thereby reducing waste sent to landfills.



2.2 Collaboration with local authorities in waste management

The Company, in collaboration with Pak Nakhon Sub-district Administrative Organization and Tha Sak Sub-district Administrative Organization (Government Agencies), Mueang District, Nakhon Si Thammarat Province, surveyed and jointly addressed the problem of overflowing waste and foul odors. It supported waste management from the source through key activities, starting with providing space for local authorities to educate residents on waste segregation. Recycling collection points (for paper, plastic, glass) were established, and dedicated wet waste bins were provided for better hygiene. Recyclable waste was transformed into a "Bridge of Merit" by collecting waste from employees and residents and delivering it to the "Waste Bank for Merit" to generate income for purchasing supplies to care for bedridden patients in the community. This collaboration has resulted in the Supalai Ville Nakhon Si

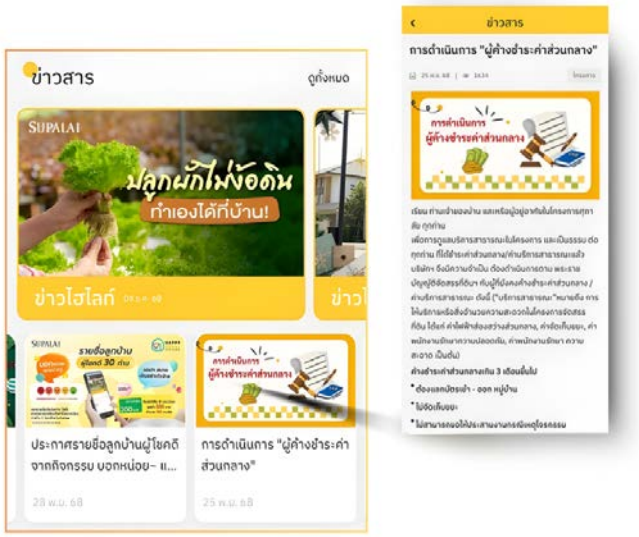
Thammarat project and the Supalai project. Park ville Nakhon Si Thammarat received an award as a model village for waste management, demonstrating its commitment and dedication to sustainable solid waste management within the village.

2.3 Waste Segregation Promotion Project Supalai Green Village

The Company prioritizes business development alongside sustainable environmental and social responsibility, implementing the "Supalai Green Village" project to promote waste segregation in the Company's residential communities, including Supalai Palm Springs Rama 2, Supalai Tuscany Rama 2, Supalai Pride Wongwaen Rama 2, and Supalai Park ville Ramkhamhaeng 174. The objective of this project is to encourage residents to recognize the importance of proper waste segregation, reduce the amount of waste impacting the environment, and support the valuable reuse of resources. The Company has established waste segregation points by type and disseminated guidelines for proper waste management to the community to instill sustainable environmentally friendly behaviors.

2.4 Promoting waste reduction and efficient resource utilization with employees

- Support data usage via E-Documents, shifting from paper-based publicity to online communication platforms like APP SUPALAI SABAI, thereby reducing paper, ink, and printing consumption.



- Communicate and publicize to employees within the organization to reduce food waste and snacks from meetings by changing the format of snack arrangements from individually packaged items to "communal snacks" served in reusable containers, thereby reducing plastic waste and single-use packaging.

- Encourage employees to participate in proposing and submitting ideas for beneficial uses of construction waste materials to promote an organizational culture of valuable resource utilization, create incentives, and foster sustainable development.

2.5 Collaboration with partners, Project E-Waste in collaboration with AIS

The Company collaborates with digital and telecommunications service providers, namely Advanced Info Service Public Company Limited (AIS), by establishing a Drop-off Point at Supalai Grand Tower. Employees and tenants are invited to bring unused or expired electronic waste, such as phones and charging cables, for segregation of small devices to be properly recycled according to international standards and to extract valuable minerals for reuse. This is combined with the use of blockchain technology via the AIS E-Waste+ application to create transparency in tracking waste status and calculating Carbon Score, thereby concretely changing consumer behavior to participate in reducing

greenhouse gas emissions and pollution. In 2025, the project will help reduce electronic waste (E-Waste) by up to 24 kilograms per year. This collaboration represents the creation of a strong network for sustainable joint environmental management.

Information on waste management

Waste Generation(*)

	2023	2024	2025
Non-hazardous waste - Landfilling (Kilograms)	39,000.00	137,891.04	27,903.55

Greenhouse gas emission scope	Base year(s)	Target year(s)	Certification
Scope 1-2	2024 : Greenhouse gas emissions 12,092.00 tCO_2e	2050 : Reduced by 0% tCO_2e	• Thailand Greenhouse Gas Management Organization (TGO)

Setting other greenhouse gas reduction targets[(2)]

Details of setting other greenhouse gas reduction targets

Greenhouse gas emission scope	Base year(s)	Short-term target year	Long-term target year
Scope 1-2	2024 : Greenhouse gas emissions 12,092.00 tCO_2e	2030 : Reduced by 40% in comparison to the base year	-

Remark: [(2)] *Target: Achieve a 40% reduction in the organizations Scope 1 and Scope 2 greenhouse gas emissions by 2030, compared to the Business-as-Usual (BAU) scenario.*

Information on performance and outcomes of greenhouse gas management

Performance and outcomes of greenhouse gas management

Performance and outcomes of greenhouse gas management : Yes

The Company has prepared its **Carbon Footprint for Organization (CFO)** in accordance with the calculation methodology and guidelines established by the **Thailand Greenhouse Gas Management Organization (Public Organization) (TGO)**. The reporting boundary covers **Supalai Public Company Limited**, including its operations at Supalai Grand Tower, low-rise housing projects, and condominium projects across Bangkok, its metropolitan area, and other regions, totaling **233 projects**.

In 2025, the Companys carbon footprint data, covering the period from **January 1 to December 31, 2025**, was officially registered with TGO and verified in accordance with the international standard **ISO 14064-1:2018**. The data was verified by **Bureau Veritas (Thailand) Ltd.**, an accredited verification body.

In 2025, the Company reported total greenhouse gas (GHG) emissions of **69,751 tCO2e** from its operations. This comprised **direct emissions (Scope 1)** of **1,452 tCO2e** and **indirect emissions from purchased electricity (Scope 2)** of **10,122 tCO2e**, resulting in total Scope 1 and Scope 2 emissions of **11,574 tCO2e**, representing a **4.28% reduction compared to 2024**. This reduction was driven by improved energy efficiency, reduced energy consumption in operations, and increased use of renewable energy. In addition, enhancements in building management at Supalai Grand Tower contributed to the reduction in Scope 1 and Scope 2 emissions in 2025.

The Company has joined the **Thailand Carbon Neutral Network (TCNN)**, an initiative under the **Thailand Greenhouse Gas Management Organization (Public Organization) (TGO)**, as one of 854 member organizations committed to greenhouse gas management. This participation reflects the Companys intention and strong commitment to managing and reducing greenhouse gas emissions.

Membership in the network facilitates the exchange of knowledge, best practices, and approaches to achieving carbon neutrality among public and private sector organizations. It also supports the Company in developing effective strategies for reducing and offsetting greenhouse gas emissions, in alignment with climate change mitigation goals and sustainable development objectives.

Human Rights in the Supply Chain

Key Sustainability Issues	Impacts, Risks, and Opportunities
Respect for Human Rights and Fair Treatment of Labour ● Child Labour ● Forced Labour ● Treatment of Labourers with fair and equal. ● Diversity, Equity, Inclusion (DEI) **Community and Social Development** ● Community Engagement ● Local Economic Development ● Local Employment ● Social Support and Assistance	The Company recognizes that current real estate business operations, in addition to developing residential projects to meet customer needs and expectations, must also consider the comprehensive impacts on society, the environment, and surrounding communities, to ensure that business operations are truly sustainable. Therefore, key challenges that the organization must address include maintaining a balance between expanding project development to new provinces or areas and conservation, environment, efficient resource management, as well as heightened expectations from consumers, investors, and society regarding responsible, transparent, and auditable business operation standards. On the other hand, these challenges have created strategic opportunities for the Company to create Shared Value by driving environmentally friendly projects and supporting community quality of life, such as developing projects designed according to energy-efficient building criteria and reducing greenhouse gas emissions, and supporting the development of education and vocational skills to enhance youth potential, and engagement with various networks to collectively build strong communities resilient to future changes with this vision and strategic approach, the Company is committed to being an organization that truly drives positive change, alongside stable and sustainable business growth, which will lead to the long-term strength of both the organization and society as a whole, to increase business growth opportunities coupled with sustainable development in all dimensions. The Company expects that its Community and Social Participation initiatives will contribute to its sustainable growth, ensure smooth project operations, and build the Company's image and credibility within communities and society. At the same time, the Company sincerely hopes to help enhance vocational skills for communities, enabling them to generate increased income, and effectively improve basic quality of life and environmental preservation.
FTSE Russell EGS Theme: Human Right & Community **Supporting SDG Goals** 	

Policy and Commitment

The Company is committed to conducting real estate development business based on comprehensive respect for human rights, establishing it as a policy. proactively to identify and prevent potential risks throughout the value chain, covering key issues such as the non-use of child labour and anti-human trafficking, promoting equality in all dimensions, eliminating discrimination, and preventing all forms of harassment, to create a safe working environment and uphold human dignity in accordance with international GRI Standards, specifically GRI 403: Occupational Health and Safety, GRI 405: Diversity and Equal Opportunity, GRI 408: Child Labor, GRI 412: Human Rights Assessment, and GRI 413: Local Communities.

Furthermore, the Company emphasizes Community and Social Participation as a strategy to create sustainable growth through supporting education and vocational skill development to enhance income and basic quality of life for

people in society. This commitment not only helps create strong and resilient communities but also enhances the organization's image and credibility, facilitating smooth and stable business operations, leading to positive change that strengthens both the organization and society as a whole in the long term.

Human Rights Policy

The Company has announced and implemented a Human Rights Policy, based on the principle that all individuals have equal inherent worth and dignity. Therefore, it emphasizes respect for human rights as a fundamental virtue for work and coexistence. Adherence to ethical principles is integrated into the organizational behavior and culture, ensuring that the Company's business operations and employees' work are based on mutual respect for dignity. The Company supports and respects human rights as stipulated in the Universal Declaration of Human Rights (UDHR), the United Nations' Guiding Principles on Business and Human Rights (UNGP), and The International Labour Organization (ILO) Declaration on Fundamental Principles and Rights at Work. The Company has established a framework for implementing the above policies in accordance with laws and international principles, such as comprehensive human rights due diligence processes, and the support, promotion, and protection of human rights. This policy is part of the Company's continuous commitment and efforts to conduct business ethically and responsibly.

Furthermore, the Company has established a comprehensive Human Rights Due Diligence Process to systematically assess human rights risks and impacts, identifying key issues and human rights objectives related to business operations, such as child labour, human trafficking, forced labour, rights and freedoms at work, and compensation, equality, discrimination, and sexual and other forms of harassment, as well as safety and security, to ensure the Company's business operations does not lead to human rights violations.

For more information, please visit: Policy on Human Rights

The Company is committed to conducting business based on equality and human rights principles in accordance with international standards, to foster clear and unified understanding throughout the organization. Labour standard policies are communicated thoroughly to employees for their awareness and effective implementation correctly and uniformly, with an English translation available on the Company's website to ensure stakeholders can access and implement the information accurately and consistently according to the same standards.

Human Rights Guidelines

Human Rights Policy	Guidelines

1. Employee Treatment Policy	The Company firmly believes that employees at all levels are its most valuable resource and the core of its success, focusing on management based on equality and fairness in all aspects, including compensation, appointments, transfers, and potential development, as well as strictly adhering to labour laws and welfare standards. The Company emphasizes creating a unified work environment that respects human dignity and is non-discriminatory, covering female workers, persons with disabilities, and disadvantaged groups, along with strict health and safety measures, especially protecting the rights of female employees pregnant. Furthermore, the Company promotes employee quality of life and engagement through activities that foster a positive organizational culture and provides confidential mechanisms for feedback or grievances through the Welfare Committee and Supalai Samphan Club, to ensure that employees receive fair treatment, job security, and a good quality of life both personally and for their families, which is a crucial foundation for the organization's development towards sustainable success. *For more information, please visit:* Policy on Treatment of Employees
2. Employee Development Policy	Define employee development, using the Competency Based Development system as the primary mechanism to enhance professional, managerial, and creative skills through regular internal and external Annual Training Plans with minimum training hours, supported by appropriate budgets. The Company aims to cultivate employees who are "good and capable," responsible, volunteer-minded, and harmonious, to unlock the full potential of personnel for growth and to drive organizational success together. *For more information, please visit:* Policy on Employee Development
3. Remuneration and Welfare Policy	The Company provides fair compensation comparable to similar business sectors and aligned with the Company's performance. In the short term, this depends on annual profitability, free from discrimination based on race, religion, nationality, gender, disability, or any other personal status. Performance evaluations are consistent with a performance appraisal system that has publicly and clearly defined forms and criteria. The focus is on creating a good, safe working environment with excellent welfare for employees, as well as providing new innovations and technologies to support work, in recognition of all employees who work for the Company's utmost benefit. *For more information, please visit:* Policy on Remuneration and Welfare

4. Responsible Termination Policy	The Company emphasizes transparent, fair processes that comply with labour laws and international standards, free from discrimination. Every termination must have clear reasons and advance notice to allow employees time to adjust. It also supports fair severance pay and skill development assistance programs to provide opportunities for new employment. Furthermore, the Company provides an appeal mechanism and a review committee to verify accuracy, prevent retaliation, and provide remedies if inappropriate practices are found. Regular oversight and evaluation are conducted to ensure that personnel management strictly adheres to human rights principles. *For more information, please visit:* Policy on Responsible Termination
5. Policy and Guidelines for Promoting Gender Equality and Women's Rights	Promote diversity and equality at all levels by creating a work environment that respects the dignity and human rights of all employees. This policy not only reflects the commitment to fostering fairness within the organization but also builds understanding and supports the acceptance of the value of gender equality and women's rights, as well as supporting sustainable growth and creating value for all stakeholder groups, focusing on creating opportunities that equality, capacity building, and comprehensive and concrete protection of women's rights. to ensure that all employees receive fair opportunities, are free from discrimination, and can grow equally in their careers, supporting the sustainability goals of the Company and build confidence for investors and stakeholders, covering employees at all levels and other stakeholders involved in the Company's business. *For more information, please visit:* Policy and Guidelines on Gender Equality and Womens Rights
6. Social Policy and Guidelines	The Company focuses on human resource management based on human rights and ethics, prioritizing fair employment and compensation, free from discrimination, and embracing diversity. It continuously promotes personnel development through training to enhance competitiveness. Furthermore, it adheres to strict occupational health and safety standards, provides comprehensive welfare benefits beyond legal requirements, and establishes transparent grievance mechanisms with whistleblower protection systems, to build confidence, happiness, and well-being for employees, which is the foundation for sustainable growth. *For more information, please visit:* Policy and Guidelines on Social

7. Sustainable Social Policy	The Company is committed to treating labour in accordance with international standards (ILO), supporting the freedom of association and the right to collective bargaining for personnel independently within legal frameworks, to foster cooperation and protect employees' rightful benefits. In terms of employment conditions, the Company prioritizes management to ensure that working hours are not excessive. It strictly regulates working hours and overtime in accordance with the law, while also protecting the right to fair wages by setting compensation no lower than the minimum wage and sufficient for living, to promote the long-term quality of life and security of personnel. *For more information, please visit:* Policy on Sustainable Society
8. Policy on Migrant Workers Recruitment	The Company emphasizes ethical recruitment to prevent forced labour and human trafficking, by providing employment contracts in a language understood by workers, not confiscating personal documents (e.g., passports), and ensuring that suppliers/contractors adhere to the same standards. Furthermore, the Company provides an accessible Grievance Mechanism with a whistleblower protection system to promote quality of life and create shared value in society sustainably. *For more information, please visit:* Policy on Migrant Workers Recruitment
9. Policy on Treatment of Customers	The Company focuses on treating suppliers equally, fairly, and transparently, based on mutual benefit. It has clear, non-discriminatory suppliers selection and evaluation processes, free from conflicts of interest, and strictly adheres to anti-corruption guidelines by not soliciting or paying illicit benefits in any case. The Company emphasizes responsible supply chain management through its Green Procurement policy and screening suppliers who conduct business ethically and do not violate human rights and does not support illegal businesses. Furthermore, it emphasizes strict adherence to commitments, has a management and monitoring system that prevents corruption at every stage, and a policy for timely payments according to fairly agreed commercial credit terms. It also strives to build sustainable relationships by fostering potential and innovation with suppliers, to drive business operations in accordance with sustainable development principles and shared social and environmental responsibility. *For more information, please visit:* Policy on Treatment of Customers

10. Policy on Whistleblowing and Complaints	The Company has complied with the whistleblowing or complaint policy by providing channels for reporting tips or complaints regarding illegal acts, ethical breaches, or misconduct that may indicate corruption or malfeasance by individuals within the organization, from both employees and all stakeholder groups. It also has mechanisms to protect whistleblowers and prioritizes keeping complaint information confidential to build trust among complainants. This includes established procedures for factual investigation, conclusion, and measures to protect whistleblowers or those who complainants clearly to prevent distress. Whistleblowing or complaints can be submitted via email to anti-corruption@supalai.com or through the suggestion boxes located near the fire escapes on each floor of Supalai Grand Tower Rama 3, which are reported directly to the independent directors. *For more information, please visit:* Policy on Whistleblowing and Complaints
11. Abuse and Harassment Policy	The Company has complied by prioritizing and establishing a policy that all employees must not engage in any acts of sexual harassment, whether towards the Company's employees or external parties conducting business with the Company. This includes sexual abuse, flirtation, harassment, indecency, and possession of obscene images, both verbally and physically. *For more information, please visit:* Abuse and Harassment Policy

Human Rights Risk Assessment

The Company prioritizes and has a policy on human rights principles, recognizing the importance of human rights as a fundamental basis for sustainable business operations. The Company publicly commits to respecting and protecting human rights in accordance with the principles enshrined in the Universal Declaration of Human Rights (UDHR), the UN Guiding Principles on Business and Human Rights (UNGPs), and the ILO Core Conventions. This is based on the belief that all human beings have equal dignity and rights. The Company adopts the Human Rights Due Diligence (HRDD) guidelines from the Securities and Exchange Commission (SEC) as a framework for preventing or resolving issues and assessing human rights violation risks of the Company, along with overseeing internal processes to implement policies covering equality and non-discrimination, such as welfare benefits for legally recognized same-sex spouses, promoting fundamental human rights, providing whistleblowing channels for human rights violations, and communicating these matters to suppliers, etc. This also includes concrete implementation, by stipulating that prospective suppliers must certify that they will not violate human rights and agree to allow the Company to use human rights, safety, occupational health, and environmental criteria for selection and evaluation. Furthermore, the Company has a process to inquire about the needs of suppliers' workers/employees to develop a joint well-being plan with suppliers, including on-site monitoring of plan implementation and reporting results to management, as well as fostering and disseminating awareness of human rights respect among internal employees, business partners, and all stakeholder groups.

Grievance and Whistleblowing Mechanism

Factual investigation, conclusion, and measures to clearly protect whistleblowers or complainants from distress.

Whistleblowing or complaints can be submitted via email to anti-corruption@supalai.com or through the suggestion boxes located near the fire escapes on each floor of Supalai Grand Tower Rama 3, which are reported directly to the Audit Committee.

The Company monitors the effectiveness of its grievance mechanism through key indicators, including processing time, complaint closure rate, complainant satisfaction level, and non-retaliation. The performance results are reported to senior management and the Board of Directors annually.

In 2025, there were no significant labour disputes, and the performance of the labour grievance mechanism met the Company's targets.

Commitment to Children's Rights

The Company adheres to the "Children's Rights and Business Principles" (CRBP) established by the United Nations Children's Fund (UNICEF) as a guideline for business operations that respect children's rights. These principles comprise four areas where the Company can help create a positive impact on children: 1) Survival, 2) Protection from violence, 3) Appropriate Development, and 4) Participation. The Company has established an operational framework to create a safe environment, provide education, and ensure protection for children and families residing in construction worker camps, granting them access to basic utility welfare to lay the foundation for a sustainable future.

- Supporting safe living (survival): The Company has announced a policy and a Supplier Code of Conduct that strictly prohibits child labour, as well as business processes that reduce impacts on societies where children live, such as establishing safe zones for children.
- Developing infrastructure and various facilities to provide children in communities surrounding project sites with access to public utilities, such as the "Transforming Open Spaces into Play Areas" project, to be used as public parks for recreation.
- In the area of education, the Company has developed collaborations with business partners to create learning spaces and provide children with access to nutritious food, such as renovating classrooms and supporting school vegetable gardens to boost children's immunity.

Sustainable Social Policy

The Company is committed to treating its workforce in accordance with international standards (ILO), supporting freedom of association and the right to collective bargaining for its personnel independently within the legal framework. This aims to foster cooperation and protect the rightful benefits of employees. Regarding employment conditions, the Company prioritizes eliminating excessive working hours by strictly regulating working hours and overtime in compliance with the law. It also protects the right to fair wages by setting compensation no lower than the minimum wage and sufficient for a decent living, thereby promoting the long-term quality of life and security of its personnel.

Performance results for 2025

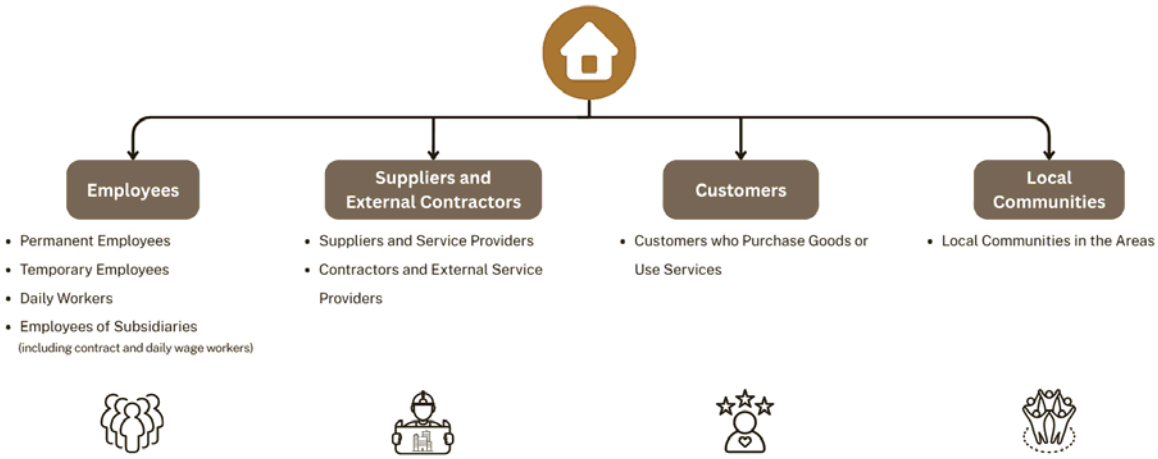
Comprehensive human rights due diligence (GRI: 412-1)

In 2025, the Company conducted a Human Rights Risk Assessment (HRRA), which is a crucial part of the Human Rights Due Diligence (HRDD) process, covering 100% of the Company's operational areas. The scope extends to the Company's supply chain and business operations, including suppliers, contractors, and business allies. The Company identified human rights risks, integrating them into other risk assessment processes conducted by each department according to their duties Self-responsibility.

Main objectives to ensure that the Company can appropriately identify, prevent, and mitigate human rights impacts, both potential and actual. Appropriate remedial and risk control measures have been established to cover the Company's operations and value chain.

Human Rights Risk Assessment and Mitigation Process (HRDD Process)

1. Scope of Assessment: covering the core activities of the Company and its subsidiaries, as well as relevant stakeholder groups throughout value chain to ensure the care and protection of the rights of all stakeholder groups, including employees, suppliers/external contractors, customers, and communities. This assessment is conducted annually.



2. Identification of Human Rights Issues

The Company identifies and assesses potential human rights risk issues arising from the activities of the Company, its subsidiaries, suppliers, and external contractors. Human rights risk issues are considered to cover stakeholders, especially impacts on vulnerable groups such as migrant workers, female workers, child labourers, LGBTQ+ individuals, and persons with disabilities, in order to prioritize risks and plan appropriate management. Stakeholders are involved in identifying issues through interviews, focus groups, soliciting opinions and suggestions, combined with future trend research, analysis of the Company's internal data, and comparison with industry best practices nearby The Company has defined "Salient Human Rights (Salient Human Rights) " by prioritizing issues based on "the severity of impact on individuals" in accordance with the UN Guiding Principles on Business and Human Rights, and integrating it into the organizational risk management process.

Core Business Activities	Procurement	Design and Construction	Sales	After-Sales Service
Human Rights Issues	• Labor Rights • Rights of Suppliers and External Contractors	• Labor Rights • Community Rights • Rights of Suppliers and External Contractors	• Consumer Rights • Labor Rights	• Labor Rights • Consumer Rights • Rights of Suppliers and External Contractors
Rights Holders	• Employees • Suppliers and External Contractors	• Local Communities • Employees • Suppliers and External Contractors	• Customers • Employees	• Customers • Employees • Suppliers and External Contractors

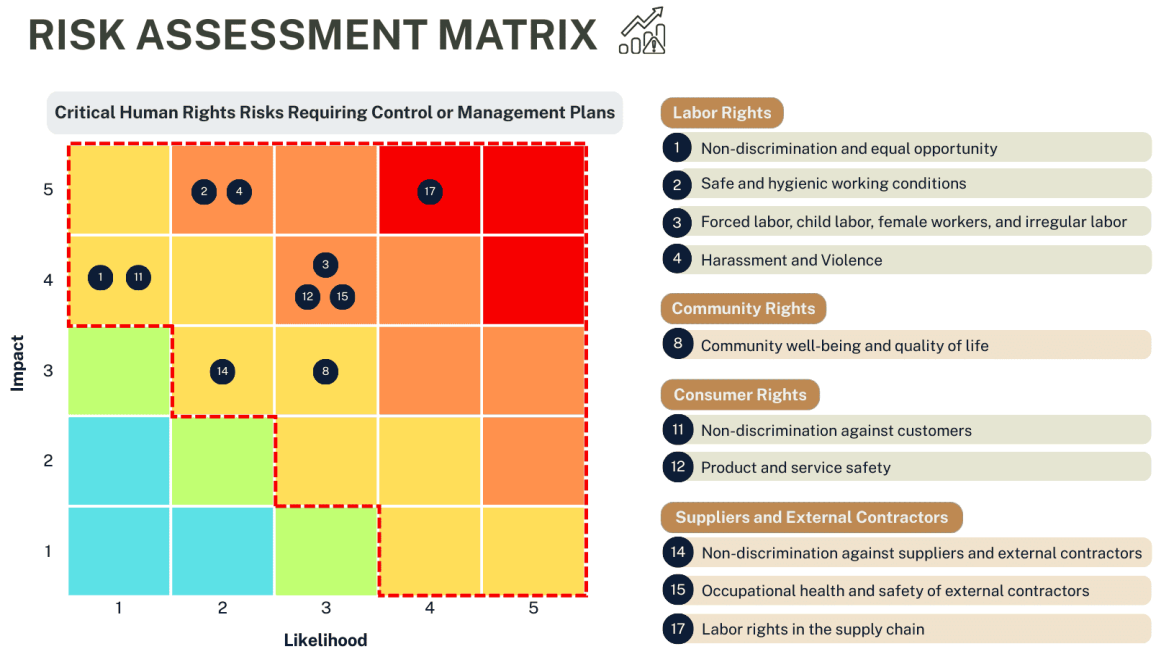
Results from the assessment and prioritization of human rights risks throughout the value chain shown in the table below.

Labour rights	Community rights	Suppliers rights	Customer rights	in the supply chain
● Workplace discrimination and violation of personal rights ● Unfair employment ● Freedom of expression and assembly ● Occupational health, hygiene, and safety ● Data privacy and security	● Community health and safety ● Community environmental management	● Discrimination against suppliers ● Privacy and security of suppliers' personal data	● Privacy and security of customers' personal data	● Forced labour or child labour by suppliers ● Health, hygiene, and safety of suppliers' workers

3. Risk Assessment

The Company assesses human rights risk levels using criteria that evaluate the severity of impact on stakeholders, based on the scale of impact, the number of affected individuals (scope), and the remediable character of the impact, combined with the likelihood of occurrence.

Affected parties	Human Rights Impact Assessment Results
Operational areas, head office, and construction sites	100% of operational areas assessed for impact. 100% of areas with human rights risks have implemented prevention and mitigation measures.
Key suppliers (Tier-1 suppliers)	Key suppliers assessed No have human rights risks.



4. Human Rights Risk Management

The Company found one high-level human rights risk issue related to occupational health and safety. Therefore, the Company has established management measures to mitigate impacts and prevent future occurrences, as well as to provide remedies or rehabilitation for those affected by the impact appropriately, in collaboration with affected or potentially directly affected stakeholders such as employees, suppliers, customers, and communities, to define effective, appropriate, and sufficient measures, and has implemented various measures as follows:

Scope	Risk issues significant human rights aspects	Affected stakeholders	Company operations to rectify, prevent, and remedy.
Activities Company operations	Labour rights		

	Employees occupational health and safety	Employees	● Conduct risk assessments and job safety analyses to identify causes and proactively prevent accidents. ● Provide appropriate and sufficient personal protective equipment. ● Improve the organizational environment and occupational health, such as installing clean drinking water points sufficient for the number of workers. ● Organize safety training across the organization. ● Organize campaigns to reduce the statistics of work-related accidents to zero. ● Foster a safety culture within the Company and raise employee awareness to participate in assessing and managing work risks, such as knowledge testing.
Activities Operations in the supply chain of suppliers and contractors	**Labour rights in the supply chain**		
	Health and safety of suppliers' and contractors' workers	Workers of suppliers and contractors	● Communicate safety-related policies and supplier codes of conduct to suppliers, ensuring their awareness and strict compliance with regulations. ● Make daily safety talks (Safety Morning Talk) a primary activity before starting work to prepare for safe operations, check equipment readiness, and the health of contractors providing labour before each type of work. ● Regularly conduct safety audits, including self-assessments and on-site audits of suppliers and contractors.
	Community rights		

	Community health, hygiene, and safety	Surrounding Communities	● Require suppliers to strictly comply with safety laws and regulations. ● Monitor the operations of suppliers and contractors regarding both labour and environmental aspects to prevent human rights violations. ● Require suppliers and contractors to have measures to prevent and take responsibility for potential human rights violations. ● Oversee that suppliers and contractors have appropriate remedial measures in cases where suppliers and contractors cause human rights violations in the community.

5. Monitoring and Evaluation The Company mandates an annual review of human rights risk issues, as human rights risks related to the Company's business operations may change with different activities and stakeholder groups. Furthermore, the Company monitors and evaluates the implementation of various corrective and preventive risk measures by establishing indicators to track and measure the effectiveness of risk management measures.

Complaint and Whistleblowing Mechanism

The Company places strict importance on preventing and investigating human rights violations. It has established appropriate rehabilitation and remedial measures, including financial assistance and other forms of support, to mitigate potential impacts from the Company's activities. It also provides channels for complaints/whistleblowing, mechanisms for protecting informants, and emphasizes data privacy. Complaints are kept confidential to build trust with complainants. Procedures for handling, fact-finding, concluding results, and measures to protect whistleblowers or complainants from suffering harm are clearly defined. Whistleblowers can report to Supalai Contact Center 1720 or complain via e-mail anti-corruption@supalai.com or through suggestion boxes located near the fire escapes on each floor of Supalai Grand Tower Rama 3, with direct reporting to independent directors.

The Company continuously monitors the effectiveness of human rights remediation and impact management through a comprehensive incident management process (Incident Management and Remediation Process), covering incident identification, resolution, rehabilitation, and recurrence prevention. The effectiveness of this process is monitored through key indicators, including:

- Average incident resolution time
- Incident resolution rate
- Corrective action effectiveness
- Repeat incident rate
- Impact remediation outcome
- Stakeholder satisfaction level after remediation

From human rights operations throughout 2025, the Company found no cases of human rights violations within the organization or in the supply chain, and received no significant complaints related to human rights violations from any stakeholder group.

Human Resource Development and Labour Standards

Key Sustainability Issues	Impacts, Risks, and Opportunities
Respect for human rights and fair labour practices. ● Child Labour ● Forced Labour ● Treatment of labour in a manner that is fair and equal. ● Diversity, Equity, Inclusion (DEI) **Capacity Enhancement for Employees and Workers in Work and Daily Life.** ● Employment ● Employee Care ● Employee potential development ● Recruitment of employees with Competence ● Employee Engagement **FTSE Russell EGS Theme:** Labour Standards **Supporting SDG goals** 	The company designates labour standards and human rights issues as an Enterprise Sustainability Risk, which is overseen by the Board of Directors and the Risk Management Committee through the operations of the Sustainability Committee. Concrete implementation is carried out, along with regular reporting of labour, human rights, and employment condition risk assessments, to ensure that these risks are integrated into the Enterprise Risk Management (ERM) process and the company's strategic decision-making. If the company lacks effective oversight mechanisms, especially in supply chains with a large workforce, it could lead to significant human rights violation risks, such as child labour, forced labour, or unequal treatment, which would directly impact reputation, stakeholder trust, and could lead to legal disputes that cause. project operations being disrupted. Furthermore, the risk of skilled labour shortages or the loss of talented personnel due to inadequate care also continuously impacts the quality of construction work and the organization's long-term competitiveness. Focusing on fair treatment of labour will sustainably increase opportunities for the organization's business development and enhance competitiveness. This is because the company maintains a positive image, which positively impacts the recruitment of qualified and suitable personnel to join the company, and serves as a strategy to retain knowledgeable and capable employees within the company. To maintain business competitiveness, as human rights issues are quite sensitive and can be linked to other issues that may have continuous impacts from the company's business operations. Furthermore, employees and stakeholders will benefit from or have opportunities due to the commitment to operate with respect for human rights and fair labour practices. This includes employees and stakeholders being treated fairly without discrimination, and employees of suppliers benefiting from the company's request for cooperation from suppliers on Human Rights Aspect issues

Strategies and Management Approaches

The company recognizes the importance of respecting human rights and fair labour practices in all activities throughout the supply chain. Therefore, it operates with a focus on diversity and equality. The company has a policy on ethical recruitment and employment, prohibiting discrimination or exclusion based on individual diversity, including race, religion, culture, language, skin color, gender, disability, political opinions, or any other matter, with consideration given to the suitability for the duties and responsibilities on a case-by-case basis. Furthermore, there is no use or employment of child labour. The company has a standardized recruitment and selection system for employees, offering equal opportunities to all interested individuals to join the company.

The company discloses sustainability report data according to international GRI Standards, specifically GRI 401: Employment 2016, GRI 403: Occupational Health and Safety 2018, GRI 404: Training and Education 2016,

GRI 405: Diversity and Equal Opportunity 2016, GRI 408: Child Labor 2016, and GRI 409: Forced or Compulsory Labor 2016. It conducts business in accordance with international practices related to respecting stakeholders' human rights to promote human rights across the organization and ensure that all employees and stakeholder groups are treated, protected, and have their fundamental rights respected equally and fairly. Concurrently, it aims to promote and support freedom of expression, association, and collective bargaining. Receiving fair compensation, including prioritizing the protection of vulnerable groups, to mitigate risks related to human trafficking, forced labour, and child labour, with a commitment to completely eliminate discrimination and oppose all forms of harassment.

Policy and Commitment

The company recognizes that all individuals possess equal value and dignity. Therefore, it has established a "Human Rights Policy" to serve as a crucial standard for conducting business with respect for human rights, which are fundamental virtues for work and coexistence. This policy is designed to be integrated into the organizational culture and desired behaviors to ensure that the company's business operations and the work practices of employees at all levels, from the Board of Directors to employees and stakeholders throughout the supply chain, are based on the principles of mutual respect for dignity and honor in a sustainable manner.

To align with international standards, the company is committed to conducting business based on human rights principles and labour standards in accordance with the Universal Declaration of Human Rights (. Universal Declaration of Human Rights: UDHR), the United Nations Guiding Principles on Business and Human Rights (UNGP), and the International Labour Organization Declaration on Fundamental Principles and Rights at Work (ILO Declaration). The company integrates these principles into its business processes, organizational policies, and management throughout the value chain to promote respect, protection, and prevention of human rights violations in all business activities.

The company has conducted a comprehensive human rights due diligence process (Human Rights Due Diligence: HRDD) systematically, covering the identification and assessment of human rights risks and impacts, the establishment of prevention and mitigation measures, the monitoring and evaluation of the effectiveness of implemented measures, as well as disclosure of information and the provision of appropriate grievance mechanisms (IdentifyPreventMitigateTrackCommunicateRemedy). This covers employees, construction project workers, migrant workers, as well as the labour of suppliers and contractors in the company's value chain.

This approach reflects the company's commitment to conducting business ethically, transparently, and with social responsibility, while also supporting the creation of fair employment conditions, respecting human dignity, and managing risks related to continuous human rights and labour, which are fundamental to long-term sustainable growth.

For more information, please visit: Policy on Human Rights

Policy	Guidelines

1. Treatment of Employees	● Treating employees and workers equally, without discrimination. ● Supporting employee diversity ● Promoting equal opportunities for women and persons with disabilities. ● Not using or condoning physical punishment, physical or psychological coercion, or verbal abuse. ● Not allowing female employees to perform work that is hazardous to their health or body as prescribed by law, including providing pregnant female employees with a working environment that is not harmful to their health and is safe for pregnancy, and not terminating employment, demoting, or reducing benefits for female employees due to pregnancy.
2. Compensation and Benefits	● Providing fair wages and benefits equally for all employees. ● Paying appropriate wages according to the salary structure and market conditions, at a minimum complying with domestic minimum wage requirements. ● Respect for the right to rest and appropriate working hours.
3. Responsible Termination of Employment	● Termination of employment complies with Thai labour laws and international labour standards. ● Employees have the right to file a complaint or appeal if unfairly terminated. ● Having a termination review committee to verify the accuracy and fairness of the termination process.
4. Gender Equality and Women's Rights (GRI 405-1)	● Proportion of women in management positions not less than 30%. ● Supporting the establishment of gender-diverse committees. ● Appropriate welfare for female employees, such as maternity leave and family care leave.
5. Employment	● Promoting diversity and equal opportunities in employment. ● Employing under terms and conditions of employment that comply with local laws or customary practices. ● Employing labour and providing compensation without discrimination, and offering equal opportunities, covering women, persons with disabilities, or other disadvantaged groups. ● Supporting the employment of persons with disabilities and/or disadvantaged groups.

6. Employment of Migrant Workers	● No child labour (persons under 18 years of age) is employed or supported. ● No forced labour or human trafficking in any form is employed or supported. ● No forced overtime beyond legal limits. ● The company respects the rights and freedoms of association, expression, and collective bargaining, similar to other labour groups, in accordance with the laws of each country. ● Not using bargaining power or coercion to force employees into any agreements that infringe upon their rights fundamental rights as stipulated by law.
7. Freedom of Association and Collective Bargaining	● Respecting employees' rights and freedom of association and collective bargaining. ● Supporting the establishment of welfare committees and employee relations clubs to develop beneficial welfare and benefits suitable for employee needs, and to provide recommendations on operational procedures, working conditions, and other matters.
8. Harassment and Abuse	● The company does not condone any inappropriate behavior from its employees, such as visual, verbal, gestural, or other forms of harassment/abuse. ● Victims will receive protection according to appropriate guidelines, and reported information will be kept confidential.
9. Safety, Occupational Health, and Working Environment	● Providing a safe and appropriate working environment and facilities hygiene, facilitating access for everyone, including persons with disabilities and contractors. ● All employees have the right to offer suggestions for improving the working environment and ensuring safe work practices.

Performance results for 2025

Diversity, equality and non-discrimination. (GRI 405-1)

Project Design and Development

The company implements measures to address diversity, equality, and non-discrimination based on race, religion, gender, age, nationality, and disability. This begins with the design process and the development of high rise projects and low rise projects that utilize Universal Design (UD) principles, or accessible design, to create environments that everyone can access, understand, and use equally, considering gender, age, abilities, or disabilities, including young children, pregnant women, the elderly, and general users, as well as designing for good well-being throughout the value chain.

The company conducts accessibility assessments in buildings, considering key elements such as ramps, elevators, and restrooms for persons with disabilities, parking, and internal building circulation paths, as well as common areas such as gardens and walkways, to comply with relevant laws and standards. These actions reflect the company's commitment to respecting human rights, non-discrimination, and creating an environment that everyone can access and utilize equally.

- **Universal Design:** Designing common areas to be accessible for all ages.
- **Disabled persons access:** Design considering persons with disabilities. Building Accessibility for Persons with Disabilities and Physical Limitations.

- **Community:** Creating common areas that promote physical and mental well-being, such as gardens, swimming pools, fitness centers, and co-working spaces.

- **Consideration of access via public transport:** Public transportation access in the project design and development phase.

The company prioritizes site selection, design, and project development with appropriate consideration for public transportation access to support convenient, safe, and environmentally friendly travel. The company has integrated consideration of these issues during the project feasibility study and master plan design phases,

such as evaluating the distance from main public transportation systems, convenience of pedestrian connections, and allocating pick-up/drop-off areas within the project to reduce reliance on private vehicles, promote residents' quality of life, and support sustainable urban development.

Equality Welfare Project

The company focuses on concretely building an organizational culture that embraces diversity and inclusion through the "Equality Welfare" project. This project provides benefits and privileges to employees and LGBTQ+ partners who are legally married, treating them equally to heterosexual married couples in all respects, such as a maximum 20% discount on housing purchases and providing gifts for starting a new life

together, in timely response to the Marriage Equality Act. This initiative reflects the commitment to treat all personnel with respect, without discrimination, and aims to create a safe and inclusive workplace, which strengthens employee engagement with the organization and aligns with international human rights standards.

Worker Care in Construction Projects

Construction labour is a crucial mechanism driving the success of project development. The company prioritizes comprehensive worker care by collaborating with contractors to elevate safety, occupational health, and quality of life standards for workers. This is achieved through providing suitable and orderly accommodation, especially worker housing that meets safety and hygiene standards. The company mandates strong, partitioned accommodation with standard fire protection systems to create a safe living environment, alongside providing essential basic welfare such as separate male and female restrooms and showers in worker camps, hygienic separate male and female restrooms in project construction areas, and sufficient clean drinking water. Systematic accommodation management helps workers achieve a good quality of life, receive adequate rest, which positively impacts their physical and mental health, increases concentration, and improves work efficiency. Simultaneously, it reflects the company's responsibility in accordance with legal labour standards and human rights principles.

Performance and outcomes for employee and labor management : Yes

Awards Employee and Labour Management received by the company in 2025

The company is a member of Ministry of Labour and received the "Outstanding Establishment" award for labour relations and labour welfare at the national level for the year 2025 from the Department of Labour Protection and Welfare, for the 8th consecutive year. This reflects an establishment that respects human dignity and conducts business truly based on international standards. Therefore, it can be assured that the company is completely free from labour practices that violate human rights, and all processes, including recruitment, hiring, training, and compensation, are conducted equally, based on ability and experience, without discrimination based on any personal factors, to promote stable livelihoods and improve the quality of life for employees at all levels.

Performance Employee and Labour Management (GRI 403-1, 403-4, 403-7, 408-1, 409-1)

- Employee gender ratio (female:male): 0.42 : 0.58
- Employment of persons with disabilities: 18 people, such as sustainability officers and others
- Local employment: 53.21%
- In collaboration with financial institutions, offering home loans for LGBTQ+ partners.
- 100% of employees trained in safety, occupational health, and working environment
- Number of hours of potential development training: 24.08 hours per person per year
- The rate of death or disability from work-related accidents is 0.

Information on employment

Human Resource Management (GRI 401-2)

Human Resources Management

Recruitment and Employment

The company has a recruitment policy based on ethical principles, without discrimination or exclusion due to individual diversity, including race, religion, culture, language, skin color, gender, disability, political views, or any other matter. Suitability for job responsibilities will be considered on a case-by-case basis. There is no use or enforcement of child labour. The company has a standardized recruitment and selection system, provides opportunities for interested individuals to join the company, and offers compensation in accordance with industry standards, equally and fairly.

The company has expanded project development to various provinces across the country in 30 provinces, supporting and enabling employees to relocate back to their hometowns for work. Additionally, it promotes local employment to directly stimulate the community's economy, reducing the rate of unemployment and distribute income, creating monetary circulation in the area, while also reducing environmental problems from commuting. In 2025, the company had a total of 1,459 employees.

Employee Welfare and Benefits (GRI 401-2)

The company is committed to creating happiness and security for employees through the provision of diverse welfare and benefits, covering needs across all life stages. These are categorized into 4 main areas to enhance quality of life and promote sustainable growth within the organization, as follows:

- **Health & Well-being:** Covers medical expenses such as dental care, eyeglasses, LASIK surgery, and disease prevention vaccinations, as well as providing get-well baskets to offer encouragement in case of illness.
- **Financial Security:** such as establishing a provident fund for long-term savings, providing group accident insurance, and offering financial assistance in case of non-accidental employee death to support employees' families during crises.

- **Life & Living:** Supports important employee milestones, such as congratulatory benefits for marriage, visitation benefits for childbirth, participation in merit-making, and support for funeral ceremonies, special housing benefits, such as discounts on purchasing company projects, budgets for residential repairs, and rights to stay at the company's hotels and residential units.
- **Personal Development:** Providing both domestic and international scholarships to promote skill and knowledge development, enabling employees to keep pace with changes.

The company is committed to continuously improving various welfare and benefits to ensure all employees are happy, confident in their work, and ready to grow with the organization sustainably.

New Hire and Employee Turnover Rates (GRI 401-1)

The company's management and team regularly organize Orientation Day at the beginning of each month to help new employees get acquainted and smoothly adapt to the organization. This includes a warm welcome through new employee introductions, the provision of welcome boxes, and presentations on the company's history, goals, vision, and various policies to ensure employees understand the company's direction before commencing actual work. Additionally, there are activities for senior employees to share their experiences and pride in working with the company, along with guided tours of various projects, to ensure new employees gain a deep understanding of the company's products and standards.

Post-retirement employment (GRI 404-2, 404-3)

Although the company has work regulations that set the retirement age at 60 years or older, the company recognizes the skills, knowledge, and experience of retired employees who are still capable of working. Therefore, it offers employees the opportunity to continue working by establishing a policy for post-retirement employment based on their willingness and readiness to work, with continuous service years counted. Employees who do not wish to continue working will receive severance pay according to the provisions of the Labour Protection Act B.E. 1998. In 2025, there were 3 retired employees, or 0.21%. Currently, 11 retired employees continue to work for the company after retirement.

Financial literacy seminar for post-retirement

The company aims to enhance the quality of life for employees through post-retirement employment policies combined with financial literacy to develop quality personnel with financial stability in life. The seminar curriculum strengthens skills in calculating post-retirement budgets, managing financial tools, and planning savings. Promoting financial knowledge alongside providing opportunities for continuous income helps reduce anxiety and creates a better life for employees after retirement.

Employment or Internship Opportunity Programs

- Activities: Supalai Open House 2025 x Kasetsart University

The company has organized activities Supalai Open House for Civil Engineering students from Kasetsart University, total 64 person visited the company, providing students with direct knowledge from experts, which helps prepare them and increase opportunities for access to quality careers in the future, reflecting the company's commitment to transferring knowledge and experience to new engineers, enabling them to further develop their skills for future careers.

- The Internship and Cooperative Education Program Supalai Excellent Internship & Co-Op Program 2025" aims to create learning experiences through practical work in relevant fields, preparing students before entering the real world of work for 72 person and providing opportunities to demonstrate potential through the creation of special projects (project-based learning) that apply knowledge from internships in a concrete, to cultivate new generation labour skills that meet market demands, which are crucial for career growth, and to prepare them towards becoming quality personnel in the future.

- New graduate recruitment program from youth employment activities (Job Fair) at universities to provide job opportunities for young people.

Employment of Persons with Disabilities

Performance of Employment of Persons with Disabilities, 2025

The company supports persons with disabilities to live equally with the general population, participating fully and effectively in society within an accessible and beneficial environment. In 2025, the company provided employment opportunities for 18 persons with disabilities, comprising 8 males and 10 females. The company has fully and timely remitted additional funds to the Fund for the Promotion and Development of the Quality of Life for Persons with Disabilities, in accordance with Section 34 of the Persons with Disabilities' Quality of Life Promotion and Development Act B.E. 2007 by the Department of Empowerment of Persons with Disabilities (DEP), Ministry of Social Development and Human Security (MSDHS).

- Employment of Persons with Disabilities under Section 33: 14 Employees
- Employment of Persons with Disabilities under Section 35 (Service Contract for Visually Impaired Massage Therapists): 4 Persons

Projects for Persons with Disabilities.

- The Company collaborates with the Thai Health Promotion Foundation (ThaiHealth), government agencies, and the Social Innovation Foundation network to promote positive perspectives and attitudes towards the employment of persons with disabilities. It has joined as a sustainable organization in the employment of persons with disabilities, with the Company being one of five Thai companies serving as a model for employing persons with disabilities for companies that have not yet done so. Furthermore, the company has shared knowledge and methods for connecting employment opportunities between employers and persons with disabilities to foster equal work opportunities and "Open New Perspectives, Understand Persons with Disabilities (Disability Awareness DA 2025)" by recognizing the true potential of disabled workers. This demonstrates a commitment to addressing disability equality on August 15, 2025.

- Support for contracted health massage services from visually impaired persons under Section 35 of the employment of persons with disabilities in Thailand under the Persons with Disabilities' Quality of Life Promotion and

Development Act B.E. 2007, 4 individuals, to promote stable employment and careers for persons with disabilities with dignity, shifting from providing assistance to leveraging specialized expertise to create shared value with the organization. This project not only helps generate sustainable income for persons with disabilities but also contributes to employee well-being by alleviating Office Syndrome symptoms, reflecting a commitment to respecting diversity and concretely caring for personnel.

Promote potential and support the employment of persons with disabilities.

The company is committed to creating opportunities for persons with disabilities through job creation and career development to move towards an equal and sustainable future, enabling persons with disabilities to have employment, income, support themselves and their families, gain self-esteem, and fully participate in society. It promotes the potential and supports the employment of persons with disabilities through employment policies that encourage actions to address diversity, equality, or discrimination based on disability, under the belief that "human potential is limitless regardless of physical ability." The company has set operational directions focused on creating "Shared Social Value" (Creating Shared Value: CSV) by elevating the employment of persons with disabilities from compliance with Legal requirements towards strategic development to enable persons with disabilities to utilize their true potential in working effectively, equivalent to the general population, along with opportunities for dignified career growth. In 2025, the company employed 18 persons with disabilities.

Performance results for 2025	
Number of persons with disabilities employed by the company: 18 people.	● Employed persons with disabilities in various positions, such as Sustainability Officer, etc., totaling 14 positions. ● Contracted massage services by visually impaired persons, 4 positions. ● Contributions to the Fund for the Promotion and Development of the Quality of Life for Persons with Disabilities in Thailand are governed by the Persons with Disabilities' Quality of Life Promotion and Development Act B. E. 2007.
Benefits to the company.	● Comply with laws and reduce risks from fines or rights violations. ● Enhance ESG/CSR image, making the organization recognized in society and capital markets. ● Enhance team potential with specialized skills and new perspectives from persons with disabilities.
Benefits for persons with disabilities.	● Persons with disabilities gain employment and stable income. ● Persons with disabilities possess perspectives, creativity, and specialized skills that are strengths for future work.

Beyond employment, the company places significant emphasis on creating a "Supportive Environment" to eliminate physical barriers and promote equal participation. We believe that sustainable development involves listening to feedback from actual practitioners.

The Company shares experiences through the perspectives of "mentors" (Job Coach/Mentor) who work closely with employees with disabilities, reflecting the dedication to care, collaborative work experiences, and the impressions gained from transforming limitations into creative power. Insights from these sentiments have been used to develop appropriate and targeted employee support guidelines, fostering genuine shared pride among all personnel.

Information, Inspirational Stories.

empowering work and shared value creation between the company and employees with disabilities, through a special public relations series that reflects Facebook Supalai Careers:

1. Public relations media for the employment of persons with disabilities at the company
2. Interviewing the perspectives and feelings of "mentors" who work closely with employees with disabilities.

Overview of methods for determining employee and employer contribution Rates

To become a member of the provident fund, employees are able to apply for membership voluntarily upon their probation. The Company pays contributions to employees at the rate of 3 - 10% (according to the term of office). The Company has allowed employees to choose asset management companies (AMC) and sub-investment plans in accordance with the policies set by the Company under the risk level and needs of employees.

Implementation of Investment Governance Code for Institutional Investors ("I Code") by Company's Provident Fund Committee : Yes

Participation in provident fund membership

Policy and guidelines on promoting savings through the provident fund for non-participating employees

Policy and guidelines on promoting savings through the provident fund for non-participating employees (PVD) : Facilitating automatic PVD enrollment for new employees, Initiatives to encourage employees to achieve sufficient retirement savings, Providing education or information on selecting appropriate investment policies, Other promotional measures

Facilitating automatic PVD enrollment for new employees

To encourage early savings discipline, the Company provides provident fund details on an employee's first day, enabling them to make an informed enrollment decision after probation. Employees retain the right to decline participation, or they can voluntarily adjust their contribution rates and investment policies at any time.

Initiatives to encourage employees to achieve sufficient retirement savings

Acknowledging that employer contributions alone may not suffice for retirement, the Company revised the fund's regulations to allow employee contributions of up to 15% of their salary, exceeding the employer's rate. Additionally, the Company regularly hosts educational seminars and retirement savings activities, while providing accessible fund information on the intranet to help employees effectively plan their financial goals.

Providing education or information on selecting appropriate investment policies

The company provides a diverse range of investment options (Employee Choice), covering debt instruments, equities, and balanced funds that can be adjusted to each individual's risk tolerance, allowing employees to make appropriate investment choices. The company continuously disseminates information and key details of its investment policy (Fund Fact Sheet) through internal communication channels to assist employees in making informed decisions.

Other promotional measures

Promoting financial literacy, debt management, and retirement planning

The Company is committed to sustainably enhancing employees' quality of life and promoting their financial wellness. This initiative aims to build financial resilience and mitigate personal debt issues. Consequently, in 2025, the Company organized a financial literacy seminar program for employees, inviting expert speakers to share insights on three key topics:

1. Tax and Investment Planning: To equip employees with an understanding of tax planning and how to select investment instruments that align with their individual risk tolerance, fostering long-term financial stability.

2. Retirement Planning: To raise awareness about the importance of retirement preparation and estimating future expenses. This enables employees to set concrete savings goals and select investment plans suitable for their life stage.

3. Tax Calculation and Deductions: To educate employees on tax privileges, including accurate and effective methods for calculating and planning personal income tax deductions.

Employee Training and Development (GRI 404-3)

Employee Capability Development

Employee personal development training to enhance abilities or individual skills.

The Company recognizes that true business success depends on quality personnel. Therefore, all personnel must receive systematic and continuous training and development to enhance their potential and capabilities, comprehensively covering both management and employee levels, in line with established goals. The Training and Development Department will conduct individual employee competency gap assessments to create Individual Development Plans (IDPs). Employees will have the opportunity to choose from a variety of learning courses, including online learning, in-house training, or external courses, to ensure that development truly meets their needs and work context.

Personnel Development Strategy based on the 70:20:10 Principle

The Company adopts the 70:20:10 personnel development approach to enhance employee capabilities through various tools and learning methods, as follows:

1. 70%: (Experiential Learning / On the Job Experience) Learning through hands-on experience and actual work, by being assigned or undertaking special projects to enhance potential.

- **On-Boarding Program:** Onboarding program for new employees.
- **Agile Project:** Learning through agile project execution to respond to business needs.

- **OKRs in Action:** Learning through real work development projects aligned with objectives.

2. 20%: (Mentoring and Coaching) Learning through on-the-job training, with supervisors, mentors, or experts providing guidance, instruction, and feedback for continuous development.

- **Leader as Coach in Action:** Developing leadership through practical coaching skills training.
- **Mentorship System:** For new employees, for adaptation and shortcut learning from experienced individuals.
- **Project Coaching:** Coaching by professional project consultants.

3. 10%: (Classroom Training) Learning through classroom training and online systems designed to meet business needs.

- **Internal & External Training:** Internal and external seminars and training.
- **Professional Courses:** Professional courses for specialized expertise.
- **Digital Learning:** Learning through Online Training and Virtual Training systems accessible anytime, anywhere.
- **Knowledge Sharing:** Knowledge sharing activities among personnel within the organization.

Construction Project Training and Skill Development Courses (GRI: 404-1, 404-2, 404-3)

The Company continuously prioritizes the development of construction personnel capabilities by preparing an annual training plan for the construction department for employees and suppliers to train employees, to develop the knowledge, skills, and abilities necessary for performing duties in line with their roles, construction standards, and the Company's business direction. This training plan covers both theoretical and practical training and is used as a framework for systematic personnel development, including:

1. Construction Standards and Work Methods Training

The Company organizes training Standard Detail Usage To directly develop construction knowledge and skills for employees, enhancing understanding of construction processes, quality standards, and safety requirements, which are crucial factors in increasing work efficiency and reducing risks from construction errors. This training is provided to 300 employees, covering relevant roles including engineers and field control teams. The knowledge assessment results, based on the Company's standard criteria, showed that 84% of all participants passed, reflecting the effectiveness of the course in transferring knowledge and applying it to actual work. This ensures employees can use Standard Details correctly, completely, and consistently in all projects, thereby supporting the overall improvement of construction quality and building long-term stakeholder confidence.

2. Skilled Labour Development Training

The Company promotes the development of skilled labour in construction projects by collaborating with manufacturers or suppliers to organize training on the installation of various materials and systems according to manufacturer standards. This aims to enhance construction quality and reduce risks from installation errors, such as:

- **High Rise Projects**

Bricklaying work training

Painting work training

Floor leveling work training

Pipe welding training PPR

- **Low Rise Projects**

Ceiling installation standard training

Exterior lower house painting training

Tile laying standard training

3. Software Usage Training Tableau

The Company supports the development of employees' digital skills and data utilization by providing data analysis tools, such as software Tableau, coupled with training to enhance understanding of its use and promote a data-driven working culture.

Additionally, the Company has developed Data Catalog to serve as a central hub for publishing and managing Tableau dashboards, allowing employees with data access rights to utilize visualizations for monitoring work, analyzing data, and making efficient and systematic decisions in their work and project management.

Training on using digital tools to enhance data-driven work efficiency.

Employee Training and Skill Development Courses (GRI: 404-1, 404-2, 404-3)

The Company believes that employees are the most crucial resource for driving the organization towards sustainable success. Therefore, it has a policy to continuously promote learning and personnel development, focusing on upskilling and reskilling to keep pace with changes in the real estate business and digital technology. The Company is committed to allocating appropriate resources and budget to ensure that employees at all levels receive equal opportunities for knowledge, capability, and career advancement. In 2025, various training channels were provided to employees, as follows:

1. Functional Training Focusing on specialized skills essential for operations, such as:

- Electrical technician training to develop the working skills of engineers and maintenance technicians, with 19 participants.
- Training on the use of RTK cameras (satellite receivers) for 10 personnel from Regional Project Department 1, which aids in project layout Highly accurate pile point setting and land boundary surveying, reducing errors that could lead to costly rework.

2. Employee Training Courses via Supalai University focusing on courses that address competency gaps and developing essential current skills in areas such as Digital, Language, Finance, Health, etc. This serves as a channel to stimulate access to learning resources, enhancing employee skills and capabilities. Knowledge-sharing training activities are provided to boost various skills, and upon successful completion of activities, employees can track their skill development progress by earning EXP to level up. In 2025, there were approximately 151 such activities.

3. Online Training Courses via SkillLane This includes both Virtual training and platform-based training, with knowledge tests after training and certificates awarded to employees upon completion. There are over 478 courses covering all categories, with the Company mandating 3 compulsory courses, namely:

- Understanding PDPA in Practice: Personal Data Protection Law. A total of 323 employees attended the training.
- Fundamental of Corporate Sustainability and Sustainable Development. A total of 345 employees attended the training.
- Data Security & Privacy: Data Security Governance Strategy. A total of 253 employees attended the training.

4. Employee Training Courses via Supalai Skill This includes both Classroom Workshop training and system-based training, with knowledge tests after training and certificates awarded to employees upon completion. There are over 36 categorized courses, with the Company mandating one compulsory course for new employees, Supalai Orientation. A total of 224 employees attended this training.

5. On-the-job / Coaching Learning For new employees, the On-boarding course in the ESS system is mandatory. This is a blended learning approach, combining On-the-job Training and coaching from mentors or supervisors throughout the probationary period (119 days).

6. Ethics and Sustainability (ESG) Training All employees must receive at least one ESG training course per year, such as ESG knowledge, anti-corruption, Diversity & Inclusion, Climate Risk, Fundamental of Corporate Sustainability and Sustainable Development, Human Rights for Real Estate Business, etc. Courses are compiled and publicized to enable employees to further their learning.

7. External Training The Company sent 77 employees to train with various institutions to update new knowledge and develop essential operational skills, comprising 15 supervisors/executives and 62 operational staff. Post-training follow-up evaluations by supervisors showed that 100% of employees developed and applied the knowledge in their work.

8. High-Potential Employee Development (Talent Development)

- **Young Talent Program**

The Human Resources Department selected new generation executives through the Young Talent program to ensure the organization does not lack leaders and can operate business smoothly, with new executives consistently replacing key positions. New leaders are selected based on their leadership potential and work performance, chosen from all functional lines within the Company. In the past year, 137 selected Young Talents have undergone continuous development for the third consecutive year to ensure they possess the necessary skills and knowledge. The selection and determination of who qualifies as a Young Talent each year will be decided by the executives functional lines and selection committee to ensure that these Young Talents can become capable leaders within the organization and are ready to lead the organization forward stably and sustainably.

Project success evaluation.	
Number of employees promoted to leadership positions	28 people, or 20.44% of the 137 selected individuals
Development Period	3 years
Benefits for Employees	● Increasing career growth opportunities and systematic leadership skill development. ● Creating motivation for continuous self-development.
Benefits for the Company	● Effectively building employee engagement and loyalty to the Company. ● Having high-potential new generation leaders ready to drive the business forward stably and sustainably in the long term.

- **Leadership & Succession Development**

The Company has developed a new generation executive development program, which includes various development and learning activities within the company to enhance the knowledge and skills of new executives, enabling them to connect the work of each company unit. New executives act as both learners and instructors to foster peer-to-peer learning and prepare succession plans for key positions, including job shadowing to transfer knowledge and skills from experienced executives to new executives, ensuring an efficient transition.

9. Human Rights Training for Employees and Suppliers

- **Training on Human Rights for Real Estate Business** demonstrates the Company's commitment to internal human rights, such as fair treatment, non-discrimination, and workplace safety. This training focuses on developing skills in Social Risk Management within the supply chain, covering employees at all levels and departments. A total of 331 participants attended the training, both online and onsite. The overall training satisfaction level was 84%.

Human Rights Training for Employees and Suppliers	
Participants (persons)	214 employees
	117 suppliers
Benefits for Employees	● Reducing discrimination and harassment, and creating an environment that clearly promotes employees' understanding of their rights and duties. ● Fostering a culture of diversity acceptance, which enhances psychological safety and organizational commitment. ● Confidence in transparent, fair, and efficient complaint channels and management processes.
Benefits for Suppliers	● Supporting suppliers to apply knowledge in ethically managing labour according to international standards. ● Reducing supply chain risks, helping to screen and prevent human rights violations for smooth business continuity.
Benefits for the Company	● Building confidence in governance and risk management systems. ● Building transparency through internationally recognized declarations of intent.

● **Training course on Fundamental Human Rights Due Diligence via Online with SET** Supporting employees to attend a comprehensive human rights due diligence fundamental course in e-Learning format at the Stock Exchange of Thailand (SET) has developed courses to enable employees and personnel within the organization to conveniently and efficiently access knowledge and develop necessary skills, learning anytime, anywhere. A total of 509 employees participated in the training.

- **Training on Anti-Harassment and Abuse Policy** The Company prioritizes human rights training and communication for all new employees to foster correct knowledge and understanding, and to instill a consciousness of respecting human dignity, equality, and non-discrimination at all levels of work. The training focuses on preventing harassment and abuse in all forms. This training helps employees recognize their roles and responsibilities in performing ethically, in compliance with laws, international standards, and organizational values. In 2025, 100% of new employees received training.

- **Human Rights Seminar: Building Positive Discipline for Modern Supervisors**

The Company organized an academic seminar on Building Positive Discipline for Modern Supervisors, open to managers, supervisors, and employees, with participation available both onsite and online via Google Meet to facilitate attendees from various departments within the organization. The objective of this seminar was to enhance the knowledge, understanding, and skills of supervisors to manage teams with a positive approach, focusing on fostering organizational discipline alongside respect for human rights and good governance principles.

The main content of the seminar covered key issues related to the role of supervisors in overseeing and strengthening team discipline, emphasizing understanding the supervisor's duty to promote appropriate employee

behavior in line with organizational values, as well as providing knowledge about laws and workplace disciplinary regulations so that participants understand the legal framework and correct disciplinary penalties and appropriate disciplinary actions, considering transparent, fair, and human rights-compliant procedures.

The seminar also included case studies of disciplinary offenses, the handling of reports or instances of bullying or harassment, and disciplinary guidelines, enabling participants to analyze and study practical approaches in real workplace situations.

10. DISC Training Course

The Company recognizes that collaboration and adaptive communication skills are the foundation of success. Beyond hard skills training, the Company is committed to investing in behavioral and interpersonal interaction training. It offers DISC courses to provide all employees with tools to understand diverse work styles, resolve conflicts, and build high-performing teams. This training is part of a comprehensive personnel development strategy to ensure all employees can grow and reach their full potential in a diverse organization.

Personnel Development Monitoring and Evaluation

The Company has a systematic post-training follow-up process to ensure that personnel development yields results. This measures the application of knowledge in work or various projects, as well as behavioral changes

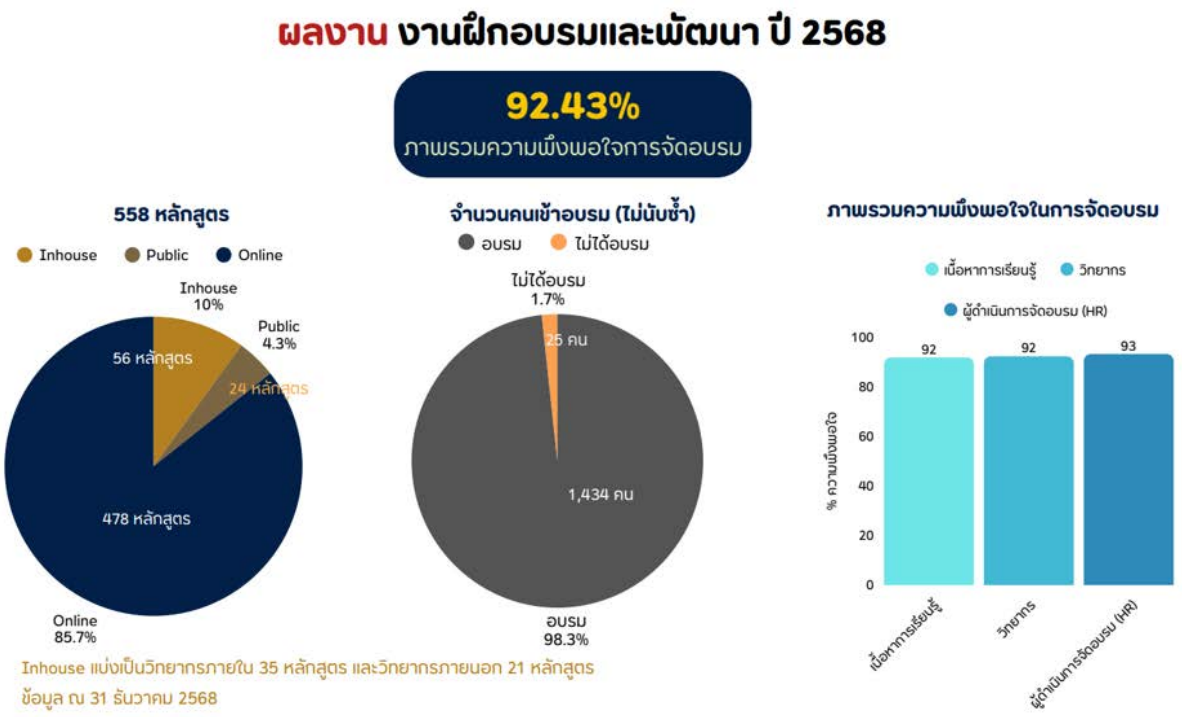
consistent with development courses, such as the Coaching and Feedback course. The Company evaluates and monitors results to align employee development with operational strategies, as follows:

1. Pre/Post Training Evaluation (Pre/Post Test)
2. Application of skills in actual work through semi-annual performance evaluations and annual evaluations for each employee, as well as inter-team evaluations to foster team discussions and overall performance.
3. Competency Gap assessment and measurement to develop individual employees in both hard and soft skills, allowing each employee to know which competencies are below standard. Employees will understand the precise direction for their self-development. In the past year, a total of 1,434 employees, representing 98%, participated in assessments and development to close competency gaps.

4. Annual Inter-Departmental Work Evaluation which will help employees identify strengths and weaknesses in inter-departmental coordination, reduce conflicts, and foster better understanding between units. Additionally, it aids in identifying bottlenecks or slow, redundant processes, thereby increasing the efficiency of work processes through cross-functional improvement. It also promotes a culture of continuous listening and development by encouraging 360-degree feedback at the organizational level, leading to shared responsibility (Accountability) as each department understands how their work impacts other departments, thus creating motivation to perform well).In the past year, a total of 35 departments, representing 100% of all departments, have undergone inter-departmental work evaluations.

Summary of Personnel Development Evaluation and Follow-up for 2025

From the analysis of factors influencing knowledge application, it was found that most employees could remarkably apply knowledge to enhance work efficiency. The evaluation results reflect that 92.43% of employees were satisfied and concretely applied the knowledge to improve work quality. This not only helps employees gain increased skills and abilities but also serves as a crucial factor driving the organization to operate efficiently and achieve its set goals.



In 2025, the Company conducted employee development with a total of 35,061.12 training hours, or an average training hours per person per year, totaling 24.08 hours, which exceeds the 2026 target of 18 hours per person per year and represents a 17.12% increase from 2024. The investment value for training and employee skill development is 4,970,767 Baht, or 3,175 Baht per person per year.

Information on safety, occupational health, and work environment

Health and Safety

Strategies and Management Approaches.

Key Sustainability Issues.	Impacts, Risks, and Opportunities
Safety, Occupational Health, and Working Environment ● Occupational safety of employees and Suppliers/contractors ● The workplace environment **FTSE Russell EGS Theme:** Health & Safety **Supporting the SDGs** 3 8 16	Occupational Health and Safety (OHS) is a critical issue for both the Company and its stakeholders. Ineffective management of occupational health and safety may directly impact the physical and mental well-being, safety, and quality of life of employees, as well as workers of suppliers and contractors operating within construction project sites and office buildings. Such risks not only lead to potential losses in human resources but may also disrupt business operations, affect project timelines and the delivery schedule of residential units to customers, and damage the Companys reputation and stakeholder confidence. In addition, these impacts may result in increased project development costs and additional financial burdens arising from remediation, medical expenses, or penalties imposed under stringent legal and regulatory requirements. Furthermore, the Company has conducted an integrated analysis linking occupational health and safety risks with climate changerelated risks that may affect business operations and financial performance. Accident records, work-related illnesses, and workplace environmental factors are incorporated into the enterprise risk management process. The Company also assesses climate-related risks, such as rising temperatures and extreme weather events, and their potential impacts on the safety of employees and construction workers. The findings are used to support construction planning, cost management, and the development of proactive preventive measures. Therefore, systematic management aimed at reducing workplace risks and promoting employee well-being represents a key opportunity to enhance operational efficiency, achieve zero workplace accidents, and elevate construction quality standards. This approach also strengthens confidence among customers and investors, reinforcing the Companys position as a responsible real estate developer committed to sustainable business practices and the continuous improvement of quality of life for personnel across all sectors.

Policy and Commitment

The Company is committed to fostering safety awareness among employees and ensuring safe working practices across the organization. To achieve this, the Company has established an Occupational Safety, Health, and Workplace Environment Policy, requiring all executives and employees to strictly comply with relevant laws and regulations.
The Company has developed operational guidelines aligned with Thailands occupational health and safety regulations, including the Occupational Safety, Health and Environment Act B.E. 2011, related ministerial regulations, and the Safety Management System Standards B.E. 2022. These frameworks support effective management of workplace health and safety within the organization.

The Company manages occupational health and safety through a Human Rights and Safety Due Diligence process covering employees, contractors, the value chain, and stakeholders who may be affected. This approach aligns with the United Nations Guiding Principles on Business and Human Rights (UNGPs).

Human Rights and Safety Due Diligence Process

1. Identify & Assess

The Company systematically assesses hazards, risks, and potential impacts on health and safety across construction activities, machinery operations, weather conditions, heat exposure, workplace environments, and potential impacts on surrounding communities.

2. Prevent & Mitigate

Risk control measures are implemented based on the Hierarchy of Controls, with consistent safety standards applied to contractors and suppliers.

3. Remedy & Corrective Action

In the event of an incident, the Company provides appropriate remediation, recovery, and support to affected parties without discrimination. Individuals reporting incidents in good faith are protected from retaliation.

4. Effectiveness Monitoring

The effectiveness of mitigation measures is monitored through key indicators, and the results are used to continuously improve preventive measures and work design. Indicators include:

- Recurrence rate of incidents
- Incident closure time
- Acceptance of corrective actions by affected parties
- Trends of systemic risks

5. Worker Participation

Employees and contractor personnel have the right to temporarily stop work if they reasonably believe that an imminent danger exists. Such situations must be reported to supervisors or authorized personnel for risk assessment and corrective actions before work resumes.

The exercise of this right must comply with the Companys safety procedures and is not considered a general refusal to work. It does not affect contractual or legal obligations. The Company also provides confidential and secure channels for reporting safety concerns and complaints while protecting whistleblowers acting in good faith from retaliation or discrimination.

Policy on Safety, Occupational Health and Working Environment

Supalai Public Company Limited places great importance on occupational safety, health, and workplace environment for employees at all levels, as well as for communities and society. All employees are required to strictly comply with relevant laws and regulations and actively participate in improving working conditions and fostering a safety culture within the organization. The Company supports knowledge sharing, safety training, and safety-related activities to ensure that workplaces remain organized, clean, and safe. Performance is continuously monitored, evaluated, and improved to prevent accidents, reduce risks, and create a safe and efficient working environment for all stakeholders.

For more information, please visit: Policy on Safety, Occupational Health and Working Environment

Governance Structure

Safety, Occupational Health and Working Environment Governance

The Company has established a governance structure for occupational safety, health, and workplace environment to ensure effective implementation of policies and continuous performance improvement. Safety management is considered the responsibility of employees at all levels under the supervision of key governance bodies as follows:

- **Board of Directors** The Board oversees and endorses occupational health and safety policies, sets strategic direction, and reviews the effectiveness of the occupational health and safety management system on an annual basis.
- **Corporate Governance and Sustainability Development Committee and Risk Management Committee** These committees, consisting of Board members and senior management, are responsible for establishing policies and strategies, overseeing risk management, and monitoring occupational health and safety performance to ensure alignment with organizational goals.
- **Safety, Occupational Health and Working Environment Committee** The committee consists of senior management representatives and professional safety officers. Its responsibilities include overseeing safety practices, monitoring performance, reporting outcomes, and establishing operational guidelines aligned with legal requirements and Company policies.

In 2025, the Company appointed the Safety, Occupational Health and Working Environment Committee, chaired by Mr. Chaipuk Subromyen, with a total of 10 members from various departments. The committee ensures strict compliance with safety standards, conducts monthly safety inspections, promotes workplace safety initiatives, and strengthens the Companys safety culture.

The committee meets regularly and reports performance quarterly to communicate policies, engage with internal and external stakeholders, share improvement initiatives, and promote collaboration and safety awareness among employees, contractors, suppliers, regulators, and other stakeholders.

Health and Safety Goals (GRI 403-9, 403-10)

Goals	Long-term Goal 2030	Performance in 2025 (%)
No work-related fatalities among employees	0	0
No work-related fatalities among contractors / suppliers	0	0
No severe work-related injuries among employees	0	1.86
No occupational diseases among employees	0	0
100% Employees receiving training on safety, occupational health, and workplace environment		

Strategies and Management Approaches. (GRI 403-1, 403-7)

The Company discloses sustainability information in accordance with the GRI Standards, particularly GRI 403: Occupational Health and Safety (2018). The Company has established operational strategies for occupational health, safety, and workplace environment management to ensure policy implementation across the organization.

The Company promotes employee participation in workplace safety by providing opportunities for qualified employees to apply for positions as safety representatives in the occupational health, safety, and workplace environment function. These representatives participate in meetings between employers and employees to identify issues, provide recommendations, and monitor the progress of corrective actions.

To strengthen workplace safety management, the Company has established an Unsafe Working Condition Reporting System for employees and contractors working within Company premises. This system supports proactive identification and management of safety risks and promotes sustainable workplace safety through the following process:

1. Proactive Monitoring and Observation

The Company promotes a strong safety culture by encouraging employees and contractor workers to actively observe and monitor workplace conditions. This enables early identification of potential hazards and risk factors that may lead to accidents.

2. Incident Notification and Reporting

When unsafe working conditions, machinery, or behaviors are identified, employees or contractors can report the issue through the Unsafe Working Condition Report Form, which is submitted directly to the Safety, Occupational Health and Working Environment Committee for immediate response.

Unsafe Condition Report Form

3. Analysis and Corrective Action

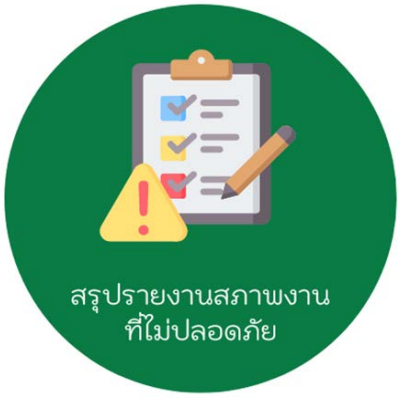
Relevant departments collect and analyze reported information to identify root causes and determine appropriate corrective and preventive measures tailored to each operational area.

4. Follow-up and Restoration of Safe Conditions

Corrective measures are implemented and monitored to ensure that workplace conditions meet the Companys safety standards and to prevent recurrence of incidents.

5. Reporting and Statistical Analysis

All reports of unsafe conditions are recorded and compiled into statistical reports presented to management. These statistics serve as key indicators of the organizations safety performance.



Summary of Unsafe Condition Reports

6. Continuous Safety Development

Accumulated safety data are analyzed to support future planning and improvement of safety initiatives. This knowledge transfer enables the Company to develop policies and preventive measures aligned with potential risks, supporting the goal of achieving Zero Accident.

Performance results for 2025

The Company systematically manages occupational health and safety risks while promoting employee well-being. Safety performance is regularly monitored and evaluated by the Safety, Occupational Health and Working Environment Committee.

In 2025, safety inspections were conducted across 60 construction projects, comprising Low Rise Projects and High Rise Projects, as well as the Companys headquarters. Several improvement opportunities were identified, including enhancements to the occupational health, safety, and environmental management system, such as training plans and management reviews.

During the year:

- 100% of employees received training on safety, occupational health, and workplace environment.
- No work-related accidents resulted in severe injury, permanent disability, or fatalities among employees.

1. Identification and Assessment of Occupational Health and Safety Risks (GRI 403-2)

The Company has established processes to identify and assess occupational health and safety risks affecting employees and contractor workers. The approach focuses on hazard identification, risk analysis, and the implementation of appropriate preventive measures to reduce the likelihood of accidents, injuries, and health impacts while promoting a safe working environment.

Key Risk Factors	Affected Stakeholders	Potential Impacts	Preventive Measures
1. Workplace Safety and Working Environment	● Employees ● Contractor workers ● Communities surrounding project sites	Working at height, falls from height, severe injuries or fatalities	● Install fall protection equipment such as guardrails and safety harnesses ● Provide regular safety training and awareness programs ● Inspect equipment before use
		Falling construction materials injuries caused by impact or crushing	● Implement 5S workplace management to maintain cleanliness and organized material storage ● Require the use of personal protective equipment (PPE) ● Establish hazard zones and communicate safety information through safety signage at construction site entrances
2. Construction Machinery and Equipment	● Employees ● Contractor workers	Injuries from being caught in, struck by, or impacted by machinery	● Conduct regular machinery inspections ● Allow operation only by trained personnel ● Install appropriate safety guards and protection devices
3. Occupational Health	● Contractor workers	Fatigue, fainting, or heat-related illnesses such as heatstroke due to hot weather conditions	● Provide appropriate rest periods ● Provide drinking water stations and rest areas ● Ensure availability of first aid kits

2. Occupational Health and Safety Audits

Occupational health and safety audits are conducted by the Safety, Occupational Health and Working Environment Committee, with results reported regularly to senior management. Audits are performed continuously for both new construction projects and projects under development, and are linked to the Companys Environmental, Social, and Governance (ESG) framework and strict safety performance indicators. Audit results are applied to strengthen collaboration with employees, contractors, and suppliers through the following actions:

- **Contractor Evaluation:** Audit results are used as part of contractor performance assessments to ensure compliance with the Companys safety standards.
- **Continuous Improvement:** Corrective Action Plans are developed for identified issues, including defined implementation timelines and additional training for high-risk areas.

ESG-Integrated Safety Audit Plan

Safety inspections cover three key operational areas:

- Construction site offices and sales offices
- Construction areas within project sites

- Worker accommodation areas

Audit Items	E: Environment	S: Social	G: Governance
● Workplace environment conditions			/
● Structural safety inspection of site offices	/	/	/
● Fire prevention and protection readiness		/	
● Storage and organization of construction materials		/	
● Availability of first aid kits		/	
● Availability of personal protective equipment (PPE)		/	
● Electrical system and wiring inspection		/	
● Working-at-height safety inspection		/	
● Safety warning signage		/	
● Inspect accommodation hygiene (cleanliness, ventilation)	/	/	
● Availability of basic facilities (toilets, lighting)	/	/	
● Access to clean and hygienic drinking water		/	
● Waste and waste management	/		

The Company has established a system to collect occupational health and safety audit results from each project. The assessment results are reported and communicated to employees through the Companys internal Intranet Safety Society system, serving as a guideline for collaborative and safe working practices across the organization.

Safety inspection record system

Low-Rise Project record form

ESG Assessment Results	Number of Projects Assessed	Contractors Passing the Assessment	
		Number (persons)	Proportion (%)

Incident Management and Oversight Process (GRI 403-1, 403-7)

In the event of an accident occurring at a project site, the Company places the highest priority on the safety and well-being of employees, contractors, and suppliers. The Company is committed to managing occupational health and safety systematically to reduce and prevent workplace accidents. Accidents may arise from various causes, such as improper material storage, unsafe work practices, or failure to use personal protective equipment (PPE). Therefore, the Company has established a structured incident management process to minimize losses and prevent recurrence. This process includes root cause analysis and the implementation of preventive measures, consisting of the following key steps:

1. Emergency Response and Assistance

The Company provides clear accident reporting channels for construction sites, including QR codebased reporting through a Google Form. Information about reporting procedures is communicated to all employees to ensure prompt reporting and response.

2. Investigation and Root Cause Analysis

Relevant personnel, such as project staff or site engineers, must report initial incident information immediately. Supervisors are responsible for conducting the investigation, as they are most familiar with operational processes and potential risks. The investigation follows a structured six-step process to ensure comprehensive data collection and effective preventive planning.

3. Impact Assessment and Remediation

The Company evaluates the impact of the incident comprehensively, including employee injuries, property damage, and potential reputational impacts. Supporting affected individuals is the highest priority. The Company provides appropriate medical care, compensation in accordance with legal requirements, and psychological support for affected personnel.

4. Corrective and Preventive Actions

Measures are implemented to prevent recurrence of similar incidents. For example, if improper material storage is identified as the root cause, storage procedures will be improved. If equipment failure is identified, the equipment will be repaired or replaced immediately. The Company emphasizes regular equipment inspections before use to ensure safe operations.

5. Review and Improvement of Safety Measures

The Company strengthens safety measures by increasing inspection frequency, improving operational guidelines, and adopting new technologies that help reduce workplace risks.

6. Communication and Safety Culture Development

The Company communicates safety procedures and best practices to employees through training programs and awareness activities. These initiatives promote safe worksite management and strengthen occupational health and safety awareness across the organization.

Occupational Health, Safety and Workplace Environment Communication Channels

1. Internal Communication Platforms: The Company communicates safety-related information through its internal intranet platform, Safety Society, as well as the Safety Society LINE Group, which serves as a channel for sharing safety updates and workplace safety information among employees.

2. Safety Awareness and Reporting Channels: Safety awareness is promoted through informational posters and safety performance statistics displayed in the workplace. These materials communicate reporting channels for unsafe working conditions and encourage timely corrective action to reduce and prevent workplace accidents. Employees and contractor workers can report unsafe conditions via telephone or QR Code reporting systems.

Project/Activities to prevent and reduce occupational health and safety risks (GRI 403-3, 403-4, 403-5, 403-6)

For Employee

1. Occupational Health Services

The Company provides workplace-related health services to support employee well-being, including annual health check-ups and vaccination programs. Employees receive an annual influenza vaccination once per year, as

influenza is an endemic disease that occurs regularly each year. Vaccination is considered one of the most effective preventive measures to ensure employee safety and good health, in accordance with recommendations from the World Health Organization (WHO).

2. Communicable Disease Prevention and Health Education

The Company promotes disease prevention by providing health education and vaccination programs, including hepatitis B vaccination. In addition, the Company organizes an annual health seminar to enhance employees health awareness. In 2025, the seminar titled Outsmart NCDs: Preventing Non-Communicable Diseases was held on 29 September 2025, providing employees with knowledge about major non-communicable diseases (NCDs) such as diabetes, hypertension, cardiovascular disease, obesity, and cancer.

- Annual health check-ups for employees (2025)

- Influenza and hepatitis B vaccination programs

- Annual health awareness seminar: Outsmart NCDs Preventing Non-Communicable Diseases

3. Health Promotion Program Health Contest

The Company organized the Health Contest program to encourage employees to maintain healthy lifestyles and achieve appropriate body weight and physical health standards. To support this initiative, the Company developed a digital monitoring system using AppSheet technology, which enables continuous, systematic, and transparent monitoring of employee health indicators. The program focuses on behavioral health improvement through monitoring key indicators such as:

- Body measurements (waist, hip, and upper arm circumference)
- Body Mass Index (BMI)
- Waist-to-height ratio, an important health risk indicator

Program Results 2025

- 205 employees participated, representing 14.05% of total employees
- 69% of participants improved their BMI to within the standard range
- 54% of participants reduced their body fat levels

These results demonstrate that the health promotion program effectively improves employee well-being, reduces risk factors associated with non-communicable diseases (NCDs), and supports sustainable healthy lifestyle behaviors among employees.

4. Occupational Safety Training

The Company provides annual occupational safety training for both new and existing employees in accordance with the Occupational Safety, Health and Environment Act B.E. 2011. Training programs aim to enhance knowledge of workplace safety, occupational health, and relevant regulations. The Company also conducts basic firefighting training and emergency preparedness exercises to ensure employees can work safely. In 2025: 31 new engineers participated in safety training, representing 100% of all newly recruited engineers.

5. Fire Safety and Emergency Preparedness Training

The Company encourages employees to participate in basic firefighting training and fire evacuation drills at the headquarters annually. In 2025: 64 employees participated, representing 54.24% of newly recruited employees.

6. Hazard Awareness Training

The Company provides online training on hazardous and unsafe working conditions to reinforce safety awareness among employees working in higher-risk environments. In 2025: 166 employees participated, representing 100% of employees High Rise Projects and Low Rise Project.

7. Safety Coin Activity

The Company organizes the Safety Coin, encouraging employees to participate in safety initiatives and enhance their awareness of workplace safety practices that protect both themselves and their colleagues.

8. Safety Quiz

The Safety Quiz activity is conducted online to promote safety awareness by testing employees knowledge of workplace safety practices through Google Forms. The activity was promoted through internal communication channels such as e-mail, Line Supalai Connect, Supalai Life. Employees were able to participate in the online quiz between 130 November 2025.

The Company evaluates employees knowledge and understanding of workplace safety through safety awareness assessments to ensure that employees can perform their duties safely and reduce the risk of workplace accidents.

This assessment is conducted annually as part of the Companys safety awareness program.

In 2025, 1,456 employees participated in the safety knowledge assessment. Among them, 1,345 employees achieved a passing score of 80%, representing 92% of total employees.

Target Group	Benefits for Employees	Benefits for the Company
1,456 employees	Improved safety awareness and behavioral change toward safer working practices	● Reduction in workplace accidents ● Strengthening of the organizational safety culture

For Contractor Workers and Suppliers

1. Safety Talk Before Entering Construction Work Areas

The Company provides Safety Talk sessions before contractor workers enter construction sites. These sessions emphasize workplace safety awareness and review safe work practices during construction operations. Topics include hazard awareness related to tools and equipment, proper use of personal protective equipment (PPE), accident prevention measures, and emergency response procedures. Workers are also reminded to maintain cleanliness and orderliness within and around project areas.

2. Emergency Preparedness and Fire Safety Training

The Company collaborates with contractors and suppliers to strengthen safety measures for the protection of life and property. Emergency evacuation plans are established for engineers and construction workers across all projects. In 2025, the Company conducted training, demonstrations, and practical exercises on the proper use of fire extinguishers to ensure that workers understand how to respond effectively in emergency situations.

Occupational Safety, Health, and Environmental Statistics (GRI 403-8)

The Company places great importance on creating a safe working environment and promoting the well-being of employees in order to prevent and reduce work-related illnesses. Various initiatives have been implemented, including improvements to workplace conditions such as temperature, lighting, noise levels, and dust control, safety and health training programs, annual health check-ups, and health promotion activities. The Company also provides employee welfare and medical benefits covering both physical and mental health. As a result of these efforts, no cases of work-related illnesses were reported in 2025.

The Company is committed to creating a safe working environment and promoting the health of all personnel. The Company's health and safety management system covers employees, construction workers, and contractors as follows:

Activity	Number (Persons)	Proportion (%)
● Providing Safety Training on Construction Work to New Employees	31	100%
● Providing Appropriate Personal Protective Equipment (PPE) for the Task and Risk	550	100%
● Arranging an Annual Health Check-up for Personnel	1,370	97%*

Freedom of Association and Collective Engagement

Welfare Committee and Supalai Relations Club

The company adheres to international labour rights principles by supporting and promoting employee participation in welfare management and conditions. Concrete operations are carried out through the "Welfare Committee and Supalai Relations Club," established under the Labour Protection Act B.E. 2541 (1998). The committee comprises 12 employee representatives from various departments, serving a 2-year term (2024-2025), selected through a transparent process with clear terms of duty. The operational roles and responsibilities of the Welfare Committee within the establishment are as follows:

1. To jointly discuss with the employer to arrange welfare for employees.
2. To advise and provide recommendations to the employer regarding employee welfare arrangements.
3. To inspect, control, and oversee the welfare arrangements provided by the employer to employees.
4. To propose opinions and guidelines for beneficial employee welfare to the Labour Welfare Committee.

This mechanism serves as an employee representative for discussions and negotiations (social dialogue) with the employer, to recommend beneficial welfare arrangements, monitor and oversee welfare provisions to ensure compliance with agreements, and act as a crucial channel for receiving feedback and suggestions via a digital system (QR code) to reflect the true needs of personnel. Such operations demonstrate the company's commitment to maintaining good relationships between employers and employees and respecting the right to association to create fair and sustainable labour standards, with management meetings, follow-ups, and joint reports held monthly.

In 2025, the company reported no incidents or situations of bullying in the workplace.

Establishment of the Welfare Committee

The company supports and promotes employees' freedom to establish a Welfare Committee within the establishment, in accordance with the Labour Protection Act B.E. 1998, to present opinions and negotiate with employer representatives for the appropriate development of other welfare benefits beyond legal requirements and in line with employee needs. Therefore, an election was held for the Welfare Committee and Supalai Relations Club, serving a 2-year term (2024-2025), on December 12, B.E. 2023, replacing the previous Welfare Committee, whose term had expired. A total of 14 employees applied to be selected for the Welfare Committee and Supalai Relations Club, and 12 were ultimately selected as committee members. A total of 725 employees exercised their voting rights, representing 50.32% of all employees.

Key Sustainability Issues.	Impacts, Risks, and Opportunities.
Consumers Responsibility ● Product and Service quality. ● Customer Relationship Management. ● Responsible Marketing and Communication. **FTSE Russell EGS Theme:** Customer Responsibility **Supporting SDGs.** 8 16	The Company is committed to conducting its business responsibly toward customers and stakeholders. Operations are managed in accordance with the ISO 9001:2015 quality management standard, covering processes from planning and design to operational control, quality inspection, and data analysis. This systematic approach supports continuous improvement and enhances operational efficiency across the organization. The Company strives to continuously improve the quality of its products and services to meet customer needs and expectations while delivering maximum value. At the same time, the Company upholds transparency, integrity, and accountability to maintain stakeholder trust. Stakeholder feedback and recommendations are regularly considered and integrated into policy development and operational practices to further strengthen service quality and sustainable business performance. The Company has conducted a Materiality Assessment by evaluating Impacts, Risks, and Opportunities related to customers in accordance with the Double Materiality principle. The assessment considers both impacts on consumers and potential business risks that may affect the Companys reputation, human rights-such as the rights to safety, privacy, and access to accurate information-stakeholder confidence, and financial value. Key risks identified include product quality risks, consumer safety, data privacy and protection, communication that may lead to misunderstanding, and legal risks related to consumer protection. To address these risks, the Company has established preventive measures and internal control systems and continues to monitor their effectiveness through executive-level oversight to ensure effective risk management and continuous improvement.

Strategies and Management Approaches.

Responsible production and services for customers.

The Company discloses sustainability report data according to international GRI Standards criteria for customer responsibility, marketing, and communication, under GRI 416: Customer Health and Safety, GRI 417: Marketing and Labeling, and GRI 418: Customer Privacy. The company operates under the international standard ISO 9001:2015, emphasizing every process from planning and design, Control, inspection, and data analysis to continuously improve and develop work systems by the company is committed to continuously improving product and service quality for the benefit of consumers and considering the company's stakeholders, as declared in the quality policy and communicated to all employees for awareness and compliance.

The Company is certified with ISO 9001:2015, which focuses on systematic management processes in all operations, allowing for traceability. It recognizes the organizational context that reflects the relationship between the business and its stakeholders, understanding their needs and expectations to align operational direction. Furthermore, it emphasizes risk management and considers operational opportunities as a fundamental basis for fostering a company-wide risk management culture, leading to the company's continuous sustainable development.

Continuous operational improvement and development.

The Company continuously improves various processes in all departments.

1. Define the organizational context regarding quality objectives, strategies, and the impact on the organization's ability to achieve expected outcomes, considering issues related to legal, social, cultural, environmental, knowledge, and organizational capabilities.
2. Identify key stakeholders of the company, including employees, customers, shareholders/investors, communities/society, suppliers/retailers, contractors, government agencies, external regulatory bodies, banks, and media, who impact the company's ability to deliver products in accordance with agreements with customers, legal requirements, and relevant regulations.
3. Define the necessary organizational knowledge for the operation of all processes, with knowledge being regularly reviewed and updated.
4. Consider risks and opportunities in all processes to ensure that all employees are aware of risk management approaches and opportunities that can lead to product and service development. This is to promote a risk management culture and enable the quality management system to achieve its defined objectives.
5. Review the "Quality Policy" to align with organizational goals and context, thereby supporting the organization's sustainable strategic direction and complying with ISO 9001:2015 requirements.

Product quality and standard development. (GRI 416-1)

The Company assesses product health and safety risks covering 100% of projects under construction and customer delivery, considering the entire Project Life Cycle from design, construction, delivery, and service.
after-sales. In 2025, there were no significant incidents related to customer safety or non-compliance with consumer health and safety laws.

In addition to the risk assessment process, the company has implemented risk management and operations in accordance with the international standard ISO 9001:2015 for quality management systems. This ensures that the company's products and services meet specified quality and safety standards, comply with legal requirements and customer expectations, effectively manage risks that may affect consumers, and are continuously monitored and controlled under the oversight of senior management.

The Company is committed to delivering quality products and services, and therefore strives to develop production processes to elevate standards. products to international standards, for which the company has been certified. Quality according to international standards. ISO 9001:2015. The company has a problem analysis process to lead to corrective actions, system improvements, risk management guidelines, and prevention of recurring problems. It also has tools for continuous improvement of work systems to connect all organizational processes, enabling the most efficient planning of sales, construction, and delivery of houses and condominiums, as follows.

1. Setting Key Performance Indicators (KPIs) to reflect operational efficiency and effectiveness, by reviewing indicators and targets of all departments to align with the company's policies and goals. This also includes emphasizing customer needs and expectations, focusing on measuring performance based on the principle that "customers are important individuals," encompassing both internal and external customers, to foster collaboration in all aspects and continuously improve the company's quality and service standards, such as.
   - Measuring customer satisfaction in terms of after-sales service, repair services, project management, information provision, and service speed.
   - The process for receiving complaints from customers and stakeholders, ensuring that all departments respond to complaints and resolve issues promptly. The company analyzes customer complaints, defines preventive measures for recurrence, and continuously monitors corrective actions. Furthermore, the company has established procedures, work instructions, and communicated them to all employees for awareness and compliance with the defined steps.
   - Measurement of the process for delivering houses/condominiums to customers, by evaluating quality and delivery time to ensure adherence to agreed-upon schedules with customers.
2. Requiring all departments to continuously improve their work systems in accordance with ISO 9001:2015 standards, with improvements and developments resulting from the following actions.
   - Data analysis and operational performance review.
   - Performance Measurement (KPIs: Key Performance Indicators).
   - Data collection and customer satisfaction measurement.
   - Improvement and development of work systems based on recommendations from ISO 9001 system monitoring: 2015, from both the Certifying Body and the company's Internal Quality Auditors (IQA).
   - Requires periodic review of the system and management processes in the operating principles (Work Instructions, operational procedures, and other related documents) to ensure that the management system is appropriate, sufficiently comprehensive, and continuously developed.

3. Establishing criteria for selection, procurement, operational control, and evaluation, covering all outsourced processes to ensure that external contractors engaged by the company meet the specified quality and qualifications, and that procurement is conducted transparently.
4. Close control and monitoring of operations by senior management in various forms, such as.
   - ISO 9001 System Monitoring. : 2015 by the ISO 9001 certifying body.

- Internal quality system monitoring by company-appointed employees (Internal Quality Audit / IQA), with audit results used to continuously review and improve processes.
- Monitoring the resolution of customer complaints and tracking ongoing complaints from the previous month to ensure that responsible parties are urged to take immediate corrective action.
- Bringing issues related to work processes and operational-level risks to the Quality System Review and Improvement Committee meeting, where representatives from management of all departments discuss and then improve work procedures and define risk management guidelines.
- In every meeting, risk issues are discussed to define risk management approaches that are crucial for business operations, such as; Operations impacting the environment, society, community, operations non-compliant with legal requirements or external regulatory criteria, customer satisfaction, product quality, company reputation, safety, corruption.

Enhancing Service Quality and Communication. (GRI: 417-1, 417-2)

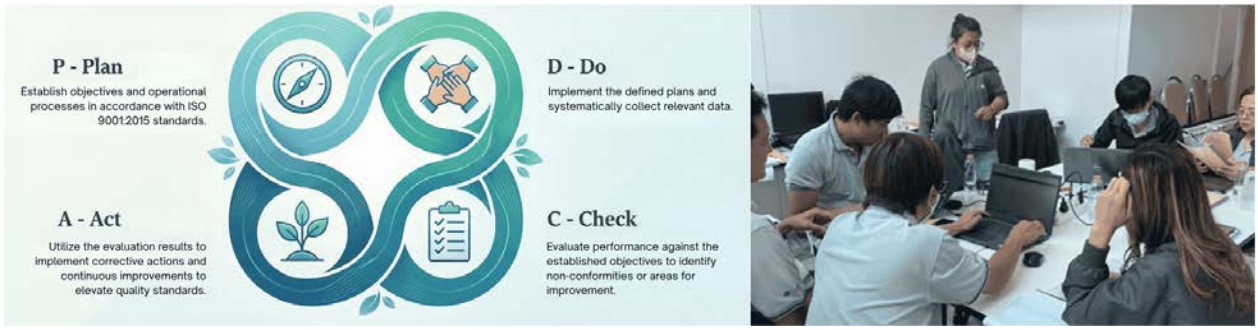
The Company conducts marketing communications based on principles of accuracy, completeness, transparency, and non-misleading information (No Misleading or Deceptive Marketing) to protect consumers' right to accurate and verifiable information. All advertising content and public relations documents must undergo internal review and approval processes before public dissemination. To promote such governance, the Company has prepared "Communication and Advertising Regulations," which systematically define criteria and control processes, covering key issues as follows.

- Establish clear criteria for presenting product and service information, including reference data, to ensure that the information is accurate, truth and traceable.
- Requires the legal department or relevant units to review and approve all advertising content before publication, along with reviewing regulations and guidelines at least annually. once, to comply with changing laws and regulations.
- Provide channels for complaints and mechanisms for correcting misleading communications, allowing for prompt correction, adjustment, or removal of content.
- Provide regular training for employees involved in marketing communications on legal requirements, marketing ethics, and the company's internal guidelines to prevent risks from the outset.

This approach reflects the company's commitment to conducting business responsibly, transparently, and in compliance with consumer protection requirements, both in terms of internal governance and managing risks related to reputation and stakeholder trust.

In 2025, the Company had no significant violations related to marketing communications or labeling.

The Company is committed to delivering quality products and services, and therefore enhances employee engagement. Over 250 experienced, knowledgeable, capable, and skilled employees from all departments have been appointed as ISO 9001:2015 system auditors (Internal Quality Audit / IQA) Employees thus participate in monitoring the operations of other departments to ensure compliance with ISO 9001 standard requirements: 2015 and the operational procedures defined by the Company. This allows both auditors and auditees to learn and understand inter-departmental work processes, resulting in more efficient internal coordination.



The Company developed the "SUPALAI SABAI" application, a comprehensive home management application that enhances living convenience in all dimensions. It supports two operating systems, iOS and Android, and is available in two languages, Thai and English, to improve service accessibility and speed for customers. This includes After-Service, a comprehensive after-sales customer care service for reporting repairs, scheduling appointments, and checking repair statuses, among others. The Company focuses on marketing and communication approaches that encompass ethical principles, sustainability, and social responsibility, prioritizing the best interests of customers.

Customer Relationship Management.

The Company has processes for managing, analyzing, and developing relationships with both new and existing customers. The ultimate goal is to increase satisfaction, build brand loyalty, and boost long-term sales through insights. To meet customer needs, channels are provided for customers to communicate with the company, including expressing opinions, suggestions, and complaints regarding products, services, or other matters, via Supalai Contact Center 1720 and online channels such as social media, email, and the company's website. A central unit handles repair notifications, complaints, suggestions, feedback, and provides information to customers or those interested in projects. Additionally, the company's senior executives regularly visit various projects to identify issues, which leads to prompt corrective or preventive measures. These actions by the company aim for continuous improvement in product and service quality to meet customer needs and ensure the satisfaction of customers and stakeholders.

SUPALAI Ins 1720 LINE

Data security.

Protection of customer personal data. (GRI: 418-1)

The Company recognizes the importance of protecting data privacy and security, and therefore has established a "Personal Data Protection Policy" to ensure that directors, executives, and employees at all levels adhere to guidelines for proper data retention, access, and use, especially for sensitive data concerning the company or stakeholders, in accordance with the Cybersecurity Act B.E. 2019 and the Personal Data Protection Act B.E. 2019.

The Company implements appropriate personal data security measures, including administrative, technical, and physical safeguards regarding access to or control over personal data, to maintain the confidentiality, integrity, and availability of personal data. This is to prevent unauthorized or unlawful loss, access, use, alteration, correction, or disclosure of personal data, in accordance with applicable laws.

The Company implements appropriate personal data security measures, including administrative, technical, and physical safeguards regarding access to or control over personal data, to maintain the confidentiality, integrity, and availability of personal data. This is to prevent unauthorized or unlawful loss, access, use, alteration, correction, or disclosure of personal data, in accordance with applicable laws.

Additionally, The company has appointed a Data Protection Officer (DPO) responsible for overseeing legal compliance and reporting directly to senior management. Additionally, cybersecurity risk assessments are conducted annually, and system tests (Vulnerability Assessment / Penetration Test) are performed to prevent data breaches.
In 2025, there were no data breach incidents requiring reporting to regulatory authorities.

Management of data breach complaints.

The Company provides channels for stakeholders to report incidents of confidential or personal data breaches and has a process for fact-finding. In cases of personal data complaints, the Data Protection Officer will consider and report to executives in sequence. Channels are provided for customers to submit complaints via Supalai Contact Center 1720, as well as a whistleblowing channel for reporting suspected misconduct or corruption via anti-corruption@supalai.com

Operational results for 2025: The company received no customer complaints regarding personal data.

Customer Complaint Management.

The Company's complaint handling mechanism is designed to align with effectiveness criteria according to. UNGP, namely transparency, accessibility, fairness, predictability, and continuous improvement.

Operational results for the year. In 2025, the company was able to resolve and close 99.17% of complaints within the SLA framework (1,314 out of 1,325 complaints).

1720

The channel through which customers most frequently submitted complaints.

In the event of customer complaints, the company closely controls and monitors operations through senior management. Follow-up on results. Resolving customer complaints and tracking ongoing complaints from the previous

month to ensure that responsible parties take immediate corrective action. This also includes bringing issues related to work processes and operational-level risks to the Quality System Review and Improvement Committee meeting, where representatives from management of all departments discuss and then improve work procedures and define risk management guidelines to maximize customer satisfaction.

In cases where customers report problems or complaints via Supalai Contact Center 1720, the company has a Ticket Expire SLA (Service Level Agreement) system. Employees must close cases within 48 hours of receiving them. The service SLA consists of 4 main processes:

1. Receiving and handling complaints.
2. Coordination with responsible parties.
3. Corrective actions and complaint management.
4. Notifying progress and inquiring about satisfaction.

Performance and outcomes of customer management : Yes

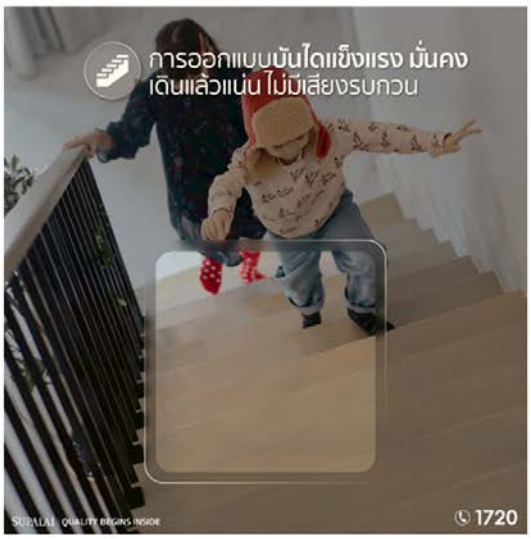
Continuously developing and improving based on customer feedback.

In 2025, the company focuses on listening to the Voice of Customer (VOC) and customer insights, exploring ways to utilize customer feedback to improve products and services as a core driver for the organization to become a Customer-Centric Organization, aiming to enhance satisfaction and create sustainable value in 6 areas, namely:

1. Communication Enhance listening channels through Supalai Contact Center 1720 and the Supalai SABAI application, as well as various online channels such as Facebook, e-mail, etc., along with developing a tracking system feature for customers to monitor work status in real-time for transparency and speed in communication.

2. Quality and Excellent Service Utilize satisfaction survey results to improve repair work standards, focusing on reducing operational time and implementing a post-completion follow-up system to prevent recurring issues.

3. Residential Design that Meets Lifestyle Needs Apply Universal Design principles to develop flexible living spaces for all customer groups, ensuring safety and practical usability for members of all ages, thereby creating long-term residential value.



4. Digital Innovation Enhance convenience with an online repair notification system and digital loan transactions to streamline processes and create a modern, seamless experience.

5. Sustainability and Social Responsibility (ESG & Sustainability) Integrate environmentally friendly concepts into project development and organize stakeholder engagement activities to create a balance between business and community impact.

6. Resident Care in Emergency and Crisis Situations Establish measures to assist residents and ensure internal communication readiness to provide support during emergencies or disasters such as earthquakes or floods, thereby ensuring the company is prepared to care for and stand by residents in all situations.

Customer Management: Customer Satisfaction

Customer satisfaction

Customer Satisfaction Evaluation

The Company mandates monthly customer satisfaction evaluations through surveys to rate customer satisfaction in terms of information/communication, service, and quality. In 2025, with a perfect score of 10, the Company achieved a customer satisfaction score of 9.35, which is higher than the target score of 9.25 and represents a 3.66% increase from 2024. The Company has analyzed customer recommendations from these evaluations and held meetings with relevant departments to plan the development and improvement of products, services, and business processes to further enhance the customer experience. The trend of customer satisfaction scores during The past three years have shown continuous improvement, reflecting the efficiency of the quality management system and responsiveness to customer feedback.

The Company utilizes these survey results as one of the strategic indicators reported to senior management and links them to the performance evaluations of relevant departments.

Creating Value for Communities and Society (GRI 413-1, 413-2)

Strategies and Management Approaches.

The Company has strategies and operational guidelines under "Supalai Srang Dee focusing on enhancing the quality of life and sustainably developing the environment of surrounding communities and society. It drives projects that create positive social impact, covering infrastructure development, reducing impact to minimize environmental impact, and strengthening communities to grow robustly alongside the sustainability of the business and society as a whole.

The Company focuses on promoting local employment and procurement, prioritizing the selection of labour, contractors, and entrepreneurs in areas near developed projects to generate income and strengthen the economic resilience of communities. This operation helps reduce impacts from external labour migration, lowers transportation costs, and promotes community participation in the project development process, leading to mutual sustainable growth between the Company and local communities.

The Company recognizes its crucial role as part of the society and communities where it operates. Real estate project development is not solely aimed at meeting customers' housing needs but also at creating value in social, environmental, and community dimensions comprehensively and sustainably, amidst complex challenges such as balancing business expansion with environmental conservation, managing limited resources, and responding to higher expectations from consumers, investors, and society regarding transparency and social responsibility. To overcome these challenges, the Company has established clear management guidelines and practices for community engagement and development, as follows:

Guidelines for community engagement and development

1. Shared Value Creation with Communities

The Company prioritizes project development that not only creates business value but also generates comprehensive value for communities. It promotes environmentally friendly project design according to energy-efficient building criteria, reduction of greenhouse gas emissions, and increasing green spaces within project areas, along with local employment and procurement to support the long-term well-being of communities.

2. Supporting education and youth potential development

The Company recognizes that investment in human resources is a crucial foundation for sustainability and thus focuses on supporting educational projects. Development of vocational skills and promotion of youth potential in

community areas, such as providing scholarships, organizing skill development training, and creating opportunities to access essential knowledge for career and quality living.

3. Strengthening communities and society

The Company promotes activities that enhance the quality of life and build resilience for communities, such as basic infrastructure development projects, community healthcare, support for natural resource conservation, and participation in disaster relief. All these efforts aim to create strong communities capable of effectively coping with economic, social, and environmental changes.

4. Building partnerships with networks

The Company recognizes that creating positive change for communities and society requires collaboration from various sectors, including the government, private sector, and civil society organizations. The Company therefore focuses on building strategic partnerships in community development projects to exchange knowledge, resources, and innovation, which will help make operations more efficient and sustainable.

5. Transparent communication and engagement

By using a participatory process of Early Engagement Prior to project approval providing opportunities for communities to participate in expressing opinions and reflecting needs, which will help the organization adjust its operational guidelines to align with the actual context and expectations of stakeholders. Community feedback is used to improve project design, traffic plans, and measures to reduce noise and dust impacts, along with the disclosure of responses to comments (Response Disclosure) to the community consistently every time operations are carried out.

With the comprehensive management guidelines and practices mentioned, the Company aims to create sustainable positive changes for communities and society, alongside stable long-term business growth, which will lead to becoming an organization truly contributing to national development. Therefore, the Company has established engagement approaches and actions to respond to the needs and expectations of communities/society, as follows:

Community/Social Engagement Approaches	Company's approaches to responding to needs and expectations to communities/society
● Public hearings in the construction area before, during, and After construction ● Interviews, providing feedback in the survey of impacts on communities around the project ● Providing advice, suggestions, and complaints through the Company's communication channels, such as Supalai Contact Center 1720, e-mail, various online media, etc.	● Human rights policies are established. ● Specify construction duration and traffic routes, and inform stakeholders of unsafe areas/zones ● Installation of signs and symbols to communicate safety in construction work ● There are various channels for receiving complaints from communities. ● Implement community development activities around projects/activities with communities and society/community development, such as infrastructure development (e.g., groundwater drilling, public street lighting, canal dredging, etc.). ● Instilling awareness among employees regarding social and environmental responsibility

Approaches to sustainable community and social development through business processes

The Company establishes guidelines for engagement to sustainably develop communities or address social issues through business processes, which enables the Company to effectively manage negative impacts and appropriately create positive value for communities, fostering sustainable relationships and stakeholder acceptance, and to define operational frameworks and approaches for sustainably addressing social issues through business processes, in alignment with the strategies and operational guidelines of Supalai Srang Dee" focusing on enhancing the quality of life

and sustainably developing the environment of surrounding communities and society. It drives projects that create positive social impact, infrastructure development, reducing impact to minimize environmental impact, and strengthening communities to grow robustly alongside the sustainability of the business and society overall, with a participatory process to develop communities and society.

1. Site survey before, during, and after construction

- Survey areas around the construction site, covering a radius of 1001,000 meters
- Assess and prioritize communities based on area, schools, and government agencies.
- Define operational strategies

2. Impact assessment

- Collect data from surveys, interviews, or public hearings
- Analyze both positive and negative impacts, as well as the interests and expectations of communities and society in all dimensions.

3. Building relationships with communities and society

- Design projects based on impact assessment results and community needs.
- Implement various projects and activities that help reduce negative impacts and create positive impacts for communities.
- Foster engagement among employees and other stakeholders to jointly develop local communities.

4. Monitoring and evaluation

- Monitor and evaluate the impact management and success of various projects.
- Survey community satisfaction with projects and their engagement with the Company

5. Communication and transparent disclosure of information to build trust

- Various and easily accessible communication channels are available at Supalai Contact Center 1720 or by e-mail anti-corruption@supalai.com

Support for Children's Rights

The Company adheres to human rights principles and conducts business with an emphasis on children's rights, covering the entire supply chain, supporting Children's rights in the Company's operations and through various projects as follows:

1. Established safe zones for children by overseeing supply chain integrity. (GRI-408-1)

- Established a human rights policy covering respect for and support of children's rights, setting zero tolerance on child labour as a key condition in the Supplier Code of Conduct, requiring 100% of new suppliers to sign Acknowledged and passed sustainable development assessments, covering no child labour and remediation in case of violations.
- Established safe zones for children, with regular monitoring and evaluation systems for suppliers to ensure that the entire supply chain operates under ethical principles and is free from illegal labour.

2. Develop infrastructure and various facilities to provide children with access to public utilities (Community & Safety).

- Designed and provided central areas for young children, including playgrounds and designated spaces. with safe and diverse play equipment such as swings, slides, and climbing structures, allowing children to develop physical skills and Society.
- Developed public spaces in communities surrounding the project by collaborating with business partners to transform an open area in the Klong Toey community into a functional activity plaza, playground, reading book, and football field.

- Promoting Development and Learning: Arranged a book corner and board games for children in the company library to enhance development and help alleviate the burden on employees in childcare after school, promoting work-life balance.

3. Right to equal access to education. All children must have access to education without discrimination (Equitable Education).

As the Company's core business involves real estate development and construction of residential projects, including low rise projects and high rise projects, it prioritizes promoting children's rights. The focus is on ensuring children have equal access to education and knowledge resources, coupled with providing safe spaces conducive to learning and age-appropriate potential development.

Additionally, the Company supports access to proper and sufficient nutrition to foster complete physical and mental health, which is a crucial foundation for learning, growth, and quality long-term development. through various activities such as:

Project "Supalai Srang Dee - Srang Fun Pua Nong"

The Company developed an educational model for the surrounding communities and society where it undertakes residential development and rehabilitation projects. It supports the development of learning spaces,

teaching materials, and creates equal opportunities for children near the project areas. In 2025, the Company transformed the dilapidated multi-purpose building of Ban Mueang Ka School, Chiang Mai Province, which was unusable due to unstable structure and safety risks for students. The Company utilized its expertise in landscape architecture and construction, collaborating with business partners and employee volunteers from Regional Project 4 (Northern Zone), to develop and renovate the building, transforming the deteriorated area into "Huan Srang Dee" to become a learning and activity center for children, providing a creative space to foster imagination and safe learning, valued at development investment totaling 370,000 Baht.

Before project

After project implementation

Additionally, the Company continuously plans to develop learning spaces, support education, and create equal opportunities for children, as well as enhance the potential of teachers, to ensure that Thai education advances equitably, comprehensively, and sustainably.

Project "Supalai Srang Dee - Srang Fun Pua Nong"	
Goal	Regional Project 4 (Northern Zone), in collaboration with business partners, supports the development and renovation of dilapidated buildings and public utilities for schools and underprivileged communities.
Performance	**2024: Ban Sri Suphan School, Lamphun Province** ● School renovation, roof repair. ● Provided educational and sports equipment, reducing school expenses by 120,000 Baht. **2025: Ban Mueang Ka School, Chiang Mai Province** ● Learning and activity center for children and staff, totaling 71 people. ● Reduced school expenses by 250,000 Baht. ● Awarded 20 scholarships for outstanding students, totaling over 40,000 Baht.
Benefits to Society and Community	● Access to children's rights regarding safety and well-being in educational institutions. ● Children in the community have educational development and equal access to learning materials. ● Improve the quality of life and opportunities for children in underprivileged areas.
Benefits to the Company	● No human rights complaints in the area. ● Establish a network of cooperation with 3 business partners.

Educational Equipment Support Project

The Company continuously implements the 'Supalai Srang Dee' project. Each year, it supports schools located in marginalized areas that face a lack of modern learning equipment and technology. This aims to enhance educational opportunities for children and youth, enabling them to access learning technology equally, reduce educational inequality, and promote appropriate potential development in the long term.

Project "Suanphak Srang Dee"

The Company implemented the "Suanphak Srang Dee" project. In 2025, it collaborated with Ban Chak Na School, Chonburi Primary Educational Service Area Office 1, Chonburi Province, to promote learning and create a sustainable food source for students, teachers, staff, and participating communities. This project aims to protect the fundamental rights to health and nutrition of youth (Children's Rights to Health and Nutrition). The Community Services Department shared knowledge and concepts of organic farming principles, including composting to reduce chemical use for vegetables, and transformed vacant school areas into sustainable organic food sources. This directly promotes good health and hygiene through the consumption of chemical-free fruits and vegetables, helping to reduce chemical accumulation in the body and establish food security within the school for access to nutrition safe from chemicals.

In addition to health, the Company imparted practical organic farming knowledge to students and villagers in the development community life skills and further develop environmental awareness, aligning with Sustainable Development Goals (SDGs) and international standards for Improve the quality of life and enhance economic value for local communities.

Project "Suanphak Srang Dee"	
Performance	● The project can reduce lunch costs, increase organic vegetable production. ● 180 teachers, students, and staff have access to organic vegetables. ● Participating communities can leverage knowledge to create supplementary occupations.
Benefits to Students/Community	● The school reduced expenses by 48,000 Baht per year for lunch ingredients. ● Create supplementary jobs and increase economic value for the community. more than 60 households
Benefits to the Company	● Very high satisfaction level in project participation. 4.86/5 Score From 92.9% of evaluators. ● Building positive relationships with schools and communities around the project area.

Project "Nong Suk Dee, Phee Suk Jai , Year 3"

The Company, together with volunteer employees, delivered a "Learning Library" and provided skill-enhancing books and learning equipment sets to children in the New Klong Toey Development Community through the "Nong Suk Dee, Phee Suk Jai" activity under the "Supalai Srang Dee" project, aiming to create a learning space, promote skills, and provide equal access to knowledge for youth.

Reflects the Company's commitment to driving sustainable society, emphasizing the belief that "learning is the fundamental basis for youth development" and focusing on creating happiness for society to grow sustainably together. This is achieved by laying foundations that support social activities, encouraging participation in charity, with volunteer employees delivering a "Learning Library" along with books and learning equipment sets, and preparing food and beverages, creating smiles and warmth in the community.

Furthermore, the renovation and delivery of the learning library is a community investment that creates a learning space and an environment conducive to developing skills, creativity, and inspiration for children, grandchildren, construction worker families, and children in nearby communities, totaling 532 people. This is considered a crucial foundation for truly improving the quality of life for youth and the community.

- Health check-ups, including BMI measurement, blood pressure measurement, blood type testing, oral health examination, Hepatitis B virus screening, 4-strain influenza vaccination, and booster shots for those who have not yet received them.

- Provided skill-enhancing books and learning equipment sets.

Project "Nong Suk Dee, Phee Suk Jai	
Goal	Improve children's quality of life through health check-ups, providing educational and sports equipment to 300 children by 2025.
Performance and Total Donations	● Improve the quality of life for children and youth. 2023 = 84 people 2024 = 93 people 2025 = 355 people Total 532 people, exceeding the Company's set target. ● Provided stationery sets, totaling 55 sets Total donations helped reduce expenses by 1,000,000 Baht.
Benefits to Society	● Helped reduce healthcare and vaccination expenses. 3,836 Baht per person ● Provide educational opportunities, inspiring youth to develop life skills. ● Reduce inequality in access to healthcare services for worker families and communities around the project area. ● Promote health and immunity in children and youth through health check-ups and vaccinations.
Benefits to the Company	● Instill a volunteer spirit in employees to participate in community development. ● Build friendly and sustainable cooperation with surrounding communities.

Creating Value for Community and Society

Goal	Long-term Goal 2050	Medium-term Goal 2030	Performance results for 2025
Average local employment in employees' home provinces or nearby provinces in areas where the Company operates.	≥75%	≥50%	53.21%

Local Employment

The Company recognizes the importance of local community and economic development as one of its core missions. It manages risks to mitigate the impact of supply chain disruptions while also creating opportunities for employment and promoting economic growth in areas where it operates. In 2025, the Company expanded its projects across Bangkok, its vicinity, and 30 provinces in total, leading to the employment of 1,275 local residents in their home provinces, representing 53.21% of all employees. Additionally, the Company procures (reserve) goods from domestic stores to support local products and ensure sufficient supply for operations.

Community Employment Support Project

The Company undertook the Supalai Sense Khao Rang Phuket project, located near communities, schools, and important landmarks. A survey and assessment of communities and society potentially affected by the Company's operations were conducted, covering periods before, during, and after construction, to systematically gather feedback, concerns, and suggestions from local communities. The survey results were used to plan, improve, and define measures to prevent and mitigate potential impacts. The surrounding communities prioritized traffic, employment, and the quality of life of nearby communities. The operations reflect the Company's commitment to responsible project development, respecting community rights, and promoting sustainable coexistence. Opinion surveys and discussion meetings were conducted as follows:

Target Group: communities around Supalai Sense Khao Rang Phuket project

1. Primary Areas
    - Household group adjacent to the project: 1 household.
    - Household group within 100 meters: 30 households.
2. Secondary Areas
    - Household group within 100-500 meters: 253 households.
    - Household group within 500-1,000 meters: 59 households.
3. Sensitive area group within 1,000 meters: 19 households.
4. Group of government agencies and state enterprises within 1,000 meters: 14 households.
5. Group of community leaders in the project area: 1 household.

From the survey, communities showed interest in managing issues directly impacting them, such as traffic, which could affect health and safety. Additionally, communities have expectations regarding the local economy, as well as the care and support for various traditional activities of the community and educational institutions. The Company has used the assessment results and community needs to implement initiatives for community care and development, including:

Key Issues	Operations	Survey Methods
Traffic Management	Systematically managed traffic before, during, and after construction by coordinating with relevant agencies, organizing project entry/exit systems, installing signs, and providing staff for convenience, while continuously communicating information with the community.	**1. Opinion Survey** ● Individual Interviews ● Opportunity to provide feedback via mail, phone or fax, or network system ● information or any other means. ● Focus Group Discussions **2. Discussion Meetings** ● Public Hearing ● Public Discussion ● Information Exchange ● Academic Conference
Community Economic Development	Local employment and procurement, prioritizing the selection of labour, contractors, and businesses in areas near the project.	

The Company supports local employment in project areas, aiming to create job opportunities, distribute income, and strengthen the local economy. It hires contractors for structural work, public utilities, painting, and local labour, which helps reduce the relocation of external workers, minimizes community impact, and promotes local participation, leading to sustainable mutual growth between the Company and surrounding communities. This has created jobs and income for 17 local contractors, with a total contract value exceeding 13 million Baht.

Communication and feedback from communities surrounding construction projects.

The Company emphasizes community engagement around its projects by meeting and communicating with nearby residents to inform them of construction schedules and to listen to feedback or concerns regarding potential environmental impacts, which are then used to improve measures and mitigate impacts to the community.

Community and Social Development Project.

The Company demonstrates its commitment to urban regeneration through a clear policy and structured process designed to revitalize urban spaces. such as the prime disclosed case study of Plian Thi Long Pen Thi Len project, Pun Aun Klai Nao (Share Warmth, Relieve Cold) project, Year 4, etc. with details as follows.

Project "Plian Thi Long Pen Thi Len" (Transforming Open Spaces into Play Areas) at Klong Toey Community.

The Company fosters community and social engagement by leveraging its expertise in real estate development, including architectural design and construction engineering, to improve the quality of life through the "Supalai Srang Dee: "Plian Thi Long Pen Thi Len" project in the New Klong Toey Development Community. This project aims to transform deteriorated areas into standardized and safe activity plazas and playgrounds.

Operations reflect that using professional design and construction teams helps ensure that area improvements meet practical needs and are highly durable, reducing accident risks through robust structural repairs and systematic area planning. Meanwhile, communities found that applying professional standards, including lighting installation and appropriate material selection, enhances area usability both day and night, while also reducing long-term maintenance burdens by providing professional maintenance manuals.

The Company engaged employees with diverse expertise through collaboration with businesses partner and foundations. This project created shared value for over 500 households in the New Klong Toey Development Community and provided safe play and learning spaces for over 400 children and youth. It demonstrates how business knowledge can be leveraged to create benefits and grow sustainably with the community.

Project "Plian Thi Long Pen Thi Len"	
Performance	● 63 executives and employees participated. ● Children and youth have spaces for learning, playing sports, and developing life skills, including playgrounds, reading nooks, and football fields. ● Allocation of recreational spaces within the community, suitable for all ages and conducive to shared activities such as exercise, relaxation, and family activities.
Benefits to Society	Improve the quality of life for the New Klong Toey Development Community, benefiting 500 households and over 400 children in the community.
Benefits to the Company	● No human rights complaints in the area. ● Establish a network of cooperation with 50 business partners.

Project "Happy Glasses" Year 4

The Company fosters community and social engagement, supporting the quality of life for workers and neighboring communities around construction projects by providing glasses to correct vision problems affecting work and daily life throughout Over the past 3 years of this activity, satisfaction survey data from glasses recipients consistently shows improved work efficiency, reduced eye strain, and decreased risk of accidents due to blurred vision. Contractors commented that this project directly enhances worker productivity, reduces occupational accident risks,

and mitigates health and safety impacts caused by poor eyesight, serving as a crucial safety measure. This initiative, conducted in collaboration with construction workers and neighboring communities, successfully delivered glasses to the group. Target: a total of 1,448 people, exceeding the Company's set goal.

Donations of money and goods.

Project "Punrak" Year 2

The "Punrak" project supports and provides opportunities for employees to participate as project volunteers. Supalai residents in Chiang Mai and Chiang Rai provinces donated items in good condition, such as clothes, bedding, various daily necessities, and children's toys, to be delivered to contractors, construction workers, and over 150 families at the Supalai Grand Ville MaeKorn-Chiang Rai project's worker camp and community near the project area. It also helps reduce waste and refuse, lowers greenhouse gas emissions, promotes efficient resource utilization, maximizes reuse, and encourages participation in volunteer activities. This reflects the Company's commitment to sustainably supporting communities and the environment, and it will continue to advance social projects in various dimensions.

Project "Punrak" Year 2	
Goal	Collected and forwarded unused items from residents and employees to reduce waste by 50,000 kg and reduce CO_2 emissions 100,000 ton of carbon dioxide equivalent.
Performance	● 2024: 9,500 kg (20 tonCO_2e) ● 2025: 12,000 kg (25 tonCO_2 e) Total 45 tonCO_2e, representing 45% of the goal.
Benefits to Society	● Delivered essential items to over 200 construction worker families and more than 6,000 individuals nationwide in project areas. ● Helped save household expenses by 2,000 - 5,000 Baht per household, representing an investment that creates social value and tangibly enhances quality of life. ● Foster awareness of efficient resource utilization and sustainably reduce community waste.
Benefits to the Company	● Strengthen good relationships and pride among the organization, employees, and residents through volunteer activities. ● Worker and contractor well-being care helps build trust and good cooperation.

Project "Pun Aun Klai Nao" (Share Warmth, Relieve Cold), Year 4

The "Pun Aun Klai Nao" (Share Warmth, Relieve Cold) project assists vulnerable groups, mostly ethnic minorities and families lacking financial resources. who are underprivileged and affected by climate change. , discrimination, and create equal opportunities for access to clothing and educational equipment. Employees near the project area in the Northern Zone visited Radpattana School, Mae Fah Luang District, Chiang Rai Province to deliver clothes winter clothes to help students and staff stay warm during winter, prevent illness from changing weather conditions, and promote good health as a fundamental basis for learning. Also provided educational equipment such as notebooks, pens, pencils, sports equipment like footballs, volleyballs, badminton rackets, etc., and basic first-aid kits to support educational opportunities and enhance students' quality of life. Additionally, a full lunch was provided to students and school staff. Community investment can help reduce expenses for the school and families, and assistance can be extended to nearby childcare centers to improve the quality of life for young children in remote areas.

Project "Pun Aun Klai Nao" (Share Warmth, Relieve Cold), Year 4	
Goal	Provided consumer goods and supplies to protect students from the cold due to changing climate conditions. who are underprivileged and affected by climate change.
Performance and Total Donations	Provided winter clothes, learning equipment, medicines, and lunch. ● 2024 1. Ban Mueang Ka School, Chiang Mai Province 2. Ban Pha Sert School, Chiang Rai Province ● 2025 3. Radpattana School, Mae Fah Luang District, Chiang Rai Province ● Assisted students, staff, and young children in remote areas, totaling 90 people - Provided 100 sets of winter clothes. - Provided 100 sets of educational equipment. - Basic first-aid kits: 2 sets - sports equipment such as footballs, volleyballs, badminton rackets, etc., totaling 1 sets ● Total donations exceeding 75,000 Baht and helped reduce expenses by 1,000 Baht per person.
Benefits to Society	● Helped save expenses for student families and the school by 1,000 Baht per person. ● Promote well-being and learning. ● Create equality and support access to basic resources for ethnic groups and vulnerable populations in remote areas.
Benefits to the Company	● Reflects commitment to achieving community social care goals (under the ESG framework). ● Build sustainable local relationships, collaborating with educational institutions and communities to foster trust and good cooperation.

Project "Punkan, Year 7"

Conducted social activities under the "Be a Bridge of Merit" project at the Pattaya Orphanage Foundation to promote a good quality of life and hygiene for orphans and disabled youth. This serves as a bridge of merit connecting compassion from employees and residents to vulnerable groups lacking opportunities. The Regional Community

Services Department and Head Office established a network of cooperation between employees and residents from 6 projects, namely:

- Supalai Ville Sriracha-Bowin
- Supalai Bliss Sriracha-Bowin
- Supalai S Avenue Bowin Commercial Buildings 1-2
- Supalai Palm Springs Rayong
- Supalai Grand Ville Rayong
- Supalai Pride Bangna-Lat Krabang

Provided essential consumer goods such as rice, dried food, learning supplies, cleaning equipment, and infant products like powdered milk and diapers, to support the foundation's long-term operations.

In addition to basic support, the Company hosted a dinner for orphans and boarding students of Sotpattana School, along with recreational activities to enhance skills and development through coloring and Lego building, fostering positive interaction and encouragement for youth. The event concluded with educational contributions to lay a foundation for sustainable learning opportunities, reflecting the organization's commitment to building a sharing society and growing together strongly.

Project "Punkan, Year 7"	
Performance and Total Donations	● Collected over 50 items of clothing, learning supplies, and other goods, including powdered milk, for the Pattaya Orphanage Foundation. ● Hosted dinner for children. ● Contributed 5,000 Baht to education.
Benefits to Community/Society	● Increase opportunities for children to have access to essential consumer goods, similar to other children. ● Improve the quality of life for children in the foundation.
Benefits to the Company	● Strengthen relationships and build trust between the Company and residents in 6 projects through initiatives that foster shared pride.

"Punrak Special" activity

Following the floods in the Southern region at the end of 2025, the Company elevated its emergency relief measures to become a "Center of Sharing," utilizing its logistics capabilities and local project networks to urgently alleviate suffering. This operation reflects a sustainable vision focused on social responsibility and effective crisis management.

The Company not only delivers relief supplies but also focuses on fostering a "volunteer culture" within the organization. This involves integrating efforts from executives and head office employees to help pack essential consumer goods, medicines, and other necessities, as well as volunteers from the Company's employees in the three main southern provinces (Surat Thani, Nakhon Si Thammarat, and Phuket) to assist residents and frontline personnel comprehensively, efficiently, and quickly. This underscores the Company's commitment as a vital mission and mechanism that stands with society in all crisis situations.

"Punrak Special" Activity	
Performance	● Prepared and distributed 2,500 relief bags. Packed essential consumer goods completely within a short period. ● Mobilized cross-regional volunteer employee teams from 3 main provinces (Surat Thani, Nakhon Si Thammarat, and Phuket) to reinforce field operations covering affected areas in 14 projects.
Benefits to Community/Society	● Assisted over 2,500 households of residents and operational staff (security guards and housekeepers) to be able to survive during flood crises. ● Build confidence in safety and hygiene through access to essential resources in enclosed areas from timely flood response.
Benefits to the Company	● Foster organizational culture and public consciousness through volunteer activities, which enhances employee engagement. ● Build credibility in after-sales service and crisis management.

Corporate Governance Policy

Information on overview of the policy and guidelines

Corporate governance policy and guidelines

Corporate governance policy and guidelines : Yes

The Company maintains a steadfast belief that Good Corporate Governance is a management system that fosters fairness, builds investor confidence, and creates long-term shareholder value. Such principles instill trust among all stakeholders while promoting a streamlined, efficient, and effective management framework. This enhances the organization's competitive advantage and ensures sustainable growth. The Board of Directors oversees sustainability and ESG (Environmental, Social, and Governance) operations through the Corporate Governance and Sustainable Development Committee to ensure that business practices align with Good Corporate Governance principles, international standards, and stakeholder expectations. Furthermore, the Company has established a Compliance Unit to supervise and monitor the Company, directors, executives, and employees to ensure adherence to external regulatory requirements. The Company adopts the Three Lines Model Governance Framework by the Institute of Internal Auditors (IIA), which comprises:

1. First Line: Management
2. Second Line: Risk Management and Compliance Functions
3. Third Line: Internal Audit Function

Policy and guidelines related to the board of directors

Are there policy and guidelines related to the board of directors : Yes

Guidelines related to the board of directors : Nomination of directors, Determination of director remuneration, Independence of the board of directors from the management, Director development, Board performance evaluation, Corporate governance of subsidiaries and associated companies, Other guidelines related to the board of directors

Nomination of directors

The Board of Directors prioritizes transparency and independence within the nomination process. Consequently, the Nomination and Compensation Committee has been established, comprising three members, two-thirds of whom are Independent Directors. This structure ensures that the selection of directorial candidates is conducted with impartiality, remains free from conflicts of interest, and allows for independent judgment to serve the best interests of the Company and its shareholders.

The Company promotes board diversity in terms of skills, experience, age, gender, and expertise to ensure effective corporate governance. The director recruitment strategy focuses on fostering Board Diversity, utilizing a Board Skill Matrix as a primary tool to identify qualified individuals whose knowledge, expertise, and experience align with the corporate business strategy. The Board has set an overall target expertise level for its composition at no less than 80%, utilizing broad and diverse recruitment channels as follows:

- Shareholder Proposals: Providing opportunities for minority shareholders to nominate qualified candidates in advance.
- Internal Nominations: Considering existing directors who possess the required qualifications.
- Director Pool: Searching for candidates from the Professional Director Pool of the Thai Institute of Directors Association (IOD).
- External Consultants: Engaging external recruitment firms as deemed appropriate.

Furthermore, the Company has established a policy limiting the number of directorships held by each director in listed companies to no more than five positions, without exception. This policy aims to maintain operational efficiency and ensure the consistent quality of strategic advice provided to the Company. Further details are disclosed in Section 2: Corporate Governance, Item 8: "Report on key operating results on corporate governance", under the sub-heading: "Meeting attendance and remuneration payment to each board member"

Furthermore, the Company encourages directors to participate in training programs organized by the Thai Institute of Directors (IOD), such as the Director Accreditation Program (DAP) and the Director Certification Program (DCP).

Director Orientation

The Company recognizes the vital importance of preparing new directors to discharge their duties effectively. Consequently, the Company has established guidelines for director onboarding to ensure that newly appointed directors understand the expectations regarding their roles, duties, and responsibilities. These guidelines also cover company policies, business operations, and corporate governance practices, while fostering a comprehensive understanding of the Companys business units through site visits. This preparation enables directors to commence their duties immediately, as summarized below:

1. Coordination and Information Provision The Company coordinates the provision of legal and other relevant corporate information to the Board of Directors.
2. The Company delivers a "Directors Manual" to new directors. This document contains essential corporate data and significant legal regulations beneficial to their tenure. The Company Secretary is responsible for coordinating the delivery of this manual, which includes:

- Articles of Association and Company Objectives
- Company Certificate
- Public Limited Companies Act and Securities and Exchange Act
- Listed Company Directors Handbook
- Charters of the Board of Directors and Sub-committees
- Code of Conduct for the Board of Directors
- Corporate Governance Policy Manual and other corporate policies

3. The Company arranges meetings with the Chairman of the Board, Board members, Sub-committees, and Executives. These sessions provide new directors with foundational business information, featuring presentations on the following:

- Vision, Mission, Corporate History, Strategy, and Goals
- Management Structure
- Operational data and corporate activities
- Roles, authorities, and responsibilities of directors
- Corporate Governance Policy
- Brief biographies of existing directors and executives
- Director qualifications and remuneration

The Board of Directors has assigned the Company Secretary to deliver the "Directors Manual" to newly appointed directors and advisors, along with organizing orientation sessions on relevant topics. To ensure efficiency, the manual is delivered via a dedicated QR Code system. Furthermore, directors provide consent for the Company to collect, use, process, and disclose their personal data, as well as data pertaining to related persons or close relatives.

In 2025, there were no newly appointed directors.

Page number of the reference link : 51-52

Determination of director remuneration

The Board of Directors is committed to operating under the principles of transparency and independence. To ensure this, the Board has mandated the Nomination and Compensation Committee, comprising at least three members with a majority of independent directors, to oversee these processes. This structure ensures that the remuneration framework and criteria are equitable, free from conflicts of interest, and aligned with the best interests of shareholders. The key considerations for determining remuneration are as follows:

- Competitive and Appropriate Compensation: Remuneration is set at levels that are both appropriate and competitive to attract and retain highly qualified directors. This is determined by benchmarking against industry peers and companies of similar business scale.
- Alignment with Strategic Goals and ESG: The compensation structure is designed to reflect duties, responsibilities, and the organizations short-term and long-term strategic objectives. It encompasses performance across economic, social, environmental, and governance (ESG) dimensions to create sustainable value for shareholders.
- Rigorous Approval Process: Director remuneration undergoes a thorough review by the Nomination and Compensation Committee before being proposed to the Board of Directors for final approval at the Annual General Meeting (AGM). Approval requires a vote of no less than two-thirds (2/3) of the total votes of the shareholders present.

Full details of the compensation are disclosed in Section 2: Corporate Governance, Item 8: Board of Director Performance Summary, under the sub-heading: the Remuneration of the Board of Directors.

Independence of the board of directors from the management

Supalai Public Company Limited adheres to the principles of good corporate governance, focusing on the establishment of effective oversight mechanisms and a system of checks and balances between the Board of Directors and the Management. This ensures the protection of the best interests of shareholders and all stakeholders with full transparency.

The Company has established independent director qualifications that are more stringent than the minimum requirements of the Securities and Exchange Commission (SEC). Specifically, shareholding is restricted to no more than 0.5% of the total voting shares, and directors must have no conflicts of interest or relationships that could impair their independent judgment. Furthermore, although the Chairman of the Board and the Chairman of the Executive Committee are the same individual to enhance operational agility, the Company has implemented a governance structure with sufficient checks and balances. This includes a formal separation of roles and responsibilities between the Chairman of the Board (governance oversight) and the Chairman of the Executive Committee (executive management). Additionally, power is balanced by maintaining a proportion of independent directors of no less than one-third of the total board members and appointing a "Lead Independent Director" to co-determine board meeting agendas and act as a clear channel for reflecting independent opinions.

Moreover, independent directors play a vital role in providing recommendations on strategy and sustainability. The Company arranges meetings among non-executive directors at least once a year to discuss key issues without the presence of management. It also requires an annual review and certification of independence to ensure that the board functions effectively and in alignment with international standards.

Page number of the reference link : 40-45

Director development

The Company places the highest priority on enhancing the potential of the Board of Directors and senior executives, recognizing them as pivotal mechanisms in driving the organization toward sustainability. The Board has established a policy to encourage continuous knowledge and skill development to remain abreast of evolving economic conditions, regulations, and modern technologies. This ensures that their duties in strategic direction-setting and corporate oversight are performed with maximum efficiency, in alignment with the Principles of Good Corporate Governance.

Promotion of Knowledge Development:

The Board of Directors encourages and supports directors, senior executives, and the Company Secretary in attending training courses, seminars, and knowledge-sharing activities organized by leading institutions, such as the Thai Institute of Directors Association (IOD), the Stock Exchange of Thailand (SET), the Securities and Exchange Commission (SEC), and other relevant professional bodies. The key content areas include:

- Legal roles, duties, and responsibilities of directors under corporate governance principles.
- Modern business management practices and enterprise risk management.
- Specialized courses relevant to the industry and the Company's business operations.
- Promotion of Environmental, Social, and Governance (ESG) knowledge and adaptation to the digital economy.

The Company has consistently implemented knowledge development programs and supported training throughout the year, with a focus on applying acquired knowledge and experience to organizational development and creating long-term sustainable value for shareholders. Details of the 2025 training courses are provided in Section 2: Corporate Governance, Item 8: Report on Key Performance Results in Corporate Governance, under the sub-heading: Information on Director Development.

Page number of the reference link : 57

Board performance evaluation

The Board of Directors conducts an annual performance evaluation. These assessments are aligned with Corporate Governance principles and the Board's scope of duties and responsibilities. The results are utilized to review performance and enhance operational effectiveness. Furthermore, these evaluations serve as a reference for CG Ratings and comply with international sustainability benchmarks, such as the FTSE4Good Index, which prioritizes board structure and efficiency.

The Company facilitates evaluations for the Board of Directors and its four sub-committees: the Audit Committee, the Nomination and Remuneration Committee, the Corporate Governance and Sustainability Committee, and the Risk Management Committee. The evaluation process consists of two main formats:

1. Board as a Whole Evaluation
2. Individual Self-Assessment

Additionally, the Nomination and Remuneration Committee compiles meeting attendance data for reporting to the Board. Key performance summaries are as follows:

- **Monitoring Process:** The Secretary of the Nomination and Remuneration Committee is responsible for distributing evaluation forms and aggregating performance results, including attendance statistics, for the annual Board report.

- **Meeting Criteria:** Individual assessments include critical criteria such as regular attendance, pre-meeting document review, and providing constructive contributions during deliberations.
- **Transparency:** To ensure operational transparency, directors with potential conflicts of interest are required to recuse themselves from the meeting and abstain from voting on such agendas.

The overall performance evaluation scores for 2025 are disclosed in Section 2: Corporate Governance, under Item 8: Key Performance Report on Corporate Governance, sub-heading: Board of Directors Performance Evaluation.

Chief Executive Officer (CEO) Performance Evaluation

The Company maintains a remuneration policy for the CEO that is linked to the effectiveness of strategic implementation in both the short and long term. This is measured through a system of Key Performance Indicators (KPIs) approved by the Board of Directors. Emphasis is placed on management aligned with ESG (Environmental, Social, and Governance) integration, reflecting the commitment to driving the organization toward sustainability across all dimensions.

The overall evaluation results for 2025 are disclosed in Section 2: Corporate Governance, under Item 8: Key Performance Report on Corporate Governance, sub-heading: Chief Executive Officer Performance Evaluation

Corporate governance of subsidiaries and associated companies

Corporate Compliance:

The Company places significant emphasis on compliance, viewing it as a vital mechanism that ensures all work processes and procedures are accurate and prudent. It further empowers the Company to execute strategic plans, achieve objectives, and maintain operations in accordance with regulations, Articles of Association, and requirements of relevant authorities. This ensures that directors, executives, and employees strictly adhere to legal principles and various notifications, both internal and external, in the performance of their duties.

Furthermore, the Company monitors the enactment of new legislation impacting business operations, including various draft bills. This preparation allows for the identification and clarification of potential obstacles, ensuring that business operations remain compliant with future laws. The following units have been assigned specific responsibilities:

- **Company Secretary:** Responsible for overseeing and monitoring compliance with regulations governing listed companies and the Articles of Association. Acts as a central hub for gathering information, communicating, and providing knowledge and advice regarding relevant external regulations.
- **Legal Department:** Responsible for supervising legal matters related to business undertakings and providing counsel to internal units to ensure business operations comply with external legal requirements.
- **Internal Audit Department:** Responsible for assessing the efficiency and adequacy of internal control systems. Monitors and audits compliance with internal regulations while developing personnel and integrating technology into the audit process.
- **Quality System Department:** Establishes Work Instructions (WI) and related documentation to serve as standard manuals. Implements problem-analysis processes to drive system improvements, ensuring that planning, design, construction, sales, and community services meet legal requirements, professional standards, and ISO 9001:2015 international standards.

Governance of Subsidiaries

The Company has established a governance policy for its subsidiaries by selecting qualified and experienced representatives to serve as directors in proportion to its shareholding, subject to Board approval. Significant transactions, such as capital increases or decreases and the dissolution of subsidiaries or associates, must receive prior approval from the Board of Directors. The scope of governance is as follows:

1. Financial Reporting: Ensures transparency by requiring subsidiaries to use the same auditing firm as the Company to facilitate thorough examination and obtain appropriate evidence for the preparation of consolidated financial statements.

2. Resources: Allocates resources efficiently, including the use of the SAP Enterprise Resource Planning (ERP) system and the 1720 complaint hotline, to enhance operational speed and efficiency.

3. Legal Compliance: Maintains oversight units to ensure subsidiary operations strictly follow regulations and bylaws to protect shareholder interests and create sustainable corporate value.

4. Internal Control System: Oversees the implementation of appropriate internal control systems. The Audit Committee approves internal audit plans to review these systems, with findings reported directly to the Audit Committee and the Board of Directors, respectively.

5. Adherence to the Code of Conduct: Ensures that directors, executives, and employees of subsidiaries consistently comply with the Code of Conduct and Good Corporate Governance policies.

Disclosure and Transparency

In 2025, at the Board of Directors Meeting No. 12/2025 held on December 9, 2025, the Board conducted a formal review of the Company's vision and mission to ensure continued alignment with business goals and strategies. Furthermore, the Board monitored the implementation of these strategic elements and oversaw managements performance to ensure that operations adhered to established policies and plans with maximum efficiency and effectiveness.

Shareholding Structure:

The Company maintains clear and up-to-date disclosure of its shareholding structure, providing stakeholders with transparent information regarding the Companys ultimate beneficial owners. This disclosure includes detailed information on major shareholders and the proportion of minority shareholdings. Additionally, the Company does not have a policy permitting reciprocal shareholding between two or more companies for the purpose of business grouping or creating complex corporate structures, such as cross-holding or pyramid holding structures.

The direct and indirect securities holdings of directors and executives as of December 31, 2025, are reported as follows:

Note: Securities holding information is disclosed in accordance with Section 59 and Section 89/12 of the Securities and Exchange Act B.E. 2535 (1992).

Reporting of Directors Interests:

The Company has established a policy requiring directors and executives to submit reports on their own interests and those of their related persons. This measure is designed to prevent potential Conflicts of Interest and ensure that

the Companys operations are transparent and accountable, in strict compliance with Section 89/12 of the Securities and Exchange Act B.E. 2535 (1992) (as amended) and relevant notifications of the Capital Market Supervisory Board.

Guidelines and Timelines:

1. Reporting Parties: Directors and executives must submit their interest reports to the Company according to the following schedule:

- **Initial Report:** Within 7 business days from the date of appointment as a director or executive.
- **Reporting of Changes:** Within 3 business days from the date of any change in the interest information.

2. Role of the Company Secretary:

- Distribute copies of the interest reports to the Chairman of the Board and the Chairman of the Audit Committee within 7 business days from the date the Company receives such reports.

3. Maintain and compile the interest report data to serve as a database for monitoring and overseeing Related Party Transactions (RPT), ensuring strict adherence to regulatory requirements.

In 2025, there were no reported instances of directors, executives, or related persons having interests or entering into transactions that could lead to a conflict of interest with the Company.

Limit on the Number of External Directorships for the Executive Chairman and Managing Director:

Supalai Public Company Limited (the Company) is committed to adhering to the Corporate Governance Code for Listed Companies 2017 of the Office of the Securities and Exchange Commission (SEC), as well as the OECD Principles of Corporate Governance. With a particular focus on the dedication of time by directors, and to ensure that governance oversight is performed with maximum efficiency while safeguarding the sustainable interests of shareholders, the Company has established a clear policy limiting the number of directorships held in other listed companies. This policy aligns with international standards and the guidelines of the Stock Exchange of Thailand, as detailed below:

1. Directorship Limits: Directors must recognize the importance of allocating sufficient time to perform their duties to the best of their abilities. Each director is permitted to hold directorships in a total of no more than five (5) listed companies (both in Thailand and abroad), including their position at the Company. This ensures that directors can dedicate quality time to scrutinizing work and driving the Companys strategy.

2. Scope of Application: This guideline applies strictly to all Company directors, including Independent Directors, Non-Executive Directors, and Executive Directors, demonstrating transparency, accountability, and equality according to international governance principles.

3. Reporting and Disclosure: For the benefit of disclosure to shareholders and the public, directors must immediately notify the Company Secretary of any changes in their directorship positions in other listed companies to ensure that information in the Form 56-1 One Report remains accurate, complete, and up-to-date.

4. Pre-appointment Assessment: Before accepting a new directorship in another listed company, directors should review their current obligations to ensure that the additional role will not exceed the specified limit or adversely affect their performance and attendance at the Companys meetings.

Throughout 2025, the Executive Chairman and the Managing Director strictly complied with the policy regarding the limit on external directorships.

Policy and guidelines related to shareholders and stakeholders

Policy and guidelines related to shareholders and stakeholders	:	Yes
Guidelines and measures related to shareholders and stakeholders	:	Shareholder, Employee, Customer, Business competitor, Business partner, Creditor, Government agencies,

Community and society, Other guidelines regarding shareholders and stakeholders

Shareholder

The Company recognizes and prioritizes shareholder rights, refraining from any actions that violate or infringe upon such rights while focusing on the provision of fundamental rights on an equitable basis. These include the right to demonstrate ownership of held shares, trade or transfer shares, receive dividends and profit sharing, consider all forms of remuneration, and access sufficient and timely corporate information. Furthermore, shareholders are entitled to participate in shareholder meetings or appoint proxies to attend on their behalf to exercise voting rights for the appointment or removal of directors, the appointment of auditors, and the consideration of significant matters impacting the Company.

The Company has no policy to establish anti-takeover mechanisms that could enable management or controlling parties to operate with a lack of transparency. The Companys shareholding structure is free from cross-shareholding or pyramid schemes within the corporate group. Additionally, the Company maintains a minority shareholding proportion (Free Float) of more than 40% of the total issued and paid-up shares.

Moreover, the Board of Directors has established an Equitable Treatment policy to safeguard fundamental rights and encourage all shareholder groups including major shareholders, retail shareholders, institutional investors, and foreign investor to fully exercise their legal rights. The Company is committed to conducting business with integrity, transparency, and accountability, implementing measures to protect assets from impairment or unjustifiable loss, and preventing the pursuit of personal interest or benefits for related parties. To instill investment confidence, the Company ensures equal information disclosure regardless of gender, age, race, religion, social status, or disability. Should shareholders be unable to attend meetings in person, they reserve the right to appoint a proxy or an independent director to attend on their behalf. The Company also maintains a policy to facilitate and encourage institutional investors to attend meetings, ensuring that shareholder meetings comply with the law and the Best Practices of the Stock Exchange of Thailand.

In 2025, the Company strictly adhered to the Code of Business Conduct for directors, executives, and employees. This covers the management of conflicts of interest, the protection of confidential information, and responsibility toward all stakeholders to create maximum long-term value for shareholders. A summary of the rights and shareholder treatments implemented over the past year is as follows:

1. Right to Receive Share Certificates and the Right to Buy, Sell, or Transfer Shares

The Company has appointed Thailand Securities Depository Co., Ltd. to perform the duty as its securities registrar to provide convenience to shareholders regarding securities registration matters of the Company.

2. Rights to Receive Equitable Treatment for Repurchase of Shares by the Company

The Articles of Association of the Company prohibits the Company to own or pledge its own shares, except in the following cases:

1. For maintaining shareholders' rights:The Company may repurchase shares from shareholders who vote in disagreement with the resolutions of the shareholders' meeting which approved amendments to the Articles of Association regarding voting rights and rights to receive dividends where shareholders deem unfair.
2. For financial management purposes: The Company may repurchase shares in the event that the Company has accumulated profit and excess liquidity, and such repurchase of shares does not cause the Company to experience financial difficulties.

Shares held by the Company from the repurchase are not counted as a quorum at the shareholders' meeting, nor are they entitled to vote and receive dividends. The Company is required to dispose of the repurchased shares within the specified period in the share repurchase program specified by the Company. In the case that the Company cannot dispose of the repurchased shares within such specified period, the Company will decrease the paid-up capital by cutting off the unsold portion of the registered shares.

3. Right to Propose Meeting Agenda Items, Nominate Candidates for Directorship, and Submit Inquiries Regarding the Company

Recognizing the importance of equitable treatment of shareholders, the Company has established criteria allowing minority shareholders to propose agenda items for the Annual General Meeting (AGM), nominate individuals for directorship, and submit advance questions concerning the Company. This initiative aims to promote engagement in corporate governance and ensure the selection of qualified personnel to perform duties effectively for the maximum benefit of shareholders and all stakeholders.

For the 2025 Annual General Meeting, the Company published the criteria, procedures, and supporting information in both Thai and English on the Companys website and notified shareholders via the Stock Exchange of Thailands information disclosure system at least three months prior to the end of the fiscal year. Shareholders were given the opportunity to propose agenda items and nominate director candidates from September 10, 2024, to November 10, 2024. Upon the conclusion of said period, no shareholders proposed any agenda items or nominated any individuals for directorship in advance.

4. Right to Attend Shareholder Meetings

- **Scheduling of Shareholder Meetings**

The Company maintains a policy to convene the Annual General Meeting of Shareholders once a year, within four months from the end of the fiscal year. The Company discloses the schedule, date, time, and venue of the meeting with sufficient notice to facilitate shareholders in allocating time to attend the meeting appropriately.

In 2025, the Company held the Annual General Meeting on April 22, 2025, at the Convention Room, 33rd Floor, Supalai Grand Tower, No. 1011 Rama III Road, Chong Nonsi Subdistrict, Yan Nawa District, Bangkok. On the meeting date, the Board of Directors, Board Advisors, senior executives in charge of finance and accounting, and the authorized auditors were present in their entirety to provide clarifications and respond to shareholder inquiries on various matters with transparency.

- **Meeting Invitation**

Thailand Securities Depository Company Limited, the Companys share registrar, is responsible for forwarding an invitation to attend the meeting along with supporting documents for various agendas with adequate details for decision making as well as proxy forms as prescribed by the Ministry of Commerce and Annual Registration Statement/Annual Report (Form 56-1 One Report) in the format of (QR Code) to the shareholders not less than 21 days before the date of the meeting. This is to give its shareholders and institutional investors time to study details of each agenda and to make preparation for proxy where it is not convenient to attend the meeting on ones own. In addition, the stamp duties for affixing on the proxy forms are also provided free of charge to lessen the burden of shareholders as well as for their convenience.

Furthermore, the letter of invitation to attend the 2025 Annual General Meeting of Shareholders, along with supporting documents and proxy forms in both Thai and English, will be posted on the Companys website (www. supalai.com) more than 28 days before the meeting. This will serve as an additional channel of information for shareholders, providing the same details forwarded by the Company to is shareholders in documented form. In 2025, the meeting notification would also be advertised on the Companys website for a period of 3 consecutive days, starting 14 days before the meeting, in accordance with the Notification of the Department of Business Development B.E. 2565 (2022) regarding Electronic Media Advertising.

The Company always informs its shareholders in the letter of invitation to attend the meeting of their legal voting right, principle and procedure. There would not be any other agenda added without prior notice except in case of urgency arisen after forwarding the invitation letter, or upon any urgency relating to or affecting the shareholders interest and it is necessary to propose that as a special agenda. In such case, the Company would urgently call an Extraordinary General Meeting of Shareholders which the Company Secretary will take the minutes of the meeting properly and completely of every agenda to be further examined by its shareholders.

The shareholders who wish to propose the agenda must possess the following qualifications:

1. Being the shareholder(s) of the Company which can be either one shareholder or combined shareholders.
2. Holding not less than 5 percent of the total voting rights of the Company as at the date of nomination of candidate.

3. Must hold those shares as stipulated in 2 on the date on which the Candidate is being proposed.
4. Must hold those shares as stipulated in 2 on the record date in order to determine the right of the shareholders to attend the Annual General Meeting of that year.

Please note that if, after the Company has checked the name of the shareholder(s) on the record date (as stipulated in 4) and it appears that such shareholder(s) in 1 does not hold the shares as stipulated in 2., the Company reserves the right not to nominate the candidate for consideration at the Annual General Meeting, even though the candidate has been included in the notice of the meeting.

- **Invitation Letter to Attend the Meetings**

The Company delivers a complete edition of invitation letter to a meeting of shareholders with required documents both in Thai and English to the shareholders to study in advance at least 21 days before the meeting date, both in Thai and English. The shareholders will then be well-prepared for the subjects to be considered at the meeting and also for their consideration whether to attend or not. The documents will include objectives and rationales along with opinions of the Sub-Committees and the Board of Directors to support the consideration of each agenda clearly.

The Company clearly defines the agenda items to be proposed to the Annual General Meeting of Shareholders and each matter shall be approved separately. The Company will avoid adding any agenda that had not been identified in advance as it will not be fair to the shareholders who are unable to attend the meeting.

Regarding the appointment of directors, the Company will provide the names and brief bio-data of each director to be appointed to the shareholders. Similarly, as for the appointment of the auditor, the Company will clearly identify the name of the auditor, his/her affiliated company, experience, skills, independence and the length of duration that the proposed auditor had been the auditor at the Company including his/her audit fees. Also, the Company will propose at the meeting to pay the dividend (if any). The Companys dividend policy will be announced with the dividend rates being proposed to the shareholders along with reasons and background information. Regarding the shareholders meeting, in the invitation letter, the Company will present the list of 3 independent directors in order for the shareholders unable to attend the meeting in person from the meeting to choose whether to appoint independent directors or other shareholders as their proxies at his/her own discretion. With respect to the voting of each agenda, the shareholders can vote as pre-specified in proxy forms or their proxies can vote for all agendas at the meeting.

For institutional investors or foreign investors appointing a custodian in Thailand as a depositor and supervising shares, the Company has coordinated in the matter of documents and evidence that must be presented in advance before attending the meeting to ensure the easier and faster registration process on the meeting day.

- **Voting Rights**

The Company gives its shareholders equal voting right, one share one vote for ordinary share, which is the only type of share issued by the Company to its shareholders. One share shall be counted as one vote, and the majority of votes shall be deemed as the resolution of the shareholders meeting.

- **Proxy Appointment**

The Company informed its shareholders in the event that they were unable to attend the meeting in person. These shareholders could appoint a proxy or an independent director nominated by the Company, who would be given rights and treated as a shareholder. The Company provided these shareholders with convenience by delivering to them a proxy form as set out by the Department of Business Development, Ministry of Commerce along with an invitation letter to the meeting in both English and Thai. This proxy form described thorough and clear details of the proxy and was delivered to the shareholders not less than 21 days prior to the meeting date. To ensure clarity and avoid inconvenience in attending the meeting of the proxies, details about the meeting, i.e., meeting schedule, agendas, including information on the procedures, documents and testimonials required for the proxy are also provided in the invitation letter. Such information was also posted on the Company's website (www.supalai.com) in the Section "Investor Relations" under the heading "Shareholders Meeting" at least 28 days prior to the meeting. In this regard, the shareholders can request further information via phone, e-mail to the Investment Relations Section (For details, please see the Section "Investor Relations").

- **Facilitation for Shareholders at the Meeting**

To facilitate the shareholders who are foreigners, the Company has prepared all relevant documents in two languages, i.e. English and Thai for Thai and foreign shareholders such as in Thailand and overseas, such as the notice of the meeting, proxy instrument, minutes of the meeting, Annual Registration Statement Annual Registration Statemen Annual Report etc., and developed the Companys website (www.supalai.com) in two languages.

The Company will send the notice of the meeting and relevant supportive documents of various agendas to the shareholders not less than 21 days prior to the meeting date and will publicize details about the meeting, the meeting schedule and the meeting agenda on the website of the Company (www.supalai.com) 28 days prior to the meeting date.

The Company did not impose any conditions or rules that needed to be certified by government offices or other regulations that caused difficulties for shareholders to appoint a proxy. To lessen the shareholders burden of acquiring stamp duties and photocopying, the Company provided stamp duties for affixing in the proxy form at the meeting to reduce the burden of providing stamp duty. Officers were assigned to provide free photo copy services for attached documents in the registration area and check the validation of the documents. Registration is available at least 2 hours before the meeting. In addition, such officers were ready to provide advice and respond to any inquiries. Technology had been applied to shareholders' meetings by using the barcode system for rapid vote casting.

- **Shareholders Meeting Procedures**

On the day of the Annual General Meeting of Shareholders, the Company assigned officers for implementing registration, providing advice, responding to inquiries for the convenience of shareholders and proxies attending the meeting in advance before the meeting and continuously until the meeting is completed, to ensure that the meeting is transparent and in line with the best practice of listed companies. In addition, electronic technology and barcodes are applied to AGM, E-Registration, and E-Voting program, which start from the process of preparing attendee information, meeting attendance registration, ballot printing, voting processing by agenda item, and meeting reporting to facilitate the meeting of shareholders.

The Company encourages shareholders to use voting ballots for all agenda items by preparing separate ballots for each agenda item so that shareholders can vote as they deem fit. Such ballots will be collected from the meeting.

Before the meeting begins, the Chairman will assign the Company Secretary to inform the meeting clearly of submission of inquiry and comments, as well as the voting and vote-counting procedures for each agenda item under the articles of association. The use of voting ballots for all agenda items is required to allow shareholders to vote as they deem fit and to clearly exercise their right to vote on each agenda item.

Explanation on submission of inquiry, comments, voting procedures and vote-counting are as follows:

- The Company used barcode system to facilitate the vote-counting process.
- The Company has established the procedure for counting votes by separating the vote counting methods for those attending the meeting and the proxy as follows:

1. Shareholders and the proxy had the right to vote according to the number of shares held, wherein one share was equal to one vote.
2. For each agenda item, each shareholder was eligible to cast his/her votes, to either approval, disapproval or abstention from voting. Vote splitting was disallowed.
3. In case the proxy was presented at the meeting, in which the shareholder had pre-casted the vote and the vote was counted, the proxy did not get to vote. On the other hand, if the shareholder's voting decision was unspecified or unclear, then the proxy was granted the right to make an appropriate voting decision. Regarding any disapproval or abstention to any agenda, the voter was asked to raise his/her hand. The officer would pick up the ballot from the proxy, same policy applied if the shareholder attended the session in person.
4. In order for the ballots to be counted as qualified votes, the ballot should be completely marked and signed. In the case that voters wanted to make changes to the vote, it was required to cross out the original mark and signed at all time. Voting that did not comply with the mentioned criteria would be considered as void and would not be counted as part of the votes for the agenda.

5. For vote-counting, the meeting would count votes of shareholders present at the meeting and cast the votes, as well as of those appointed proxy as recorded by the Company at the time of registration of the Meeting. There shall be 3 types of vote-counting as follows:

- For the agenda to be approved by the meeting of shareholders by the majority votes of the shareholders attending and casting their votes at the meeting, the Company officer shall count only the votes of the shareholders with voting right, who voted for approval and disapproval. In the event of voting tie, the Chairman of the meeting must exercise a tie-breaking vote.
- For the agenda to be approved, by the vote of not less than two-thirds of the total votes of the shareholders present at the meeting, the Company shall count the votes of approval, disapproval, abstention and voided ballot.
- For the agenda to be approved by the vote of not less than three-fourths of the total votes of shareholders attending the meeting and having the right to vote at the meeting, the Company shall count the votes of approval, disapproval and abstention.
- In case the meeting is closed for each agenda, shareholders cannot vote in the past agendas.

6. Shareholders would be requested to mark and sign in the voting cards indicating approval, disapproval, or abstention. The Company staff shall collect only voting cards with disapproval and abstention, in correspondence with each agenda. If the voting for each agenda has been closed, shareholders would not be able to cast vote for the previous agenda. The voting cards with approval shall be collected all together after the meeting.

7. In the vote counting process, the Company would deduct votes of the disapproval and abstention out of the total number of votes casted by the shareholders present at the meeting. The rest shall be deemed as affirmative votes in favor of such agenda. The votes shall also be considered based on the intent stated in the letter of proxy by shareholders.

8. As the counting of votes for each agenda shall be counted from the vote of shareholders attended the meeting and with the right to vote, the numbers of shareholders and votes might not be equal, depending on the presence of shareholders at the time of cast of each agenda item.

9. In case of any questions or comments, shareholders could raise their hands before the voting at the end of each agenda.

10. The Company will announce the voting results of each agenda item after completing the final agenda item.

For the selection of directors, the vote would be cast individually to enable shareholders to elect the preferred directors, whereby the Company would nominate names to be voted one by one. For transparency of this agenda, every shareholder who either votes for, approve, disapprove or abstain, vote on the ballot, and the staff will collect the ballot when all directors were completely voted. Each director who is elected must receive more than half of the entire votes cast by shareholders who attend the meeting and have the right to vote.

The shareholders who attend the meeting after the beginning time are entitled to exercise their voting rights or to cast their votes for the agenda during consideration and not yet voted, and the Company attendees would also be given an opportunity to raise questions or to give opinions with reasonable time for discussion. To allow all shareholders to be adequately informed of information and details of such matters, the issues of the questions and answers would be recorded in the minutes of the meeting in order to inform the shareholders who had not attended the meeting, and the Chairman would conduct the meeting according to the agendas. In addition, other agenda items that are not determined in advance must not be included in the shareholders' meeting without providing a prior notice to the shareholders.

In 2025, the Company organized the Annual General Meeting of Shareholders of April 22, 2025 at the Convention Room, 33 Floor at Supalai Grand Tower, 1011 Rama III Road, Chong Nonsi Subdistrict, Yannawa District, Bangkok. On the meeting date, the Chairman presided over the meeting to meet and answer questions posed by shareholders regarding the management of the Company. The Chairman of every Sub-Committee, Board of Directors, Advisory of the Board, Chief Accounting-Financial Officer and Company Secretary, totaling 13 persons, had attended the meeting by the concerted as follows:

1.	Dr. Prateep	Tangmatitham	Chairman of the Board and Chief Executive Officer
2.	Mrs. Ajchara	Tangmatitham	Director and Executive Vice President
3.	Mr. Tritecha	Tangmatitham	Director and Managing Director
4.	Assoc. Prof. Dr. Virach	Aphimeteetamrong	Independent Director, Chairman of the Nomination and Compensation Committee, and Chairman of the Audit Committee
5.	Assoc. Prof. Dr. Somjai	Phagaphasvivat	Independent Director and Chairman of the Corporate Governance and Sustainability Development Committee
6.	Mr. Atip	Bijanonda	Director and Chairman of the Risk Management Committee
7.	Mr. Anant	Gatepithaya	Independent Director
8.	Assist. Prof. Aswin	Bijayayodhin	Independent Director
9.	Mr. Prasas	Tangmatitam	Director
10.	Mr. Krid	Chancharoensuk	Director
11.	Prof. Emeritus Dr. Sahas	Bunditkul	Advisory of the Board of Director
12.	Mrs. Siriporn	Wangsapar	Assistant Managing Director and Chief Financial Officer
13.	Mrs. Varunee	Lapitananuvat	Company Secretary

Furthermore, the Company had invited 2 auditors from EY Office Limited, namely Ms. Krongkaew Limkittikul and Ms. Salitta Piyanonthaya, to attend the meeting since its starting to listen to opinions and answer questions raised by shareholders.

At the meeting, the Chairman of the meeting assigned the Company Secretary to clarify the Meeting about voting procedures, vote counting, and announcement of voting results. The Company will announce the voting results after the end of agenda items. The Company also offers opportunities to shareholders who have inquiries or would like to express opinions on the agenda can raise their hands to ask questions before voting at the end of each agenda. Regarding any matter other than the agenda, shareholders can raise questions at the end of the period, which they have equal rights and sufficient time.

- **Shareholders Meeting**

The meeting of shareholders will be facilitated by the Company, ensuring that it does not contain any complicated procedure or limit the opportunity of those who wish to study the information of the Company. In addition, the Company shall not perform in any way that creates barriers to or hinders effective communication among shareholders. The Company shall take into account the convenience of the participants by not organizing the meeting on traditional holidays or holidays of commercial banks. Also, it shall conduct the meeting during appropriate period, that is, during 8.30 - 17.00 hours, and convenience is provided such as having the staff to provide sufficient convenience, to check documents, answer inquiries and provide duty stamps for affixing the power of attorney, while convenience is provided for the elderly and the disabled as well as security system and emergency plan for the participants.

In 2025, the Company organized the Annual General Meeting Shareholders on April 22, 2025, of which 10 directors representing 100%. Presently, the Company has its registered capital in the amount of 1,955,666,261 Baht and its paid-up capital in the amount of 1,953,054,030 Baht with the par value of 1.00 Baht per share. Today, there were 670 shareholders attending the meeting in person, holding altogether 1,292,961,552 shares or equivalent to 66.2020% of all outstanding shares categorized as follows:

- Present in person totaling 87 persons, holding altogether 788,923,086 shares or equivalentto 40.3943 % fall outstanding shares.

- Proxy totaling 583 persons, holding altogether 504,038,466 shares or equivalent to 25.8077 % fall outstanding shares.

Therefore, the quorum was duly constituted according to the Companys Articles of Association and under the Public Limited Companies Act B.E. 2535 (1992), which requires not less than 25 shareholders presented in person or represented by proxy at the meeting, with shareholding altogether of not less than one-third of issued shares. To conduct the meeting transparently and in accordance with the best practices for e-Shareholder Meeting of listed companies, the Company assigned 1 volunteer, Ms. Waraporn Angsirikulchot, to participate in the vote counting at the shareholders' meeting in the vote counting area and collect the ballots signed by the above vote counting witnesses for later verification. In each agenda item of the meeting, the Company arranges vote casting and clearly records the resolutions of the meeting as to how many votes are approval, disapproval or abstention.

- **Disclosure of Results of the Meeting**

The Company had disclosed the resolutions of the Annual General Meeting with result of the vote in a letter to the Director and Manager of the Stock Exchange of Thailand and on the Companys website (www.supalai.com) within 1 day after completion of the meeting, which was on April 22, 2025 as well as the minute of the meeting with the votes for each agenda and important questions or suggestions fully recorded. The minutes of the meeting had been forwarded to the Stock Exchange of Thailand (SET), the SETs Board of Governors and relevant agencies within 14 days from the date of the meeting, that is on May 6, 2025 for the Annual General Meeting of Shareholders. The information on the meetings is available on the Company's website, and the Company had publicized VDO live of the sessions on the Company's website. (www.supalai.com) to serve interested shareholders.

- **Report on the Shareholders Meeting**

In order for the shareholders to review meeting details within a reasonable time and to ensure equality for both Thai and foreign shareholders concerning access to the information, the Company has implemented a policy on distributing minutes of the shareholders meeting accurately and in a comprehensive manner. Each agenda contains important information, comprising explanation of the voting procedures, the essence of agendas, resolutions and voting results (either votes for, against, or abstained), as well as questions, clarifications, and comments during the meeting in both Thai and English, including the list of directors, with names and positions provided, attending the meeting, of which in 2025, all of them had attended. Such information will be displayed on the Company's website within 14 days from the meeting date for shareholders to ensure the accuracy of the minutes data which will be later forwarded to the Ministry of Commerce within the time prescribed by laws. In 2025, the Company publicized the minutes of the Annual General Meeting of Shareholders on May 6, 2025.

5. Rights to Receive Dividends and Share of Profits

The Company allocates profits to its shareholders in the form of dividends. The Companys dividend payment policy, the proposed interim dividend rate with reasons and information supporting consideration shall be informed to the shareholders. The 2025 Annual General Meeting of Shareholders passed the resolution to approve the 2024 net profit allocation for dividend payment totaling 1.45 Baht per share.

6. The Right to Consider Remuneration for Directors

As regards remuneration for directors, the Company has complied with the policy on the criteria for considering and proposing the directors remuneration to shareholders. Accordingly, the Nomination and Compensation Committee was appointed to consider the form and criteria for the payment of remuneration to each position of the directors. Such remuneration has been considered by taking into account the business size, business environment and economic condition in whole, overall performance that reflects and connects with the results of operations, as well as comparing with remuneration of those in the same industry at competitive and reasonable level. The Company has also proposed all forms of remuneration, i.e., monthly allowance, gratuity and meeting allowance, which will be proposed to the shareholders for approval at every Annual General Meeting of Shareholder. Neither cash nor other assets will be offered to the directors unless it is the remuneration as per the rights and entitlements on a normal basis for the position as directors of the Company (For details, see Meeting Attendance and Remuneration Payment for Individual Directors). The remuneration payment shall be in accordance with the Public Limited Companies Act, Section 90, which

stipulates that the remuneration payment to directors must be in accordance with the resolutions of the general meeting of shareholders that consists of not less than two-third of the total votes of the shareholders present at the meeting.

7. The Right to Receive Adequate Business Information in a Timely Manner

The Company has disclosed business-related information on the news system of the Stock Exchange of Thailand while also posting important information and current updates on its website (www.supalai.com). Such an effort is considered the protection of shareholders rights beyond their legal rights.

8. The Right to Approve the Appointment of Auditors and Determination of Audit fees

The Company has set out agendas for the appointment of auditors and determination of audit fees for shareholders to approve at the general meeting of shareholders on an annual basis. Details on the names of auditors proposed, the companies to which they belong, experience and capabilities, independence issue, and audit fees will be provided sufficiently to shareholders for consideration.

9. Right to Approve Special Transactions

Shareholders of the Company are entitled to approve connected transactions or the acquisition or disposition of assets with transaction sizes as specified in relevant laws and regulations or consider and approve any other matter that has a significant impact on the Company. If the shareholders will enter into a Shareholder Agreement, the Company shall make all efforts to ensure that such Shareholder Agreement does not cause a significant impact on the Company or other shareholders.

In 2025, the Company did not violate the compliance with the regulatory authorities' guidelines regarding the prohibition of shareholders from communicating with each other or the non-disclosure of shareholder agreements that have a significant impact on the Company or other shareholders.

10. Related Party Transaction

The Company has complied with the policies on related party transaction by requiring that directors, executive management and all employees as well as employees in the subsidiaries and associated companies strictly comply with the regulations of the Stock Exchange of Thailand in every respect. When a transaction is not in accordance with normal trading conditions, an approval must be obtained from the Audit Committee and then presented to the Board of Directors for approval of the transaction. The implementing steps regarding interrelated transactions or related party transaction are as follows:

1. To consider doing related party transaction, the Company shall use the same criteria as that used with general customers and in accordance with the Company's normal lending procedures to support the company operation which must be fair and reasonable with maximum benefits to the Company. For example, if the group requests for a loan, an interest rate charged must be the same rate applied to the third parties.
2. The evaluation of the transactions of assets or services according to the total value of consideration paid or received or book value or the market value of such assets or services, depending on whichever is higher.
3. If there are transactions between each other of the Company or the subsidiaries incurred to the person who may have a conflict of interest or stake or may have a conflict of interest in the future, the Company will require the Audit Committee's comments about the need and appropriateness of such transactions. If the Audit Committee has no expertise regarding such transactions, the Company shall arrange for an independent expert or internal auditor of the Company to provide their comment in order to support the decision making of the Board of Directors or shareholders, as the case may be.
4. If the Company has a transaction between each other or other related party transaction which are applicable to requirements of the Stock Exchange of Thailand, the Company must strictly comply with such requirements.
5. The Company is required to disclose transactions with potential conflicts of interest or related party transaction or transactions between the Company and subsidiaries according to the regulations issued by the Securities and Exchange Commission Thailand Re: Disclosure of Information and Other Acts of Listed Companies concerning the Connected Transactions B.E. 2546 (2003), which disclosed in its Annual Registration Statement/Annual Reports (Form 56-1 One Report) or any other reports, as the case may be. There shall also be disclosure of related party transaction

to the Stock Exchange of Thailand in accordance with the rules of the Stock Exchange of Thailand as well as items related to the Company in accordance with accounting standards which must be disclosed in the notes to the financial statements being audited by the auditor of the Company.

The directors, executive management and all employees must avoid any personal interest that will have a negative effect on the performance of work for the benefit of the Company or making it difficult to perform the task correctly and efficiently. A conflict of interest may arise in many situations. However, in performing duties, the Companys benefit under legitimate law and ethics must be observed. The Company had completely disclosed related party transaction in its Annual Registration Statemen Annual Report (Form 56-1 One Report). Furthermore, the Company forbids its executives and employees from undertaking or participating in any business that is in competition with the Companys business, regardless of whether such directors, executives and employees will receive either direct or indirect interests. It is clearly indicated in the Companys Code of Conduct. However, to conduct related party transaction or transactions with conflict of interest, the Board of Directors has laid as a policy that they must be considered and approved by the Board before proceeding. In addition, the information on names, relationship of connected persons, transaction value, reasons and the need must be disclosed in the Annual Registration Statement and Annual Report as per the rules of the Stock Exchange of Thailand and the Office of the Securities and Exchange Commission, Thailand. The meeting must also be attended by the Audit Committee to ensure that the related party transaction are conducted fairly, reasonably, and with proper pricing policy, taking into consideration the maximum benefit of the Company, the Company has publicized guidelines on the website of the Company (www.supalai.com) to inform the shareholders and the general public.

In 2025, there was not connected transactions, which has violated and/or has not complied with the rules and regulation of the Stock Exchange of Thailand and the Office of the Securities and Exchange Commission, Thailand. In addition, the Company had no agenda for connected transactions and reporting required to be approved by the Annual General Meeting and the Company has no business group structure that has connected transactions in the form that might have conflict of interest.

11. Enhancing Shareholder Rights through Collaboration with the Thai Investors Association (TIA)

The Company recognizes the significance of establishing a balance of power within the capital market. Consequently, it supports the mission of the Thai Investors Association (TIA) in acquiring shares and exercising rights at shareholder meetings of listed companies nationwide. This enables the TIA to legally participate in meetings and drive mechanisms for minority shareholder protection, thereby establishing corporate governance benchmarks for the overall economy and strengthening the Thai capital market. The Company provides support in the following areas:

- **Supporting Access to Ownership Rights:** The Company encourages the Association to effectively fulfill its duty as a shareholder representative, asserting co-ownership in various companies listed on the Stock Exchange of Thailand.
- **Establishing Legitimate Oversight Mechanisms:** The Company supports the Associations legal status as a shareholder to exercise rights in attending Annual General Meetings (AGMs). This includes playing an active role in inquiries, monitoring operations, and providing recommendations to Boards of Directors for the ultimate benefit of the broader investor community.
- **Elevating Macro-level Transparency:** Supporting the Associations mission aims to drive shareholder rights across all listed companies, ensuring the Thai capital market possesses a balanced, transparent check-and-balance system that meets international standards.
- **Acting as a Voice for Minority Shareholders:** The Company empowers the Association to act as an intermediary, reflecting the opinions and concerns of retail investors through legal channels. This ensures that fundamental shareholder rights are protected equitably and fairly.

Employee

The Company consistently recognizes that employees at all levels are its most valuable assets. Consequently, it strictly adheres to its Employee Treatment Policy, Compensation and Benefits Policy, and Employee Development Policy. The Company ensures fair and non-discriminatory treatment, enhances employees' quality of life, and provides support for their families during emergencies. This includes equitable practices regarding employment, termination, and compensationbenchmarked against industry peers and aligned with Company performance (with short-term incentives tied to annual profitability). Furthermore, the Company manages appointments, transfers, training, new employee orientation, professional development, and welfare benefits. It actively solicits employee feedback and focuses on fostering a safe and conducive working environment that empowers employees to realize their full potential, thereby contributing to the organizations sustainable growth.

Moreover, the Company has fully and punctually contributed to the Fund for Encouragement and Development of the Quality of Life of Disabled Persons, in strict compliance with the Empowerment of Persons with Disabilities Act, B. E. 2550 (2007). To ensure long-term financial security and provide tax benefits, a voluntary Provident Fund has been established. This is complemented by role-specific online training curricula (Supalai Beyond Training).

The Company disseminates these policies to all employees via its corporate website and the Corporate Governance and Quality System Intranet. Detailed information is available in Section 2: Corporate Governance, Item 8: Key Operating Results on Corporate Governance, under the "Employee Information" sub-section.

Customer

The Company has strictly adhered to its Customer Treatment Policy, which is binding upon all directors, executives, and employees, including those within its subsidiaries and associates. This commitment aims to foster customer satisfaction and confidence, anchored in the principles of fairness, integrity, and ethical conduct. The Company treats all customers equitably, ensuring that engagement is based on mutual fairness and the delivery of high-quality products at reasonable prices. Furthermore, the Company is dedicated to the procurement, development, and production of quality goods and services to meet customer needs. This includes regular evaluation and mitigation of any potential product impacts. To ensure transparency, concrete channels for feedback and complaints have been established to facilitate continuous operational improvement. The Company also maintains rigorous quality control to ensure compliance with standards, regulations, consumer protection laws, and other relevant legal requirements, providing efficient service to all clients. Monitoring customer satisfaction via the Customer Satisfaction Score (CSAT) system to measure, evaluate, and enhance processes as follows:

- **Establish** criteria and survey parameters for customer satisfaction, encompassing Sales, Construction, and After-Sales Service, to ensure operations strictly align with the Company's designated standards.
- **Define** Key Performance Indicators (KPIs) for customer satisfaction scores, and consistently prepare summary evaluation reports for presentation to functional executives and senior management.
- **In instances where** evaluation results fall below the established benchmarks, the Company will analyze the identified deficiencies and customer feedback to determine root causes. This facilitates the development of corrective measures and tangibly improves the efficiency of operational processes.

Further details are disclosed in Section 1: Business Operations and Performance, under "Driving Business for Sustainability," specifically within the "Customer Information" subsection.

Business competitor

The Company strictly adheres to its Competitor Treatment Policy, which is binding upon all directors, executives, and employees, including those within its subsidiaries and associates. Our primary focus is to promote free and fair

competition, protect our reputation and that of others, and safeguard consumer interests. We strictly refrain from acquiring competitors' trade secrets through dishonest or improper means and avoid any actions that lead to market price distortion, which could adversely affect consumers. The key principles are as follows:

- **Fair Competition:** The Company treats the competitions according to the rules of decorum and fair competition Promote free competition and refrain from any actions that distort market prices, which could adversely affect consumers.
- **Confidentiality and Integrity:** The Company shall not seek confidential information of trading competitors by fraudulent, dishonest, inappropriate, immoral, or illegal acts.
- **Reputation Management:** The Company shall not intentionally do any act to discredit trading competitors by any allegations, defamation, causing disgrace or using any tactics against the trading competitor without grounds.
- **Intellectual Property Rights:** The Company shall not do any act in violation of intellectual property rights and copyrighted works of others or trading competitors.
- **Anti-Monopoly Practices:** The Company shall not treat competitors by means of monopoly by requiring trading partners to trade with the Company only.

In 2025, the Company faced no litigation or legal proceedings regarding anti-competitive behavior. Further details are disclosed in Section 1: Business Operations and Performance, under "Driving Business for Sustainability," specifically within the "Social Policies and Guidelines - Partner Rights" subsection.

Business partner

The Company adheres to a policy of fair and equitable treatment for all business partners, including contractors, vendors, and financial institutions. This policy is strictly observed by all directors, executives, and employees, including those within subsidiaries and associates. Our operations are conducted with the Companys best interests in mind and are based on the principle of mutual benefit. We actively avoid situations involving conflicts of interest, honor all contractual commitments, and provide factual information and accurate reporting. Negotiations and dispute resolutions are grounded in maintaining long-term business relationships. Furthermore, we provide continuous support to residential construction contractors to encourage the sustained delivery of high-quality craftsmanship.

- The Company treats its trading partners equally and fairly on the basis of fair returns to both parties.
- The Company shall not demand, receive, and pay any benefits that are dishonest in trading with business partners. If any dishonest demand, receipt, or payment of benefits is found, the details must be disclosed to business partners and the problems must be jointly resolved fairly and quickly.
- The Company establishes the transparent, fair, and non-discriminatory criteria for the selection of business partners. Such criteria are periodically reviewed. There is the evaluation for business partners and the preparation of contracts in accordance with agreements.
- The Company supports the selection of trading partners throughout the supply chain who demonstrate a commitment to and take concrete actions on environmental issues (Green Procurement), This includes, for example, the use of construction materials certified with eco-labels, conducting business with social responsibility, and adhering to principles of good governance.
- The Company establishes the management and monitoring system to ensure the strict compliance with the terms of the contract and the prevention of corruption at all stages. If the Company fails to comply with any terms, business partners must be informed promptly in advance in order to jointly consider and find solutions based on the principle of reasonableness.
- The Company has measures for examination and screening of trading partners, such as contractors and subcontractors while providing support to trading partners who conduct fair business with no violations of human rights and recognize social responsibility.

- The Company establishes a policy of timely payment to trading partners without delay once the delivery of goods and services meets the agreed-upon conditions. Payment terms are aligned with the Credit Term Policy, and the consideration of credit terms for each trading partners is based on various factors, including the duration of business relations, product and service quality standards, past performance evaluations, and adherence to principles of fairness.
- The Company does not cooperate with or support any person or business partner who operates an illegal business or poses a threat to society and national security.
- The Company is committed to maintaining sustainable relationships with business partners and trusting each other.
- The Company promotes the competency and capability of business partners by providing cooperation in the development of products, services, or innovations that are beneficial to business operations in accordance with the principles of sustainable development with social and environmental responsibility.

Detailed information is provided in Section 1: Business Operations and Performance, under the heading "Driving Business for Sustainability," within the sub-heading "Social Policies and PracticesPartner Rights."

Responsible to Stakeholders

Analysis of Stakeholder and Development of Operation Strategies

The Company attaches importance to the attention to and care for all groups of stakeholders both inside and outside the Company including the responsibility to the society and the environment. Accordingly, the stakeholders have been divided into 11 groups, namely, employees, customers, shareholders/investors, communities including the responsibilities towards the society and the environment, trading partners/suppliers, government agencies, SET, banks and competitors. whereby the criteria on connection has been taken into consideration.

Criteria for Stakeholder Identification

The Company has categorized its stakeholders into 2 major groups as follows:

- Primary Stakeholders are those who are directly involved with the business, receiving direct interest or effect from the business operations, i.e. employees, customers, vendors and suppliers, shareholders, communities and society, environment, contractors, banks and government agencies.
- Secondary Stakeholders are those who are indirectly involved with the business, receiving indirect interest or effect from the business operations, i.e., the Stock Exchange of Thailand and competitors.

Due to a wide variety of stakeholders, the Company has arranged various tools and channels to look for the needs and expectations of each group of stakeholders, as well as to exchange opinions for further development by the Company.

- **Stakeholder Feedback Forum**

The Risk Management Committee organized a stakeholder and external expert engagement forum for the year 2025 in collaboration with key executives from construction material suppliers and contractors involved in high-rise projects. Participating companies included SCG Ceramics Public Company Limited, Westcon Company Limited, Deco Enterprises Company Limited, Starmark Manufacturing Company Limited, Duraflor Corporation Limited, and SECCO Engineering & Construction Company Limited. The forum served as a platform for exchanging views on a range of key issues, including product and service image, fairness toward business partners, responsible business operations with due consideration for social, environmental, and governance (ESG) aspects, human rights issues, green procurement, and

the impacts of climate change. Discussions also covered corporate image development and risk assessment, with the objective of fostering continuous innovation and improvement while prioritizing the interests of stakeholders, society, the environment, and customers.

Information on business code of conduct

Business code of conduct

Business code of conduct	:	Yes

The Board of Directors has approved the written Corporate Governance Policy Manual and Business Code of Conduct which covers good practices, roles and responsibilities of directors, and effective internal control mechanisms. These guidelines have been communicated to all stakeholders via the Companys website. In 2025, the Company reaffirmed its commitment to building confidence among stakeholders and the Thai capital market by participating in

the JUMP+ project (Promoting Value Creation for Listed Companies), which aims to enhance the potential of listed companies in various dimensions. The Company has established a Value Enhancement Plan covering 3 main areas as follows:

1. Business Growth Strategy

The Company focuses on stable growth to generate sustainable returns for shareholders through continuous product/service development and customer base expansion, as well as transparent communication of business direction through Investor Relations activities to enhance confidence and increase the Company's Corporate Visibility among both domestic and international investors.

2. Enhancing Corporate Governance Excellence

The Company adheres to good corporate governance as a fundamental principle in its business operations. In the past year, it has elevated standards in 3 key areas:

- **Anti-Corruption:** Establish clear policies and guidelines to foster a transparent organizational culture.
- **Prevention of Insider Trading:** Develop a strict system for controlling and monitoring data usage to ensure equality and fairness for all shareholders.
- **Information Security:** Elevate technology system management standards to prevent risks from cyberattacks and protect the confidentiality of customer and organizational data.

3. Environmental Management (Environmental Management)

The Company recognizes its role in reducing environmental impact and therefore has prepared **a Greenhouse Gas Management Plan** and set clear greenhouse gas reduction targets to become a low-carbon organization and align with international standards.

The Company has established a Corporate Governance Policy Manual and a Code of Conduct for directors, executives, and employees. Directors, executives, and employees have consistently adhered to it. Directors and executives have set good examples, overseen, and encouraged subordinates to comply with the Good Corporate Governance Policy Manual, the Code of Conduct for directors, executives, and employees, and fostered a work environment conducive to ethical conduct. At the same time, there is a commitment to prevent violations of the Code of Conduct. In cases of non-compliance or violation, penalties are considered and imposed according to Human Resources department regulations. Communication and public relations efforts are made to foster understanding among executives and employees, and compliance with these guidelines is monitored. Stakeholders can access this information on the Company's website (www.supalai.com)

Prevention of incidents and behaviors that may constitute unethical conduct

- The Board of Directors has appointed a Corporate Governance and Sustainable Development Committee with clearly defined roles and responsibilities.
- Organize at least one meeting per year of the Corporate Governance and Sustainable Development Committee to report on the performance of ethical compliance.
- Directors, executives, and employees of Supalai Public Company Limited and its subsidiaries must study and understand the Code of Conduct manual.

Additionally, the Corporate Governance Policy Manual and Code of Conduct have been published on the Company's website for external stakeholders. The Company has established guidelines to promote, supervise, and monitor compliance with the Code of Conduct by directors, executives, and employees of both the Company and its subsidiaries, as follows:

Driving organizational culture through communication from senior management (Tone from the Top) to reinforce adherence to business ethics.

The Code of Conduct (abridged version) is ready for dissemination to directors, executives, and employees via the Intranet system and the company's website.

Develop ESG knowledge sets by providing ESG sustainability courses and knowledge videos on the topic of tangible sustainability, closer than you think, via the SUPALAI SKILLS platform.

Activities to enhance ethical awareness through the Supalai ESG DNA: The GREAT Series knowledge set.

Performance: Annual activity of signing acknowledgement of the Company's Code of Conduct and policies.

Target	Performance in 2025
Company and subsidiary employees Sign acknowledgement of the Code of Conduct and various policies via the SUPALAI SKILLS platform 100%	Company and subsidiary employees 1,847 people participated in the test, 100% (Company 1,465 people, subsidiaries 382 people)

Performance: Activities to measure employee awareness regarding ESG issues through Focus Group activities, using Post-it Brainstorming and Group Discussion techniques

Target	Performance in 2024	Performance in 2025
Employees are aware of ESG. No less than 80%	54%	65%
If the results of the ESG awareness assessment for employees do not meet the target, the Company will analyze the causes, improve communication and knowledge-building activities, and continuously monitor and re-evaluate to enhance employee understanding.

Policy and guidelines related to business code of conduct

Guidelines related to business code of conduct : Prevention of Conflicts of Interest, Anti-corruption, Whistleblowing and Protection of Whistleblowers, Prevention of Misuse of Inside Information, Money laundering prevention, Gift giving or receiving, entertainment, or business hospitality, Compliance with laws, regulations, and rules, Information and assets usage and protection, Anti-unfair competitiveness, Information and IT system security, Environmental management, Human rights, Safety and occupational health at work, Other guidelines related to business code of conduct

Prevention of Conflicts of Interest

Driving the policy on preventing conflicts of interest

The Board of Directors has approved the policy and conflicts of interest. All executives and employees, including employees in subsidiaries and joint ventures, are required to strictly adhere to it. All employees must report conflict of interest situations. The Audit Committee has assigned the Internal Audit Department to oversee, monitor, and report on various situations to the Audit Committee and the Board of Directors by March of each year.

Monitoring and evaluation of conflict of interest prevention

All executives and employees of the company and its subsidiaries participate in answering the conflict of interest questionnaire through the SUPALAI SKILL platform. In 2025, no executives or employees were found to have violated the regulations regarding conflicts of interest.

Communication for employees to disclose conflicts of interest through the SUPALAI SKILLS platform.

Anti-corruption

Driving Anti-Corruption Policies and Measures

The Board of Directors approved the "Anti-Corruption Policy and Measures" to serve as clear guidelines for personnel at all levels, focusing on fostering a transparent organizational culture through systematic communication and evaluation processes. Driven by its commitment to transparent business operations, the company's membership in the Thai Private Sector Collective Action Against Corruption (CAC) has been renewed for the second time. This certification will remain effective until March 2027. In 2025, significant changes and developments were as follows:

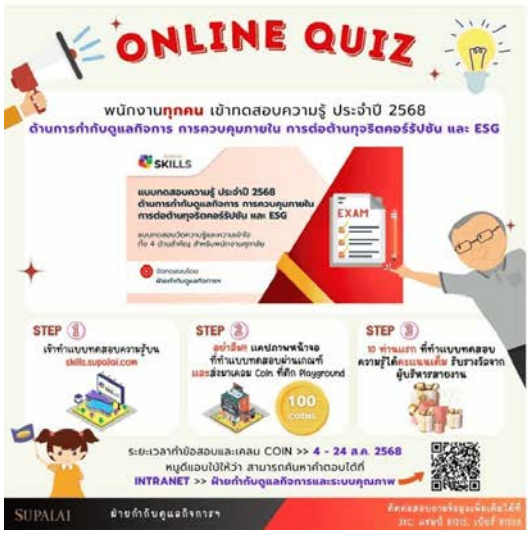
Monitoring and Evaluation of Anti-Corruption Efforts

- **Awareness Building and Knowledge Testing:** The company communicates policies and guidelines through the SUPALAI SKILLS platform to ensure comprehensive access to information for employees and regularly conducts knowledge tests on corporate governance, internal control systems, and anti-corruption measures annually by using various simulated scenarios to enable the application of learned knowledge in real-world situations as appropriate and to assess understanding and effectiveness in practical implementation. For topics with the most incorrect answers from employees, communication is conducted via

Performance Results:

- **Knowledge testing activities on corporate governance, internal control systems, and anti-corruption measures are conducted once a year.**

Goals	Performance in 2025
All employees of the company and its subsidiaries participated in the knowledge test on governance activities and internal control systems and anti-corruption measures 100%	Employees of the company and its subsidiaries 1,847 people participated in the test, 100% (Company 1,465 people, subsidiaries 382 people)
Employees who passed the criteria (more than 80%) 100%	Employees of the company and its subsidiaries 1,837 people participated in the test, 99.46% (Company 1,456 people, subsidiaries 381 people)



Executives awarded employees who scored 100% on knowledge and understanding tests. Knowledge test on corporate governance, internal control systems, and anti-corruption measures to provide positive reinforcement to employees, thereby building a strong and unified organizational culture that aligns with the company's future direction, which is considered a crucial foundation for the company's success.

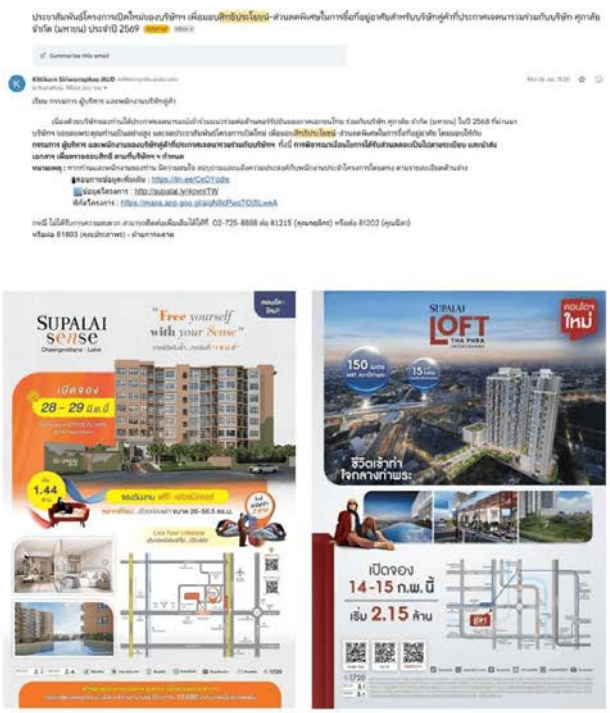
.

- **Extension to the supply chain:** The company aims to elevate ethical standards throughout the supply chain by promoting and supporting business partners to join the CAC declaration of intent, which resulted in the company receiving the CAC Change Agent Award for the 4th consecutive year (2025).

- **Partner Support:** The company has provided various benefits and support activities to partners who have joined the declaration of intent, aiming to create a sustainable business ecosystem free from corruption.

6 types of benefits for partners who join the declaration of intent

Publicizing special discounts on the purchase of residential properties in 2 projects under the announcement regarding special discounts for the company's partners.



- Project to promote value creation for listed companies (JUMP+), which is a project to enhance the potential of listed companies.

From 2026 - 2028, Supalai elevates its governance under the COSO ERM framework through the "Enhancing Anti-Corruption" strategic plan, aiming to foster a culture of integrity from policy level to practical implementation. It targets pushing at least 10 partners annually to join the CAC declaration of intent and supporting them until they receive CAC Certification. A CAC Training & Monitoring team will also be established to build readiness throughout the supply chain. Furthermore, stringent risk management is integrated into the procurement system and construction inspection through Digital Site Inspection technology, along with the use of random audit systems and whistleblowing channels, to reinforce verifiable transparency standards in all dimensions and create sustainable value for the organization.

Whistleblowing and Protection of Whistleblowers

Driving Whistleblowing and Complainant Protection

The Board of Directors has approved Whistleblowing or Corruption Complaint Policy from illegal acts, ethical breaches, or behaviors that may indicate corruption or misconduct by individuals within the organization, including employees and all stakeholder groups. This also includes mechanisms for protecting information providers and emphasizing the confidentiality of tips and complaints to build confidence among whistleblowers or complainants.

Complaint and Corruption Whistleblowing Management Process

1. Receive complaints: Divided into

- **Internal Channels:** Complaint Box, installed in an appropriate and private location near the fire escape, to maintain the privacy of whistleblowers.
- **Ethics and Anti-Corruption Channels:** Through the Company's dedicated Anti-Corruption channels.
- **Shortcut Channels for Employees:** Employees can report or provide information directly to management (Direct Reporting)
- **Public Channels:**

By Standard Response: The Company sends a standard response message to the whistleblower immediately to confirm receipt of information and build confidence in the investigation process.

2. Gather and verify facts: In cases where initial information is insufficient, the responsible department will politely coordinate to request additional information to ensure the investigation is accurate and relevant.

3. The Disciplinary Committee investigates facts, with representatives from: From the main departments, as follows:

- Legal Department, to ensure that investigation processes and penalties comply with work regulations and relevant laws.
- Compliance Department, to verify compliance with corporate governance policies and ethics.
- Human Resources Department, to handle disciplinary actions and employee remediation measures.
- Management representatives in the accused's department, to provide in-depth information on the work context and consider operational impacts.

4. Summarize results for the complainant: After the resolution of the Disciplinary Committee

5. Reporting results to the Audit Committee and the Board of Directors: After the resolution of the Disciplinary Committee

6. Follow up and rectify: In cases where the Audit Committee or the Board of Directors deems it necessary to prevent corruption, the Internal Audit Department will monitor and report at the next meeting.

Whistleblowing Monitoring and Evaluation

In 2025, the Internal Audit Department reported to the Audit Committee and the Board of Directors once, specifically Meeting No. 12/2568 on December 2, 2025.

Measures for Protecting Whistleblowers or Complainants

The Company has established a policy for the protection of whistleblowers or complainants regarding corrupt practices, as follows:

1. The Company will keep the information and identity of whistleblowers or complainants and the accused confidential.
2. The Company will disclose information only as necessary, taking into account the safety and potential harm to the source of the information or related individuals.
3. Those who suffer damage will receive appropriate and fair redress.
4. In cases where a whistleblower, complainant, or person cooperating in fact-finding believes they may be unsafe or suffer harm, they may request the Company to implement appropriate protective measures. Alternatively, the Company may implement protective measures for the complainant or person cooperating in fact-finding without a request, if it deems there is a likelihood of harm or unsafety.
5. The Company will not commit any unfair acts against whistleblowers or complainants, whether by changing job positions, job descriptions, workplaces, suspending work, threatening, interfering with work performance, terminating employment, or any other act that constitutes unfair treatment towards whistleblowers, complainants, or those cooperating in fact-finding.
6. The Company does not demote, punish, or negatively impact employees who refuse to engage in corruption.

Prevention of Misuse of Inside Information

Driving efforts to prevent the use of inside information for personal gain.

The Board of Directors has approved a policy on the use of inside information to enhance good corporate governance and transparency in business operations. This policy aims to ensure that all directors, executives, and employees collectively safeguard important non-public information to prevent its use for personal gain or for the benefit of others in unfair securities trading. The company has established appropriate data access systems and defined a Blackout Period for refraining from securities trading prior to financial reporting, in order to protect shareholders' interests and the organization's positive image. Compliance with this policy is considered an integral part of the ethical standards that all personnel are expected to uphold.

Monitoring and evaluation in terms of in preventing the use of inside information for personal gain.

Details are disclosed in Section 8.1.4 Monitoring compliance with corporate governance policies and guidelines, sub-section: Use of inside information for personal gain. In the past year, 2025, the Company participated in the Value Enhancement Plan for Listed Companies (JUMP+), a strategic initiative designed to elevate the potential and capabilities of listed companies.

- The Value Enhancement Plan for Listed Companies (JUMP+)

During 2026 - 2028, Supalai is committed to elevating corporate governance under the COSO ERM framework through a strategic plan that links policies from the Board of Directors to practical implementation across the entire organization. This focuses on establishing internal control systems via the 3 Lines of Defense mechanism and conducting annual employee ethics assessments. A key highlight is the use of Automated Real-Time Insider List technology to automatically update the list of individuals with access to critical information and send notifications for the Silent Period (prohibition on securities trading). This aims to reduce risks from human error and effectively prevent insider trading, while fostering a culture of responsible data usage to enhance transparency and sustainably protect stakeholders' interests.

Gift giving or receiving, entertainment, or business hospitality

Initiatives Regarding Giving or Receiving Gifts or Business Entertainment

The Company has established an anti-corruption policy, which covers policies regarding the acceptance and giving of gifts, assets, or any other benefits, to ensure that all directors, executives, and employees strictly adhere to it. The Company conducts its business with honesty, integrity, and in compliance with the law. To maintain its reputation, the Company has established a No Gift Policy concerning the acceptance and giving of gifts, assets, or any other benefits that are permissible according to tradition and ethical principles, to express gratitude or to maintain normal business relationships. However, if the acceptance or giving of gifts, assets, or any other inappropriate benefits could influence decision-making in performing duties and potentially cause the Company to lose benefits, the Company will not support such actions.

Monitoring and Evaluation Aspect Policy Giving or Receiving Gifts or Business Entertainment

The Company adheres to the principles of good governance and transparency by establishing a "No Gift Policy" to prevent the risk of corruption. Annually, from November to January, the Chairman of the Executive Board communicates the Company's stance on not accepting gifts or any other benefits from business partners and the public. The Company monitors and evaluates compliance through mechanisms under the anti-corruption topic.

The Chairman of the Executive Board communicates the Company's stance on not accepting gifts or any other benefits from business partners and the public annually.

Compliance with laws, regulations, and rules

Compliance with laws and regulations related to the company's business

Supalai Public Company Limited fully complies with relevant laws and regulations, including the Public Limited Company Act B.E. 2535 (1992), the Securities and Exchange Act B.E. 2535 (1992), as well as the regulations of the Securities and Exchange Commission (SEC) and the Stock Exchange of Thailand (SET). Over the past 5 years, the Company, its Board of Directors, and executives have had no record of serious misconduct or violations of the aforementioned regulatory bodies' rules, no criminal cases or bankruptcy proceedings; and no significant conflicts of interest or labor disputes have been found. Furthermore, no executives have resigned due to corporate governance issues, reflecting standards of transparency and trustworthiness.

The Company conducts its marketing communications and advertising activities in a responsible manner (Responsible Marketing), providing accurate and clear information about its products and services to ensure consumers are not misled. Furthermore, the Company strictly adheres to consumer protection laws and related guidelines.

Information and assets usage and protection

Commitment to Internal Data Management and Asset Preservation: Emphasizing Governance and Systematic Control

Supalai Public Company Limited is committed to conducting business in accordance with good corporate governance principles, considering data security and asset management as fundamental to sustainability. The company has therefore established a strict and tangible governance structure as follows:

- **Measures to Prevent Insider Trading** The company has established strict policies and guidelines to prevent the use of non-public information for personal gain, considering it part of the Code of Conduct that personnel at all levels must adhere to in order to maintain fairness to shareholders and all stakeholder groups.
- **Asset Management and Delegation of Authority System** To ensure efficient and transparent use of organizational resources, the company has developed a "Delegation of Authority Manual" to clearly define job scopes and access rights to systems according to levels of responsibility. Additionally, it has established control systems for procurement and asset transfers to prevent the risk of assets being misused.

- **Monitoring and Follow-up Mechanisms** The company has implemented a continuous management reporting system for monitoring and anomaly detection. The internal audit department regularly assesses the effectiveness of the control systems. This mechanism enables the company to proactively manage risks and sustainably protect the interests of stakeholders.

Anti-unfair competitiveness

Driving Anti-unfair competition

Supalai Public Company Limited conducts its business under the principles of free and fair competition, adhering to ethical business practices, transparency, and compliance with relevant competition laws. The Company has established a Policy on Treatment of Competitors, which has been considered and approved by the Board of Directors, to serve as a framework for business operations and to prevent actions that may constitute unfair competition (Anti-competitive Practices).

The Company has established the following key practices:

- Treat trade competitors fairly, under the rules and etiquette of good competition, and not engage in any actions that may distort market mechanisms or adversely affect consumers.
- Not to seek or obtain confidential information of competitors through dishonest, inappropriate, or unlawful means, or in violation of business ethics.
- Not to engage in any actions that may damage the reputation of competitors, such as making accusations, defaming, or disseminating inaccurate or unverifiable information.
- Respect intellectual property rights and not engage in any actions that infringe upon the intellectual property or copyrights of others or trade competitors.
- Not to conduct business in a manner that may constitute a trade monopoly or use methods to force business partners to conduct business exclusively with the Company.

Furthermore, the Company communicates these policies and practices to employees through internal channels such as the Intranet and internal communications to enhance awareness of competition laws and business ethics. Continuous monitoring of policy compliance is also conducted to prevent risks arising from actions that may constitute unfair competition.

The Company is committed to conducting business based on principles of transparent, fair, and responsible competition to build trust among stakeholders and support the organization's sustainable growth.

Information and IT system security

Implementation Progress Data and Information Security

The Company prioritizes Information Security Governance and Information Technology Risk Management and Cybersecurity Risk Management. To this end, it has developed an Information Security Management System (ISMS) to enhance Data Protection and the security of the organization's information systems in accordance with international standard ISO/IEC 27001:2022.

The Company prioritizes Customer Data Privacy by complying with relevant data protection laws, such as the Personal Data Protection Act (PDPA), and international data protection standards. We have established stringent measures for the collection, use, disclosure, and storage of customer data. Furthermore, the Company defines data subject rights, including the right to access, rectify, or request the deletion of data, to ensure that customer information is handled securely and with full respect for individual privacy rights.

The Company has established a crucial Information Security and Data Protection Framework, including the Information Technology and Security Policy, Personal Data Protection Policy, Company Email Usage Policy, and guidelines for the appropriate and secure use of Artificial Intelligence (AI) technology. These policies have been reviewed and approved by the Board of Directors.

The Company has communicated its policies and guidelines to employees through internal channels, such as the Company's Intranet and internal emails, to promote data security awareness and continuously support compliance with the Company's Cybersecurity and Data Protection measures.

Communication of Information Technology and Data Protection Policies via the Company's Intranet

In 2025, the Company conducted a Gap Assessment between its operational processes and the requirements of ISO/IEC 27001:2022. It also provided training on the standard's requirements and raised cybersecurity awareness among employees. Furthermore, a Gap Assessment was conducted for the Digital Technology Department to identify risks and develop approaches for improving data security management processes.

Currently, the Company is in the process of improving its operations to close identified gaps. An Information Security Management System (ISMS) working group has been established, operational procedures and related documents are being prepared, the capabilities of internal auditors are being developed, and internal audits are being conducted to test system effectiveness. Furthermore, preparations are underway for ISO/IEC 27001:2022 certification.

Such operations are part of the monitoring, review, and continuous improvement process aimed at enhancing the security of the organization's data and information systems and mitigating risks from cyber threats that could affect business operations.

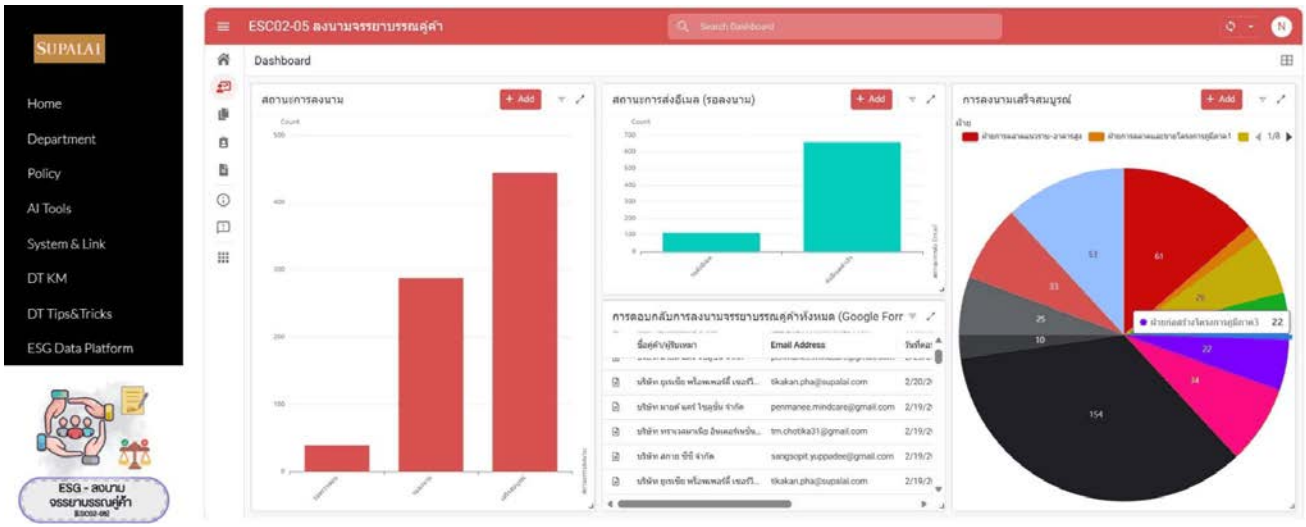
Code of Conduct for Business Partners

The company prioritizes responsible supply chain management by establishing a Supplier Code of Conduct and requiring partners to acknowledge and sign it via the AppSheet platform. This facilitates systematic document submission and tracking of partner signatures, demonstrating partners' understanding and commitment to adhering to the company's standards in business ethics, human rights, labor, safety, and anti-corruption. Additionally, the company conducts Supplier Site Visits to monitor actual operations, including Human Rights Due Diligence (HRDD) assessments within the supply chain, to ensure that partners' business operations comply with the company's standards.

In 2025, the company will implement responsible supply chain management as follows:

- 483 partners signed the Supplier Code of Conduct, representing 63% of the total number of partners.



- Conducted Supplier Site Visits to 7 key partners' operational areas to supervise and monitor their operations to ensure compliance with the Supplier Code of Conduct and the company's sustainable supply chain management guidelines, particularly in the environmental, social, and governance (ESG) dimensions, as well as a comprehensive Human Rights Due Diligence (HRDD) assessment in accordance with the guidelines set by the Securities and Exchange Commission (SEC).

Supplier Site Visits Construction Materials Group

Responsibility to Customers

Supalai recognizes that customers are key stakeholders essential to the organization's success. Consequently, the Company has established business guidelines that prioritize safety, product quality, and fair treatment of customers, based on the principles of transparency, accountability, and respect for consumer rights. The Company is committed to developing and delivering high-quality and safe residential projects, emphasizing construction standards, quality control, and pre-delivery inspections to ensure that customers receive products of superior quality that meet all relevant standards. Furthermore, the Company promotes the communication of accurate and clear product and service information, ensuring it is not misleading, so that customers can make well-informed decisions (informed decision-making).

Promotion of compliance with the business code of conduct

Promotion for the board of directors, executives, and employees to comply with the business code of conduct : Yes

The Board of Directors regularly reviews policies and codes of conduct annually to align with changing circumstances. In the past year, important policies were reviewed and approved to enhance sustainability in all dimensions, as follows:

1. Review and Improvement of Key Policies (Review of Existing Policies)

The company has reviewed the abridged Code of Conduct for employees and the Good Corporate Governance Policy to ensure clear implementation, comprising:

- Sustainable Corporate Governance Policy
- Policy on Limiting the Number of Directorships in Listed Companies for Company Directors
- Human Rights Policy
- Supplier Code of Conduct

2. Approval of Additional Policies for Sustainability (New ESG Policies)

To elevate environmental, social, and governance (ESG) management, the company has approved 8 additional new policies to serve as a comprehensive operational framework, as follows:

- **Environmental Aspects:** Sustainable Environmental Policy, Climate Change Management Policy, Resource and Waste Management Policy, and Biodiversity Management Policy
- **Social and Employee Aspects:** Sustainable Social Policy and Responsible Termination Policy
- **Management Aspects:** Environmental Management Policy

The company has established a communication strategy for the Corporate Governance Policy Handbook and the Code of Conduct to enhance employees' knowledge, understanding, and awareness of good corporate governance principles. Content has been developed to clearly explain operational guidelines, along with examples of situations that should and should not be practiced, enabling employees to understand and apply them appropriately in their work.

These communication guidelines are designed to align with the principles of good corporate governance of the Stock Exchange of Thailand, as well as best practices under the Corporate Governance Development Project for listed companies, to encourage the company's personnel to operate with transparency, ethics, and continuous adherence to good corporate governance standards.

The company has disseminated and communicated this information through the internal Intranet system to ensure that directors, executives, and employees of the company, including its subsidiaries, can access and understand the operational guidelines thoroughly. This will support personnel at all levels in using it as a guideline for appropriately and consistently interacting with all stakeholder groups, in line with the company's good corporate governance policy, which covers all four key categories.

1. Shareholders' Rights and Equitable Treatment of Shareholders
2. Consideration of Stakeholder Roles and Sustainable Business Development
3. Disclosure and Transparency
4. Board of Directors' Responsibilities

Information on material changes and developments in policy and corporate governance system over the past year

Material changes and developments related to the review of policy and guidelines in corporate governance system or board of directors charter

In the past year, did the company review the corporate governance policy and guidelines, or board of directors charter	:	Yes
Material changes and developments in policy and guidelines over the past year	:	Yes

Each sub-committee regularly reviews its charter and related policies on an annual basis to ensure alignment with its roles, responsibilities, and appropriate practices in accordance with the Principles of Good Corporate Governance. In this regard, the sub-committees have performed their duties as assigned by the Board of Directors comprehensively and have provided constructive recommendations that support the Companys business operations, while continuously adhering to the Corporate Governance Code (CG Code). The results of such reviews are subsequently proposed to the Board of Directors for consideration and approval on an annual basis.

In 2025, the Company established sustainability targets in the governance dimension and disclosed the performance outcomes of its sustainability management, which can be summarized as follows.

Sustainability Goal Governance	Key Sustainability Management Performance Results For the Year 2025
Evaluation of the quality of shareholder meetings, (AGM Checklist) full score of 100 Point, Excellent level	Consistent total score of 100 points. For the 13th consecutive year. (Year 2013 - 2025)
Surveying of excellent corporate governance practices among registeredcompanies or CGR is rated in the top tier of 5 stars.	5 stars, survey result in Excellent level. For the 13th consecutive year. (Year 2013 - 2025)
Sustainability assessment, business ethics category and anti-corruption: 100 points	100 points consecutive
FTSE Russell ESG Scores theme Corporate Governance and Anti-Corruption full score of 5 points	Corporate Governance: achieved a full score of 5 points (2024: 4 points) Anti-Corruption: achieved a full score of 5 points (2024: 5 points)
Member seal of commitment declaration for collaboration in CAC Change Agent project 3 stars.	3 stars member seal. For the 4th consecutive year. (Year 2022 - 2025)

Implementation of the CG Code for listed companies

Implementation of the CG Code as prescribed by the SEC	:	Fully implement

The Company has considered the "Corporate Governance Code for Listed Companies 2017" (CG Code) prepared by the Office of the Securities and Exchange Commission (SEC) to apply the CG Code to create sustainable value for the business.

Throughout the year 2025, the Company had consistently complied with the CG Code in accordance with the criteria of the survey of the corporate governance of the listed company project. The Company also considered and reviewed the implementation of the CG Code, which might not cover some criteria. However, the Company has conducted other approaches which are different from the specified criteria. They have been considered by the Board of Directors in terms of the reasonableness and suitability under the environment of the Company's business operation in order to achieve the Company's objectives and take into account the best interests of shareholders. The matters that the Company has not implemented are as follows:

Practices under CG CODE and CGR	Reasons for or replacement measures of the Company
Election of directors by cumulative voting	The Company has not determined the cumulative voting methods for director election because the Company considers that such criteria still have disadvantages in a practical way. In other words, these criteria encourage minority shareholders to gather and vote for electing directors that are different from those nominated by the Company. This may cause the elected directors' representatives to be inconsistent with the Board Skill Matrix, which is a tool used to nominate directors based on the Company's strategy. In addition, the management approaches of elected directors may be conducted for the interests of a particular group of shareholders, which is not for the best interests of shareholders, leading to a divisive relationship between the directors and executives that affect the management in the same direction.
Forming policies to limit the number of years for the term of office of independent director more than 9 years from the date appointed for the first time.	The Company has 4 independent directors, of which 4 directors shall hold office for more than 9 years. However, the Nomination and Compensation Committee and the Board agreed that independent directors are fully qualified according to the criteria set by the Securities and Exchange Commission, Thailand that is, they are knowledgeable, capable with experience suitable for the business. They can provide opinions freely and perform their duties as independent directors well. All independent directors have also proved that they can maintain independence and have no conflict of interest and/or significant vested interest in the company whatsoever.

The Board of Directors reviews the matters that the Company has not been able to comply with the principles of good corporate governance on an annual basis.

Other corporate governance performance and outcomes

Other Practices in Good Corporate Governance to Support the ASEAN CG Scorecard Assessment

Supalai Public Company Limited is committed to continuously strengthening its good corporate governance practices by conducting business with transparency, accountability, and due consideration for all stakeholders. The Company strives to align its governance framework with international standards in order to support sustainable business growth.

In 2025, the Company was assessed under the **ASEAN Corporate Governance Scorecard (ASEAN CG Scorecard)** and was recognized in the **ASEAN Asset Class PLCs** category. Supalai was among 74 listed companies in Thailand that received this recognition at the regional level. The ASEAN CG Scorecard assessment covers listed companies from six ASEAN member countries, namely Thailand, Malaysia, Singapore, the Philippines, Indonesia, and Vietnam, totaling 569 companies.

This recognition reflects the Companys **strong commitment to continuously enhancing its corporate governance standards**. Supalai integrates good corporate governance principles with environmental, social, and governance (ESG) considerations across its business operations to create sustainable value for all stakeholders. The achievement also reinforces investor and consumer confidence while affirming the Companys leadership in Thailands real estate development industry.

As of 31 December 2025, the Board consists of 10 directors and 1 advisor to the Board. Of the 10 directors, 4 are independent directors, 3 are non-executive directors, and 3 are executive directors. The Company has established a Board Diversity Policy covering gender, age, professional background, and expertise. Female directors represent 10% of the Board. The Nomination Committee reviews Board composition annually and considers diversity in succession planning for directors and senior executives. Directors are selected based on qualifications, independence, integrity, leadership, strategic vision, and ability to devote sufficient time to perform their duties. The nomination and appointment process is carried out through the Nomination Committee before being proposed to the Board of Directors and shareholders for approval.*

The appointment was subsequently proposed to the Board of Directors and approved on December 8, 2020.

The measures for balancing the power between the board of directors and the Management

The measures for balancing the power between the board of directors and the Management	:	Have
Methods of balancing power between the board of directors and Management	:	Appointing an independent director to jointly consider the agenda of the board of directors meeting

Independent Directors Committee

The Board of Directors defines the definition of the independent director. It refers to the directors who can express opinions to support policies that are beneficial to shareholders or report suggestions independently in accordance with the assigned mission, regardless of any interests relating to assets or positions, are independent from the control of the management and the major shareholders of the Company, do not get involved with or have no interests, are not under the influence of any person or a group of persons, and do not have any circumstances to coerce them to be unable to express opinions. The Board of Directors approved the appointment of the Independent Director Committee. The names are listed as follows:

No.	Name - Surname		Position in the Independent Directors Committee
1	Assoc. Prof. Dr. Virach	Aphimeteetamrong	Chairman of the Independent Director
2	Assoc. Prof. Dr. Somjai	Phagaphasvivat	Independent Director
3	Mr.Anant	Gatepithaya	Independent Director
4	Assist.Prof.Aswin	Bijayayodhin	Independent Director

Constitution of Independent Directors

1. Independent directors are appointed by the Board of Directors, consisting of all independent directors of the Company. The Nomination and Compensation Committee shall propose the list to the Board of Directors to appoint one independent director as the Lead Independent Director.
2. The qualifications are in accordance with the regulations of the Capital Market Supervisory Board and the requirements of the independent directors of the Company, which must be reviewed and certified at least once a year.
3. Independent directors are qualified persons with knowledge, capabilities, and experiences that are beneficial to the Company.

Establishment of Qualifications of Independent Directors

To build the confidence of investors and maintain the balance of good management, the Company has defined the independence of "independent directors" more stringently than the criteria set by the Capital Market Supervisory Board as follows:

1. Appointed by the Board of Directors or the Shareholders Meeting of the Company to be the independent director.
2. Holding shares of no more than 0.5% of the total voting shares of the Company, its subsidiaries, associates, major shareholders, or controlling persons, including the shareholding of related parties of such independent director.
3. Not being or having been an executive director, workers, employees, advisors receiving a regular salary, or controlling person of the Company, its subsidiaries, associates, same-level subsidiaries, major shareholders, or controlling persons, unless he/she has been discharged from the aforementioned characteristics for at least 2 years

prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand; such prohibited characteristics shall not include the case where the independent director was a government official or an advisor of a government agency who is a major shareholder or a controlling person of the Company.

4. Not being a person with a blood relationship or legal registration in the manner of a parent, spouse, sibling, or child, including the spouse of the children, other directors, executives, major shareholders, controlling persons, or persons to be nominated as a director or a controlling person of the Company or its subsidiaries.

5. Not having or never having had a business relationship with the Company, its subsidiaries, associates, major shareholders, or controlling persons in a manner that may impede the use of its independent discretion, including not being or never having been a significant shareholder or a controlling person of a person having a business relationship with the Company, its subsidiaries, associates, major shareholders, or controlling persons, unless he/she has been discharged from the aforementioned characteristics for at least 2 years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand.

The business relationship under Paragraph One includes normal business transactions, rental or lease of real estate, transactions related to assets or services, or granting or receipt of financial assistance through receiving or providing loans and guarantees, providing assets as collateral, and any other similar actions, which result in the Company or the counterparty being subject to indebtedness payable to the other party in an amount starting from 3% of the Company's net tangible assets or from 20 million baht or more, whichever amount is lower. In this regard, the calculation of such indebtedness shall be in accordance with the method for calculating the value of related party transactions under the Notification of the Capital Market Supervisory Board Re: Rules on Execution of Related Party Transactions, mutatis mutandis. In any case, the consideration of such indebtedness shall include the indebtedness incurred during the period of 1 year to the date of establishing the business relationship with the related person.

6. Not being or never having been an auditor of the Company, its subsidiaries, associates, major shareholders, or controlling persons, and not being a significant shareholder, a controlling person, or a partner of the audit office for which the auditor of the Company, its subsidiaries, associates, major shareholders, or controlling persons works, unless he/she has been discharged from the aforementioned characteristics for at least 2 years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand.

7. Not being or never having been a professional service provider, including a legal advisor or a financial advisor who receives service fees exceeding 2 million baht per year from the Company, its subsidiaries, associates, major shareholders, or controlling persons, and not being a significant shareholder, a controlling person, or a partner of the professional service provider, unless he/she has been discharged from the aforementioned characteristics for at least 2 years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand.

8. Not being a director appointed as the representative of the Companys directors, major shareholders, or any shareholders who are connected persons of the major shareholders of the Company.

9. Not undertaking any business of the same nature and in significant competition with the business of the Company or its subsidiaries or not being a significant partner in partnerships or an executive director, worker, employee, or advisor receiving a regular salary or holding more than 1% of the voting shares of other companies that operate a business of the same nature and in significant competition with the business of the Company or its subsidiaries.

10. Not possessing any other characteristics that will prevent the independent expression of opinions in respect of the operations of the Company.

11. The independent director who is qualified according to Item 110 may be assigned by the Board of Directors to make decisions on the operations of the Company, the operations of the subsidiaries, associates, or juristic persons that may have a conflict. The decision could be made in the form of a panel.

Scope of Duties and Responsibilities

Chairman of the Independent Directors	Independent Directors
1.Presiding over the Independent Directors Meeting (Non-executive Director) which is held at least once a year. 2.Being a leader and a coordinator for any opinions and observations of independent directors in order to propose them to the Board of Directors. 3.Being a coordinator to contact among shareholders and independent directors (if any). 4.Being responsible for performing specific operations required to be carried out by independent directors.	1.Considering and providing suggestions and opinions on strategies and sustainability that should be performed and are beneficial to other related stakeholders. 2.The independent director may seek advices from experts to provide assistance in performing duties efficiently under the charter at the expenses of the Company. 3.Reviewing the Companys compliance with the requirements / regulations of listed company supervising agencies relating to independent directors. 4.Reviewing and improving the charter of independent directors to be appropriate and up to date. 5.Independent Directors shall be entitled to attend trainings or activities in order to enhance work-related knowledge by using the Company's resources. 6.Independent directors annually perform the self-assessment to certify their qualifications of independence in accordance with the criteria set by the Capital Market Supervisory Board.

Determination of Tenure of Sub-committee

The tenure of the sub-committees, namely the Audit Committee, the Corporate Governance and Sustainability Development Committee, the Risk Management Committee and the Nomination and Compensation Committee, shall be 3 years for each term. When vacating office upon the expiration of the term, they may be re-appointed.

The Company supports the development of the Company's management system and operations. Non-executive Directors and independent directors are allowed to hold meetings as deemed appropriate without executive directors or the Management attending the meeting in order to discuss issues on the business management of the Company or other highlighted matters which cause benefits to the Company and all stakeholders as they can express their opinions independently and create different perspectives. In 2025, there was a meeting held on August 13, 2025. The issues discussed at the meeting were disclosed by reporting to the Board of Directors' Meeting No. 9/2025 held on September 9, 2025. Assoc. Prof. Dr. Virach Aphimeteetamrong to be the Chairman of the Independent Director Committee and is responsible for determining the agenda of the Independent Director Committee's meeting by supervising and including important matters to the agenda of the Independent Director's meeting. The results of the meeting were reported to the Board of Directors for acknowledgement.

Separation of Roles and Duties of the Board of Directors from the Management Team

Directors and executives of the Company perform their duties for the benefits of the Company and shareholders with the clear management structure, balance and traceability. The Committee understands the roles, duties and responsibilities towards shareholders and can show that they will be able to perform their duties. The structure of Committee and management must be inspected and have adequate balance as follows:

1. Consisting of at least one-third of the total number of independent directors, but not less than 3 persons.
2. Having the Audit Committee which consists of at least 3 independent members of the Audit Committees having duties in the same manner as those specified in the Regulations of the Stock Exchange of Thailand, and at least 1 person having knowledge and experiences in reviewing the reliability of the financial statements and performing other duties as a member of the Audit Committee.

3. The Company clearly segregates roles, duties and responsibilities between the Board of Directors and the Management Team. The details are as follows.

Chairman of the Board	Chief Executive Officer
1. Being responsible as the leader of the Board of Directors in monitoring the administration of the Executive Committee and other sub-committees to ensure that the performance of duties of the Board of Directors and other sub-committees is efficient and achieves the objectives and goals of specified plans. (Ensure Board Effectiveness) 2. Presiding over the Board of Directors Meeting and the Company's Shareholders Meeting and ensuring that all directors participate in promoting the ethical organizational culture and adhering to the good corporate governance and the code of conduct of the Company. (Manage Board Meetings) 3. Having a casting vote in the event that there is a vote casting at the Board of Directors Meeting and the votes of both parties are tie. 4. Allocating sufficient time to discuss important issues, cooperating with independent directors to determine the agenda for the Board of Directors' Meetings, and providing measures to ensure that important matters are included in the agenda, as well as promoting and encouraging the Management to exercise prudent discretion to discuss any issues during the meeting, make inquiries and express opinions. 5. Promoting constructive relationships among directors and the Board of Directors and the Management. (Manage Key Relationships).	1. Managing and performing the Company's operations in accordance with the strategic directions and policies approved by the Board of Directors within the scope and authority specified by the Board of Directors. 2. Establishing short-term and long-term business goals in the annual business plan, including expense budgets and long-term strategic plans for the Board of Directors for approval and being responsible for reporting the progress of such approved plan and budget to the Board of Directors every 3 months. 3. Managing operations through the Management Committee and the Executive Committee to achieve the goals specified in the business plan by aiming to create long-term values for shareholders, competitiveness and suitable returns for shareholders. 4. Allocating resources and recruiting personnel with potential for the highest benefits. 5. Appointing, removing, transferring, promoting, demoting, cutting salaries or wages, and taking disciplinary action for employees and workers, as well as dismissing employees and workers to vacate office in accordance with the regulations specified by the Committee. 6. Promoting and building a strong organizational culture and supporting the vision and growth of the business. 7. Closely monitoring the Company's operations, measuring operating results and reporting activities completely performed by the Management to the Board of Directors periodically and in a timely manner. 8. Considering, screening, and proposing for approval from the Board of Directors regarding the Companys policies and business directions, matters possibly causing significant changes to the Company's business, and matters requiring compliance with laws and regulations of the Stock Exchange of Thailand. 9. Preparing details of operating authority within the Company to decentralize employees to perform operations and make decisions efficiently and flexibly without losing control in order to propose them to the Board of Directors for approval. 10. Preparing financial position reports and financial statements for the Board of Directors to consider and approve them every quarter.

The aforementioned delegation of authority to the Chief Executive officer must not be in the manner that allows the authorized person to approve transactions in which he/she or persons may have conflicts, interests, or conflicts of interest in any other manners with the Company or its subsidiaries, unless it is a normal course of business of the Company and passes the resolution of the Board of Directors Meeting where independent directors attend the meeting and establish a clear framework for consideration only. However, it shall be in accordance with the criteria of the Office of the Securities and Exchange Commission, Thailand and regulations of the Stock Exchange of Thailand or other government agencies.

Job Position Combination or Separation

The Company combines the positions of Chairman of the Board and Chief Executive Officer to ensure unified leadership and strategic alignment. To mitigate potential governance risks arising from this structure, the Company has implemented the following balancing mechanisms:

- Appointment of a Lead Independent Director
- Independent Directors meeting without management at least once annually
- Abstention from voting in case of conflict of interest
- Requirement of unanimous approval for significant transactions

However, the resolutions of every meeting must be approved by the majority votes. The Chairman will cast a vote in the case of a tie vote only. Decisions on important matters must be resolved unanimously by all directors who attend the meeting. If any director disapproves, such agenda will not be approved by the Board of Directors. In the event that the Chairman of the Board has interests in that agenda, the Chairman of the Board will abstain from voting. The roles and duties of Chairman of the board will be separate from Chief Executive officer. (See to Separation of Roles and Duties of the Board of Directors from the Management Team), Appointing the chairman of independent director to jointly determine the agenda of the Board of Directors' meeting to balance the power between the Board of Directors and the Management.

- Promoting the application of information technology to disseminate information and to be able to access additional necessary information. If necessary, the Board of Directors can provide opinions from independent advisors or external professionals at the expense of the Company.

- Participating in building and driving an ethical organizational culture whereas the Board of Directors should behave as a model as a leader of corporate governance.

2. Monitoring of Operations of the Management for Inspection of Balance and Consistency with Directions of the Company

Such assignment shall not release the duties and responsibilities of the Board of Directors. The Board of Directors should also monitor the Management to perform its assigned duties as follows:

2.1. Corporate Governance

- Monitoring and supervising the Management Committee to operate businesses with social and environmental responsibility included in the Operational Plan and applying the strategic plan to the Operational Plan in accordance with the strategic plans, main goals and objectives of the Company, including establishing a framework for budget allocation and resource management for the efficient and effective development, considering the impacts and development of resources throughout the value chain.
- The Management Committee reports the performances at least once a quarter in order to be able to control and supervise the performances of the Management Committee continuously and timely.
- Non-executive directors hold meetings as necessary to discuss issues on management that are in the limelight without the Management attending the meeting and report it to the Chief Executive officer for acknowledgment.
- Ensuring that there is adequate monitoring of the financial liquidity and solvency of the entity and providing plans for solution to recover the operational status in the event that financial difficulties occur or are likely to occur.
- Monitoring, managing and following the solution of potential conflicts of interest and connected transactions to be in accordance with the procedures and information disclosure stipulated by the laws, including the prevention of improper use of the Company's assets, information and opportunities and transactions made with those who have a connected relationship with the Company in an inappropriate manner.
- Supervising departments and persons responsible for investor relations, determining the direction, supporting operations on investor relations, and ensuring that there is an appropriate and fair communication channel with each group of shareholders and stakeholders, such as investors, analysts and the media.
- Providing accounting, financial reporting and auditing systems, including ensuring that there are an efficient, effective of internal control and internal audit system.
- Preparing of financial statement at the end of the Company's fiscal year and proposing them to the Shareholders' Meeting at the Annual General Meeting to consider and approve the balance sheet and profit and loss account; The Board of Directors must allow the auditors to complete the audit before presenting it to the Shareholders' Meeting.
- Providing complete, accurate and sufficient financial information and general information that are important to shareholders and verifying the authentication of the reported information.
- Providing accurate, clear, transparent, and reliable disclosure of financial and non-financial information with high standards.

2.2. Internal Control and Risk Management

- Establishing guidelines for risk management comprehensively and ensuring that the executives provide an internal control system or effective risk management processes.
- Providing the internal control and audit, as well as establishing a system for financial and operational control, supervising operations, and controlling and managing risks.

2.3. Determination of Remuneration of Directors

- The Board of Directors is responsible for proposing directors' remuneration to the Shareholders' Meeting for approval by considering the structure and the rate of remuneration to be suitable for duties and responsibilities and motivating the Board of Directors to lead the organization to achieve both short-term and long-term goals.

2.4. Determination of Remuneration of Executive Management

- Appointing and determining the remuneration of the Chairman of the Executive Committee.

- Ensuring that there is an appropriate system or mechanism for remuneration payment of senior executives in order to create both short-term and long-term motivation for performance which is in line with the main objectives and goals of the Company.
- The Board of Directors is responsible for evaluating the performances of executive management and determining the remuneration based on their performances.

3. Self-Assessment

The Board of Directors provides an annual performance assessment of the Board of Directors, sub-committees and individual directors at least once a year through the Nomination and Compensation Committee. The results are applied to the development of the directors' performance of duties.

4. Appointment of a Professionally Qualified Person as Company Secretary

Appointment and Removal of Directors

The Board of Directors assigns the Nomination and Compensation Committee to propose the appointment to the Shareholders' Meeting for approval in accordance with the rules and procedures prescribed in the Company's Articles of Association with the following substances:

1. Directors of the Company are elected by the Shareholders' Meeting by not less than 5 persons and there are at least 3 independent directors. Not less than one-half of the total number of directors must have residence in the Kingdom and at least one director of the Company must have knowledge in accounting and finance. The directors must possess qualifications as specified by laws and regulations.
2. The Shareholders' Meeting shall elect directors. The Nomination Committee selects and nominates qualified persons according to the following rules;

(1) A shareholder has one vote. One share equals to one vote.

(2) Each shareholder is required to exercise all his votes under (1) to elect one person or several persons to be a director. However, the shareholder shall not allot his/her votes to any person in any number.

(3) The candidates shall be ranked in order descending from the highest number of votes received to the lowest and shall be appointed as directors in that order in the amount required in the election or to be elected at that time. In the event that the persons who are elected in descending order of votes obtain the equal number of votes exceeding the number of directors required or to be elected at that time, the Chairman shall have a casting vote.

3. At each Annual General Meeting, one-third of the directors must vacate office. If the number of directors is not a multiple of three, then the number nearest to one-third must vacate office. The directors to vacate office in the first and second years following the registration of the company shall be drawn by lots. In every subsequent year, the directors who have been longest in office shall vacate office.
4. Any director who wishes to resign from his/her position shall submit a resignation letter to the Company. The resignation takes effect as from the date on which the letter of resignation reaches the Company.
5. In the case where any director shall vacate office prior to his/her retirement by rotation, the resolution must be passed by a vote of not less than three-fourths of the number of shareholders present at the meeting and eligible to vote and representing at least one half of the total number of shares held by the shareholders present at the meeting and eligible to vote.

Authorization Granted by Board of Directors

Two of four directors authorized to sign on behalf of the Company shall jointly sign to authorize other directors or other persons to act on behalf of the Company within a certain period of time.

The delegation of authority and the responsibilities of the Board of Directors will not be in the manner of the delegation or sub-delegation of authority which the Board of Directors or an authorized person of the Board of Directors is able to approve transactions that he/she or a person having a potential conflict (as defined in the Notification of the SEC Board) for the Company and its subsidiaries. The approval authority of the Board of Directors is as follows:

- Considering and approving the acquisition or disposal of assets, unless such transaction is subject to approval from the Shareholders' Meeting; such approval shall be in accordance with the notifications, regulations and/or rules relating to the Office of the Securities and Exchange Commission, Thailand.
- Considering and approving connected transactions, unless such transaction is subject to approval from the Shareholders' Meeting; such approval shall be in accordance with the notifications, regulations and/or rules relating to the Office of the Securities and Exchange Commission, Thailand.
- Considering and approving the payment of interim dividends to shareholders, when the Company earns the reasonable amount of profits to do so, and reporting such dividend payment to the Shareholders' Meeting at the next shareholders' meeting.
- Having the authority to approve any loan or application for credit from financial institutions or setting a new working capital limit (O/D) as well as expenses for investment and land purchase within the limit of each transaction that exceeds 200 million Baht per time.

Authority of Board of Directors

1. The Board of Directors is responsible for complying with laws, objectives, and Articles of Association of the Company and the resolution of the Shareholders' Meeting by performing duties with responsibilities, duty of loyalty, and duty of care, maintaining current and long-term interests of shareholders, including abiding by rules and regulations of the Stock Exchange of Thailand, the Office of the Securities and Exchange Commission, Thailand and the Capital Market Supervisory Board.
2. The Board of Directors has the authority to appoint a director to be the Chairman of the Board and may appoint the Vice Chairman as the Board deems appropriate.
3. The Board of Directors has the authority to appoint a director to be the Chief Executive Officer and any person to be the Company Secretary as the Board of Directors deems appropriate.
4. The Board of Directors supervises directors to obtain necessary training and development of knowledge continuously in order to enhance their knowledge relating to works by using the Company's resources.

Meeting and Quorum

The Company organizes the Board of Directors Meeting at least once a month and additional extraordinary meetings as necessary. The directors are required to attend every meeting, unless there is a necessary reason. The meetings date, time and agenda are clearly set in advance throughout the year. It is scheduled for the 2nd Tuesday of the month. An invitation letter stating the agenda and supporting documents shall be submitted to each director at least 7 days in advance prior to the date of the meeting to allow sufficient time for each director to study them before the meeting, unless there is an urgent case that affects the interests of the Company. The Company records the minutes of meeting at every meeting within 14 days from the date of the meeting, which consists of details including written opinions / observations. All directors are able to request for the review of the minutes of meeting from the Company Secretary at all times. The minutes of meeting approved by the Board of Directors must be kept together with all relevant documents.

1. The Company establishes a policy stipulating that, if the director is considered to have interests that may conflict with the interests of the Company in any agenda, the Company Secretary will not submit such agenda to such director. Directors with interests must temporarily leave the meeting room and abstain from voting on such agenda, which is the practice that the Board of Directors has always performed.
2. At the Board of Directors meeting, at least half of total number of directors present at the meeting is required to constitute a quorum. In the event that the Chairman of the Board is absent from the meeting or is unable to perform his duties, if there is a vice-chairman, the vice-chairman shall preside over the meeting. If there is no vice Chairman or the vice chairman is unable to perform his duties, the members present at the meeting shall elect one director to preside over the meeting.
3. The final decision of the meeting shall be made by a majority vote.
4. ne director has 1 vote, unless the director having interests in any matter has no right to vote on that matter. In the case of a tie vote, the Chairman of the Meeting shall have a casting vote.

5. To summon the Board of Directors Meeting, the Chairman of the Board or an assigned person shall submit an invitation letter no less than 7 days before the date of the meeting. Unless there is an urgent and necessary case for protecting rights or interests of the Company, the meeting appointment shall be notified by other means and the date of the meeting may be scheduled to the earlier date.

6. For the good corporate governance, the Company has a policy by setting a minimum quorum at the time of voting that there must be no less than two-thirds of the total number of directors present at the meeting.

Remuneration policy for executive directors and executives

Remuneration of Chief Executive Officer

The Company specified a remuneration policy for the Chief Executive Officer, and the Board of Directors is assigned to consider the results of the Companys operation based on the indicator and established targets (KPI: Key Performance Indicator) approved by the meeting of the Board of Directors. Thereafter, the Nomination and Compensation Committee will consider the results of the performance and remuneration of the Chief Executive Officer to comply with the result of the performance based on indicators.

There are rules for performance evaluation of the Chairman of the Executive Committee based on the management under the mission and vision, reflecting leadership capabilities and achievement of results consistent with the Companys strategic objectives, business goals, and annual business plan. Plus, economic, social, environmental, and governance performances shall be a part of the performance indicators of the Chairman of the Executive Committee to reflect the organization's awareness of sustainability integration as a part of sustainable business operations. There are two areas of indicators defined as follows:

1. The economic area consists of business performances, inventory management, and customer satisfaction.
2. The social, environmental, and governance area reflects sustainable business operations and consists of the ESG assessment results and scores from FTSE Russell, and the Stock Exchange of Thailand.

Remuneration of Executive Management

The Company has adopted the policy and criteria in providing remuneration to the executives by assigning the Nomination and Compensation Committee to assess the performance of the Executive Management and determine Key Performance Indicators (KPIs), and the annual remuneration in the form of cash is to be in accordance with the operational results of the Company and the performance of each executive by considering and screening the remuneration of the Executive Management, namely, the Chief Executive Officer, Executive Vice President, Managing Director, Deputy Managing Director, and Chief Financial Officer, in order to be considered and approved by the Board of Directors every year.

Performance Report on Corporate Governance

Information about the summary of duty performance of the board of directors over the past year

Summary of duty performance of the board of directors over the past year

The Board of Directors is responsible for defining the corporate vision, policies, and business strategies while overseeing material sustainability issues. These include climate change, ESG risk management, supply chain governance, and stakeholder impacts, all aimed at driving long-term value creation for shareholders and all stakeholder groups.

In addition, the Board monitors and evaluates the performance of the management to ensure that operations are conducted in accordance with the approved plans and strategic direction, while providing policy guidance and recommendations that contribute to the Companys long-term development.

Criteria for selecting independent directors

The Board of Directors has approved the Independent Directors Committee Charter, which sets out the qualifications of Independent Directors in full compliance with the requirements prescribed by the Stock Exchange of Thailand and relevant laws, as follows:

1. Holding shares of no more than 0.5% of the total voting shares of the Company, its subsidiaries, associates, major shareholders, or controlling persons, including the shareholding of related parties of such independent director.

2. Not being or having been an executive director, worker, employee, or advisor receiving a regular salary, or controlling person of the Company, its subsidiaries, associates, same-level subsidiaries, major shareholders, or controlling persons, unless he/she has been discharged from the aforementioned characteristics for at least two years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand; such prohibited characteristics shall not include the case where the independent director was a government official or an advisor of a government agency who is a major shareholder or a controlling person of the Company.

3. Not being a person with a blood relationship or legal registration in the manner of a parent, spouse, sibling, or child, including the spouse of the child, other directors, executives, major shareholders, controlling persons, or persons to be nominated as a director or a controlling person of the Company or its subsidiaries.

4. Not having or never having had a business relationship with the Company, its subsidiaries, associates, major shareholders, or controlling persons in a manner that may impede the use of its independent discretion, including not being or never having been a significant shareholder or a controlling person of a person having a business relationship with the Company, its subsidiaries, associates, major shareholders, or controlling persons, unless he/she has been discharged from the aforementioned characteristics for at least 2 years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand.

The business relationship under Paragraph One shall include normal business transactions, rental or lease of real estate, transactions related to assets or services, or granting or receipt of financial assistance through receiving or providing loans, guarantees, providing assets as collateral, and any other similar actions, which result in the Company or the counterparty being subject to indebtedness payable to the other party in an amount starting from three percent of the Company's net tangible assets or from twenty million baht or more, whichever amount is lower. In this regard, the calculation of such indebtedness shall be in accordance with the method for calculating the value of related party transactions under the Notification of the Capital Market Supervisory Board Re: Rules on Execution of Related Party Transactions, mutatis mutandis. In any case, the consideration of such indebtedness shall include the indebtedness incurred during the period of 1 year to the date of establishing the business relationship with the related person.

5. Not being or never having been an auditor of the Company, its subsidiaries, associates, major shareholders, or controlling persons, and not being a significant shareholder, a controlling person, or a partner of the audit office for which the auditor of the Company, its subsidiaries, associates, major shareholders, or controlling person works, unless he/she has been discharged from the aforementioned characteristics for at least 2 years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand.

6. Not being or never having been a professional service provider, including a legal advisor or a financial advisor, who receives service fees exceeding 2 million baht per year from the Company, its subsidiaries, associates, major shareholders, or controlling persons, and not being a significant shareholder, a controlling person, or a partner of the professional service provider, unless he/she has been discharged from the aforementioned characteristics for at least 2 years prior to the date of application submission to the Office of the Securities and Exchange Commission, Thailand.

7. Not being a director appointed as the representative of the Companys directors, major shareholders, or any shareholders who are connected persons of the major shareholders of the Company.

8. Not undertaking any business of the same nature and in significant competition with the business of the Company or its subsidiaries or not being a significant partner in partnerships or an executive director, workers, employee, or advisor receiving a regular salary or holding more than 1% of the voting shares of other companies, which operate a business of the same nature and in significant competition with the business of the Company or its subsidiaries.

9. Not possessing any other characteristics that will prevent the independent expression of opinions in respect of the operations of the Company.

10. The independent director who is qualified according to Items 1-9 may be assigned by the Board of Directors to make decisions on the operation of the Company, the operations of the subsidiaries, associates, and juristic persons that may have a conflict. The decision could be made in the form of a panel.

Process for the Nomination of Independent Directors

1. The nomination and proposal of candidates for independent director positions provide minority shareholders with the opportunity to propose qualified individuals. Candidates may also be considered from the director pool, nominated by the Board of Directors or the Nomination Committee, or sourced through external advisors as appropriate. This is to ensure a diverse range of qualified candidates aligned with the Companys needs and capable of enhancing the effectiveness of corporate governance.

2. Candidates are required to complete a self-assessment form to certify their qualifications prior to assuming the position of Independent Director. The Company carefully verifies each candidates qualifications and independence in accordance with the prescribed criteria. Such criteria include, for example, that the candidate is not and has not been an executive, employee, or staff member of the Company or its subsidiaries within the legally specified period; does not have any significant business relationship with the Company or its subsidiaries; is not a major shareholder or a person with conflicts of interest with the Company and does not have any family relationship with executives or major shareholders.

3. After passing the qualification and independence review, the Nomination Committee considers the candidates suitability in terms of knowledge, expertise, experience, and independence before proposing the nomination to the Board of Directors for approval. The nomination is then submitted to the shareholders meeting for consideration and appointment in accordance with the Companys Articles of Association and applicable laws.

Rights of minority shareholders on director appointment

The Company places importance on the equitable protection of the rights of all shareholders, particularly minority shareholders, to participate in the appointment of the Companys directors. This is in accordance with the Public Limited Companies Act B.E. 2535 (1992), the rules of the Stock Exchange of Thailand, and good corporate governance practices. The key principles are as follows:

1. Opportunity to Propose Director Candidates in Advance

The Company provides an opportunity for minority shareholders to nominate qualified individuals for election as directors at the Annual General Meeting of Shareholders (AGM). Clear criteria, procedures, and timelines for nominations have been established and disclosed in advance via the Companys website to promote shareholder engagement and transparency in the director recruitment and appointment process.

For this year, the Company accepted director nominations from 10 September 2025 to 10 November 2025, with detailed criteria and submission methods announced on the Companys website. Furthermore, the Company discloses the rationale for each director nomination, including the specific skills, knowledge, expertise, and experience that align with the Companys Board Skill Matrix, to support shareholders in their consideration and decision-making.

2. Voting Rights in the Election of Directors

The appointment of directors is made by resolution of the shareholders meeting. Shareholders are entitled to vote in proportion to the number of shares held. The election of directors is conducted on an individual basis, enabling shareholders to exercise their discretion independently.

3. Transparency and Disclosure of Information

The Company ensures full disclosure of information relating to nominated director candidates, such as educational background, work experience, directorships in other companies, shareholding in the Company, independence status (in the case of independent directors), and any relationships that may give rise to conflicts of interest, to support shareholders decision-making.

4. Equitable Treatment of Shareholders

The Company treats all shareholders fairly and equitably, facilitates participation in shareholders meetings, proxy appointments, and the exercise of voting rights, and establishes a transparent and verifiable process for the nomination and appointment of directors.

Method of director appointment	:	Method whereby each director requires approval votes more than half of the votes of attending shareholders and casting votes

Information on the evaluation of duty performance of directors

Criteria for evaluating the duty performance of the board of directors

Board Diversity Assessment Results

The Board of directors assigns the Nomination and Compensation Committee to establish the policy on board diversity. It is believed that the determination of board diversity is an important factor that helps promote the balance of minds and quality of work, including effective decision-making of the Board, which is beneficial to the Company's business operations. The skills necessary for performing the duties of the Board of Directors are determined in 14 areas as follows:

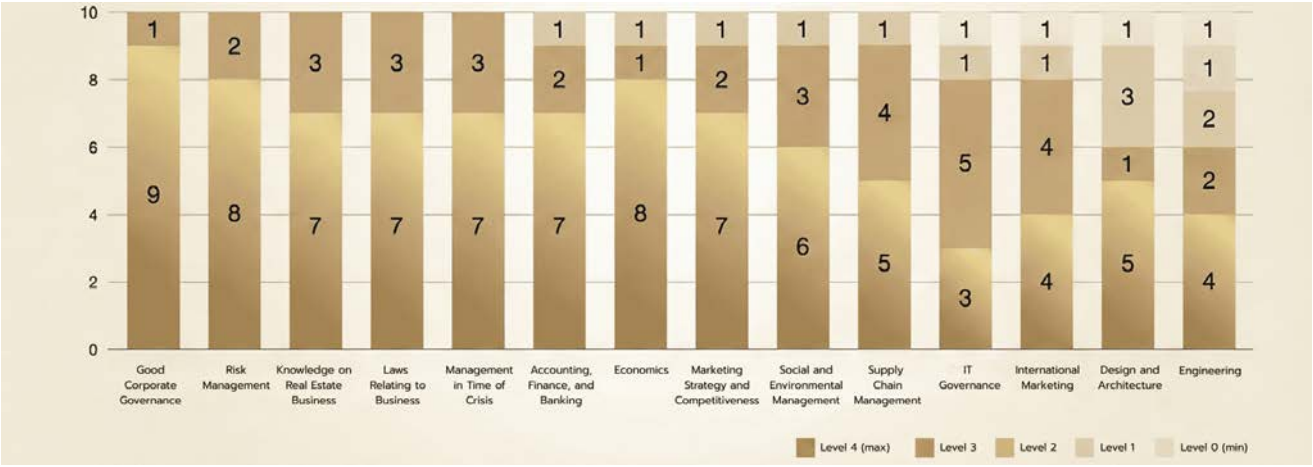
Rules on self-assessment regarding necessary skills for performing duties of the Board of Directors are as follows:

Level of Expertise (%)	Level
More than 86	Level 4 : Excellent
76 - 85	Level 3 : Very Good
66 - 75	Level 2 : Good
50 - 65	Level 1 : Fair
Less than 50	Level 0 : To be improved

The Company Secretary has distributed the Board Diversity Self-Assessment Form to all members of the Board of Directors for annual self-evaluation. After each director completes their self-assessment, they return the form to the Company Secretary for compilation of the Board Diversity Self-Assessment scores. The Nomination and Remuneration Committee has reviewed and determined that the Board's structure possesses diverse knowledge and capabilities, fostering a balance of perspectives, work quality, and decision-making efficiency, which benefits the Company's business operations. According to the Board Diversity Self-Assessment results, in 2025, more than half of the directors demonstrated expertise (Level 4) in all 14 skills and knowledge areas, as follows:

The Board Diversity Self-Assessment					
Expertise level goals (%)	2021	2022	2023	2024	2025
Level 4	level 3 : Very Good	level 3 : Very Good	level 3 : Very Good	Level 4 : Excellent	Level 4 : Excellent
More than 86%	80.83%	81.25%	82.86%	88.39%	86%

The results of the Board Diversity Assessment for the year 2025 showed the number of directors who are rated for each level of proficiency separately based on the skills required to perform their duties



Evaluation of the duty performance of the board of directors over the past year

Performance Assessment of the Committee

The Board of Directors conducts an annual performance evaluation at least once a year. The evaluation forms are designed to align with the Companys Good Corporate Governance Principles, as well as the scope of duties and

responsibilities of the Board. This evaluation process encompasses the board evaluation, individual director evaluation, and the performance of subcommittees.

The Company focuses on utilizing the evaluation results to review the Boards performance and address any issues or obstacles encountered during the past year. These insights are used to enhance the efficiency of the Boards governance and functional processes, as well as to establish guidelines for potential development and strengthen the effectiveness of the Companys corporate governance. Furthermore, these evaluation results serve as a key reference for the Companys Corporate Governance Rating (CG Rating) assessment. In 2025, the appraisal was done in 2 characteristics, they are, 1) the assessment of the whole Committee; 2) the assessment made on an individual basis (self- assessment). The assessment forms were divided into 10 categories consisting as follows:

Performance Assessment	The Whole Board of Directors	Individual Member of the Board of Directors (Self- Assessment)
Board of Directors	/	/
Sub-Committees		
● The Audit Committee	/	/
● The Nomination and Compensation Committee	/	/
● The Corporate Governance and Sustainability Development Committee	/	/
● The Risk Management Committee	/	/

Assessment Process for the Whole Committee and Each Individual Member

In every year, the Secretary of the Nomination and Compensation Committee shall deliver the performance evaluation forms of the Board of Directors and the Sub-committees to all directors for the annual performance assessment in relevant parts. After each director has completed the evaluation, the performance evaluation forms shall be returned to the Secretary of the Nomination and Compensation Committee to compile the evaluation scores of each director, summarize the analysis of the performance evaluation results of various committees for the year, and report to the Nomination and Compensation Committee for acknowledgment. In this regard, the Chairman of the Nomination and Compensation Committee presented the evaluation results to the Board of Directors' meeting on February 24, 2026, which can be illustrated as follows:

The assessment results in percentage are as follows:

Level of Assessment (%)	Level
More than 86	Excellent
76 - 85	Very Good
66 - 75	Good
50 - 65	Fair
Less than 50	To be improved

1. Performance Evaluation Form of the whole Board of Directors and individual members of the Board of Directors (self-assessment), the results can be summarized as follows:

Detailed justification for the Company director's non-attendance at the Board of Directors' meeting

Over the past year, some directors were unable to attend certain meetings due to health issues. The Company places primary importance on the appropriateness and well-being of its directors.

As for another director, they had an important pre-scheduled commitment overseas and informed the Company in advance. Nevertheless, the director was informed of the meeting agenda beforehand and provided comments and/or recommendations to the management or the Chairman for consideration at the meeting.

Remuneration of the board of directors

Types of remuneration of the board of directors

Compensation for Directors and Executives

The Company specified the policy on rules of presentation and consideration for compensation of directors to create the incentives of assigned performance to achieve goals effectively. The Nomination and Compensation Committee is assigned to carefully consider the Compensation rates of the committee, scrutinize the suitability of various reasons thoroughly, compare and refer by the same business including consideration from the expanding business, where shall be presented to the Board of Directors and the meeting of shareholders.

1. The directors receive monthly remuneration and pension. Such remuneration is set to be the level comparable to the same industry group.
2. Directors who are assigned to perform additional duties and responsibilities (such as being a member of the sub-committee) will receive additional remuneration which relates to the level of assigned responsibility, except the executive directors.
3. The Company shall not pay any money or other property to directors unless the remuneration is paid as the rights and benefits habitually as being the Companys director.
4. The remuneration of directors shall be paid in accordance with the resolutions of the shareholders' meeting which comprise a vote not less than two in thirds of the total votes of shareholders who join the meeting.

Remuneration Policy for Directors

The Company has the criteria for providing remuneration to the Board of Directors and Sub-Committees clearly and transparent, which shall be considered the same industrial sector and business expansion. Its believed that such remuneration could attract, retain and motivate the directors to perform their roles and carry out their responsibilities to accomplish the Companys goals efficiently.

In 2025, The Annual General Meeting on April 22, 2025, resolved that approve the Remuneration for Board of Directors, as detail below

Remuneration for the Board of Directors	
1. Remuneration/month	Chairman, Director 45,000 Baht/person/month
2. Special Remuneration/year	Chairman, Director 800,000 Baht/person/year
3. Other benefits (not including general welfare to employees)	1. Directors and Officers Liability Insurance (D&O Insurance) 2. The right to attend training courses and seminars organized by the Thai Institute of Directors Association (IOD) and other relevant institutions 3. Privileges for purchasing products and services of the Group's companies
Remuneration for the Audit Committee	
1. Chairman	35,000 Baht/person/month
2. Director	30,000 Baht/person/month
Remuneration of Sub-Committee: Meeting allowance will be paid only once at the meeting (Sub-Committees comprise of (1) The Nomination and Compensation Committee (2) The Corporate Governance and Sustainability Development Committee (3) The Risk Management Committee and the other sub-Committee appointed by the Committee. (not including Executive Director)	
1. Chairman	35,000 Baht/person/meeting
2. Director	30,000 Baht/person/meeting

Information on corporate governance of subsidiaries and associated companies

Corporate governance of subsidiaries and associated companies

Mechanism for overseeing subsidiaries and associated companies

Does the Company have subsidiaries and associated companies	:	Yes
Mechanism for overseeing subsidiaries and associated companies	:	Yes
Mechanism for overseeing management and taking responsibility for operations in subsidiaries and associated companies approved by the board of directors	:	The appointment of representatives as directors, executives, or controlling persons in proportion to shareholding, Disclosure of financial condition and operating results, Transactions between the company and related parties, Internal control system of the subsidiary operating the core business is appropriate and sufficient in the subsidiary operating the core business

Supervision of the Subsidiaries Operations

The Company has established a policy for overseeing the operations of its subsidiaries. This includes selecting directors with the appropriate knowledge, capabilities, qualifications, and experience relevant to the nature of the subsidiary's business to serve as directors with controlling authority in the subsidiary. These selections have been approved by the Company's Board of Directors. In cases where a subsidiary has significant matters, such as approval of capital increases or decreases, dissolution of the subsidiary, and joint ventures, approval from the Company's Board of Directors is required in all instances. The Board of Directors has resolved to appoint directors with the following scope of authority, duties, and responsibilities:

Financial reporting

- The Board of Directors oversees the Company and its subsidiaries to ensure transparency. Therefore, it requires the use of the same external auditor as the Company. This enables the auditor to examine various transactions and obtain sufficient appropriate evidence to express an opinion on the consolidated financial statements.

Resources

- The Board of Directors allocates and manages the resources of the Company and its subsidiaries efficiently and effectively. These include the SAP (PRD) system and the 1720 complaint channel, aimed at supporting operations to ensure convenience, speed, and enhanced work efficiency.

Legal compliance

- A dedicated department oversees the operations of the Company and its subsidiaries to ensure adherence to relevant regulations and rules. This department is responsible for safeguarding the interests of shareholders, contributing to the sustainable value creation of the business.

Internal control system

- The Board of Directors ensures that an appropriate and effective internal control system is in place. The Audit Committee approves the internal audit plan, which includes reviewing operational and internal control systems, and reports directly to the Audit Committee and the Board of Directors.

Regarding adherence to the Code of Conduct

- The Board of Directors oversees that directors, executives, and employees of the Company and its subsidiaries comply with the Code of Conduct and various policies in accordance with good corporate governance principles. It also monitors compliance with corporate governance policies and practices.

Information on the monitoring of compliance with corporate governance policy and guidelines

Prevention of conflicts of interest

Operations for conflict of interest prevention over the past year

Has the company operated in preventing conflicts of interest over the past year : Yes

Prevention of Conflicts of Interest

The Company adheres to a conflict-of-interest policy, which all directors, executives, and employees, including those in subsidiaries and affiliates, must strictly comply with. All employees are required to report any conflict-of-interest situations upon commencement of employment, during annual reporting periods, and whenever there is a change in circumstances that may lead to a conflict of interest.

In cases where an employee suspects a potential conflict of interest, or if there is something that could lead others to perceive a conflict of interest, they must immediately report it to their supervisor and submit a report to the corporate governance unit. This reporting process is a key internal control mechanism for the Company. The audit committee has assigned the internal audit unit to oversee, monitor, and report on these situations, submitting findings to the audit committee and the board of directors by February of each.

Prevention of the use of inside information to seek benefits

Operations for prevention of the use of inside information to seek benefits over the past year

Has the company operated in preventing the use of inside information to seek benefits over the past year : Yes

Exploitation of Insider Trading

The Company adheres to the policy on the use of inside information, which all directors, executives, and employees, including those in subsidiaries and affiliates, must strictly comply with. The policy requires directors and executives to report as follows:

- Reporting the first shareholding of the Company and the change in securities holding, which includes spouses and children who are not sui juris as well as related persons under Section 59 of the Securities and Exchange Act, B.E. 2535 (1992), within 3 business days from the date of purchase, sale, transfer or acceptance of transfer to the Office of the Securities and Exchange Commission, Thailand. In addition, they are not allowed to trade in the Company's securities for 1 month prior to the publishment of the financial statements for the public.
- Reporting the change in securities holding to the Office of the Securities and Exchange Commission of Thailand and submitting a copy of such report to the Company on the same date as the date of reporting to the Office of the Securities and Exchange Commission, Thailand.
- When receiving material inside information that affects the change in securities price, the trading of the Company's securities must be suspended for one month prior to the publishment of the financial statements or such inside information for the public. Such material information must not be disclosed to any third parties.
- If the directors and senior executives (executives as defined by the Securities and Exchange Commission, Thailand (SEC)) wish to trade-sell securities, the notice of intent shall be made at least 1 business day prior to the securities trading. The Board of Directors shall be informed by the Company Secretary. The securities holding report shall be prepared and submitted to the Securities and Exchange Commission, Thailand (SEC) within the specified period.

Results of the Implementation of the Policy on the Use of Inside Information for the Year 2025

Targets	Operational results
once a quarter, **total 4 times a year** During two weeks before the closing date of financial statements, the Company Secretary will prepare a letter of notification to directors, executives and departments that acknowledge inside information to inform that they are not allowed to disclose inside information to any third parties or non-related persons and trade in the Company's securities for 1 month prior to the publication of the financial statements for the public and notify everyone in the Company via e-mail.	**Achieved the target** **(Total 4 times a year)** There were no findings of violations or non-compliance with the regulations regarding insider trading and asset trading as stipulated by the Stock Exchange of Thailand and the Securities and Exchange Commission.
once a quarter, **total 4 times a year** The Board of Directors and executives report their securities holdings to the Board of Directors for acknowledgment in January, April, July, and October of each year, for a total of 4 times per year.	**Achieved the target** **(Total 4 times a year)**

Furthermore, all directors, executives, and employees of subsidiaries and affiliates have signed acknowledgments and consents for the Company to use or disclose their personal data through the Employee Self Service (ESS) system. The Company places importance on and complies with the Personal Data Protection Act, B.E. 2562. The Board of Directors has reviewed and approved a Personal Data Protection Policy for directors, executives, and employees to enhance operational standards in accordance with external regulatory agencies and to align with good corporate governance principles. Additionally, the Company has no

transactions involving financial assistance, such as loans or loan guarantees, to general companies that are not subsidiaries. Directors or executives of the company have not engaged in insider trading and have not violated or failed to comply with the rules on related party transactions and asset trading.

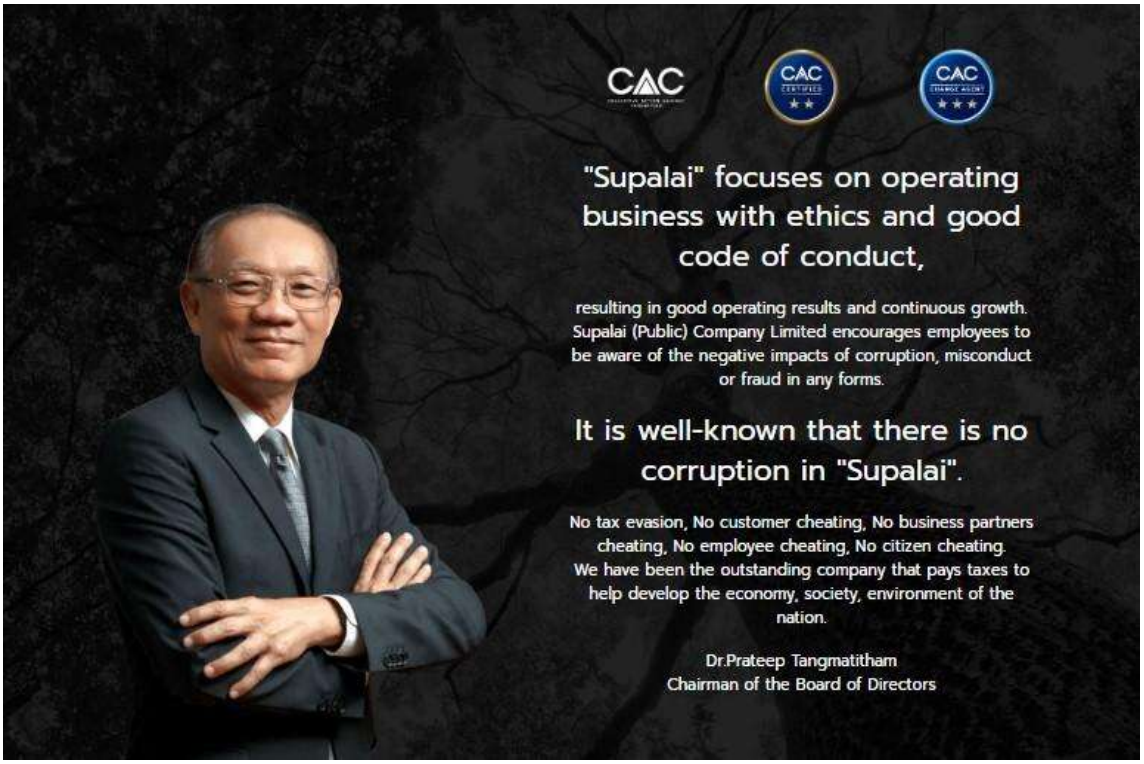
Anti-corruption action

Operations in anti-corruption in the past year

Has the company operated in anti-corruption over the past year	:	Yes
Form of operations in anti-corruption	:	Review of appropriateness in anti-corruption, The participation in anti-corruption projects, Assessment and identification of corruption risk, Communication and training for employees on anti-corruption policy and guidelines, The monitoring of the evaluation of compliance with the anti-corruption policy, Review of the completeness and adequacy of the process by the Audit Committee or auditor



Messages from the Chief Executive Officer on Anti-Corruption Measures

The Company recognizes that "corruption" is a social menace that adversely affects the Company's sustainability, as well as the economy, society, politics, and international confidence. Therefore, the Company has established eight policies related to anti-corruption measures, focusing on instilling awareness in employees and executives at all levels about the dangers of corruption and creating the right values to develop a transparent organization. This also aims to build confidence in conducting business together between the organization, investors, financial institutions, and business partners, which will increase the organization's competitiveness in both the short and long term. These policies have been approved by the Board of Directors, which has assigned the Audit Committee to oversee compliance with anti-corruption measures and designate those responsible for establishing written rules, methods, monitoring, and reporting with transparent disclosure and readiness for inspection in all processes, ensuring sufficient and effective measures to reduce potential risks from corruption.

The Company communicates its policies related to anti-corruption measures to directors, executives, supervisors, and employees of the Company and its subsidiaries through e-mail, Group Line, and bulletin boards at various locations within the head office and at all project offices. New employees are informed of the anti-corruption policies and practices immediately upon commencing work and receive training during every new employee orientation. The Company also disseminates information to external parties and all business partners and provides channels for reporting or complaining about corrupt practices, with measures to protect whistleblowers who report such activities. The Company has established eight policies related to anti-corruption measures, as follows:

1. Policy on Anti-Corruption

The Company complies with the anti-corruption policy. The Company operates its business by using fair and transparent business competitive strategies and mainly adhering to the good quality of products. The Company does not accept any corruption at all, whether by presenting, promising, asking, claiming, offering, or receiving bribery, inducing an illegal act, or destroying trust. Officers at all levels, including directors, executives, supervisors, and employees working for the Company, its subsidiaries, or other companies controlled by the Company, including persons involved in the business operation, are required to comply with such anti-corruption policy in all relevant departments and all localities where the Company operates its businesses.

In addition, the Company also establishes detailed procedures for anti-corruption so that the implementation is in accordance with the policy. However, the Company will review the procedures regularly to be in line with changes in laws and businesses and also maintain the Company's reputation.

2. Policy on Gift and Hospitality

The Company legally operates its business with integrity to maintain its reputation. The Company establishes a no gift policy regarding accepting and offering gifts, assets, or other benefits that can be done according to tradition and morality to express gratitude or maintain a normal business relationship. However, if the acceptance and the offering of a gift, asset, or other benefits are inappropriate, which may affect the decision of the performance of duties and cause the Company to lose benefits, the Company will not support such action.

3. Policy on Provision of Financial Support

The Company abides by the policy on the provision of financial support with commitment to business operations together with continuous corporate social responsibility to conduct business transparently. The Company establishes procedures and supervises the provision of financial support by reviewing the transaction approval from the Company's authorized persons, including reporting results and following up on the results of the provision of financial support to ensure that the financial support provided by the Company has been used according to the purpose of the financial support request.

4. Policy on Charitable Donation

The Company complies with the policy on charitable donation by focusing on business operations together with continuous corporate social responsibility to conduct business transparently. The Company establishes procedures and supervises transactions of charitable donation by reviewing the transaction approval from the Company's authorized persons, including reporting results and following up on the results of charitable donation to ensure that the financial support provided by the Company has been used according to the purpose of the charitable donation request.

5. Policy on Whistleblowing and Making Complaints

The Company establishes and complies with the policy on whistleblowing or making complaints by providing a channel for whistleblowing or making complaints due to an illegal or unethical act and behavior possibly implying corruption or misconduct of persons in the organization, including employees and all groups of stakeholders. In addition, the Company provides a mechanism to protect informants and pays attention to the confidentiality of complaints to build the confidence of complainants. Procedures, fact investigations, and summaries, including protection measures for whistleblowers or complainants, are clearly established for not suffering from trouble. They can perform whistleblowing or make complaints via e-mail: anti-corruption@supalai.com or a suggestion box installed at the fire exit of each floor at Supalai Grand Tower Rama III, which is reported directly to the independent directors.

6. Policy on Political Contribution

The Company complies with the policy on political contribution and supports democracy by encouraging all directors, executives, and employees, including employees of companies controlled by the Company, to exercise their political rights in accordance with the laws as good citizens and express, join, support, and exercise political rights outside working hours by using their own resources only. The Company has no policy for supervisors and employees at all levels to instruct or influence others by any means, which causes employees and subordinates to participate in all types of political activities that may lead to internal conflicts.

7. Policy on Employment of Government Officers

The Company complies with the policy on employment of government officers by selecting and recruiting personnel who have been government officers according to the criteria set by the Company in order not to avoid the exploitation of such actions as a return for the acquisition of any benefits. In addition, information is disclosed for transparency and traceability.

8. Policy on Conflict of Interest

The Company complies with the policy on conflicts of interest by providing a channel for the Company's personnel to report conflicts of interest to the Audit Committee to ensure that the Company's personnel perform their

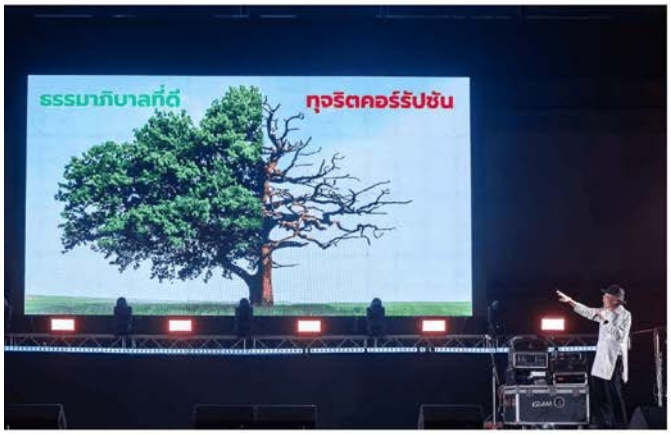
duties by adhering to the Company's benefits under lawfulness and ethics. The Company's personnel must strictly avoid having any personal interests that will adversely affect the performance of duties for the benefit of the Company according to the specified policy on the prevention of conflicts of interest.

In 2025, the executives and employees of the Company and its subsidiaries signed acknowledgments of the anti-corruption policy through the SPL Consent Management system, an online signing system. This system allows for the retrieval of various reports, such as the number of policy acknowledgments, the number of users who accessed the Company's policy information, and more. It serves as a management tool to raise employee awareness and foster a unified approach to combating corruption, passing down practices from generation to generation until it becomes a strong corporate culture. Details related to the aforementioned policies can be found on the Supalai Public Company Limited website.

Provision of Knowledge of Anti-Corruption Measures to All Directors, Executives, Supervisors and Employees

The Company offers training to all new employees to provide knowledge on anti-corruption measures at the employee orientation and issues press releases to provide knowledge on anti-corruption through public relation boards, Line Group, and e-mails to employees of the Company and its subsidiaries. In addition, activities are held to create a culture that supports the organization's anti-corruption, such as an annual anti-corruption knowledge test, bulletin board decoration for providing knowledge, which receives positive feedback from employees. The managing director also emphasizes that all employees must acknowledge the benefits of anti-corruption at the Company's annual New Year's party. Regarding the provision of knowledge on anti-corruption measures to directors and senior executives, information on anti-corruption policy, practices, results of policy implementation, manual on implementation of policies on anti-corruption measures, and benefits are presented to the Management Committee, the Executive Committee and the Board of Directors.

Chairman of the Executive Committee gave the speech about the benefits of anti-corruption at the Company's New party



Communication and Training to Employees and Stakeholders

The Company disseminates anti-corruption measures to all employees via public relations boards, e-mail, the Company's Intranet and also communicates such measures to all groups of stakeholders, such as shareholders, business partners, competitors, customers, contractors and stores, through the Company's website (www.supalai.com). It is considered to compliance with the policy on the treatment of customers and business partners. The Company does not request or receive any dishonest benefits and accept gifts in any festivals. In addition, risk management on corruption is also provided. The Management sends a letter to suppliers so that they can use such channel to perform whistleblowing via the e-mail: anti-corruption@supalai.com. However, this is to communicate the Company's policies and practices on corruption prevention to stakeholders and allow them to know the channels for whistleblowing and create participation from stakeholders to make the Company's commitment to corruption prevention achieve its specified objectives. Not only are the employees of the Company aware of the practices on anti-corruption, but the Company also provides communication to applicants who are interested in working with the Company in the job application form and when interviewing applicants about attitudes on anti-corruption.

Assessment of Risk on Business Corruption

The Company conducts a corruption risk assessment in all departments of the Company and its subsidiaries. Each department identifies risks possibly arising from corruption, score level of opportunity and impact of risks, including approaches to minimize risks and measures on corruption prevention or anti-corruption. The risk assessor considers risks from the nature of business activities, operational processes, situations of the industry, business terms, including policies relating to anti-corruption measures and a manual on policies relating to anti-corruption measures that identify the specific procedures of each policy, such as receiving or offering gifts, providing subsidies or political actions. All directors, executives, supervisors and employees of the Company and its subsidiaries must strictly comply with these rules and policies communicated by the Company and trained employees.

In 2025, the Company did not detect any significant issues or defects regarding litigation on anti-competition, destruction of credibility, monopoly of trade, incidents of discrimination, and corruption. In addition, there were no fines or non-fine penalties due to inconsistent operations with applicable laws or regulations and violations of the Code of Conduct.

6 Steps for Risk Assessment

1. Risk Identification

Supervisors identify the potential corruption risks by taking the results into action

- When planning an internal audit plan
- When there is an Audit Checklist in the system audit process

2. Risk Identification

The assessor identifies the severity of the risk and how it affects the achievement of the objective by considering the level of likelihood and impact that may arise from risks. When encountering issues / findings that the risk is medium, high, or very high, the risk management plan and risk appetite shall be reported to the Audit Committee, Risk Management Committee, Corporate Governance and Sustainability Development Committee.

3. Risk Management

Defining strategies or activities to manage risks in accordance with risk appetite of the Company.

4. Control Activities

A policy or practice is applied to implement a control, such as approval, review, reconciliation, separation of duties, to ensure that risk management has been performed appropriately and timely.

5. Risk Management Monitoring and Reporting

Monitoring and improving risk management activities to ensure continuity and appropriateness of the situation by collecting and presenting corruption risk information to the Audit Committee, the Risk Management Committee, and the Board of Directors for consideration and approval at least once a year.

6. Communication

Risk management is communicated according to the opinions of the Audit Committee and the Board of Directors and then notified to the relevant department. Issues / findings are communicated to each department as follows:

- Internal Audit and Corporate Governance Section
- Risk Management Section
- Quality System Section

Establishment of Guidelines for Control, Prevention, and Monitoring of Risks on Corruption

The Chief Executive Officer leads the organization by setting an example in the serious implementation of anti-corruption policies. By demonstrating exemplary behavior, they build confidence among all employees, encouraging collective efforts in combating corruption. All employees strictly adhere to the anti-corruption policy, demonstrating the company's commitment. This is achieved through the following actions:

- Message from the Chief Executive Officer on Anti-Corruption Measures is informed to all groups of stakeholders to demonstrate their commitment to anti-corruption action.
- Supports the Company's online knowledge test on anti-corruption measures and offers rewards to employees who obtain the highest score.
- Supervising executives and supervisors to communicate corruption risks through project meetings, and providing cooperation in responding to survey forms and interviews with private companies on corruption issues of the Thai Institute of Directors (IOD).
- It also establishes the procedures for recording and collecting statistical data on the number of whistleblowing, type of whistleblowing, number of whistleblowing being investigated and implemented, summary of investigation results of each complaint, including annual statistical reports on whistleblowing or complaints to the Audit Committee and the Board of Directors in writing. This is for the benefits of monitoring progresses and improvement of the Company's operational processes that may cause all forms of corruption.

Driven by the commitment of the Chairman of the Executive Board under the supervision of the Audit Committee, as assigned by the Board of Directors, the Company has been certified as a member of the Thai Private Sector Collective Action Against Corruption (CAC). Furthermore, the Company has declared its participation as a CAC Change Agent member. Notably, the Company has been honored with the "CAC Change Agent Award" for the fourth consecutive year. The details of the anti-corruption operational guidelines are as follows:

Disclosure of anti-corruption practices

Over the past three years, anti-corruption operations have led to significant developments, as follows:

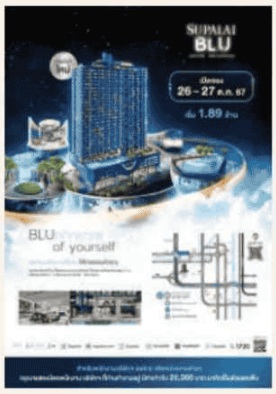
2023

- The Company received the 2nd renewal certification as a member of the Thai Private Sector Collective Action Against Corruption (CAC).
- The Company received the CAC Change Agent Award 2023 for two consecutive years.

The Company organized the seminar, "SPALI Supplier Day 2023", to communicate sustainable business practices to business partners by focusing on business operations based on Environmental and Corporate Governance (ESG) and awareness of problems, including risk prevention and corruption solutions.

2024

The Company provides privileges to trade partners who express their anti-corruption commitment to the Company, offering benefits such as special residential purchase discounts for partners who declare a joint commitment with the Company.



The Company was honored to have Mr.Phrommet Bencharongkit, Director of the Thai Private Sector Collective Action Against Corruption (CAC), deliver a lecture on the topic "Thai Private Sector Collective Action Against Corruption: Private Sector Corruption Prevention." The Company invited SME business partners to attend the lecture to raise awareness of corruption issues and to provide guidance on enhancing transparent operational standards, thereby expanding the network of transparent businesses to its business partners.

2024

The Company received the CAC Change Agent Award 2024 for three consecutive years.

All directors, executives, and employees of the Company and its subsidiaries have signed acknowledgments of the anti-corruption policy through the SPL Consent Management system, achieving 100% completion.

All directors, executives, and employees of the Company and its subsidiaries take an annual test to assess their knowledge and understanding of anti-corruption measures via Google Forms, with 100% participation. Everyone passes the test with a score of more than 80%.

2025

Supalai Public Company Limited was honored to be invited by the Thai Private Sector Collective Action Against Corruption (CAC) as a speaker at the "CAC Change Agent Day. The event was held under the theme "New Guidelines, Simpler Than Ever : Building a Sustainable Business Chain," aiming to communicate the criteria for becoming a CAC Change Agent and encourage CAC-certified companies to join the program.

Supalai Public Company Limited has received the "CAC Change Agent" recognition for the fourth consecutive time from the Thai Private Sector Collective Action Against Corruption (CAC). This recognition reflects the Company's strong commitment to driving its business forward based on transparency, ethics, and robust corporate governance.

2025

Supalai and Business Partners Participate in the "Road to Certify with CAC and CAC Change Agent"Seminar on the Topic of "Transparent Business Chain for Sustainable Thai Business"

Supalai Public Company Limited receives the "CAC Change Agent Award 2025" for the 4th Consecutive Year,

2025

Supalai Public Company Limited has enhanced collaborative development with its business partners and expanded its transparency network by organizing the Supalai Coaching Clinic. This initiative serves as a partner clinic to address CAC-related requirements and provides intensive guidance for business partners, aiming to support them in achieving full certification from the Thai Private Sector Collective Action Against Corruption (CAC).

Whistleblowing

Operations related to whistleblowing over the past year

Has the company implemented whistleblowing procedures over the past year : Yes

Complaint and Whistleblowing Process

The company established the procedures for handling complaints on corruption as follows.

1. Acceptance of Matters

When whistleblowers or complainants report any corruption matters, the coordinator registers the acceptance of matters.

1) The complainant must be the person affected by the Company's operations and show his/her identity with evidence issued by government agencies for supporting the reporting of complaints.

2) The complainant provides written details of the complaint by describing the sequence of events in detail, including the date, time, name-surname, and the affiliated department of the referring person referring to.

2. Investigation

The Investigation Committee is appointed to conduct the investigation and summarize its results and then present it to the Audit Committee.

3. Reporting Results

The Internal Audit Department summarizes details of complaints, investigations, and consideration results and presents them to the Audit Committee. The Audit Committee summarizes the consideration results and expresses opinions and reports to the Board of Directors.

4. Reporting Results to Whistleblowers or Complainants

The consideration results are notified to the whistleblowers or complainants after reporting such investigation results to the Board of Directors.

5. Monitoring and Reporting

In the case that the Audit Committee or the Board of Directors provides any suggestions or comments on the improvement of procedures for corruption prevention, the Internal Audit Department is responsible for monitoring and reporting the results of improvement and correction to the Audit Committee and the Board of Directors for acknowledgment.

Measures for Protection of Whistleblowers or Complainants

The Company established a policy on the protection of whistleblowers or complainants regarding corruption as follows:

1. The Company will keep information and identity of the whistleblower or complainant and the person being complained confidential.
2. The Company will disclose only necessary information by considering the safety and the damage of the reporter, the source of information or related persons.
3. Those affected will be mitigated through appropriate and fair procedures.
4. In the case that whistleblowers or complainants or those cooperating in the investigation think that they may be in danger or may suffer from damages, whistleblowers or complainants or those cooperating in the investigation can request the Company to establish appropriate protection measures or the Company may establish protection measures without the request of the complainants or those cooperating in the investigation if it is considered that such matter is likely to cause damages or dangers.
5. The Company will not take any unfair action to the whistleblower or complainant, such as changing their job position, job description, place of work, suspension of work, threatening, interference with operations, termination of employment or any other acts that are unfair to the whistleblower or complainant or those cooperating in the investigation.
6. The Company does not demote, punish or give negative effects to employees who refuse to be involved with corruption in a practical manner.

Incident no longer subject to action

The monitoring of compliance with other corporate governance policy and guidelines

Guidelines for Monitoring and Evaluating Compliance with Anti-corruption Measures

The Board of Directors and the Audit Committee are responsible for supervising the internal control system and giving opinions on the adequacy of the internal control system. The topics were evaluated based on "Internal Control System Sufficiency Evaluation Form" announced by the Office of the Securities and Exchange Commission and the

Stock Exchange of Thailand. It evaluates in accordance with the framework of the COSO ERM 2017 (The Committee of Sponsoring Organizations of the Treadway Commission - Enterprise Risk Management - Integrating with Strategy and Performance) in five categories, which are

1. Control Environment
2. Risk Assessment
3. Control Activities
4. Information & Communication
5. Monitoring Activities

In 2025, Regarding the results of the internal control system review, there were no significant disadvantages or deficiencies found in the internal control system. Each process is approved and reviewed sufficiently.

Monitoring

The Board of Directors is responsible for reviewing the appropriateness of the anti-corruption policy annually by taking into account the effectiveness of the policy, and the compliance with the good governance principles of the business, including the Board of Directors suggestions on the development and improvement of previous policies. Each year the Internal Audit Department is responsible for reporting the results of the compliance with anti-corruption measures to the Audit Committee. The Audit Committee then gives opinions and suggestions for process improvement to the Board of Directors for consideration.

In 2025, the Company and its subsidiaries have no legal dispute or any violation of laws relating to corruption which are being investigated, prosecuted, or judged. In 2024, the Company received 1 case of whistleblowing through any channels which was the action against the Company's articles of association actions against the Company's regulations, code of conduct, policy on corporate governance, and anti-corruption policy and measures. The Company has implemented and established corrective measures for recurrence prevention.

Compliance with Good Corporate Governance Principles in Other Matters

The Board of Directors of Supalai Public Company Limited is well aware of the importance of corporate governance and social responsibility, as it is confident that good governance will contribute to the following:

1. Strengthening a good management system with transparency and accountability, which can enhance the Companys potential to compete in the short and long terms for sustainable business growth and eliminate conflicts of interest that may arise.
2. Creating confidence among investors, both in the country and abroad, as well as financial institutions, business partners, all stakeholders through clear and transparent communication on an equal basis and adding value to shareholders in the long run by significantly taking into consideration all kinds of stakeholders.
3. Being a tool to measure the operations of the Company and examine all operations to improve their efficiency.

The Company has considered the "Corporate Governance Code for Listed Companies 2017" (CG Code), which was prepared by the Securities and Exchange Commission (SEC). Securities and Exchange Commission (SEC) a.) To implement good corporate governance principles in creating sustainable value for the business, there has been a follow up on the adherence to good corporate governance principles in other areas. The follow-up results indicate that the company has fully complied with the guidelines for each issue as follows:

1. Control to ensure that there are complete and correct operations on data storage and accounting recording as well as regulations established in regard to the connected transaction, the acquisition or disposition of assets, or major transactions of the subsidiaries, and also ensure that the preparation of financial statements is based on the same accounting policies used by the Company in order that the financial statements of the subsidiaries can be included in the consolidated financial statements properly and in a timely manner. Arrange for the reports on the operations and the financial statement of the Subsidiaries Company to be proposed to the Board of Directors for acknowledgment on a monthly basis.
2. The Company places great importance on fair and equitable human resource management by establishing policies and practices for employee welfare and care without discrimination based on gender, age, race, religion,

disability, or any other status. The company aims to promote a work environment that respects human dignity and provides equal benefits and development opportunities to all employees. Welfare and benefits are regularly reviewed to ensure compliance with labor laws, international standards, and the appropriateness to economic and social conditions. Additionally, channels for receiving complaints and mechanisms for protecting whistleblowers are provided to foster trust and fairness within the organization.

3. The Company conducts its business with transparency, fairness, and adherence to the principles of fair competition. It has established a policy prohibiting directors, executives, and employees from engaging in any actions that may constitute monopolistic practices, price-fixing, the exchange of sensitive commercial information, or any other activities that limit or distort competition. The company continuously promotes understanding of business ethics and has implemented monitoring measures and disciplinary actions in case of violations to prevent legal and reputational risks to the organization.

4. The Company recognizes its responsibility toward the environment and the safety of all stakeholders by establishing systematic policies and measures for environmental, health, and safety management. These measures cover the prevention and reduction of environmental impacts and efficient resource use, and in terms of safety and occupational health, the company conducts regular risk assessments, training, and emergency drills to prevent work-related accidents and diseases, while also setting safety goals and indicators to continuously monitor and improve operational efficiency.

5. The Board of Directors supervises cybersecurity awareness with plans and installation of devices to prevent threats through cyber channels and secure information and information systems.

6. The Audit Committee assigns the Internal Audit Section to review the performance of subsidiaries by using the risk-based approach depending on each case to ensure that the subsidiaries have appropriate and sufficient internal control systems. The Internal Audit Section shall then report to the Audit Committee to further propose their opinions to the Board of Directors.

7. Each subcommittee reviews related policies and requirements of each committee and provides suggestions that are beneficial to the Company in accordance with the CG Code annually and presents them to the Board of Directors for approval accordingly.

The results of duty performance of the audit committee

In 2025, there were twelve Audit Committee meetings, which were reported to the Board of Directors. The meetings were held with executives in charge of accounting and finance. Additionally, there were meetings with external auditors every quarter. The auditors of the Company and its subsidiaries are EY Office Limited. Certified public accountants have no relationship or interest with the Company, subsidiaries, executives, major shareholders, or persons related to such persons in any way. Therefore, they are independent to audit and express opinions on the Company's financial statements.

In the previous fiscal year, the Company and its subsidiaries did have any non-audit fees from the audit office where the auditors were affiliated with persons or businesses relating to the auditors. The audit office, which the auditors were affiliated with (for details, please see Section: 7.6.3 Auditing Fee), and the Company were able to comply with the requirements of external agencies and relevant laws.

Furthermore, the Audit Committee held a meeting with the external auditors without the presence of Management. This was to ensure an independent exchange of information regarding audit issues, risk assessments, and internal control systems.

Performance of Duties of the Audit Committee

In 2025, the Company held twelve Board of Directors Meetings, covering four core roles in alignment with international standards: 1) Financial Reporting Oversight 2) Internal Control System Oversight 3) Internal Audit Function Oversight 4) External Auditor Oversight. The summaries are as follows:

The results of duty performance of The Nomination and Compensation Committee

Nomination of Persons to be Appointed as Directors

The nomination methods for the Board of Directors are established with criteria and transparency, adhering to good practice guidelines under the good corporate governance principles, in order to build confidence for shareholders and all stakeholders. They are disclosed in Form 56-1 e-One Report and on the Company's website.

In addition, the Nomination and Compensation Committee provides opportunities for shareholders to nominate names of persons deemed appropriate to be selected as directors. From September 10, 2024, to November 11, 2024, there was no shareholder nominating a candidate for appointment as a director, so the Nomination and Compensation Committee proposed to consider re-electing the directors who retired by rotation for the year 2025 to be a director for another term. The Shareholders' Meeting passed the resolution to approve the appointment of new directors as proposed. The newly appointed directors meet all qualifications under the Public Limited Companies Act and do not possess the prohibited characteristics as stipulated or specified in laws that are applicable to the Company. In addition, they are qualified persons, have no interests or conflicts of interest with the Company, and possess qualifications, knowledge, and capabilities in line with the Company's business strategies. This involves overseeing the succession plan and maintaining an up-to-date succession pool of executive management to ensure business continuity and alignment with the companys corporate strategy. However, details are disclosed for transparency of the audit in this Form 56-1 e-One Report. According to the results of the assessment, it is concluded that all independent directors are independent and reviewed the Policy on Remuneration of Directors, Chief Executive Officer, and Executive Management.

Determination of Compensation for Board of Directors, Subcommittees, and Executive Committee

Guidelines for determining the compensation for the Board of Directors, sub-committee, Chairman of Executive Committee and executive management are considered. Methods and rules for determining fair and reasonable compensation are also established based on performances and operational achievements compared with Key Performance Indicators (KPIs), which are in line with the interests of stakeholders. They cover the performances on economic, social, environmental, and corporate governance aspects. Compensation consideration takes into account the responsibility of directors, size of business, business environment, overall economic situations, and performances reflected and linked to the operating results. In addition, the Companys compensation rate must be compared with that of the same industry, which is at a competitive level and reasonable. The compensation rate was proposed to the 2025 Annual General Meeting of Shareholders for approval. The compensation of directors, sub-committees as well as the Chairman of the Executive Committee and senior executives, is considered appropriately based on performances and the Company's operating results. Human resource management policy and plans are considered to be in line with the Company's business strategy. Opinions are provided to the Chairman of the Executive Committee for presenting to the Board of Directors accordingly.

Evaluation of Performances of the Board of Directors, Sub-committees and Independent Directors

Self-Assessment of the Board of Directors and the sub-committees (the whole group) is provided individually. It is reported to the Board of Directors for acknowledgment in order to apply the evaluation results to improve operations and achieve the objectives of the Company. In addition, independent directors' independence is assessed annually. In 2025, independent directors' performances are evaluated additionally. The evaluation results concluded that all independent directors met the qualifications under the rules of the Securities and Exchange Commission of Thailand and also performed duties completely based on the assigned scope of duties, expressed opinions independently, and had no conflict of interest or significant interests with the Company.

Improvement and Development of Roles and Duties of the Nomination and Compensation Committee

The charter of the Nomination and Compensation Committee is considered and reviewed annually. Any matters are screened based on roles and duties to improve the performance of duties for the highest benefits of shareholders, which are proposed to the Board of Directors for approval. In addition, the qualifications of the Chairman of the Executive Committee in the policy on the succession plan are also reviewed.

Composition and Diversity of the Board of Directors

The level of expertise of the entire Board of Directors structure is considered and determined according to the average board skill matrix of not less than 80% board diversity, and the key performance indicators (KPIs) and review the necessary qualifications and skills for the nomination of directors are considered and reviewed in order to review the structure, composition, and expertise of the Board of Directors and sub-committees of the Company in accordance with the Company's business strategy. This served as supporting information for the consideration of the nomination of directors retiring by rotation and the selection of directors. The Nomination and Compensation Committee was of the opinion that the current composition of the Board of Directors and sub-committees is appropriate for the Companys business.

The Nomination and Compensation Committee pays attention to the meeting attendance and proposes useful opinions and information to develop nominations and determine the compensation for all related persons fairly and appropriately. The Nomination and Compensation Committee performs operations in accordance with the good corporate governance guidelines of the Stock Exchange of Thailand, which are consistent with the Corporate Governance Code and ASEAN CG Scorecard (ACGS). All opinions and suggestions of the Nomination and Compensation Committee can be used as a tool for the Board of Directors to consider with confidence and reliability.

Director Development Plan

All directors are encouraged to attend trainings or participate in activities to continuously develop knowledge by using the Company's resources. In addition, each director has to conduct the self-assessment on the board skill matrix. The skills applied for evaluation are comprehensive and consistent with the Company's business strategies.

Virach Aphimeteetamrong
(Assoc. Prof. Dr. Virach Aphimeteetamrong)
Chairman of the Nomination and Compensation Committee

The performances of the Nomination and Compensation Committee over two meetings can be summarized as follows:

No.	Description
1/2025	● Considering the determination of the special compensation rate and the salary increment rate ● Considering the nomination of new directors to replace those retiring by rotation ● Considering and reviewing special remuneration, compensation, and meeting allowances of the Board of Directors and sub-committees ● Considering and reviewing the evaluation criteria of the Executive Committee ● Acknowledging the evaluation results of committees to set out guidelines for the development of directors and enhance the efficiency of corporate governance of directors ● Acknowledging the results of training and development of the Company's directors
2/2025	● Considering and approving the performance result of the Nomination and Compensation Committee for the year 2025 ● Considering and reviewing the amendment of the charter of the Nomination and Compensation Committee ● Considering and approving the evaluation criteria for the Executive Committee, incorporating climate change indicators in accordance with FTSE Russell standards ● Considering and reviewing the Policy on Remuneration of Directors, Chief Executive Officer and Executive Management ● Acknowledging the results of the board skill diversity assessment ● Acknowledging the results of composition of directors suitable for effective performance of duties ● Acknowledging the results of the independent director's independence assessment ● Acknowledging the performance of the Human Resources Department

The results of duty performance of The Corporate Governance and Sustainability Development Committee

The Corporate Governance and Sustainable Development Committee focuses on and is committed to enhancing the effectiveness of its good corporate governance practices. Furthermore, the Committee provides strategic oversight of the Companys sustainability matters by regularly monitoring ESG performance, sustainability risks, and progress toward Environmental, Social, and Governance (ESG) targets. It reports these outcomes to the Board of Directors to ensure that business operations align with corporate strategy and international sustainability disclosure standards. Its operations are managed with transparency, fairness, and accountability. The Committee also monitors the implementation of the good corporate governance plan, adhering to the Code of Conduct for sustainable growth. The Committees responsibilities also extend to anti-corruption efforts, ensuring fairness, and upholding responsibility towards all stakeholders, including employees, customers, trade partners, communities, contractors, shareholders, society, the environment, and government agencies. Furthermore, the Committee emphasizes sustainability management encompassing economic, environment, social, and governance aspects. The key highlights are as follows:

1. Rights of Shareholders and Equitable Treatment of Shareholders

- Supervising and offering opportunities to shareholders to propose and append agenda items and inquiries in advance and nominate a person for election of directors in advance from September 10, 2025, to November 10, 2025.
- Supervising the 2025 Annual General Meeting of Shareholders by adequately providing information, date, time, venue, agenda, and all relevant matters to be decided to the Shareholders Meeting in advance and

facilitating and encouraging all shareholders, including institutional investors, to attend the Company's shareholders' meetings and fully cast votes. As a result, the Company has received an excellent score from the AGM Checklist for 13 consecutive years from the Thai Investors Association.

- Supervising and notifying shareholders to acknowledge the rules of the meeting in advance in both Thai and English through the website and submitting the invitation letter in advance in order to provide opportunities to shareholders and institutional investors to study details of each agenda and prepare the proxy documents for not less than 28 days and publishing the notice of the Shareholders Meeting in the newspaper or on the Company's website for 3 consecutive days at least 3 days before the date of the meeting.
- Supervising the preparation of the meeting agenda to including the objectives and reasons for each agenda and opinions of the directors of each agenda clearly.
- Supervising and requesting volunteers who independently monitor the vote counting to participate in the vote counting at the vote counting point in each agenda item of the meeting and disclose the resolution of the Annual General Meeting of Shareholders together with the voting results after the meeting by notifying the Stock Exchange of Thailand and disclosing it on the Company's website by the end of the day after the meeting.
- Facilitating foreign shareholders by preparing documents in 2 languages, Thai and English and creating a website of the Company (www.supalai.com) in 2 languages to provide publishing services to interested shareholders.
- All directors, executives, and employees are required to prepare a report on conflict of interest. In 2025, there was no significant conflict of interest.
- All directors and executives are required to be responsible for reporting their holdings and changes in securities according to laws. The Company Secretary regularly collects and reports to the Board of Directors' Meetings every quarter.
- Supervising the implementation according to practices on insider trading by prohibiting directors, executives, and employees involved in information from trading the Company's securities during 1 month prior to the publishment of the financial statements for the public.
- Information on connected transactions must be completely disclosed in the Annual Registration Statement/Annual Report (Form 56-1 One Report) However, if there is a connected transaction, such transaction must be approved by the Board of Directors before implementation. In addition, information on transaction details, transaction value, reasons and necessity is disclosed in the Annual Registration Statement/Annual Report (Form 56-1 ne Report) in accordance with the regulations of the Stock Exchange of Thailand and the Office of the Securities and Exchange Commission, Thailand. The Audit Committee also attends the meeting to consider and ensure fair and reasonably connected transactions.
- Supervising directors and executives to review and disclose information about their interests and related parties so that directors can consider the Company's transactions that may have conflicts of interest and make decisions for the overall benefit of the Company and requiring directors with interests to abstain from voting and refraining from expressing opinions.

2. Consideration of Stakeholder Roles and Sustainable Business Development

- To review the Environmental, Social, and Governance (ESG) policies to reaffirm the commitment to good corporate governance and to assure all stakeholders of the Companys ongoing commitment to sustainable development, covering key policies including:

1. Policy on Sustainable Corporate Governance
2. Policy on Sustainable Environment
3. Policy on Sustainable Society
4. Policy on Environmental Management
5. Policy on Resource and Waste Management

6. Policy on Climate Change Management
7. Policy and Guidelines on Gender Equality and Womens Rights
8. Policy on Migrant Workers Recruitment
9. Policy on Responsible Termination
10. Policy on Biodiversity Management
11. Policy on Human Rights
12. Policy on Treatment of Business Partners
13. Policy on Treatment of Competitors
14. Policy on Treatment of Creditors

The Company recognizes the importance of respecting human rights throughout its business value chain, in alignment with the United Nations Guiding Principles on Business and Human Rights (UNGP). To this end, the Company has established a Human Rights Policy, a human rights risk assessment process, and grievance mechanisms to prevent and mitigate potential human rights impacts arising from its business operations.

- To oversee the preparation and dissemination of the Supalai Supplier Code of Conduct via an online platform, enabling partners to acknowledge and transparently confirm their compliance. This action reflects the Companys commitment to supporting supply chain management and ensuring its tangible development. Furthermore, this oversight includes reviewing partner self-assessments on supply chain management, ethical operations, and social responsibility. This process aims to enhance working procedures, create value for all stakeholders, and build long-term value with partners. The Company encourages its business partners to adhere to Environmental, Social, and Governance (ESG) principles through the Supplier Code of Conduct, which encompasses human rights, labor practices, environmental management, and business ethics. Furthermore, the Company consistently monitors and evaluates compliance with these criteria to foster a responsible and sustainable supply chain.
- Ensuring that there is a channel for reporting clues or complaints from illegal acts or corruption offences or offences of violation of business ethics or any violation of human rights; complaints can be made via telephone number 1720 or by e-mail: anti-corruption@supalai.com, which are reported directly to the Independent Director Committee.
- The Company is committed to developing the Company and its stakeholders in all aspects to grow sustainably together by focusing on environment, society, and governance and adhering to the principles of operation in accordance with sustainability criteria (SET ESG Ratings). In 2025, a staff the training program on the topic ESG Journey: First Step Towards Sustainability Plus, a measure of employee awareness on ESG was implemented to support and improve the development of an organizational culture with ethical standards and social and environmental responsibility.
- The Company encourages and supports its SME partners in declaring their intention to join the CAC, aiming to build a sustainable supply chain network. In 2025, the Company invited its SME partners to attend the seminar, "CAC Change Agent: A Key Mechanism for Driving the Thai Private Sector Collective Action Against Corruption." Furthermore, the Company received the "CAC Change Agent" award from the Thai Private Sector Collective Action Against Corruption (CAC) for the 4th consecutive year.

3. Information Disclosure and Transparency

- Providing the disclosure of Form 56-1 e-One Report as well as the report of quarterly operating results, financial statements, and important information for shareholders, investors, and the general public, which contain all complete, adequate, and reliable substances in a timely manner through various channels, such as the Stock Exchange of Thailand system and the Company's website (www.supalai.com) in both Thai and English versions.
- Supervising and disclosing the performance of sustainable development through the Form 56-1 e-One Report on the topic of sustainable business driving under Global Reporting Initiative (GRI) Standards - Core Option in order to reflect the factors affecting the Company's sustainable business operations in economic, environmental, soci and corporate governance.

- To oversee the disclosure of performance in line with the FTSE Russell ESG Scores framework across all 3 dimensionsEnvironmental, Social, and Governance (ESG)via the Form 56-1 e-One Report, the Company's website, or other public disclosure channels, to enhance operational transparency and build trust with shareholders, investors, and all stakeholders, as well as to further align the Companys sustainability performance with international standards.

4. Responsibilities of the Committee

- Supervising the formulation of sustainability directions and strategies to be in line with business goals that represent social and environmental responsibility, as well as supporting sustainability action plans to balance 3 dimensions in an integrated manner, including economic, social, and environmental aspects, underon good governance, and also collaborating with stakeholders to drive operations to achieve sustainability.
- Supervising relevant sustainability plans and performances to support the Company's sustainability strategic plan to demonstrate social and environmental responsibility by following up on outcomes and providing advice.
- Supervising IT governance and reviewing the personal information protection management process to be suitable for the nature of the Company's business and in accordance with legal requirements.
- Supervising the meeting among non-executive directors without the participation of the Management to give the independent directors an opportunity to express their opinions.
- Review and update the Good Corporate Governance Policy Handbook and Code of Conduct Handbook for employees to be clear, concise, and easy to understand. Employees are aware of the Code of Conduct and policies through the Supalai Skills.
- Encouraging the Company's directors to attend training.

5. Corporate Governance Awards

The Company was ranked in the category of Excellence for the 13th consecutive year based on the survey results of the Good Corporate Governance of Listed Companies in 2025 organized by the Thai Institute of Directors Association collaborating with the Stock Exchange of Thailand and the Office of the Securities and Exchange Commission, Thailand. Additionally, the Company was recognized as an "ASEAN Asset Class PLC" from the ASEAN Corporate Governance Scorecard (ACGS) assessment for 2024.

The Corporate Governance and Sustainability Development Committee is still committed to developing transparent operations on corporate governance to be a good model, as the Corporate Governance and Sustainability Development Committee absolutely believes that the management based on the rule of law, integrity, transparency, traceability, and continuous improvement of good corporate governance, including the emphasis on the highest responsibility with the stakeholders, will cause the organization to grow sustainably and build confidence to shareholders and all stakeholders.

Somjai Phagaphasvivat

(Assoc. Prof. Dr. Somjai Phagaphasvivat)

Chairman of the Corporate Governance and Sustainable Development Committee

The performances of the Corporate Governance and Sustainability Development Committee which convened one meeting can be summarized as follows:

No.	Description
1/2025	● Consideration of the calculation methodology for Scope 3 greenhouse gas emissions, Category 11: Use of Sold Products. ● Consideration of the expense management for the Happy Glasses Project for the year 2025 ● Considering and reviewing the charter of the Corporate Governance and Sustainability Development Committee ● Considering and approving the performance result of the Corporate Governance and Sustainability Development Committee for the year 2025 ● Considering and approving the Corporate Governance Plan for the year 2026 and the performances of corporate governance for the year 2025 ● Acknowledging the results of the employee awareness test regarding ESG issues for the year 2025 ● Acknowledging the performance regarding sustainability (ESG) for the year 2025 and the FTSE Russell Gap Analysis ● Acknowledging the gap analysis results for CGR and ASEAN CG Scorecard criteria

The results of duty performance of The Risk Management Committee

In 2025, two Risk Management Committee's meetings were held to determine, review, and update the Risk Management Policy, Charter of the Risk Management Committee, Corporate Risk Management Framework, and Corporate Risk Management Process to the rapidly changing situations and the business operations, and also to provide recommendations on risk management guidelines that are consistent with the strategic direction of the business plan.

This is to allow the risk owner to manage significant risks to risk appetite and to ensure that the Company has adequate and effective risk management in accordance with the Enterprise Risk Management Framework (COSO ERM 2017), as well as to continuously support the development of risk management at all levels to create the organizational culture of risk management.

In addition, there is follow-up, evaluation, review, and approval for the risk management plan, which covers various types of major risks, including Strategy Risk, Operation Risk, Financial Risk, Compliance Risk, Corruption Risk, Market Risk, Cybersecurity Risk, Emerging Risk, and Risks on the Company's sustainability issues covering Environmental, Social, and Corporate Governance Risk (ESG Risk), including Climate Risk and reporting the results of the risk management to the Board of Directors.

According to the performance of duties of the Risk Management Committee in the previous year, the Risk Management Committee had taken steps to ensure that risk management was adequate and appropriate, which had been implemented continuously until the risk was at an acceptable level for the Company. The implementation was as follows:

- Holding two Risk Management Committee meetings, the Chairman of the Risk Management Committee summarized the opinions of the meeting and presented them to the Board of Directors for acknowledgement and/or consideration.
- Reviewing the Risk Management Policy and the Charter of the Risk Management Committee.
- Considering the Risk Map and Risk Radar Chart.
- Determining, reviewing, approving, and suggesting risk management guidelines relating to the Company's business operations by issuing a resolution from the meeting to the risk owner to conduct risk management and providing an internal control system covering various types of risks, including:
    - Strategy Risk
    - Operation Risk
    - Financial Risk
    - Compliance Risk
    - Corruption Risk
    - Market Risk
    - Cybersecurity Risk
    - Emerging Risk by assessing the likelihood of unprecedented future risk to plan and manage risks in advance, such as technology, economic conditions, politics, wars, social trends, etc., and
    - Risks on the Company's sustainability issues covering Environmental, Social, and Corporate Governance Risk (ESG Risk), including Climate Risk.

The Risk Management Unit shall conduct monthly follow-up on risk management and report to the Risk Management Committee.

- Considering the assessment of likelihood and impact to assess the organization's risk appetite.
- Determining key materiality on sustanability on the Company by assessing the impact of sustainability issues on the Company and stakeholders, covering Environmental, Social, and Corporate Governance Risk (ESG Risk), including Climate Risk and prioritizing.
- Determining key risks in key materiality on the sustainability of the Company and assessing the risk level, likelihood, and impact, defining risk appetite, key risk indicators (KRIs), and a risk matrix showing the prioritization or severity of risks, and providing recommendations/formulating policies/proposing additional risk mitigation plans to line executives.
- Organizing a forum to listen to opinions from stakeholders and external experts to obtain information and suggestions covering the topics of products, services, sustainability, good governance, and real estate leadership; in 2025, the Company invited key partners in the high-rise building construction industry and representatives from its major construction material suppliers.

- Supervising and providing risk management training courses for employees and supervisors through an online self-learning system and offering training to provide basic risk knowledge to new employees to have an understanding of risk-based thinking and apply it in their operations.
- Supervising and providing the evaluation of risk management through an online system for all employees in the Company and its subsidiaries to enhance and improve their knowledge and understanding of risk management.
- Supervising and providing communication channels on risk management that everyone in the Company can access by using information efficiently and effectively.
- Reviewing the Risk Management Handbook to guide employees in managing the organization's risks.
- Supervising and providing a Business Continuity Plan (BCP) to enable the Company to operate its business continuously and enhance the organization's image in terms of good management, consisting of
    - Business Continuity Plan in case of accident at the construction project
    - Business Continuity Plan in case of flooding at the construction project
    - Business Continuity Plan in case of crisis at the construction project
    - Business Continuity Plan in case of crisis at the head office
    - Disaster Recovery Plan (DRP) in case of data loss on cloud computing

The Risk Management Committee has the following key action plans in 2025:

- Holding two Risk Management Committee meetings, the Chairman of the Risk Management Committee summarized the opinions of the meeting and presented them to the Board of Directors for acknowledgement and/or consideration.
- Reviewing and updating the Risk Management Policy and the Charter of the Risk Management Committee in accordance with the business strategy and vision.
- Considering key materiality on the sustainability of the Company.
- Determining, analyzing, and assessing corporate risks to cover all major risks and assessing risk level, defining risk appetite, key risk indicators, and risk matrix showing the prioritization or severity of risks by assessing likelihood and impact, and providing advice/formulating policies/proposing additional risk mitigation plan to line executives to manage risk appetite.
- Consistently providing communication and knowledge on risk management to employees at all levels, such as communication through the risk handbook in comic version, communication of news and warnings about potential risks and knowledge about risk management in the companys intranet system, e-mail, Line Group, etc.
- Establishing and reviewing a Business Continuity Plan (BCP) to enable the Company to operate its business continuously and enhance the image of the organization in terms of good management.
- Providing risk management training courses for employees and supervisors through an online self-learning system and orientation for new employees to have a basic understanding of risk-based thinking so that they can apply the risk management concept to their operations.
- Developed guidelines for assessing nature and biodiversity risks, providing criteria for evaluating such risks in line with ESG standards for projects in various locations.
- Prepared information on the financial impacts of climate-related risks and opportunities, adhering to the TCFD (Task Force on Climate-related Financial Disclosures) framework, to serve as key data for climate risk management and compliance with external regulatory standards.
- Developed Human Rights Due Diligence (HRDD) guidelines and conducted Human Rights Risk Assessments (HRRA), establishing a standardized framework to identify, analyze, prevent, and mitigate potential human rights impacts, thereby strengthening our corporate social responsibility and reinforcing good governance.

According to the implementation of risk management, the Company is confident that it will be able to achieve its business goals in order to maximize the benefits of shareholders and all groups of stakeholders.

Atip Bijanonda

(*Mr. Atip Bijanonda)*

Chairman of the Risk Management Committee

The performances of the Corporate Governance and Sustainability Development Committee which convened one meeting can be summarized as follows:

No.	Description
1/2025	● Acknowledging the progress of the implementation according to the resolutions of the Risk Management Committees meetings and the Risk Management sub-committees meetings ● Considering and approving the list of external stakeholders (business group/company name) for attending the 2025 Focus Group Meeting and approving the external stakeholder group for the 2026 Focus Group Meeting ● Consider and approve the management of emerging risks ● Acknowledge the results of the 2024 annual knowledge assessment on risk management ● Acknowledge The Global Risks Report 2025 from the World Economic Forum ● Acknowledge the results of the ESG risk assessment for suppliers and external contractors of Supalai Public Company Limited ● Acknowledge the results of the Disaster Recovery Plan (DRP) test for data loss on cloud computing affecting the company's core systems ● Workshop on Risk Management, Digital and AI Strategy Alignment Business Growth to ensure consistency with the company's growth strategy
2/2025	● Acknowledging the progress of the implementation of the resolutions of the Risk Management Committees meetings and the Risk Management sub-committees meetings ● Considering and reviewing material issues on sustainability and risk management results on sustainability ○ Identifying material issues on sustainability ○ Assessment of the impact of sustainability issues on stakeholders ○ Prioritization of material sustainability issues ○ Alignment with SDGs 17 Goals ○ Goals / Strategies / Action Plans ○ Identification of risks and opportunities ○ Determination of risk level for each sustainability issue (risk level) ○ Table showing likelihood and impact assessment (risk matrix) ○ Assessment of risk appetite ○ Definition of key risk indicators (KRIs) and KRI results. ○ Risk Management Guidelines ● Considering and reviewing the risk map and risk radar chart of the organization ● Considering and reviewing the disclosure of management and operational risks (according to the topics specified by the SET) ● Considering and reviewing the policy on risk management ● Considering and reviewing the Charter of the Risk Management Committee ● Considering and approving the report of the Risk Management Committee ● Considering and approving the risk management plan for the year 2026 ● Acknowledging the risk management performance for the year 2025

Meeting attendance of The Independent Directors Committee

Meeting The Independent Directors Committee : 1

(times)

List of Directors	Meeting attendance of The Independent Directors Committee			Average meeting attendance

4 Assist. Prof. Aswin Bijayayodhin (Member of the subcommittee, Independent director)	1	/	1	1/1 (100.00%)
Average meeting attendance rate				**(100.00%)**

The results of duty performance of The Independent Directors Committee

In 2025, the Independent Committee held an internal meeting as appropriate, once on August 13, 2025, to discuss various issues related to the management of the company's business or other matters of interest that benefit the company. They considered the best interests of all shareholders and stakeholders, especially minority shareholders, and oversaw the risk management system, internal controls, and timely and complete information disclosure to build investor and capital market confidence. The issues discussed in the meeting were reported to the company's board meeting No. 9/2025 on September 9, 2025, by Assoc. Prof. Dr. Virach Aphimeteetamrong is the chairman of the Independent Committee. The meeting results are reported to the company's board of directors for their information.

Corporate Sustainability Policy

Information on policy and goals of sustainable management

Sustainability Policy

Sustainability Policy : Yes

Sustainability Policy and Operational Framework

The Company has established **Sustainable Development Policy** To serve as principles and operational guidelines for responsible business growth and the management of impacts and risks covering economic, social, environmental, and governance dimensions, including appropriately addressing the needs of all stakeholder groups. This aligns with international sustainability practices and standards, such as the 10 principles of the UN Global Compact (human rights, labor, environment, and anti-corruption), which are among the UN Sustainable Development Goals (UN SDGs), the OECD Due Diligence Guidance for Responsible Business Conduct, the United Nations Guiding Principles on Business and Human Rights (UNGPs), and the ISO 9001:2015 international quality management system.

The Company is committed to and prioritizes conducting business in accordance with sustainable development practices, covering economic, social, environmental aspects, and operating under good corporate governance principles. This includes considering all relevant stakeholders, both in project areas and society as a whole, to create lasting benefits for communities, society, and the environment. The practices are as follows:

Economic Dimension

Committed to continuously adhering to good governance principles, anti-corruption, and anti-unfair competition. It also concretely develops policies, processes, and monitoring systems for these practices to ensure transparency and fairness for all stakeholders.

Social Dimension

Committed to developing human resources both within and outside the organization from the perspective of sustainable business operations, as the Company believes that human resources are a crucial factor for long-term sustainability. The Company focuses on five key issues: human rights, equality, safety, health, and working environment, by "creating" good products for consumers through various innovations, "promoting" the development of knowledge and capabilities of personnel within the organization, including manufacturers and service providers, and "responding" to the needs of stakeholders by listening to feedback from all sectors.

Environmental Dimension

Committed to improving and transforming business processes throughout the supply chain to reduce negative impacts such as climate change, pollution, and biodiversity depletion, through accurate, clear, and verifiable management.

For more information on the policy, please refer to Policy on Corporate Sustainability Management

To Achieve Business Goals

The Company defines **Sustainable Development Framework** To serve as a framework for managing significant issues in each dimension. The operations for all issues must be based on good corporate governance, compliance with laws and regulations, effective risk management, respect for human rights throughout the supply chain, innovation management, and economic benefits. Establishing a sustainability operational framework enables the Company to clearly define goals in each area and formulate appropriate strategies and action plans to support long-term business growth, while creating value for local communities and stakeholders in line with the Company's objectives and vision. Details are as follows:

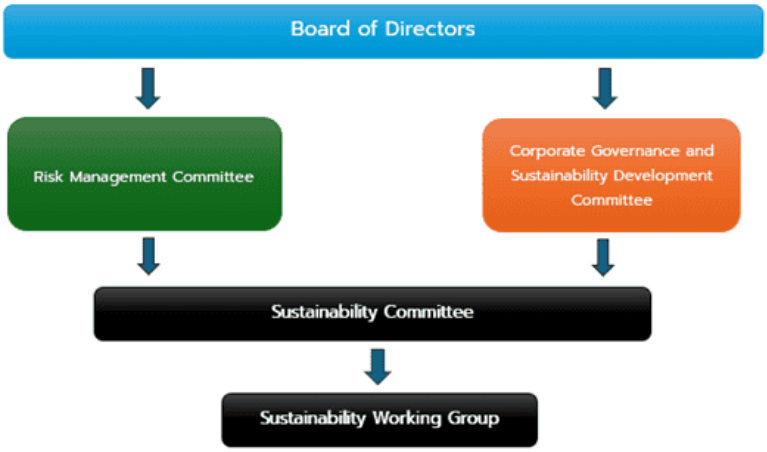
ESG Aspects Committed to conducting business ethically and in compliance with laws, by integrating business operations that consider E: environmental, S: social, and G: governance factors, as well as prioritizing stakeholders throughout the supply chain.

Innovation Aspect Committed to enhancing personnel potential development to prepare for future growth and driven by data for accurate and rapid decision-making, leading to business innovation development to create a good quality of life for everyone in the organization, including society, in terms of economy, environmentally friendly products, education, health, and safety, to reduce operational risks and create competitive advantages.

Economic Benefits Committed to creating products that meet all needs and paying attention to details in every step of construction and quality delivery under ISO standards to ensure satisfaction for important customers, while collaborating with partners and within the ecosystem to expand business and increase value.

Sustainability Governance Structure

The Company drives sustainability operations by focusing on the participation of all sectors within the organization, from the Board of Directors and executives to operational staff. Therefore, a comprehensive governance structure for sustainability operations and development has been established across all dimensions economic, social, and environmental to ensure policy implementation and enhance the efficiency of related operations, with annual reviews. It is the responsibility of all employees, at every level, to be accountable for and adhere to this policy, under the supervision of key stakeholders, as follows:



The roles and responsibilities of committee

The Company has appointed **Sustainability Committee** Comprises the Managing Director, who is a senior executive, with Mr. Tritecha Tangmatitham, the Managing Director, serving as the Chairman of the Sustainability Committee. The Sustainability Working Group consists of representatives from department heads across all company divisions to ensure faster and more efficient management of sustainability issues in all dimensions. The roles and responsibilities of each committee and working group are as follows:

- **Board of Directors**

Responsible for overseeing and approving policies, setting strategic directions, and assigning the Corporate Governance and Sustainable Development Committee, in conjunction with the Risk Management Committee, to formulate strategies and practices, as well as to supervise and monitor performance annually.

- **Corporate Governance and Sustainable Development Committee**

Responsible for establishing policies, strategies, and frameworks for sustainability operations, covering economic, social, environmental, and governance aspects. It monitors progress and performance in sustainability, and provides appropriate advice and operational guidelines to align with the organization's goals and direction.

- **Risk Management Committee**

Responsible for establishing policies, strategies, and frameworks for enterprise-wide risk management. It monitors the progress and performance of risk management, covering environmental, social, and governance (ESG Risks), and provides recommendations for appropriate risk management measures.

- **Sustainability Committee**

The ESG Sustainable Development Committee plays a vital role in overseeing practices to ensure they align with the organization's vision and mission, as well as the Company's policies, direction, strategies, and operational goals for environmental, social, and governance matters. Furthermore, it promotes the integration of ESG operations as a part of the business processes throughout the supply chain to foster sustainable growth and report sustainability performance to the Chairman and the Board of Directors.

- **Sustainability Working Group**

Has a crucial role and responsibility in supporting and driving the Company's environmental, social, and governance operations to align with the organization's sustainability policies, strategies, and goals. This involves systematically and continuously analyzing, planning, managing data, and monitoring ESG performance to create shared value among the organization, society, and the environment, while enhancing the Company's competitiveness and sustainable growth.

Sustainability management goals

Does the company set sustainability management goals : Yes

Management of Material Sustainability Issues

Defining ESG sustainability goals.

1.Supply Chain

Governance

Risk Management Committee

- Oversee the assessment of significant supplier/external contractor risks.

Corporate Governance and Sustainable Development Committee

- Oversee the Supplier Code of Conduct to cover ESG issues and supply chain management.

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders

Maintain capable suppliers and contractors to ensure customer contract cancellations due to substandard products and services do not exceed 0.5% of total sales contracts. **Operational Outcome** Achieved target; customer contract cancellations due to substandard products and services remained below 0.5%	● Supplier onboarding and selection prioritizing ESG declaration. ● Risk assessments of suppliers and contractors on material supply chain and ESG issues, including site visits. ● Contractor training to ensure work quality in line with Company standards One Standard, One Quality. ● Initiatives to enhance workers quality of life at project sites (e.g., Happiness Camp and welfare facilities). ● Product Selection Committee to ensure product quality and suitability. ● Facilitating access to construction materials at reasonable prices for contractors. ● Factory visits to assess production systems, delivery readiness, and ESG practices. ● Price control through benchmarking with international market data. ● Monitoring global raw material trends for inventory and procurement planning. ● Stakeholder focus groups on corporate image, products, services, governance, climate response, and risk management. ● Participation in CAC Change Agent Day to promote business integrity and anti-corruption practices.	**Key Risk** Supply chain disruption and loss of bargaining power due to reliance on a limited number of key suppliers or distributors. **Risk Appetite: [2] : Low** Shortage of skilled labor. **Risk Appetite [3] : Moderate** **Opportunity** ● Strengthening the business supply chain by promoting the development of ESG-focused products. ● Delivering high-quality products and services requires effective supply chain management across the entire value chain, from upstream to downstream, including product delivery, warranty services, and revenue recognition.	**Opportunity** Sustainable supply chain practices deliver long-term benefits to customers and stakeholders in terms of product quality, pricing, and after-sales services, supporting continuous sustainability.

2. Tax-related Operations

Governance

Board of Directors

- Tax Operations Policy

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
No fines are incurred from tax errors or careless tax operations. **Operational Outcome** No tax penalties incurred from errors or non-compliance.	● Ensure accurate and complete tax compliance in accordance with applicable laws and regulations ● Monitor changes in tax laws, rules, and regulatory requirements ● Avoid inappropriate or non-compliant tax structures ● Engage external tax advisors to ensure proper tax practices	**Key Risk** Potential inaccuracies or incomplete tax filings. **Risk Appetite** **[1] : Very Low** **Opportunity** Strengthening a culture of transparency in alignment with good corporate governance principles.	**Opportunity** Full and accurate tax contributions to the government support continuous national development, generating positive returns for the Company and all stakeholders.

3. Business and Social Innovation

Governance

Executive Committee

- Support the expression of ideas and innovative thinking among employees and provide resources related to innovation development.

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
1. At least 50% of award-winning innovations are practically implemented.	**Environmental** ● Establish sustainable interior design guidelines Sustainable Interior Design. ● Continuous use of environmentally certified materials (Green Products). ● Innovations to reduce construction waste (e.g., recycling lightweight bricks for landscaping).	**Key Risk** Insufficient monitoring and execution in implementing award-winning innovations by	**Opportunity** ● Enhancing consumers quality of life, economic growth, social development,

2. Increased use of environmentally friendly materials and innovations to reduce waste and environmental impacts. 3. Continuous recognition through external awards. **Operational Outcome** ● 56% of award-winning innovations (5 out of 9) in 2024 have been implemented; the remaining 44% are under development. ● Increased adoption of environmentally friendly materials and technologies, including: Low GHG products (e.g., Green Products, low CFP, low VOC paints) Paint innovations reducing multiple coating layers and eliminating primers Installation of air filtration (airflow) systems in residential units Recycling of roof tile waste into paving materials.	● Upcycling paint containers for organic waste composting to replace chemical fertilizers. ● Promoting energy-saving innovations (e.g., EV charging stations). ● 100% recycling of gypsum waste from construction processes. ● Use of reusable plastic pallets to replace wooden pallets. ● Reuse of concrete waste for temporary on-site roads. ● Use of cut-to-size pipes and fittings to minimize material waste. ● Collaboration with partners to develop low-coat, primer-free paints. ● Development of water filtration systems in storage tanks to improve water quality. ● Innovation in multifunctional waste bins with integrated mailbox and parcel features. **Social** ● Upcycling lightweight brick waste into aroma stones to generate income for local communities. ● Supporting employee participation in innovation-related training and seminars (internal and external). ● Organizing HACKATHON C2C TECH X BY SUPALAI 2025 in collaboration with Suranaree University of Technology. **Business** ● Digital Mortgage Innovation project in collaboration with banks to enhance loan approval efficiency and reduce documentation processes. ● SUPALAI EXPERIENCE HOME: construction innovation initiative. ● Innovation Award program to encourage internal innovation. ● Research and analysis of real estate innovations to enhance product development. ● Utilization of consumer behavior research to drive value-added innovations. ● Integration of innovation and AI into business operations. ● Continuous participation in external innovation competitions.	responsible functions. **Risk Appetite [2] : Low** **Opportunity** ● Enhancing customer awareness and corporate image. ● Improving operational efficiency. ● Strengthening competitive advantage. ● Developing products aligned with customer needs and increasing sales Opportunity.	and environmental sustainability. ● Responding effectively to stakeholder needs and expectations. ● Promoting continuous innovation in the real estate business. ● Developing products aligned with ESG principles.

● Received 8 external awards, including: Product of the Year Award 2025 Supalai Elite Sukhumvit 39 Masterplan for Thailand Supalai Lagoon Hua Hin (Asia Pacific Property Awards 2025) Best Affordable Quality Awards Home (Living Insider Developer Awards 2025) Best Concept Design Awards Condo (Living Insider Developer Awards 2025) FIABCI Thai Prix DExcellence Awards 2025 (Condominium category) Elite Winner Hubexo Asia Awards 2025 Green Innovation Award Energy Efficiency Label (No.5) Certification Electricity Generating Authority of Thailand.			

4. Biodiversity and Ecosystem Conservation

Governance

Corporate Governance and Sustainable Development Committee

- Organizational Sustainability Management Policy

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
● Business operations support the reduction of negative impacts on ecosystems and biodiversity through stakeholder engagement. ● Green space in low-rise projects ≥5% of saleable area. **Operational Outcome** ● No complaints regarding project impacts on biodiversity and ecosystems. ● All low-rise projects maintained green space of at least 5% of total saleable area.	● Conduct site assessments and prepare Initial Environmental Examination (IEE) and Environmental Impact Assessment (EIA) reports. ● Establish grievance channels for biodiversity and ecosystem impacts at project sites and communicate to nearby stakeholders. ● Comply with Company standards aligned with expert review committee requirements for EIA (buildings, land allocation, and community services). ● Treat wastewater to meet regulatory standards prior to discharge. ● Implement community communication plans on impact mitigation, remediation measures, and monitoring results. ● Preserve existing trees within project areas and replant within Company developments. ● Utilize native plant species in project landscaping. ● Organize reforestation activities (e.g., Forest for Well-being initiative). ● Conduct biodiversity risk assessments and implement mitigation plans. ● Establish guidelines for tree relocation and transplantation. ● Use natural or treated water for landscape maintenance to reduce potable water consumption. ● Convert organic waste (leaves and branches) into compost to replace chemical fertilizers and improve soil quality. ● Apply bio-fermented solutions to enhance soil quality and plant growth without chemicals. ● Utilize organic fertilizers to reduce chemical fertilizer usage. ● Reuse existing soil within project areas to preserve ecosystems and enhance biodiversity. ● Collaborate with government agencies on conservation of rare species, microbial solutions, and organic composting. ● Organize environmental volunteer activities (e.g., coastal clean-up and marine conservation support).	**Opportunity** Enhancing operational management to minimize impacts on biodiversity and ecosystems, while mitigating reputational risk.	**Key Risk** Potential impacts from construction activities on ecosystems and the environment, leading to biodiversity loss. **Risk Appetite [2]: Low**

5. Resource Utilization and Waste Management

Governance

Corporate Governance and Sustainable Development Committee

- Efficient Resource Utilization Policy

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
1. Continuously reduce resource consumption at the Companys headquarters 2. Promote waste segregation through the Waste Separation campaign and Recycle Day at headquarters, contributing to carbon reduction of at least 10 TonCO_2e per year. **Operational Outcome** 1. Reduced resource consumption at the Companys headquarters as follows:  2. Sort more, benefit more waste segregation project at the headquarters building, in collaboration with Recycle Day. 2024: A total of 787.90kg of waste was separated, reducing carbon emissions by 2.61 TonCO_2e, equivalent to 275 trees planted.	**Resource Utilization** ● Replacement of 9W LED 6,400K light bulbs in common areas and restrooms at the Companys Supalai Grand Tower to reduce electricity consumption. ● Reuse of wastewater from the air-conditioning system at the head office for watering plants and cleaning road surfaces. ● Replacement of street lighting poles in project common areas with solar-powered lighting (Solar Cell) to reduce electrical wiring and electricity consumption, helping lower common area expenses. ● Green building management at Icon Sathorn to enhance efficient water and energy utilization, with the office area certified under LEED Certified. ● Implementation of energy-saving innovations such as Motion Sensor, Heat Wheel Energy Recovery, Precooled Evaporator, UVC air-conditioning disinfection system, Building Management System (BAS), and Lift Destination. ● Replacement of the chiller system to improve cooling efficiency, together with the installation of CPMS (Chiller Plant Management System) to control and manage the cooling system based on actual load usage and enable real-time monitoring to reduce energy consumption. ● All real estate development projects launched in 2025 utilize water-saving fixtures and sanitary equipment. ● Replacement of sanitary fixtures with water-saving models at the head office. ● Improvement of the wastewater treatment system at the head office. ● Optimization of electricity load to improve energy efficiency. ● Improvement of equipment to reduce energy consumption in the wastewater treatment system. ● Increased adoption of electric vehicles (EVs) and hybrid vehicles to replace fuel-powered vehicles. ● Installation of EV charging stations within the building.	**Key Risk** Employees may lack consistent and sustainable implementation of efficient resource utilization, energy conservation, and waste management practices in their daily lives. **Risk Appetite** **[2] : Low** **Opportunity** Planning resource utilization, including the adoption of innovations in production processes, to enhance resource efficiency and reduce impacts on the climate, which may otherwise lead to natural changes that could adversely affect overall business operations.	**Opportunity** Promoting efficient resource utilization habits among employees, extending to their families and society.

	2023	2024	2025
Water Consumption (units)	104,374	107,060	92,995
Electricity Consumption (units)	4,086,669	3,593,629	2,717,859

2025: A total of 2,764.15 kg of waste was separated, reducing carbon emissions by 15.33 TonCO_2e, equivalent to 1,487 large trees planted.	● Collaboration with Pankan Project to collect donated unused items for resale, with proceeds supporting scholarships for children under the Yuvabadhana Foundation. ● Implementation of the Care the Bear Eat It All Reduce Global Warming (No Food Waste) campaign. ● organization of activities and campaigns to encourage employee and supplier participation in resource efficiency, such as SPALI Supplier Day and waste separation campaigns. ● Use of natural water sources within project areas or treated water to replace tap water for landscape maintenance in project common areas. ● Adoption of Virtualization and Cloud Services in place of physical servers to reduce energy consumption. ● Providing knowledge and awareness on energy conservation through the Companys online platforms such as Facebook, TikTok, and Instagram. ● Elevator system management through the installation of EMS (Energy Management System) to monitor elevator operations and the replacement of existing elevators with the energy-efficient Regent model. ● Installation of VSD (Variable Speed Drive) in water pump systems to control operational speed and reduce energy consumption according to actual usage. ● Replacement of snack and fruit packaging used in training sessions and meetings with environmentally friendly containers. **Waste Management**		

	● Implementation of the The More You Separate, The More You Gain waste separation project in collaboration with Recycle Day, achieving a carbon footprint reduction of 15.33 TonCO_2e, equivalent to 1,487 trees planted. ● Implementation of the E-Waste project in collaboration with Advanced Info Service (AIS), collecting 20 kg of electronic waste, equivalent to a carbon footprint reduction of 0.123 TonCO_2e or 14 trees planted. ● Recycling of used sealant tubes into various products such as chairs, plant pots, and coasters. ● Employee uniforms produced from recycled plastic totaling 97,720 pieces, reducing carbon emissions by 9.772 TonCO_2e, and reducing ironing-related energy use by 25.36 TonCO_2e per year, totaling 35.13 TonCO_2e, equivalent to 3,652 trees planted. ● Implementation of the SUPALAI SELF-PROVED project to measure construction waste generated from the Companys projects, aiming to reduce waste through construction innovation and improved planning under the Waste Management initiative. ● Waste separation within projects into eight categories: organic waste, plastic, glass bottles, foam, paper, cans, plastic bottle caps, and food waste, with hazardous waste separated from non-hazardous waste for proper disposal and measurable outcomes. ● Campaigns and awareness programs for residents within projects, including providing color-coded waste bags based on waste categories. ● Reuse of lightweight brick scraps to produce Aroma Stones, reducing greenhouse gas emissions by 0.002 kgCO_2e per piece, which are used as souvenirs in Company events. ● Implementation of the New Gen Zero Waste project to separate recyclable waste.		

6. Climate Action

Governance

Corporate Governance and Sustainable Development Committee

- Organizational Sustainability Management Policy

Goals/Indicators	Strategy/Approach Operations	Risks and Opportunities

2025		Business	Stakeholders
● Reduce Scope 1 and Scope 2 greenhouse gas (GHG) emissions by 40% from the Business-as-Usual (BAU) baseline by 2030. ● Achieve ISO 14064-1:2018 certification for organizational GHG emissions reporting. ● Obtain certification from the Thailand Greenhouse Gas Management Organization (TGO) for organizational carbon footprint disclosure. **Operational Outcome** ● Total Scope 1 and Scope 2 GHG emissions amounted to 11,574 TonCO2e, representing a 4.28% reduction compared to 2024. ● Achieved ISO 14064-1:2018 certification for organizational GHG emissions reporting (March 2025). ● Achieved TGO certification for organizational carbon footprint disclosure (May 2025).	● Participation in climate-related initiatives and programs with external organizations. ● LEED certification (Leadership in Energy and Environmental Design) for the office building at Supalai Icon Sathorn. **Operational Outcome** ● Reforestation initiative Forest for Well-being with 36th Anniversary, Prachuap Khiri Khan. ● Chiller system replacement to improve energy efficiency and reduce emissions. ● Installation of EV charging stations at Supalai Grand Tower and Supalai Icon Sathorn. ● Gradual transition to electric and hybrid vehicles for corporate fleet. ● Adoption of mineral-based pool systems to reduce chemical usage. ● Upcycling paint containers for organic waste composting to replace chemical fertilizers. ● Installation of solar-powered street lighting to reduce electricity consumption. ● Solar roof projects for sales offices, construction offices, clubhouses, show units, and parking areas. ● Adoption of low-carbon materials and technologies in construction and product development. ● Use of hydraulic cement to reduce CO_2 emissions. ● Use of certified green materials (e.g., SCG Green Choice). ● Selection of low GHG products (e.g., low CFP, low VOC paints). ● Participation in Care the Bear initiative to reduce carbon footprint. ● Communication and awareness campaigns to achieve 40% GHG reduction target by 2030. ● Preservation and relocation of existing trees within project areas. ● Waste reduction campaigns for residents, including color-coded waste segregation. ● Use of environmentally friendly cleaning products. ● Use of organic fertilizers combined with chemical fertilizers to reduce environmental impact. ● Employee uniforms made from recycled plastic, reducing 35.01 TonCO_2e (equivalent to 3,640 trees).	**Key Risk** 1. Misalignment of initiatives or activities by responsible functions with the Companys GHG emissions reduction targets. **Risk Appetite [2] : Low** 2. Insufficient knowledge and understanding among designated coordinators (Centers) responsible for data collection, communication with consultants, and internal knowledge transfer. **Risk Appetite [2] : Low** **Opportunity** Climate change challenges create Opportunity for the development of new products and improved business management approaches aligned with the Companys operations.	**Impact** The impacts of climate change are becoming increasingly severe, including flooding from intensified rainfall, rising sea levels due to polar ice melt, heatwaves, and droughts.

7. Consumers Responsibility

Governance

Corporate Governance and Sustainable Development Committee

- Customer Treatment Policy
- Personal Data Protection Policy

Quality System Review and Improvement Committee

- Quality Policy

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders

No final court rulings indicating intentional unfair treatment of consumers. **Operational Outcome** In 2025, there were no final court rulings indicating intentional unfair treatment of consumers.	● ISO 9001:2015 certification covering end-to-end processes, including delivery and after-sales services. ● Extended warranty periods for condominium and low-rise projects beyond legal requirements. ● Customer complaint, feedback, and maintenance request channels via hotline (1720) and online platforms. ● Continuous development of the Supalai Sabai application. ● Provision of certified technician listings (e.g., electrical, plumbing, interior works) via Supalai Sabai. ● Customer knowledge sharing through various channels (e.g., Supalai Sabai). ● Supalai Privilege Program offering discounts on healthcare, appliances, and moving services. ● Promotion of solar roof adoption through Supalai Sabai Marketplace. ● LINE OA: Supalai Care Providing guidance on home and condominium maintenance. ● Green Home Loan Program in collaboration with financial institutions, offering preferential interest rates. ● Use of project areas for community planting (e.g., vegetables and seasonal flowers). ● Waste segregation awareness campaigns with provision of color-coded waste bags. ● Customer surveys on satisfaction, behavior, and feedback to enhance products and services. ● Customer assistance programs during disasters (e.g., earthquakes, floods). ● Collaboration with partners to provide discounts on construction materials for affected customers. ● Share of the Month initiative within construction team meetings to share best practices. ● Peer Reporting program as a channel for reporting issues or risks to ensure timely resolution for customers.	**Key Risk** Potential failure to meet product quality standards. **Risk Appetite** **[1] : Very Low** **Opportunity** ● Strengthening long-term competitiveness. ● Enhancing corporate image.	**Opportunity** Enhancing customer satisfaction across key aspects, including quality of life, safety, and value for money.

8. Community and Social Development

Governance

Corporate Governance and Sustainable Development Committee

- Social Treatment Policy

Goals/Indicators	Strategy/Approach Operations	Risks and Opportunities

2025		Business	Stakeholders
Conduct at least 15 social and community development activities per year. **Operational Outcome** In 2025, more than 19 social and community development activities were conducted.	**Community and Social Support Activities** ● Panrak Project: - Collection and donation of relief items for flood victims in Northern Thailand, such as clothing, dried food, and cleaning supplies, through the Mirror Foundation. - Special Panrak Project campaign providing relief items for flood victims in Hat Yai in collaboration with Tham-Dee Foundation. ● Waen Sang Suk Project: Eye examinations and eyeglasses provided to workers, contractors, suppliers, and nearby communities, achieving 152% of the target. ● Nong Suk Dee, Pee Suk Jai Project: Health check-ups and influenza vaccinations provided to children of construction workers and children in nearby communities, achieving 177% of the target. ● Pan Aun Klai Nao Project: Provision of essential supplies to help underprivileged students cope with cold weather caused by changing climate conditions. ● Pankan Project: Donation of unused items for resale, with proceeds supporting scholarships for children under the Yuvabadhana Foundation. ● Suan Phak Srang Dee Project: Transformation of unused school space into fruit and vegetable gardens, including seed planting, organic fertilizer production, and income-generating skills development for students and nearby communities at Ban Chakna School, Chonburi Province. ● Environmental activities such as the Pa Sang Suk Project (3rd edition).	**Key Risk** Community and social development activities may lack continuity in implementation. **Risk Appetite [2]: Low** **Opportunity** ● Sustainable business growth. ● Smooth implementation of project operations. ● Enhancement of the Companys reputation and credibility among communities and society.	**Opportunity** ● Enhances communities capacity to generate livelihoods and increase their income. ● Improves basic quality of life and supports environmental conservation.

	● Education Development Activities under the Supalai Srang Dee Project: - Establishment of the Huen Srang Dee Learning Center as a hub for childrens learning and activities, along with scholarships for outstanding students at Ban Muang Ka School, Chiang Mai Province. - Supalai Srang Dee Transforming Open Spaces into Playgrounds Project: Renovation of deteriorated activity areas into safe learning spaces, including activity yards, playgrounds, reading cabins, and football fields for the New Khlong Toei Development Community. - Support for the BAS CAMP OF GEN social development volunteer camp organized by the Faculty of Business Administration for Society, Srinakharinwirot University. - Support for Engineering Open House 2025 organized by the Faculty of Engineering, Thammasat University. ● Participation in the Big Brother Project with the Thai Chamber of Commerce to strengthen the capabilities of new-generation Thai entrepreneurs through coaching and mentoring. ● Scholarship grants provided in 2025. **Job Creation for Communities and Society.** ● Local employment within project areas, hiring residents from nearby communities or provinces for roles such as gardeners, housekeeping staff, and security personnel. ● Recycling of crushed lightweight brick scraps into Aroma Stones, generating income for the Amban Community Enterprise in Mae Hong Son District, Chiang Rai Province. ● Internship programs for university students. ● Employment Opportunity for persons with disabilities. ● Knowledge-sharing activities as guest speakers in collaboration with local organizations such as schools and communities to promote development, awareness, and income generation for society.		

9. Respect for Human Rights and Fair Treatment of Labour

Governance

Nomination and Remuneration Committee

- Human Rights Policy
- Remuneration and Benefits Policy

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
● No employee complaints related to human rights violations or unfair labor practices. ● No human rights impacts arising from suppliers business operations. **Operational Outcome** ● In 2025, no complaints were reported regarding human rights violations or unfair labor practices. ● In 2025, no human rights complaints were associated with suppliers business operations.	● Adoption of Human Rights Due Diligence (HRDD) guidelines from the Securities and Exchange Commission of Thailand (SEC) to prevent and mitigate human rights risks, including ensuring internal implementation of policies. ● Assessment of human rights risks and impacts across the Companys operations, suppliers, contractors, and external parties, including remediation, mitigation, and grievance mechanisms for violations or unfair labor practices. ● Human rights training programs for employees and business partners, covering topics such as human rights in the real estate sector, positive discipline for modern supervisors, and policies on misconduct and harassment. ● Compliance with labor relations and welfare standards, receiving recognition as an outstanding establishment in 2025 from the Department of Labour Protection and Welfare. ● Protection of privacy rights, including personal data protection (PDPA). ● Provision of fair, inclusive, and sustainable compensation and benefits. ● Revision of Company regulations to align with human rights principles and fair labor practices. ● Provision of essential and equitable employee welfare. ● Promotion of equal employment Opportunity without discrimination (e.g., disability, gender identity, age, religion, race). ● Integration of human rights criteria into procurement processes. ● Establishment of grievance channels on human rights and fair labor practices via email (Employee_feedback@supalai.com), with direct oversight by senior management.	**Key Risk** Potential unfair labor practices or discrimination, leading to reduced employee well-being and safety, possible legal actions, and reputational damage. **Risk Appetite** **[1] : Very Low** Failure to integrate Diversity & Inclusion (D&I) principles into internal processes (e.g., recruitment, training, compensation, and benefits), which may result in discrimination based on gender, age, religion, or ethnicity and adversely affect corporate reputation. **Risk Appetite** **[1] : Very Low** **Opportunity**	**Opportunity** ● Employees and stakeholders are treated fairly without discrimination. ● Employees of suppliers benefit from the Companys collaboration with suppliers on human rights issues.

		● Strengthening competitive advantage through a positive corporate image. ● Enhancing talent attraction and retention by recruiting qualified employees and retaining skilled personnel to sustain business competitiveness. ● Advancing human rights practices, recognizing their cross-cutting impact on business operations and related risk areas.	

10. Capacity Enhancement for Employees and Workers in Work and Daily Life

Governance

Nomination and Remuneration Committee

- Employee Development Policy
- Employee Treatment Policy

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
	Training and Employee Development.	Key Risk	Opportunity

● At least 90% of employees participate in the performance competency assessment as defined by the Company. ● At least 80% of employees participating in the competency assessment have an Individual Development Plan (IDP). **Target (2030)** 100% of employees are assessed on the skills required for both current and future roles and participate in the Companys employee development programs (starting in 2026). **Operational Outcome** ● In 2025, 98% of employees participated in the competency assessment as defined by the Company. ● In 2025, 83% of employees who participated in the competency assessment had Individual Development Plans (IDPs).	● Annual training plan. ● Individual Development Plans (IDPs). ● Participation of employees in external training programs organized by professional and regulatory institutions (e.g., the Stock Exchange of Thailand, the Engineering Institute of Thailand, and the Department of Skill Development), including joint training with business partners. ● Professional and construction standards training for engineers, maintenance technicians, and contractors. ● Organization-wide capability development through the Agile Program. ● Competency and behavioral assessments based on Agile Competency principles. ● n-the-job training and coaching. ● Gamification-based learning through the Supalai Life platform. ● Cybersecurity awareness training for employees and executives. ● Digital skills capability assessment linked to the sustainability pillar on Innovation under the DIGITAL Capability Assessment program. ● Technical skills training (e.g., AI Forum, Data-Driven Decision Making for Enhanced Productivity, and construction safety). ● Cross-functional professional skills training. ● ESG and ethics training, including: ○ ESG: Closer Than You Think. ○ ESG: The First Step Toward Sustainability. ○ Waste segregation and management. ○ Anti-corruption. ○ Diversity & Inclusion. ○ Fundamentals of corporate sustainability and sustainable development. ○ Human rights for the real estate sector. ○ Seminar on Positive Discipline for Modern Supervisors. ○ Training on policies regarding misconduct and harassment. ○ Online learning programs under Supalai x SkillLane. **Activities and Benefits Supporting Employee Development.**	Employee development may not fully align with the competencies required for each position, resulting in insufficient skills and knowledge necessary for job performance and daily work. **Risk Appetite [2] : Low** Supervisors may lack clear guidelines for developing employees in alignment with required competencies. **Risk Appetite [2] : Low** **Opportunity:**	● Employees receive fair and transparent performance evaluations. ● Employees are provided with equal Opportunity for career growth and development.

	● Scholarship programs. ● Employee welfare and essential benefits. ● Employee engagement survey program. ● Welfare Committee and Supalai Relations Club. ● Competitive compensation benchmarking with industry standards. ● SPL Book Club program, including book recommendations, board games, and a book lending service. ● Talent and successor development programs. ● Activities promoting awareness of Agile Way behaviors. ● Environmental awareness initiatives embedded in the corporate culture. ● Recruitment and development of future leaders through the Manager Trainee program.	● Strengthening employee capabilities in alignment with the Companys strategic direction. ● Enhancing employee competencies to support the Companys long-term strategic objectives. ● Adoption of Agile practices to improve organizational capability and competitiveness in a rapidly changing environment.	

11. Safety, Occupational Health, and Working Environment

Governance

Corporate Governance and Sustainable Development Committee

- Safety, Occupational Health, and Working Environment Policy.

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders

● Zero work-related fatalities among employees. ● Zero severe work-related injuries among employees. **Operational Outcome** In 2025, there were no work-related accidents resulting in severe injury, permanent disability, or fatalities among employees.	● Establishment and annual review of the Companys safety policy. ● The Safety Committee conducts inspections, gathers findings, and reports improvement measures to management. ● Safety inspections conducted by the Safety Committee, management team, internal audit, and IQA. ● Monthly safety inspection checklists for project safety officers, with results reported at the monthly project meeting. ● Occupational safety manuals and guidelines. ● Installation of safety signage at construction site entrances to raise awareness and enforce safety practices. ● All Safety Committee members attend certified training on occupational safety, health, and working environment for establishments. ● Training programs for Executive-Level Safety Officers for supervisory-level employees to oversee workplace safety. ● Training on occupational safety, health, and working environment for all new employees. ● Establishment of a Business Continuity Plan (BCP) and Disaster Recovery Plan (DRP). ● Firefighting training provided to at least 40% of employees in each area. ● Annual fire evacuation drills for employees. ● Provision of safety equipment for employees and suppliers. ● Annual SAFETY GAME and SAFETY COIN activities to raise awareness of occupational safety, health, and working environment. ● Engagement with suppliers to promote and implement safety practices within their operations.	**Key Risk** Employees may fail to comply with safety regulations, requirements, or safety manuals. **Risk Appetite [1] : Very Low** Unsafe working conditions, work procedures, and inadequate supervision, where supervisors may not sufficiently establish safe work practices and ensure a safe working environment. **Risk Appetite [1] : Very Low** **Opportunity** Continuous improvement in safety risk management, strengthening the Companys safety performance and corporate reputation.	**Opportunity** ● Employees work in a safe environment with improved morale. ● Employees of suppliers benefit from suppliers cooperation with the Company on occupational safety, health, and working environment through the Code of Conduct and workplace visits.
12. Corporate Governance 			

Governance

Corporate Governance and Sustainable Development Committee

- Policy on Treatment of Shareholders, Customers, Partners, Creditors, Competitors.
- Consider approving the Employee Code of Conduct.
- Oversee compliance with good corporate governance criteria.
- Support and promote knowledge dissemination.
- Internal Information Usage Policy.
- Conflict of Interest Policy.
- Policy on Reporting Conflicts of Interest.
- Information Disclosure and Public Dissemination Policy.

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders

1. Received a 5-Star CG Rating. 2. Received the ASEAN Asset Class PLCs Award under the ASEAN CG Scorecard. 3.Received the Outstanding Ethics Award from the Thai Chamber of Commerce. **Operational Outcome** 1. Received a 5-Star CG Rating (Excellent Category)in 2025, for the 13th consecutive year. 2. Received the ASEAN Asset Class PLCs Award under the ASEAN CG Scorecard for 2024, with the results announced in July 2025. 3. Received the Outstanding Ethics Award from the Thai Chamber of Commerce (23rd year), in 2025.	● Assessment of employees ESG awareness across three dimensions, with results analyzed using SPSS and PAM (Marketing Automation Platform) and reported to the Corporate Governance and Sustainable Development Committee. ● ESG training for employees through the Supalai Coin Next platform: ESG Journey The First Step Toward Sustainability. ● Improvement of the Corporate Governance Policy and Code of Conduct to enhance clarity and readability. ● Achievement of a full score (100 points) in the AGM Checklist for the 13th consecutive year. ● Knowledge assessment tests for employees on corporate governance, internal control, and anti-corruption. ● Implementation of corporate governance practices with monitoring, evaluation, and reporting processes covering: ○ Shareholder rights and equitable treatment of shareholders. ○ Treatment of stakeholders. ○ Disclosure and transparency. ○ Responsibilities of the Board of Directors. ● Communication of corporate governance knowledge through employee-friendly materials. ● Disclosure of conflicts of interest. ● Employees are required to acknowledge and sign the Code of Conduct and Company policies through the Supalai Skills platform to ensure understanding and compliance with corporate governance principles.	**Key Risk** Operations may not comply with the requirements of the Stock Exchange of Thailand and external regulatory authorities. **Risk Appetite [2]: Low** **Opportunity** Establishing a strong foundation for sustainable business operations.	**Opportunity** ● Stakeholders benefit from the Companys economic contributions, including income generation, employment Opportunity, and participation in social and environmental stewardship. ● Investors gain confidence that their investments are managed appropriately and in the best interests of the business. ● Suppliers enhance their reputation through collaboration with the Company on ESG initiatives.

13. Risk Management

Governance

Risk Management Committee

- Define material sustainability issues.(Key Materiality).
- Assess the impact of sustainability issues on stakeholders.
- Prioritize material sustainability issues (Materiality Matrix).
- Define policies and propose risk management approaches.
- Define Key Risks.
- Assess Risk Level.
- Define acceptable risk levels (Risk Appetite).
- Define risk indicators.
- Table showing assessment of likelihood and impact (Risk Matrix).
- Provide advice / define policies and propose additional risk management approaches to line managers (Risk Mitigation Plan).
- Support activities to build knowledge and understanding of risk management.
- Oversee the emergency response plan.
- Provide a platform for stakeholder feedback.

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders
Assessment and establishment of risk management plans for key enterprise risks and sustainability-related risks of the Company, achieving a SET ESG Ratings score of 95 in the Risk and Crisis Management category from the Stock Exchange of Thailand (SET). **Operational Outcome** The sustainability assessment result in risk management from the Stock Exchange of Thailand in 2025 scored 89 points in the Risk and Crisis Management category.		**Key Risk** The Companys risk assessment may not fully cover all significant risks arising within the organization. **Risk Appetite** **[2] : Low** **Opportunity**	**Opportunity** Stakeholders receive both direct and indirect benefits from the Companys risk management practices across social, environmental, and economic aspects.

	● Risk management covers sustainability issues (ESG Risks) and enterprise risks, including strategic, operational, financial, regulatory, cyber, and emerging risks. ● Annual risk review conducted by the Risk Management Unit and relevant departments, considering risks from: 1. Internal factors (SWOT Analysis). 2. External factors (PESTEL Analysis), including business environment surveys based on various statistics. 3. Global risk reports such as the The Global Risks Report by the World Economic Forum. 4. Annual focus group discussions with external stakeholders on topics such as product image, services, governance, sustainability, corporate image development, risk assessment, and stakeholder expectations to support sustainable development (Environmental, Social and Governance: ESG). 5. Other stakeholder feedback channels. 6. Review by the Risk Management Committee to consider risk mitigation measures in line with the Companys risk appetite (presented four times per year), with monthly updates reported to the committee via the Group Line platform. ● Risk management is also implemented at the departmental level and reviewed annually. ● Initiatives to promote enterprise-wide risk management practices, including: 1. Risk-Based Audit processes. 2. Assessment of employees knowledge on risk management. 3. Communication of risk management knowledge through easy-to-understand materials.	● Enhancing awareness of potential threats and reducing possible losses. ● Establishing a knowledge database to support management and operational efficiency. ● Creating value in operations and strengthening the Companys corporate image. ● Aligning organizational development toward common goals. ● Improving the efficiency of management and resource allocation. ● Supporting the achievement of organizational objectives while reducing potential obstacles or unexpected events.	
14. Anti-Corruption 			

Governance

Audit Committee

- Oversee compliance with the self-assessment criteria for CAC certification, including consideration of policies related to anti-corruption, as follows:

1. Risk Assessment
2. Anti-Corruption Risk Prevention Measures
3. Policies and Practices
4. Personnel Management
5. Communication
6. Whistleblowing
7. Review and Audit
8. Receiving complaints and defining solutions to prevent recurrence.

Corporate Governance and Sustainable Development Committee

- Ensure that the Supplier Code of Conduct includes anti-corruption issues.

Board of Directors

- Oversee compliance with the anti-corruption enhancement plan of the JUMP+ project.

Goals/Indicators 2025	Strategy/Approach Operations	Risks and Opportunities	
		Business	Stakeholders

● No complaints related to corruption. ● Maintain 3-Star CAC status. ● Receive the CAC Change Agent Award continuously. **Long-term Plan (2028).** ● Achieve the 3rd consecutive renewal of certification as a member of the Thai Private Sector Collective Action Against Corruption (CAC). ● At least two suppliers that declare their commitment to CAC obtain CAC certification. **Operational Outcome** ● In 2025, no complaints related to corruption were reported. ● The Company received CAC 3-Star status for the 4th renewal of certification from the Thai Private Sector Collective Action Against Corruption (CAC) in 2025. ● The Company received the CAC Change Agent Award in November 2025.	● Implementation of anti-corruption measures in accordance with the CAC assessment conducted by the Thai Institute of Directors Association (IOD). ● Monitoring and compliance with the criteria of the Thai Private Sector Collective Action Against Corruption (CAC). ● Received the CAC Change Agent Award for the 4th consecutive year, with the award ceremony held on 24 November 2025. ● At least two suppliers that declare their commitment to CAC obtain CAC certification within three years (20252028). ● At least 10 SME suppliers, subsidiaries, and key business partners that conduct business with the Company declare their commitment to CAC each year. ● Participation as a speaker at the CAC Change Agent Day event to support transparent business practices and strengthen anti-corruption efforts, while building an anti-corruption network and offering special discounts to suppliers that declare their commitment with the Company. ● Communication of whistleblowing channels via Email: anti-corruption@supalai.com. ● Promotion of employee roles and participation in preventing and combating corruption. ● Development of knowledge assessment tests on corporate governance, internal control, and anti-corruption for employees. ● Assessment of the adequacy of the internal control system. ● Review of the Companys operational systems. ● Preparation of a gap analysis and implementation of improvement actions in accordance with the required criteria. ● Communication on anti-corruption to employees and suppliers to raise awareness through channels such as the website, intranet, email, and Line groups.	**Key Risk** Operations may not comply with the criteria of the Thai Private Sector Collective Action Against Corruption (CAC). **Risk Appetite) [2]: Low** **Opportunity** ● Enhances competitiveness and strengthens the Companys reputation. ● Reduces unnecessary costs in business operations.	**Opportunity** ● Builds confidence in investment and product purchases. ● Suppliers are informed about the Companys anti-corruption policy, helping reduce their operational costs. ● Suppliers gain knowledge from participating in SME seminars organized by the Thai Private Sector Collective Action Against Corruption (CAC).

Information on review of policy and/or goals of sustainable management over the past year

Review of policy and/or goals of sustainable management over the past year

Has the company reviewed the policy and/or goals of sustainable management over the past year	:	No
Has the company changed and developed the policy and/or goals of sustainable management over the past year	:	Yes

The company is committed to driving the organization towards achieving its sustainability vision, recognizing the importance of responding to stakeholder needs in all dimensions, including environmental, social, and governance aspects, while balancing economic considerations to ensure stable business growth and deliver shared value to society. However, conducting business amidst current global changes is fraught with challenges, including climate change, stricter regulations, economic volatility, and increasing expectations from consumers and society. Therefore, the company prioritizes risk management, anticipating emerging opportunities, and developing comprehensive strategies that address these situations.

On the other hand, these challenges also reflect opportunities for adaptation and differentiation by adopting innovation, technology, and business approaches that consider environmental and social aspects, in order to enhance product and service quality, build trust with stakeholders, and sustainably increase competitive potential.

With a clear vision and organizational commitment, the company is ready to overcome all challenges and transform them into a driving force for stable and sustainable growth, delivering value to stakeholders, society, and the environment in the long term. This is achieved through a framework and operational strategies for sustainable development, integrating sustainable development into corporate strategy, business decisions, and the Enterprise Risk Management (ERM) process, considering both the organization's impact on the economy, society, and environment (Impact Materiality) and the risks and opportunities that sustainability issues pose to the company's financial performance (Financial Materiality) to support long-term sustainable growth.

By 2025, the company aims for sustainability goals with operational strategies focused on Being a Multi-National Company as follows

- **Products and Services** Developing affordable low rise projects targeting the 3-5 million baht price segment, with new house designs, increased investment in large land plots to create residential communities in Bangkok, its vicinity, and regional areas. The company is also committed to selecting quality materials and extending warranty periods. For high rise projects, the structural warranty has been extended from 5 years to 10 years, and the fixtures warranty from 2 years to 3 years. For low rise projects, the fixtures warranty has been extended from 1 year to 3 years. The company has piloted this initiative at high rise projects: Supalai Park Ekkamai-Pattanakarn, Supalai Sense Srinakarin, and the horizontal project Supalai Essence Bangna-Suvarnabhumi, to enhance confidence in living in Supalai projects.

- **Marketing** AI and technology are utilized to drive marketing strategies by analyzing data to provide an easy, convenient, and responsive home-buying experience for all customer segments.
- **Digital Innovation** Integrating innovation for sustainable living with the Smart Village concept to enhance residents' quality of life.
- **Environmental Aspect** Aiming for sustainability in building partnerships with suppliers by collecting carbon emission data for materials used in all business processes, and by 2025, targeting the procurement of Green Procurement.
- **Social Responsibility** Committed to improving the quality of life for society and stakeholders with transparency and ethics, while complying with laws and climate business ethics.

Monitoring, verification, and assurance of information

The company monitors, verifies, and assures sustainability data through internal control systems, internal audit units, and internal assessment systems by the IQA team within the ISO system (Internal Quality Audit) to ensure that disclosed information is accurate, traceable, and compliant with international disclosure standards.

Information on impacts on stakeholder management in business value chain

Business value chain

Value Chain Management

The Company has adopted supply chain management processes as a key business strategy to foster business sustainability and enhance efficiency across all operational processes, from upstream, midstream, to downstream, throughout the value chain, with the utmost consideration for the benefits of all stakeholder groups, as follows:

Value Chain	Process	Stakeholders

1. Land Acquisition and Funding Sources The upstream process begins with a project feasibility study and location potential analysis, considering factors such as supply-demand, economic trends, urban growth, infrastructure, and consumer behavior, along with legal and urban planning risk assessment, before carefully acquiring land through due diligence and transparent land valuation processes.	● Land, location, and project potential analysis ● Studying legal provisions and construction regulations ● Physical environmental risk analysis process before land acquisition	● Investors and shareholders ● Community/Society ● Landowners ● Adjacent landowners ● Government agencies ● Potential Customers ● Competitors
2. Design After land acquisition, the project design and planning phase begins, integrating sustainable development concepts from the outset, such as energy-efficient building design, selection of environmentally friendly materials, green space planning, and efficient water management. This also includes preparing Environmental Impact Assessment (EIA) reports and soliciting feedback from community stakeholders to ensure the project develops in balance with society.	● Environmental risk and opportunity assessment ● Designs in compliance with government regulations and customer needs ● Selection of high-quality and eco-friendly construction materials ● Obtaining permits from relevant authorities	● Investors and shareholders ● Executives and employees ● Potential Customers ● Community/Society ● Government agencies ● Suppliers and trade alliances (designers, consultants, etc.)
3. Procurement Establishing procurement criteria aligned with sustainability goals, such as selecting materials with environmental labels or certifications, and setting partner selection criteria based on ESG factors like raw material sources, clean energy use, labor management, and business ethics, to create a transparent supply chain, as well as developing work processes and innovations in collaboration with partners.	● Establishing environmentally friendly procurement guidelines ● Partner selection process considering human rights, anti-corruption, and ESG ● Partner evaluation using ESG Criteria ● Developing the potential of partners and contractors ● Cost and budget management	● Investors and shareholders ● Executives and employees ● Suppliers and trade ● alliances (procurers of goods and contractors)

4. Construction The midstream phase is the core of business operations, covering construction processes, project management, contractor management, labor, and efficient construction timelines. It involves controlling costs and work quality according to specified standards, while also prioritizing occupational health and safety for workers and minimizing environmental impacts, such as controlling dust, noise, and construction waste.	Fair contractor selection criteria ● Planning construction work to reduce waste and use recycled materials ● Developing construction processes for the safety of workers, communities, society, and the environment ● QC according to ISO 9001 : 2015 standards ● Measures to prevent and mitigate social and environmental impacts ● Communicating complaint channels to communities around the project	● Investors and shareholders ● Executives and employees ● Suppliers and trade ● alliances (contractors) ● Neighboring communities ● Government agencies
5. Sales and Marketing Operating transparently, providing accurate information to customers, and promoting products that meet sustainable living needs, such as energy-efficient buildings or projects with access to public transportation, as well as protecting personal data.	Providing complete information ● Customer data protection ● Marketing communication strategies, such as advertising media, sales promotion activities, and marketing events ● Customer feedback ● Preliminary credit assessment for customers	● Investors and shareholders ● Executives and employees ● Customers ● Business partners and trade alliances (Banks) ● Competitors
6. Handover & Ownership Transfer The downstream process begins with delivery and ownership transfer to customers, including product warranties and after-sales service.	● Quality inspection process before delivery ● Customer appointments for home inspection and ownership transfer ● Facilitating customers, such as applying for loans with commercial banks ● Customer care after ownership transfer	● Investors and shareholders ● Executives and employees ● Customers ● Suppliers and trade ● alliances (juristic persons, banks) ● Government agencies

7. After-Sales Service To ensure confidence in product and service quality, the Company provides product warranties to customers for both components and structures. Furthermore, it focuses on and prioritizes maintaining high standards of after-sales service quality, including operations that align with ESG criteria, such as efficient management of energy, water, and waste. Customer satisfaction surveys are also conducted to gather feedback for improving product and service quality.	● Warranty and maintenance services ● Customer satisfaction surveys ● Customer Relations management ● Juristic person management ● Supalai Contact Center 1720 ● Supalai SABAI Application	● Customers ● Juristic Person

Stakeholders in the value chain

The Company recognizes that both internal and external stakeholders are crucial for sustainable business operations, as they are affected or may be affected by the Company's operations, or can create an impact or influence business operations. Therefore, the Company prioritizes stakeholder engagement throughout the value chain, with the following processes for engaging with stakeholders:

Identification and Prioritization of Stakeholder Groups

The Company categorizes stakeholder groups in its value chain into 11 groups: 1) Employees, 2) Customers, 3) Shareholders/Investors, 4) Communities/Society, 5) Suppliers/Retailers 6) Contractors/ Vendor, 7) Government Agencies, 8) External regulatory bodies, 9) Banks, 10) Media and 11) Industry competitors. The Company's internal stakeholders include employees, while external stakeholders include customers, shareholders/investors, communities/society, business partners/retailers, contractors/suppliers, government agencies, external regulators, banks, media, and competitors in the same industry. The prioritization of stakeholders is determined by considering the level of the

Company's impact on each stakeholder group across economic, social, environmental, and human rights dimensions, combined with the level of impact or influence from each stakeholder group on the Company. This approach helps define strategies for building connections and fostering stakeholder engagement, as well as planning appropriate operations for each stakeholder group.

Prioritizing Stakeholders the Company has established the following stakeholder management strategies:

- Manage Strategically: Build strong relationships and foster collaboration to align stakeholders' needs and expectations with the organization's goals, leading to mutual benefits and long-term success.
- Keep Satisfied: Address significant stakeholder needs and concerns to maintain their support.
- Keep Informed: Provide accurate information and communicate transparently and consistently to keep stakeholders updated on progress and build trust and confidence.
- Monitor: Observe and assess stakeholders' interests and operations that may impact on the Company.

Monitoring, verification, and assurance of information

The company monitors, verifies, and assures sustainability data through internal control systems, internal audit units, and internal assessment systems by the IQA team within the ISO system (Internal Quality Audit) to ensure that disclosed information is accurate, traceable, and compliant with international disclosure standards.

Material Sustainability Issues

Material Sustainability Issues

Material Issues Process (GRI: 2-1, 2-2, 2-3, 2-4)

Supalai Public Company Limited recognizes the importance of conducting business with consideration for the environment, social, and governance. Therefore, it has prepared sustainability business driving information to present management approaches and performance results on key sustainability issues to all stakeholder groups, covering economic, social, environmental, and governance dimensions. The information is presented from January 1 to December 31, 2025.

The company has reviewed material sustainability issues based on the principles of GRI Standards 2021 GRI 3: Material Topics 2021, which assesses material sustainability issues based on significant impacts on stakeholders, society, and the environment (Impact materiality) and significant impacts on the company. This includes a process for identifying material sustainability issues and linking data on driving sustainable business, analyzing and collecting data from all departments within the company to ensure consistency with the reporting guidelines of the GRI Sustainability Reporting Standards (GRI Standards), an international sustainability reporting standard, at the Core Option level and the United Nations Sustainable Development Goals (UNSDGs), to reflect factors affecting the organization's sustainable business operations in economic, social, and environmental dimensions, as well as responsibility towards all stakeholders. The company reviews changes annually.

1. Analyze the context of the company and the industry.	Study and analyze activities within the supply chain conducted by the company and its business partners. Study external factors, global changes, economic, environmental, human rights, and social challenges at local, regional, and global levels related to the company and its business relationships.
2. Identify impacts throughout the supply chain.	Identify actual and potential impacts on the economy, environment, and society, including impacts. Impact on human rights, arising from both company activities and business relationships, identifying both negative and positive impacts, short-term and long-term impacts, through brainstorming sessions, in-depth interviews, survey results, and complaints, as well as performance statistics.
3. Assess the significance level of economic impact, environment, and society, including human rights.	Assess the significance level of impact by executives and experts in each field from internal departments, along with feedback from internal and external stakeholders through various channels, considering the severity of impact, nature of impact, and scope of impact. impact, likelihood, and ability to mitigate impacts, assessed separately for negative and positive impacts.
4. Assess the significance level of impact on the company.	Group impacts on the economy, environment, and society, including human rights, into sustainability issues and consider likely material sustainability issues to assess their impact on the company. This is done by senior management, considering the likelihood and severity of the organization's sustainability impacts.
5. Prioritize material sustainability issues.	Prioritize issues by setting cut-off points or criteria to determine which sustainability issues are highly material, high, medium, low, and very low.
6. Review and Approval of Material Sustainability Issues	Verify the prioritization and accuracy of the process by the Risk Management Committee and external sustainability experts, and approve key sustainability issues by the Corporate Governance and Sustainable Development Committee and the Board of Directors, respectively.

Sustainability risk management

Information on risk management policy and plan

Risk management policy and plan

The Board of Directors of Supalai Public Company Limited has been committed and has attached importance to risk management by adopting the risk management process covering strategic, operational, financial, legal and regulatory, corruption, marketing, cyber, materiality issues regarding sustainability of the company through environmental, climate change, social, and corporate governance (ESG) aspects and emerging risks that have an impact on the company are managed in accordance with the COSO Enterprise Risk Management (2017) framework, in order to ensure that risk management is conducted in a systematic and effective manner, while reducing the likelihood of damage which might affect the achievement of the Companys objectives to an acceptable level and be consistent with the strategic plan of the Company, which covers;

- causes of risks affecting the Company in financial and nonfinancial aspects, and provide a review of the risks every time there is a change of various factors affecting the capital fund of the Company.
- categories of risks and determine the risk appetite to be used as a basis for responding to the risks of the Company.
- assessment of risks by adding measures for risk assessment to achieve greater accuracy in terms of both quantitative and/or qualitative aspects.
- management of risks and monitoring each category of risk according to the priority by arranging for monitoring of risks at least on a quarterly basis.

The above-mentioned policy covers the operations of its subsidiaries, associated companies and other companies under the Companys control. The 8th amendment was made in accordance with the resolution of the Board of Directors Meeting No. 12/2025 held on 9 December 2025. The guidelines are as follows:

1. Establishing the risk management process with the same standard throughout the Company.
2. Implementing integrated risk management throughout the Company with a systematic and continuous management and operation in accordance with the Company's indicators and strategic plans.
3. Encouraging employees at all levels to proactively manage risks and also providing a risk management plan related to material sustainability issues of the Company, including environmental issues, climate change, social responsibility, and corporate governance (ESG). Additionally, the plan covers emerging risks so that the Company can operate its business continuously (Business Continuity Plan) and sustainably.
4. Executives and supervisors at all levels are responsible for supporting activities related to risk assessment, risk analysis, and ESG risk management in accordance with the criteria set by the Stock Exchange of Thailand and external regulatory bodies, ensuring tangible implementation.
5. Promoting and developing employees and executives at all levels to have knowledge, understanding, participation, and awareness of the importance of risk management and fostering the risk management culture throughout the Company.
6. Providing an internal control system that covers all major risks in various aspects as follows:
    - Strategy Risk
    - Operation Risk
    - Financial Risk
    - Compliance Risk
    - Corruption Risk
    - Market Risk
    - Cyber Risk
    - Risks related to the Company's key sustainability issues, covering Environmental, Climate Change, Social, and Corporate Governance (ESG) Risk

- Emerging Risk

This is done to ensure that the Company has an appropriate and efficient internal control system.

7. Encouraging all employees at all levels to participate in risk management and be responsible for identifying risks that affect the Company's action plan, directions, and strategies, and assessing risks by considering the likelihood and potential impact of risks and proposing methods or seeking approaches to manage risks and complying with the plan to maintain the risk appetite. The risk management plan and the risk appetite for the risk in medium, high, or very high level shall be reported to the Risk Management Committee.
8. When employees encounter or acknowledge risks that may affect the Company, such risks must be reported to the Company's Management and the Risk Management Committee to seek the appropriate approach for risk management under such circumstances or they can report such risks via riskmgt@supalai.com.
9. Monitoring, evaluating and preparing a risk management report, presenting it to the Risk Management Committee, and reporting it to the Board of Directors for approval or suggestion. Additionally, reviewing, improving and reporting incidents of potential emerging risks to mitigate impacts on the achievement of the Company's objectives.
10. Establishing a Business Continuity Plan (BCP) and a Disaster Recovery Plan (DRP) to fully prepare for crisis in a timely manner and prevent disruption to the Company's business operations.

The Company has communicated the risk management policy to executives and employees through e-mail, Intranet and the Companys website to raise awareness and mutual understanding on risk management.

Corporate Risk Management Plan

Supalai Public Company Limited conducts an annual review and assessment of significant business risks through meetings of the Risk Management Committee, which comprises experienced and expert executives. Risk Map and Risk Radar Chart tools are used to consider the relationships between risks and prioritize urgent matters to enhance resource allocation efficiency. Measures and risk management plans are established to align with organizational goals and strategic plans, presented to the Board of Directors, and assigned to each department to manage risks to an acceptable level, in order to support to ensure the organization's strategic plan succeeds.

Culture of Risk Management

Supalai Public Company Limited is committed to continuously fostering a risk management culture among employees at all levels throughout the organization by instilling attitudes that promote awareness of the importance of the Company's risk management process, enabling them to effectively and consistently apply risk management processes in their work. This begins with organizational leaders, the Board of Directors, and executives at all levels leading the enhancement of risk management processes to serve as role models for employees, fostering shared responsibility and applying knowledge to manage work-related risks.

Building a risk management culture focuses on ensuring that the Company's employees have the knowledge, understanding, and ability to naturally manage related risks. by relying on executives at all levels to drive change and implement good frameworks that enable rapid identification and management of risks, by aims to respond to the Company's goals, vision, and mission.

as a tool to create a good working environment alongside timely management of risks that may affect the Company, which will contribute to business sustainability. in the long term. The Company therefore focuses on promoting an organization-wide risk management culture to ensure stable and sustainable growth.

The Company has established a risk management culture through its risk management policies and guidelines, risk management structure and governance, and continuous monitoring of risk management progress at all levels. The Company has develop risk management culture guidelines and apply them to employees at all levels throughout the organization, while communicating the objectives and benefits derived from the organization's risk management. to allow senior executives, and inform all employees.

The aforementioned approach consists of 6 key components:

1. Risk Management Governance starting with the establishment of a risk management policy to cover new risks that may arise in both the present and the future. The Risk Management Committee holds meetings at least 2 times per year, and the management results are monitored planned risks monthly. The risk management unit is responsible for monitoring and reporting the performance of each department that responsible for risks to the Risk Management Committee, for evaluating and reviewing management plans to ensure risk levels are acceptable rapidly and in response to situations.

2. Leadership executives and the board of directors prioritize risk management by setting policies and guidelines during meetings at all levels. The Chairman of the Board mandates that all meetings adhere to the following practices:

- with risk consideration as one of the agenda items to be discussed every time.

- The meeting chairman will raise risk issues for discussion at every meeting to create awareness and consistently prioritize risk management.
- Risk management guidelines are closely monitored and must be implemented concretely, with follow-up items as mandatory agenda points. report on the implementation of resolutions (Follow up) for risk management.
- The meeting chairman must report the results of risk management operations to the next level of meetings.

3. Risk Management Structure standardize the Company's risk management process by implement comply with international practices. according to the framework COSO Enterprise Risk Management (2017) and ISO 9001:2015 standards, as well as The risk management process is implemented in the operations of all departments throughout the organization.

4. Risk Management The Company applies risk management techniques in accordance with academic risk management frameworks and integrates psychological techniques to enhance risk management efficiency, with key guidelines as follows:

- Utilize the COSO ERM 2017 risk management framework and ISO 9001:2015 standard as tools for risk identification, risk assessment, risk management, and performance monitoring and reporting. Additionally, Key Risk Indicators (KRI) are used as risk warning signals to prepare and establish proactive preventive measures if there is a tendency for likelihood or the expected impact.

Source: http://www.coso.org

- Quality management systems are monitored by employees appointed as Internal Quality Auditors (IQA) at the process level. The scope of audit covers ESG (Environment, Social, Governance) risks, including safety, that may directly and indirectly affect stakeholders, to identify and define appropriate risk management approaches.
- Campaigning for supervisors to build a risk management culture by having supervisors self-declare and measure the effectiveness of supervisors in building a risk management culture through evaluations from subordinates. The Company will use these evaluation results to further improve and develop its risk management culture-building guidelines.

5. Risk Communication communication is conducted knowledge and case studies from both internal and external factors continuously, to support employees in monitoring and preparing for potential risks. Risk issues are appropriately discussed at all levels of meetings. The Company emphasizes creating an environment conducive to open communication, such as providing opportunities for employees at all levels can express opinions creatively and propose risk-related views equally. to promote an organization-wide risk management culture.

6. Dissemination of Knowledge on Risk Management The Company promotes to ensure employees at all levels continuously acquire knowledge and understanding of risk management through various knowledge resources and channels, such as risk management manuals, training for all new employees, online courses (E-Learning) which are mandatory for all employees, risk-related knowledge dissemination via email and the Supalai Connect system.

Furthermore, in 2025, all employees passed the basic risk management knowledge test, accounting for 63% of all employees, to enhance awareness and understanding of risk management for executives and employees at all levels throughout the organization. The Company also supports continuous learning and development, which is a crucial foundation for an organization-wide risk management culture, such as organizing training and disseminating knowledge on risk management topics like Digital Strategy Risk Management and AI to align with business growth strategies for employees at all levels, from Board members, senior executives, and employees.

The Company mandates risk management training as a compulsory course for all new employees. In 2025, 100% of all new employees completed risk management training.

Agile Team and Development of Risk Management Processes

The Company has adopted the working concept of Agile into the organization in order to promote the development of risk management processes in the form of that is flexible, agile, and aligned with the rapidly changing business context, with key guidelines as follows:

- **360-degree Risk Management** from the working model of Agile that emphasizes communication and collaboration between various departments. that is rapid resulting in the sharing of risk perspectives from personnel with diverse expertise, which helps make risk management more comprehensive and holistic.
- **Risk Management throughout the Work Process** gradual delivery of work and providing feedback rapidly and continuously throughout the work process, facilitating regular review and improvement of risk management to align with rapidly changing environments, including technology, regulations, and consumer behavior.
- **Risk Management In-Process** development and improvement of work based on stakeholder feedback rapidly and continuously, which helps risk management occur. automatically throughout the work process. alongside actual operations naturally. reduce complex techniques or tools, and encourage employees to gain risk management perspectives from direct work experience.

- **Support from senior management** Executive directors support employees at all levels can express opinions openly about operations and risks. by providing opportunities for employees can communicate or report information directly to the executive directors to strengthen the risk management culture and transparent communication throughout the organization.

Information on ESG risk factors management standards

ESG risk factors management standards

Standards on ESG risk management : Yes

Standards on ESG risk management : COSO - Enterprise risk management framework (ERM)

Information on ESG risk factors

Risk factors on business operation

Operational risk associated with the Company or the group of companies

Risk 1 Changes that may affect the company's business operations in the next 3-5 years (Emerging Risks)

Related risk factors : Strategic Risk

- Business operations of partners in the supply chain
- Climate change and disasters

Operational Risk

• Impact from population structure

ESG risk factors : Yes

Risk characteristics

1. Structural demographic changes (aging society) and changes in public income structure, which may affect Changes in consumer behavior and demand

Thailand is facing Structural problems related to demographic changes or entering an aging society which resulting in changes in consumer behavior that may significantly impact businesses by Consumers are increasingly prioritizing well-being and health care, both for caring for elderly family members and for preparing themselves for life after retirement. becoming one of the factors consumers consider when choosing to purchase housing today.

2. Risks related to the environment, climate change, and natural disasters that may impact projects

Climate risk is a significant international risk and a major risk for countries that are both the business sector and the public are paying more attention as the impacts of climate change become clearer and more severe, such as increased flooding due to heavier rainfall, rising sea levels from melting polar ice, heatwaves, and heat radiation. This climate risk issue has led various countries to prioritize climate management with the goal of controlling global warming, which is the root cause of climate problems.

3. Supply chain disruptions can significantly impact businesses.

1. The closure of sea shipping routes due to war / conflict situations geopolitical (Geopolitical Tensions) or international conflicts or wars that may occur with trading partners, making it difficult to predict their likelihood and impact in advance.
2. Shortages of certain key raw materials in the production process.
3. Key maritime shipping routes may be disrupted by environmental issues, natural disasters, and climate change "condition of global warming" which may cause important global maritime trade routes to be cut off or lack sufficient water for "cargo ships" to pass through.
4. Polarization of superpowers.
5. Trade wars, trade protectionism, increasing sanctions
6. Emerging diseases

Risk-related consequences

1. Demographic structural changes (aging society) and the income structure of the population, which may affect changes in consumer behavior and demand.

Currently, Thailand is undergoing significant demographic structural changes, particularly the continuous decline in the birth rate, which directly impacts the overall real estate business in the long term. The Company has identified challenges arising from various structural factors as follows:

1. Demographic Shift: The complete transition into an aging society has led to a continuous decline in the number of family-forming age groups (3049 years old), which are the primary purchasing power in the housing market, over the next decade. This situation will inevitably result in a decrease in demand for new housing, proportionate to the changing population. Furthermore, the social trend of declining birth rates creates opportunities for inheriting real estate from previous generations. previous generations, which are all significant variables that reduce the necessity for deciding to purchase new housing.
2. Compared to the past managing housing price levels in line with economic conditions (Market Affordability) over nearly a decade. In the past, the real estate industry faced challenges from rising production costs and housing prices. which is higher than the average income growth rate of the overall

population. This situation makes "Affordability" a crucial factor in consumer decision-making. Therefore, the Company places great importance on managing operational efficiency and designing innovations for systematic cost control to ensure that its products remain at an accessible price level and align with actual purchasing power in the current economic climate.

2. Environmental risks: Climate change and natural disasters that may affect building structures.

The real estate business is one of the industries affected by climate change, with increasing frequency and severity, which may impact construction projects, such as:

- construction delays, disruptions, leading to increased costs, and affecting the timely delivery of products to customers.

which may affect the organization's reputation and image.

- designing housing and adapting new construction materials to accommodate extreme weather conditions, such as unusually high rainfall.

severe storms, increased toxic dust, floods, and earthquake risks.

3. Supply chain disruptions may significantly impact the business.

These factors may adversely affect the Companys operations through disruptions in the supply of construction materials, thereby impacting competitiveness and causing delays in construction and project delivery, which may result in the loss of target customer segments. Given the Companys nationwide presence across more than 30 provinces, it places strong emphasis on systematic supply chain management to enhance business continuity and sustain long-term competitiveness.

Risk management measures

1. Demographic structural changes (aging society) and changes in public income structure, which may affect consumer behavior and demand.

The Company has recognized and prioritized these changes, thus expanding its real estate development projects nationwide. Currently, projects have expanded to over 30 provinces, with home designs that support the lifestyles of residents across all genders and age groups (Universal Design), including detached houses, semi-detached houses, townhomes, and condominiums. These designs accommodate various uses and lifestyles of different resident groups, such as Pet-Friendly homes for animal lovers, as well as private spaces designed for the modern lifestyle, and for LGBTQ+ couples who can jointly apply for home loans. Additionally, homes are designed to support an aging society, such as the Supawattanalai project, which chose to use materials and interior home design that support usage for the elderly.

Furthermore, the Company has designed and constructed projects that prioritize the quality of life for both residents and neighboring communities, offering quality products at affordable prices. This includes

continuously developing communication channels and services through various platforms, such as online home or condominium bookings, and developing the Supalai Sabai application to create new living experiences for residents and meet the demands of modern lifestyles that increasingly utilize technology for convenience. Additionally, the Company emphasizes customer needs and continuously develops products to ensure that its products can respond to changing consumer behavior in both the short and long term. Market research and technology studies are conducted to adapt to design and construction work, resulting in the Company's products aligning with customer needs and offering value for money.

2. Environmental risks, climate change, and natural disasters that may affect building structures.

The Company has therefore established measures and targets to mitigate climate impact, while also managing business risks and opportunities.

- Setting a target to reduce carbon footprint by 40% by 2030, established as an organizational strategy and Key Performance Indicators (KPIs) for all departments, to reduce greenhouse gas emissions into the environment. By 2025, the Company has received certifications and awards for organizational-level greenhouse gas reduction, such as:
  - International standard ISO 14064-1:2018 for reporting greenhouse gas emissions and reductions at the organizational level.
  - Standards of the Greenhouse Gas Management Organization (Public Organization) (TGO) for carbon reporting disclosure. Footprint of the organization.
  - Construction design award meeting evaluation criteria for the Energy Efficiency Labeling Project (Electricity Saving Label No. 5) from the Electricity Generating Authority of Thailand (EGAT).

- Other activities implemented by the Company to mitigate climate change impacts, such as:
  - Forest for Happiness activity with Supalai's 36th anniversary. Supalai employees jointly planted over 2,250 trees on 10 rai of the company's land in Prachuap Khiri Khan province. This is the 3rd consecutive activity, with a total of 6,650 trees planted on a combined area of 55 rai.
  - Selecting products that reduce greenhouse gas emissions, such as Green Products or products with low CFP (Carbon Footprint) values, Low GHGs, and Low VOCs architectural paints.
  - Creating innovations to reduce construction waste, such as finely crushed lightweight brick scraps mixed with soil for planting trees.
  - Solar Roof project for sales offices, construction offices, show homes, and temporary customer parking.
  - Utilizing energy-saving innovations, including Motion Sensor / Heat Wheel Energy Recovery / Precooled Evaporator / UVC light sterilizing air conditioners / Building Management System (BAS) / Lift Destination, etc.
  - SUPALAI SELF-PROVED project measures construction waste from various company projects to reduce waste through innovative construction and effective management planning under the Waste Management project.
  - Waste separation is implemented within the project, categorizing waste into 8 types: wet waste, plastic, glass bottles, foam, paper, cans, plastic bottle caps, and food scraps. Furthermore, the Company is committed to separating hazardous waste from non-hazardous waste, establishing guidelines for proper disposal and measurable outcomes.
  - The 'The More You Separate, The More You Get' (Waste Separation) project with Recycle Day has comparable carbon reduction data. Footprint 11.82 tonCO_2e, and equivalent to planting 1,228 large trees.
  - E-Waste project with AIS, totaling 20 kg of waste, comparable to carbon reduction. Footprint 0.12 tonCO_2e and equivalent Planting 14 trees.
  - Recycling used sealant tubes and manufacturing them into various items such as chairs, plant pots, coasters, etc.
  - Employee uniforms made from recycled plastic, totaling 97,400 pieces, reducing carbon by 9.74 tonCO_2e, and reducing energy from ironing/year, which helps reduce carbon by 25.27 tonCO_2e, total carbon reduced 35 tonCO_2e, equivalent to planting 3,640 trees.

○ Campaigning and educating residents in the project, along with providing color-coded waste bags for waste separation.

○ Transforming lightweight brick scraps into aroma stones, reducing greenhouse gas emissions by 0.002 kgCO_2 e/piece, which is used to make a souvenirs for various company events.

○ New Gen Zero Waste project for separating recyclable waste.

○ Replacing Chillers to enhance the efficiency of the cooling system, along with installing CPMS (Chiller Plant System Management) equipment to control and manage the cooling system (Chiller) according to usage load, and to monitor system operation in real-time to reduce energy consumption.

○ Replacing 9W 6,400K LED bulbs in common areas and restrooms of Supalai Grand Tower to reduce electricity consumption.

○ All real estate development projects initiated in 2025 will use water-saving equipment/sanitary ware.

By managing risks from climate change, which is increasing in frequency and severity, and may affect construction projects in various aspects as follows:

- Designing residences and adapting new construction materials to accommodate extreme weather conditions.

  ○ Designing products and construction processes for projects to accommodate extreme weather conditions, such as Green Design, using lightweight bricks and green tinted glass to cool the interior of homes, or raising ground levels appropriately to mitigate impacts. In case of flooding, without affecting neighboring communities.

  ○ Organizing internal innovation competitions (Innovation Award) and adopting Agile methodologies to enhance approaches for mitigating future climate change impacts

  ○ Increasing the warranty period for condominium building structures from 5 years to 10 years to enhance quality assurance for customers.

- Construction delays and disruptions lead to increased costs and affect the timely delivery of products to customers.

  ○ Developing a Business Continuity Management (BCM) plan to prepare for natural disasters or events that may disrupt business operations.

  ○ Environmental, Social, and Governance (ESG) Risk Assessment: Developing ESG risk assessment forms for key partners and external contractors to reduce the risk of business disruption for partners and promote sustainable operations.

3. Supply chain disruptions may significantly impact the business.

The Company manages risks to mitigate the impact of supply chain disruptions, alongside opportunities, such as:

- Monitoring news regarding key raw materials and critical situations or situations that may cause raw material disruptions, in order to promptly understand price trends, extend lead times for ordering goods, and manage inventory.
- Procuring new (backup) partners to replace existing suppliers in case of disruption.
- Procuring (backup) goods from domestic suppliers to ensure sufficient stock for operational needs.
- Establishing product price control standards by monitoring international product prices to inform purchasing decisions and fixed-price contracts for critical and rare goods, thereby controlling costs/expenses to prevent them from becoming excessively high and impacting the business.
- Managing significant partner risks in Supply Chain Management and ESG, coupled with on-site facility surveys, building relationships with key partners, and entering into long-term contracts to ensure the Company does not face raw material shortages in its operations.
- Conducting Environmental, Social, and Governance (ESG) Risk Assessments for all partners to mitigate supply chain risks and promote sustainable operations.

Risk 2 Procurement Risk Management

Related risk factors : Strategic Risk

• Government policy

ESG risk factors : Yes

Risk characteristics

Procurement risks arise from reliance on a limited number of suppliers for certain critical goods or materials, as well as the concentration of sourcing in specific areas, which leads to a lack of diversity in the supply chain and vulnerability to disruptions from external factors.

Risk-related consequences

This may result in delays in the delivery of goods and services. Furthermore, procurement from partners located far from the project area may lead to increased transportation and travel costs, thereby impacting operational efficiency and the company's overall costs.

Risk management measures

The Company has managed procurement risks by continuously seeking new partners and compiling data on the distribution of usage load across all goods/items to ascertain a sufficient number of partners for each period. The Company has sought partners in provinces where projects are located, leading to a significant increase in local contractors. This results in the rapid delivery of goods and services to customers and can reduce costs in traveling from Bangkok to the provinces.

The Procurement Department has continuously sought and developed partners, resulting in having partners in provincial areas covering 30 provinces. where Supalai projects are located, thus eliminating the company's risk in procuring goods and enabling timely delivery to meet demand.

Furthermore, the Procurement Department and the Engineering Department have compiled data on product prices, which are adjusted, and contractor hiring prices every 3 months. Construction prices are set according to current market rates to ensure fairness for the Company's partners and contractors, and to facilitate the procurement process procurement, which is rapid. correct, and goods can be delivered in time for use.

The Company has procedures in its procurement process, which involves negotiating construction material prices through advance bidding for goods. and utilizes the principle of bulk bidding to reduce the cost of purchasing goods through bidding. Advance notification of product usage plans is provided to partners for their planning. and prevent product shortages, enabling partners to plan production and deliver goods on time.

Risk 3 Changes in customer/consumer behavior or needs

Related risk factors : Strategic Risk
- Behavior or needs of customers / consumers

ESG risk factors : Yes

Risk characteristics

Currently, businesses across various industries are increasingly adopting innovation in their operations, driving rapid advancements in smart devices used in everyday life. This has accelerated changes in consumer behavior across multiple aspects, including greater adoption of innovation in daily life, a shift toward working from home instead of in offices, and increased reliance on online communication in place of face-to-face interactions. In addition, various transactions both financial transactions and product purchases are increasingly conducted through applications rather than at banks or department stores.

Risk-related consequences

The transition into an aging society supports changes in consumer behavior, as the elderly tend to prefer staying at home rather than traveling for external activities, thus influencing the demands and conditions for consumers' residential property choices in emphasizing the importance of internal living space, the utility of common areas, safety, and the environment natural surroundings suitable for living within the residence, within the project, and in the surrounding areas.

The real estate development business is therefore one of the businesses affected by changes in customer/consumer behavior or needs. on the selection of residential properties, leading developers to continuously review marketing plans and product development to meet the evolving needs of customers/consumers.

Risk management measures

The Company closely monitors changes in customer/consumer behavior through research surveys to utilize the data. in designing products to accommodate new lifestyles, such as

- Increasing internal workspace within residences
- Building layout design emphasizing natural ventilation from wind and the use of natural light.
- Utilizing Face Scan for entry/exit to minimize contact
- The addition of Dedicated Delivery Drop Off areas separate from residential spaces
- designing and installing support points. EV Chargers within residential buildings

Furthermore, the Company also incorporates the concept of Home Automation, adapting it to new product designs to support future living innovations, with a focus on the functional benefits within customers' residences. Additionally, it facilitates customers in integrating various technologies for future use. Furthermore, the Company is also adjusting its online marketing strategies and brand image creation.
within the brand to address needs Future clientele.

Risk 4 Business of partners or operators in the supply chain

Related risk factors : Strategic Risk
• Business operations of partners in the supply chain

ESG risk factors : No

Risk characteristics

Environmental sustainability has been elevated in importance at both global and national levels due to the impacts of climate change. The drivers of this shift include the anticipated enforcement of future regulations, enhanced regulatory oversight by government authorities, and increasing expectations from society and consumers. These factors are fostering greater collaboration among businesses across the supply chain to drive collective change.

Similarly, in the real estate development sector, as well as related industries within the supply chainsuch as construction materials, furniture, and construction contractorswhile there is growing pressure to adapt to these emerging trends, fundamental changes will require time and are expected to occur gradually.

Risk-related consequences

Risks arising from changes in the business operations of suppliers and contractors within the real estate development supply chain may occur at any time, driven by evolving domestic and international factors beyond the Companys control. Such changes may disrupt the supply chain, which may not be able to adapt in line with the Companys expectations, particularly as external expectations continue to rise.

Risk management measures

The Company collaborates with its suppliers and contractors by providing training on construction techniques in accordance with the Companys standards, as well as ESG-related knowledge to support the development of innovation and operational processes. These efforts are aligned with the expectations of stakeholders across all sectors, with the aim of continuously enhancing business practices in response to evolving economic, social, and environmental contexts. By leveraging the Companys strengths in combination with those of its business partners, the Company seeks to create competitive advantages and achieve sustainable growth.

Risk 5 Economic uncertainty

Related risk factors : Strategic Risk
• Economic risk

ESG risk factors : No

Risk characteristics

Currently, the economic situation is highly volatile, influenced by various factors such as slowing consumer purchasing power, trade wars, rapid tax rate increases, geopolitical tensions, and conflict situations in several regions, all of which impact the overall global economy.

Risk-related consequences

The business is facing increasing challenges. In 2025, Thailands residential property market is expected to contract compared to the previous year, particularly in condominium transfers, which are projected to decline by approximately 11.8% year-on-year. In response to weakening demand and excess supply, the Bank of Thailand has introduced a relaxation of loan-to-value (LTV) limits, allowing up to 100% financing for residential properties from 1 May 2025 to 30 June 2026.

Risk management measures

In response to weakening demand and excess supply in the market, the Bank of Thailand has introduced a relaxation of loan-to-value (LTV) limits, allowing up to 100% financing for residential properties from 1 May 2025 to 30 June 2026.

However, the Company operates a real estate development business under a business-to-customer (B2C) model, directly serving a diverse customer base across more than 30 provinces nationwide, while also expanding into international markets. This enables the Company to maintain a diversified customer base. In addition, the Company offers an integrated digital lending platform, D.E.A.L., featuring preferential interest rates in collaboration with 10 leading banks to enhance financial experience standards. This platform helps reduce customers interest burden and simplifies the loan application process. As a result, the Company is able to mitigate the impact of economic volatility and diversify risks arising from external factors.

Risk 6 Data Security or Computer Systems and Cyber Attacks

Related risk factors :

Operational Risk

- Information security and cyber-attack

ESG risk factors : Yes

Risk characteristics

Rapid advancements in data transmission technologies and wireless communication devicessuch as computers, laptops, and smartphoneshave led to an increasing reliance on digital technologies and online transactions. This has driven exponential growth in online transactions, which, while creating significant business opportunities, has also attracted a growing number of cyber threats. The substantial value of global online transactions has made them a key target for cybercriminals, resulting in a sharp increase in cybersecurity risks.

Risk-related consequences

Although the Company has relatively limited critical online transactions with customers and other stakeholders, any data breach or cyberattack that compromises its systems or databases could result in harm to data owners and cause temporary disruptions to business operations.

Risk management measures

The Company has adopted cloud computing technology to manage critical system databases, selecting service providers with globally recognized security standards and reliability. In addition, the Company has established processes and procedures to mitigate risks arising from potential cyberattacks, including those caused by human error and data leakage. Key measures include:

- Establishing an Information Technology Usage Policy in line with recognized security frameworks, including clearly defined data access controls based on roles and responsibilities
- Conducting regular cybersecurity risk assessments and implementing continuous risk management measures
- Utilizing cloud computing solutions to enable rapid data recovery in the event of unforeseen incidents, thereby ensuring business continuity
- Implementing firewall and VPN controls to reduce the risk of unauthorized access and data breaches from external threats
- Performing vulnerability assessments and management, including monitoring, detection, and incident alerting to enable timely response and remediation
- Requiring IT and cybersecurity self-assessments for external contractors to ensure adequate risk management and protection against cyber threats
- Promoting cybersecurity awareness among employees at all levels, including the risks of data leakage in various work scenarios
- Conducting cybersecurity awareness testing to reinforce employee readiness and vigilance

Risk 7 Safety, Occupational Health, and Working Environment

Related risk factors : Strategic Risk
- ESG risk

Operational Risk
- Safety, occupational health, and working environment

ESG risk factors : Yes

Risk characteristics

Issues concerning safety, occupational health, and the working environment are considered significant risks for the real estate development business. This is due to the operational nature that heavily relies on a large workforce and involves work in construction areas, which inherently carries risks of accidents and undesirable incidents.

Risk-related consequences

If not properly managed, these risks may lead to operational disruptions, increased medical expenses and compensation costs, serious accidents, non-compliance with applicable laws and regulations, as well as disputes with communities or other stakeholders. Such impacts could adversely affect the Companys business objectives, stakeholder confidence, and long-term corporate reputation.

Risk management measures

The Company places strong emphasis on occupational health, safety, and working conditions for its employees. Appropriate personal protective equipment (PPE) is provided to employees working at construction sites, including safety helmets, safety footwear, and other protective items such as jackets, sun protection sleeves, and basic medical supplies. In addition, the Company has established an Occupational Health, Safety and Environment (OHSE) Committee responsible for setting safety plans, reporting, and recommending corrective and preventive measures in compliance with applicable laws and regulations. The Committee also promotes safety-related activities, monitors safety practices, reviews workplace incident statistics, and ensures continuous improvement in safety performance.
A reporting system for unsafe working conditions is in place, requiring employees at all levels to report potential risks. The Company also conducts regular evaluations of workplace safety performance to ensure effectiveness and compliance.

Furthermore, the Company provides suitable working environments across its head office, sales offices, and construction sites, taking into consideration temperature, lighting, and ventilation. Adequate drinking water, sanitation facilities, and work equipment are provided to support employees in performing their duties effectively. The Human Resources function also conducts proactive site visits to assess employees needs and continuously enhance welfare programs in line with current conditions.

The Company also implements accident prevention measures and fosters a strong safety culture through training and simulation exercises. In addition, the Company promotes employees physical and mental well-being through annual health check-ups, communication on proper nutrition, and wellness activities such as therapeutic yoga and other health-related programs.

Risk 8 Environmental and Biodiversity Impacts

Related risk factors : Strategic Risk
- ESG risk

Operational Risk
- Impact on the environment

ESG risk factors : Yes

Risk characteristics

In recent times, pressure from the global community on environmental and biodiversity issues has continuously escalated. This stems from the evident and intensifying problems of climate change and biodiversity loss in many areas worldwide, leading to increased awareness and demands from both government and the public sector. This has, in turn, become a pressure on the business sector, which must prioritize the environmental and biodiversity impacts in all its activities, as well as increasingly emphasize environmental and biodiversity sustainability issues.

The construction and real estate development businesses are among those with multi-dimensional risks from environmental and biodiversity impacts. This is due to their activities requiring large land areas and extensive supply chains, with the potential to affect natural ecosystems, alter wind patterns and sunlight, generate dust, and produce greenhouse gases.

Risk-related consequences

Real estate development businesses have operational control measures, both legal and regulatory, from the government and independent agencies to establish appropriate guidelines, and there is still a high

potential for disputes with neighboring communities, which may result in
Project construction is halted or delayed due to not receiving operational permits from the government or being sued by neighboring communities, and may have to pay compensation to those affected, as well as impacting the organization's sustainability image.

Risk management measures

The Company is committed to developing high-quality projects while minimizing impacts on the environment and biodiversity. Prior to project development, the Company conducts Environmental Impact Assessments (EIA) to evaluate potential impacts on surrounding communities, including public consultations to assess both positive and negative environmental impacts across all dimensions. In addition, Biodiversity Action Plans (BAP) are developed for areas with biodiversity-related risks, along with mitigation measures to minimize adverse impacts. These proactive approaches help reduce potential remediation costs after project implementation and ensure ongoing monitoring of environmental impacts throughout the project lifecycle.

The environmental impact assessment process covers four key dimensions:

- Physical environment
- Biological environment
- Human use values
- Quality of life values

Furthermore, the Company participates in the Care the Bear initiative, led by the Stock Exchange of Thailand, to raise employee awareness of environmental management and foster collaboration in reducing greenhouse gas emissions in a measurable manner.

Risk 9 Human Rights Impact

Related risk factors : Strategic Risk
• ESG risk

Operational Risk
• Impact on human rights

ESG risk factors : Yes

Risk characteristics

Human rights issues have gained increasing prominence and attention at both global and national levels, driven in part by the widespread influence of social media, which has intensified public discourse on such matters. For the real estate development sectorwhere operations involve a large workforce, multiple tiers of contractors, and activities within local communitieshuman rights risks may arise in areas such as employment conditions, fair treatment of workers, and impacts on surrounding communities. In the absence of appropriate oversight, such risks may lead to grievances and adversely affect the Companys reputation.

Risk-related consequences

Human rights issues are highly sensitive and have wide-ranging impacts across all sectors. There is increasing expectation for businesses to respect human rights, diversity, and freedom of expression, leading to the strengthening of relevant laws and regulations, as well as the implementation of sanctions or restrictions on cooperation with entities involved in human rights violations.

If the Company or its business partners fail to implement appropriate management practices, this may result in both direct and indirect impacts, including legal and regulatory risks, investigations or complaints, loss of confidence among customers, investors, and other stakeholders, as well as adverse effects on the Companys reputation, corporate image, and long-term business continuity.

Risk management measures

Recognizing that all individuals are entitled to dignity and equal rights, the Company places strong emphasis on human rights and has established a Human Rights Policy, supported by internal processes to ensure effective implementation. The policy covers key principles including equality, non-discrimination, and the promotion of fundamental human rights, as well as providing whistleblowing channels for reporting potential violations. These principles are also communicated to business partners and embedded in practice.

The Company requires its suppliers to formally commit to respecting human rights and agrees to the application of criteria relating to human rights, occupational health, safety, and the environment in supplier selection and evaluation processes. In addition, the Company engages with contractors employees to understand their needs and collaboratively develop improvement plans, supported by site visits, ongoing monitoring, and reporting to management. The Company has also integrated the United Nations Guiding Principles on Business and Human Rights (UNGPs) into its business operations across all processes, while promoting awareness of human rights among employees and business partners.

Furthermore, the Company has established Human Rights Due Diligence (HRDD) and Human Rights Risk Assessment (HRRA) processes to identify, assess, and manage potential risks. These processes involve evaluating issues that may impact the human rights of key stakeholders, including employees, customers, and communities, based on the severity and likelihood of risks, in order to implement appropriate preventive and mitigation measures.

Risk 10 Shortage or fluctuation in the prices of raw materials or factors of production

Related risk factors :

Operational Risk

- Shortage or fluctuation in pricing of raw materials or productive resources

ESG risk factors : No

Risk characteristics

Shortages or fluctuations in the prices of raw materials and production factors represent significant risks that are challenging to manage. These impact various industries, including the real estate development business. The primary causes can stem from both domestic and global factors, such as trade policies, global economic conditions, geopolitical tensions, and transportation limitations, which consequently impose restrictions on the use of certain types of materials.

Risk-related consequences

Supply chain disruptions may result in higher production and service costs, and may cause interruptions or delays in production processes, service delivery, and product delivery to customers, or the delivery of substandard products due to shortages of raw materials or production factors, which could affect the organization's reputation and image.

Risk management measures

As construction materials are key inputs in project development, the Company recognizes risks arising from price volatility and potential shortages. The Company therefore places strong emphasis on robust raw material and construction material risk management to mitigate such impacts. Key measures include:

- Diversifying suppliers by selecting experienced and capable manufacturers or distributors to ensure consistent quality and reliable delivery, while avoiding over-reliance on any single source. The Company also enters into advance pricing agreements with suppliers to mitigate the risk of price increases
- Monitoring material price trends through designated functions that closely track changes in key construction material categories and implement timely mitigation measures

- Collaborating with suppliers and contractors to plan material usage on an ongoing basis, ensuring sufficient resource availability in line with construction schedules, while sourcing raw materials through multiple channels to maintain quality standards and operational flexibility
- Identifying and securing substitute materials during periods of shortage to minimize potential disruptions
- Implementing contingency planning, including supplier diversification across regions, sourcing from suppliers located near project sites to reduce lead time and logistics costs, and conducting comprehensive supplier evaluations based on factors such as political, geographical, and economic risks
- Encouraging suppliers to conduct business continuity and recovery plan drills, including maintaining business data across multiple systems to support effective recovery
- Reviewing the capabilities and supply chain management practices of key suppliers, including the use of supply chain management assessment tools

In addition, the Company regularly assesses supply chain risk factors, which is critical to ensuring projects proceed according to construction plans and to fostering a risk management culture throughout the supply chain.

Risk 11 Changes in regulations and laws related to business operations, and violations of relevant regulations and laws

Related risk factors :

Compliance Risk

- Change in laws and regulations
- Violations of laws and regulations

ESG risk factors : Yes

Risk characteristics

The real estate development business is subject to a wide range of laws and regulations, which can be categorized into three main groups: (1) general laws applicable to all types of real estate development, such as urban planning laws, building control regulations, and environmental laws; (2) sector-specific laws applicable to particular types of real estate, such as land subdivision and condominium laws; and (3) supporting laws that facilitate, regulate, or promote real estate-related activities, such as energy conservation laws and investment promotion regulations.

In addition to the breadth of applicable legislation, certain laws may vary by locality and are subject to ongoing revisions in response to evolving environmental conditions, economic circumstances, and national development policies, including economic and social development plans.

Risk-related consequences

Changes in government policies and the enforcement of new laws and regulations represent key risks for the real estate development business. This is particularly relevant for the Company, given its diverse development portfolioincluding low-rise housing projects, office buildings, hotels, and condominiumsas well as its continuous expansion into major provincial cities across regions. As a result, the Company is required to comply with a wide range of applicable laws and regulations, each with complex and evolving requirements.

Failure to comply, or incomplete compliance, may result in various impacts, including restrictions on land use for certain types of developments, building height limitations, setback requirements, boundary disputes with adjacent landowners, and complaints during construction. In addition, risks may arise from land expropriation for public infrastructure projects or disruptions caused by changes in laws and regulatory requirements that come into effect while the Company is in the process of preparing permits for land already acquired.

Risk management measures

To mitigate regulatory risks, the Company conducts comprehensive legal due diligence prior to commencing any real estate development project, including reviewing applicable laws, regulations, and requirements of relevant

authorities. Dedicated functions have been established to monitor and ensure compliance with evolving legal requirements, while maintaining an up-to-date and comprehensive legal and regulatory database covering all aspects of the Companys operations.

In addition, condominium and housing projects that meet the applicable criteria are subject to Environmental Impact Assessments (EIA) for approval by the Office of Natural Resources and Environmental Policy and Planning under the Ministry of Natural Resources and Environment. The Company strictly complies with all conditions specified in the EIA reports and regularly reports on the implementation of mitigation measures in accordance with the Enhancement and Conservation of National Environmental Quality Act B.E. 2535 (1992). This approach helps minimize environmental impacts and supports the Companys sustainable business operations.

Following the enforcement of the Personal Data Protection Act B.E. 2562 (2019) on 1 June 2022, the Company has strengthened its data protection practices to ensure that personal data of customers and stakeholders is handled appropriately and in line with regulatory requirements. The Company has appointed a Data Protection Officer (DPO) and established a cross-functional working team, including representatives from legal and digital technology functions, to oversee compliance.

The Company also provides mandatory training and knowledge assessments on data protection to all employees to ensure an appropriate level of understanding and compliance with the law. For functions handling personal data, key performance indicators (KPIs) have been established to prevent data breaches and ensure that no personal data leakage occurs. Data protection risks are incorporated into the Companys enterprise risk assessments, with appropriate mitigation measures implemented to reduce potential future risks.

Environmental regulations in Thailand are becoming increasingly stringent and complex, particularly in areas such as carbon emission reduction, air quality control, and sustainable project classification. As a result, the real estate sector faces increasing challenges in adapting construction processes, material selection, energy management, and environmental reporting. The Company has proactively prepared for these changes by continuously monitoring regulatory developments and aligning its internal systems and project-level measures with applicable standards. Furthermore, the Corporate Governance and Quality Management function regularly reviews and monitors the implementation of policies and procedures across all departments to ensure full compliance with relevant laws and regulatory requirements.

Plans, Performance, and Outcomes related to Sustainable Supply Chain Management.

Key Sustainability Issues	Impacts, Risks, and Opportunities
Supply Chain ● Supply Chain Risk Management ● Environmental Supply Chain Management ● Social Supply Chain Management ● Relationship and Capacity Development to Contractor and Supplier **FTSE Russell EGS Theme:** Supply Chain: Environment Supply Chain: Social **Supporting SDG Goals** 	The Company prioritizes supply chain management as a business partnership which plays a crucial role in supporting the organization's sustainable operations under policies based on transparency, fairness, and consideration of impacts on communities, society, and comprehensive environmental considerations. Therefore, the Company sets criteria for selecting potential and qualified suppliers according to its standards, emphasizing the quality and standards of goods and services, on-time delivery, compliance with labour laws and human rights, as well as relevant regulations and rules, to foster a transparent and well-governed procurement system and reduce long-term business risks. The Company integrates supply chain management under the concept of Value Chain Responsibility, covering the entire lifecycle of products and services, from raw material sourcing, construction, and delivery to usage and demolition. It assesses environmental, social, and governance (ESG) impacts, risks, and opportunities (IROs) throughout the value chain, including direct and indirect suppliers (Tier-1 and Non-Tier Suppliers), to support disclosure in accordance with IFRS Sustainability Disclosure Standards, TCFD, and TNFD. In the context of rapid changes in the global supply chain, the Company recognizes significant challenges such as volatility of raw material cost, skilled labour shortages, risks from raw material scarcity, and the continuity of key suppliers. This also includes analyzing physical risks and transition risks related to climate conditions. Simultaneously, it sees opportunities to elevate cooperation standards with suppliers through systematic selection and performance evaluation, as well as building stable long-term business relationships and adapting with suppliers towards a circular economy to reduce resource consumption and emissions greenhouse gases is an opportunity to create a competitive advantage, not just for the Company, but also for its suppliers with a commitment to growth alongside value creation for all sectors, the Company continues to develop a strong, transparent, and stable supply chain. It also promotes ethics and sustainability in all processes to meet the expectations of customers and stakeholders in the era of the circular economy and sustainable competition.

Sustainable Supply Chain Management Goals (GRI: 308-1, 414-1)

Goals	2025 Goals	Performance in 2025
Proportion of new suppliers assessed for sustainability risks	100%	100%
Proportion of ESG assessment criteria for contractors in Low Rise Projects and High Rise Projects	100%	100%

Strategies and Management Approaches

Policy and Commitment (GRI: 414)

The Company prioritizes the selection of suppliers, contractors, and materials/equipment based on ESG principles (Environmental, Social, and Governance) to promote shared responsibility throughout the supply chain, especially in social, environmental, and business ethics aspects. The Company therefore establishes systematic processes for selecting, evaluating, and registering suppliers and contractors, and discloses relevant ESG issues, including expected impacts, to reduce supply chain management risks and to ensure suppliers Contractors acknowledge by signing **The Company's Supplier Code of Conduct** which consists of

1. Business Ethics and Transparency
2. Quality Standards, Business Continuity
3. Respect for human rights, covering equal treatment, prevention of forced labour, prevention of child labour. Contractors and suppliers comply with laws prohibiting working hours exceeding legal limits, fair wages, equal opportunities, and supporting the right to organize and collectively bargain.
4. occupational health and safety, providing safe and hygienic work areas and environments, and preventing employees from safety risks.
5. social responsibility, social and community care, land rights, and access to natural resources.

The Company conducts Human Rights and Environmental Due Diligence (HREDD) for suppliers, in line with the United Nations Guiding Principles on Business and Human Rights (UNGP) and OECD Due Diligence Guidance which covers identifying, preventing, mitigating, and monitoring human rights, labour, environmental, and community risks, along with establishing mitigation and remediation measures for at-risk suppliers.

Additionally, the Company has established **Terms of Reference (TOR)**

1. to serve as a framework and guidelines for fair procurement practices with contractors and suppliers, as well as to promote value creation for local communities.
2. to serve as guidelines for conducting business with suppliers and contractors on social and environmental aspects in construction operations, by setting operational conditions for creating sustainability throughout the supply chain to reduce risks and negative impacts on the environment, society, and economy across the supply chain. It consists of 3 main parts: environmental impact management and reduction plans (e.g., dust, noise, wastewater, waste management), prevention and reduction of social impacts (e.g., traffic), and monitoring measures (e.g., pre-construction, during-construction, and post-construction checks).

The Company integrates environmental policy as part of its business operations, from sourcing environmentally friendly materials, production, product delivery, marketing and sales, and after-sales service, to supply chain management and waste disposal, considering environmental impact reduction, environmental conservation, climate management, and adaptation to climate change. This is done in alignment with the Company's greenhouse gas reduction targets, including biodiversity and ecosystem preservation through efficient resource utilization.

For more information, please visit: Policy on Environmental and Practices

The Company communicates its Supplier Code of Conduct and procurement regulations for contractors, suppliers, and employees, establishing clear operational guidelines under relevant laws and regulations. This covers business ethics, human rights, safety, and environmental aspects, aligning with the Supplier Code of Conduct that is consistent with sustainable business principles, to foster trust, confidence, and cooperation among the Company, contractors, suppliers, and relevant stakeholders.

For more information on the Code of Conduct, please visit: Supplier Code of Conduct

Governance Structure

The Company assigns a committee, comprising relevant departments such as Procurement, Creative & Product Development, Marketing & Sales, Engineering & Estimate, and Construction, to consider and select

materials and equipment, and to be responsible for implementing the policy to achieve the specified goals. Manage suppliers in the supply chain in accordance with international practices and standards to reduce supplier risks and ensure that selection covers all dimensions, including product quality, price, delivery capability, and social and environmental responsibility. The corporate governance unit develops and publishes a Supplier Code of Conduct to communicate the Company's intention to conduct business ethically, transparently, and with social and environmental responsibility throughout the supply chain. Oversight is provided at the Board of Directors level through the Sustainability Committee, which is responsible for directing strategy and supply chain risk management, as well as monitoring ESG Supply Chain Performance indicators monthly.

Strategies and Management Approaches.

Establish criteria for suppliers to reduce greenhouse gas emissions from their operations.

The Company is committed to procuring environmentally friendly products, emphasizing the selection of products that has a certification label for being friendly to environment and has a policy to encourage all suppliers to develop environmentally friendly products for presentation to the Company. Including encouraging suppliers organizations to prioritize production processes, material sourcing, delivery processes, and waste disposal in the form of Recycle including inquiring about and visiting waste disposal processes that do not harm the environment. All suppliers are required to register sustainable products (ESG -Driven Product) to control and reduce supply chain risks that may arise from suppliers, such as violations of human rights or environmental impacts.

Supply Chain Management

The Company follows operational processes to develop a sustainable supply chain as follows: 1) Selection and registration of new suppliers 2) Supplier classification 3) Supplier risk assessment 4) Supplier audit, and 5) Building relationships and joint development with suppliers, with procurement practices to control and reduce

supply chain risks that may arise from suppliers, such as human rights violations, unfair practices, or environmental impacts, and conduct comprehensive investigations (Due diligence) to prevent and mitigate social and environmental impacts in the value chain, and to disclose sustainability reports according to international standards such as GRI Standard GRI 204: Procurement Practices, Supply Chain Environmental GRI Standard GRI 308: Supplier Environmental Assessment, and Supply Chain Social GRI 414: Supplier Social Assessment, as well as complying with laws and regulations, in accordance with SEC requirements that mandate listed companies to disclose ESG information via Form 56-1 e-One Report.

Operational Processes for Sustainable Supply Chain Development

Grievance and Remediation Mechanism in the Supply Chain

The Company provides a Supply Chain Grievance Mechanism for workers, suppliers, communities, and stakeholders in the supply chain, enabling them to safely, confidentially, and without retaliation report human rights violations, unfair labour practices, or environmental impacts. The Company establishes appropriate investigation, corrective, and remediation processes (Non-Retaliation), and continuously monitors results through quality control procedures according to ISO 9001:2015 via Supalai contact center 1720.

Performance results for 2025

The Company has developed a Supplier Code of Conduct whose content and scope align with the Company's Business Code of Conduct, as well as international principles and best practices. Training and communication are provided to all suppliers to raise awareness of the importance of conducting business responsibly towards the environment and society, and with good corporate governance, as well as to serve as guidelines for suppliers to operate in accordance with the Company's guidelines. All direct suppliers (Tier-1 suppliers) and new suppliers are required to sign an acknowledgment from the start of the supplier registration process. There is a process to monitor supplier operations and evaluate their performance to ensure compliance with the Supplier Code of Conduct. Suppliers must be able to demonstrate compliance with the Code of Conduct whenever requested. The Company will use various methods determined by the level criteria supplier risks, such as requiring suppliers to self-certify compliance with the Code of Conduct, conducting on-site supplier audits, or using questionnaires.

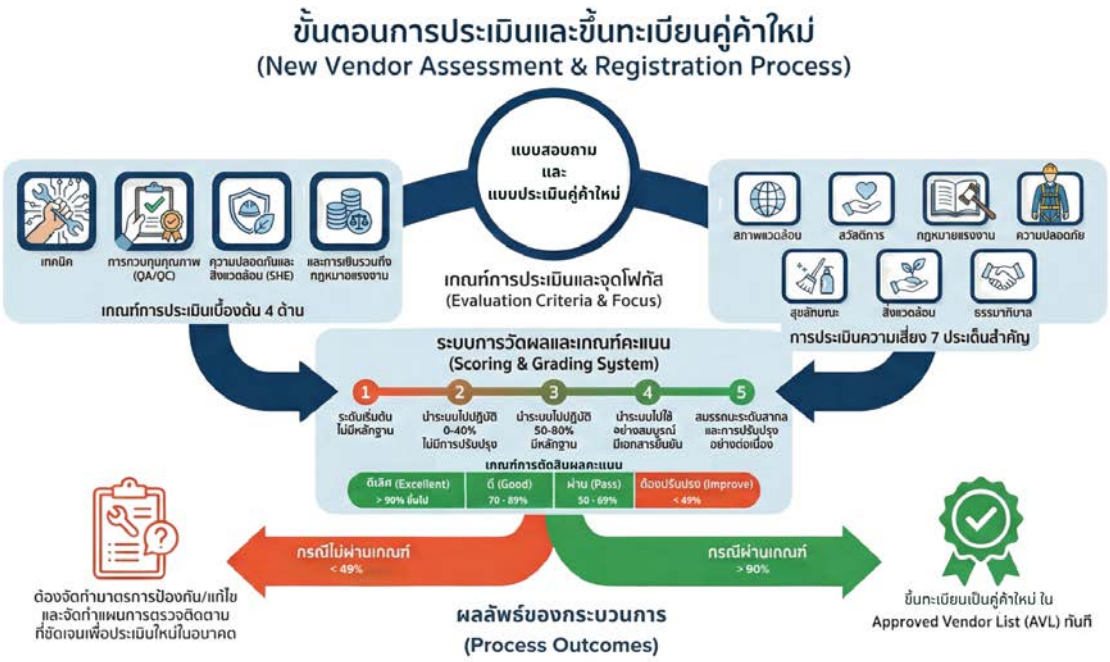
In 2025, the Company communicated and had suppliers sign an acknowledgment of the Supplier Code of Conduct as follows: (GRI: 308-1, 414-1)

Supplier Code of Conduct	2025
Direct Suppliers (Tier-1 Suppliers) ● communicated ● Acknowledged by signing	100% 100%
New Suppliers ● communicated ● Acknowledged by signing	100% 100%

Supplier and Contractor Management

1. Selection and Registration of New Suppliers

The Company establishes guidelines for considering the selection and registration of new suppliers by checking the initial qualifications of suppliers and contractors before procurement, using a questionnaire with 4 basic qualification assessment criteria and checking relevant quality standard certification documents. Additionally, the Company requires all new suppliers to undergo risk assessment, sustainability, covering environmental, social, community rights, safety and hygiene, and governance aspects, using a supplier self-assessment form before proceeding with new supplier registration.



When new suppliers whose scores meet the criteria and have no economic, social, environmental, or governance risks sign an acknowledgment of the Supplier Code of Conduct, the Company will proceed with new supplier registration. However, if the scores do not meet the assessment criteria or there are risks, the supplier must implement corrective actions or preventive measures and have a clear monitoring plan to achieve an acceptable score before being registered as a new supplier with the Company.

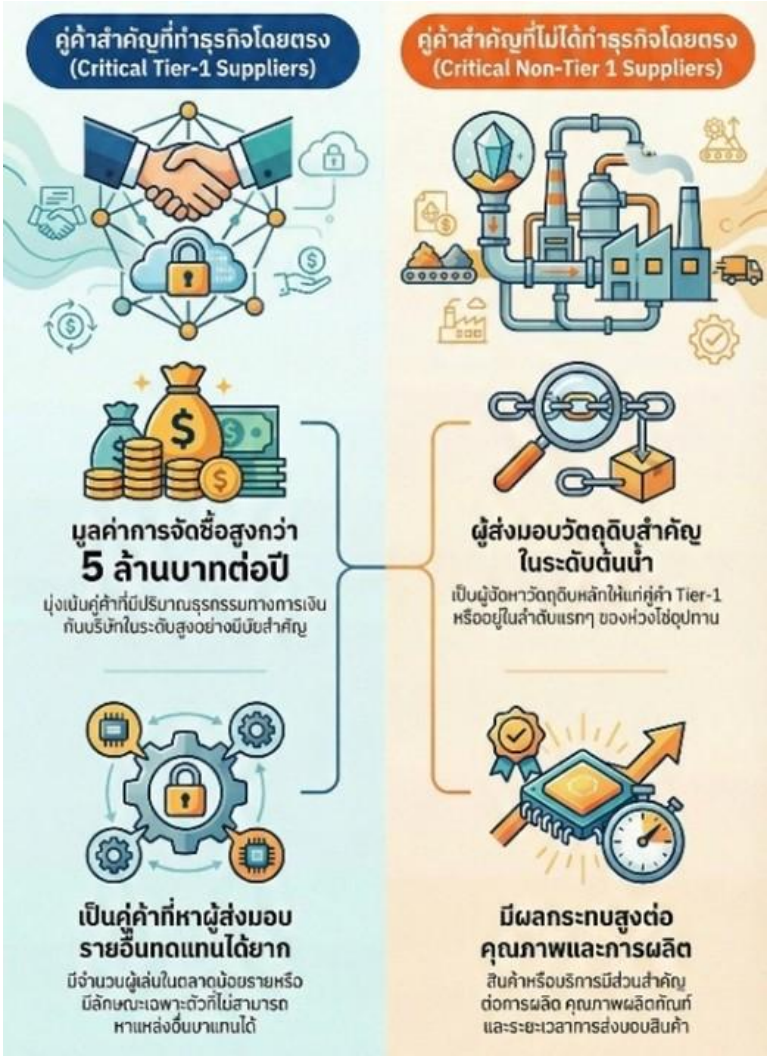
In 2025, the Company registered 97 new suppliers who passed the selection process, representing 99% of all new suppliers.

2. Supplier Classification

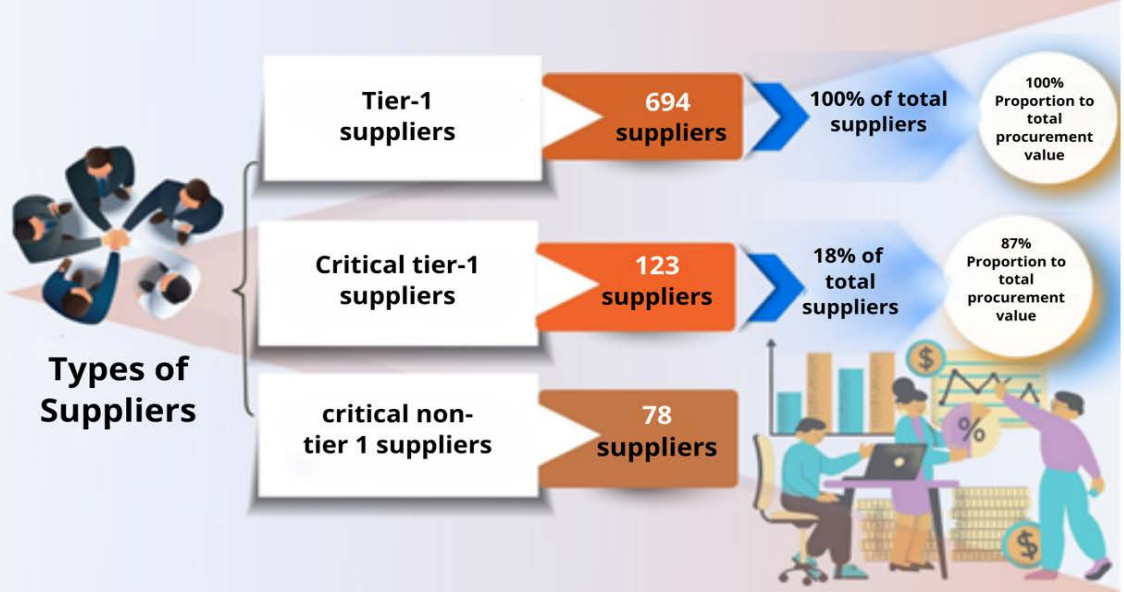
Identification of Critical Suppliers

In 2025, the Company had a total of 123 direct suppliers and contractors in its supply chain (Tier-1 suppliers). Of these, 98 were construction material suppliers, accounting for 80% of all suppliers.

The Company analyzed and identified critical suppliers from those providing goods and services in the entire supply chain, using criteria to identify critical suppliers based on with annual procurement values exceeding 5 million THB, being a supplier of essential business components, and being a niche supplier in the market or one for whom no alternative products can be found. The criteria for identifying suppliers are as follows:



From the analysis, it was found that the Company has 123 critical tier-1 suppliers, accounting for 18% of all suppliers, with a procurement value representing 87% of the total procurement value. Of these, 98 are construction material suppliers, accounting for 80% of all critical tier-1 suppliers.
As for critical non-tier 1 suppliers, there are 78 entities.



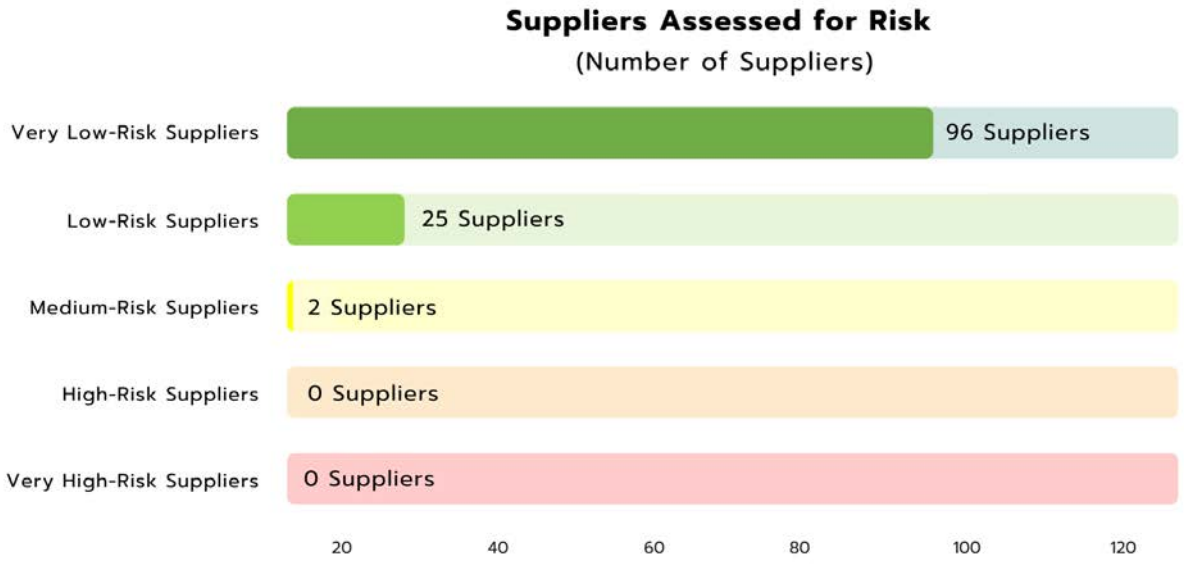
3. Supply Chain Risk Assessment

The Company assesses supplier risks that may impact its business operations, society, and the environment at least annually once, using supplier assessment forms, interviews, and reference document verification. This covers economic risks such as quality, delivery time and consistency, and origin; Environmental risks such as compliance with environmental laws, management, and prevention of impacts on environment and natural resources; Social aspects such as labour practices, respect for community rights, and safety; and Corporate governance aspects such as fair competition and prevention of corruption. The Company determines risk levels based on assessment scores and sets additional operational guidelines for suppliers with various risk levels as follows:

The assessment is linked to Enterprise Risk Management and climate-related risks, climate, including Nature-related Risks, to support the management of Scope 3 Greenhouse Gas Emissions and the long-term business continuity of the supply chain.

Risk Level	Operational guidelines for controlling and monitoring risks
Very low	● Annual Supplier Self-Assessment every year. ● providing management advice, training, or improvement measures, along with continuously monitoring and evaluating supplier performance.
Low	● Annual Supplier Self-Assessment every year. ● Planning meeting for collaborative development ● providing management advice, training, or improvement measures, along with continuously monitoring and evaluating supplier performance.
Medium	● Document-based supplier assessment and on-site audit every 2 years. ● In cases where a supplier has ESG risks, a corrective action plan must be developed within a specified timeframe specified. ● providing management advice, training, or improvement measures, along with continuously monitoring and evaluating supplier performance.
High	● Document-based supplier assessment and on-site audit within the year assessed. ● establish additional operational conditions related to high-risk issues, such as specifying them in contracts or Terms of Reference (TOR) for orders, and imposing penalties for non-compliance. It also specifies the right to terminate contracts if very high risks are found in subsequent assessments and implements contingency plans in case suppliers fail to deliver goods/services. ● providing management advice, training, or improvement measures, along with continuously monitoring and evaluating supplier performance.
Very high	● A written notification for improvement was issued once, and a timeframe for risk management was set. ● If, upon expiration of the agreed period, the problem or risk issue cannot be resolved, procurement from that supplier shall be terminated.

In 2025, the Company assessed the risks of its direct suppliers with procurement values exceeding 5 million Baht. and above, totaling 123 entities, representing 18% of all suppliers. "No suppliers were found to have very high risk." All suppliers met the Company's specified standards.



4. Supplier Audit

The Company conducts on-site supplier audits covering economic, environmental, social, and governance (On-site ESG Audit), with criteria and frequency of assessment based on the supplier's risk level, conducted by the Procurement Department and the requested party. The Company will prepare a supplier audit plan for each supplier type and send a letter of intent to audit, specifying the visit date, time, and relevant audit criteria documents in advance. In 2025, the Company had no suppliers that met the criteria for an on-site audit.

However, the Company conducted site visits to 7 critical tier-1 suppliers to build trust, strengthen business relationships, and verify that production or service standards comply with agreements. This helps reduce operational risks, facilitates knowledge exchange for developing new innovations, and expands long-term sustainable business opportunities together.

5. Relationships and Development of Supplier & Contractor Potential

Developing a sustainable supply chain with operations that comply with international standards or various regulations requires knowledge. Supplier understanding and engagement are very important, especially for material suppliers, equipment that supplies key raw materials in the construction process. Therefore, the Company focuses on raising supplier awareness for responsible business operations, providing knowledge on quality development, as well as practices consistent with human rights principles and new regulatory changes, both domestic and international, affecting the real estate development business.

The Company has a process of selecting key issues that suppliers and contractors are interested in and that impact them in terms of economy, health and safety, and the environment. These issues are then used to organize training sessions for suppliers and contractors.

Supply Chain: Environment

Project to develop new standard Green Products for sustainable quality of life and environment

The construction industry is another factor contributing to climate change. Therefore, the Company collaborates with leading business partners to initiate innovations in residential project development, focusing on mutual knowledge and experience exchange for studying and presenting new, high-quality, environmentally friendly products that can be further developed in the construction industry. This involves joint development with CPAC in the cement business, Siam Cement Group (SCG), to develop Green Products such as CPAC High Strength Concrete for 18 high rise projects, aiming to comprehensively meet the needs of environmentally conscious customers and promote Green Construction with the goal of elevating national construction standards to be environmentally friendly throughout all construction processes across the supply chain for sustainable growth.

Supply Chain Social & Environment: Collaboration with Contractors

The Company has established operational guidelines for controlling and monitoring risks. In 2025, contractor audits were conducted operating in 60 projects, divided into 57 Low Rise projects and a number of High Rise Projects 3 projects. The Company continuously monitoring of social and environmental supply chain management in new and ongoing construction projects. This is linked to and sets indicators for ESG issues. The Company uses the audit results to jointly develop employees, contractors, and suppliers, and requires all contractors to pass the assessment criteria set by the Company.

In cases where a contractor does not meet the criteria, the Company requires immediate corrective actions on relevant issues, providing management advice, training, or improvement measures, along with continuously monitoring and evaluating supplier performance continuously.

ESG-linked audit guidelines consists of 3 main parts:

1. Environmental impact management and reduction plans, such as for dust, noise, wastewater, and waste management.
2. Prevention and reduction of social impacts, such as traffic.
3. Monitoring measures, such as pre-construction, during-construction, and post-construction checks.

- **Contractor Scoring:** The audit results will be used as criteria for evaluating contractors to encourage them to collaborate and operate according to the Company's standards.

Score Level	Assessment Scoring Criteria
≥ 90% or more = Excellent	Met criteria, 90% or more
81 - 89% = Very Good	Met criteria, found only minor non-compliance issues.
70 - 89% = Good	Met criteria, found moderate deficiencies.
50 - 69% = Fair	Met criteria, found deficiencies that require collaboration with contractors to improve and develop issues that have not yet met the criteria.
≤ 49% = Needs Improvement	Did not meet criteria ● A written notification for improvement was issued once, and a timeframe for risk management was set. ● If, upon expiration of the agreed period, the problem or risk issue cannot be resolved, that contractor shall be removed from the contractor register and further engagement shall cease.

- **Continuous Improvement:** Develop a Corrective Action Plan for identified deficiencies, set a timeframe for implementation, and support additional training on high-risk ESG issues such as occupational safety and health. If safety equipment is not available, immediately suspend work on the project, including human rights issues.

ESG Assessment	Number of projects assessed.	Contractors who passed the ESG assessment	
		Number (of entities)	Proportion (%)
High Rise Projects	3	2	100
Low Rise Projects	57	140	100

Construction knowledge training

The Company promotes the development of skilled labour in construction projects by collaborating with manufacturers or suppliers to organize training on the installation of various materials and systems to meet the Company's standards. This aims to enhance construction quality and reduce risks from construction errors, including occupational safety and health. The training covers both theoretical and practical sessions, developing knowledge, skills, and abilities, which enables workers to further apply their knowledge and skills in future projects.

- **High Rise Project**

Bricklaying training

Painting training

Floor leveling training

PPR pipe welding training

- **Low Rise Projects**

Ceiling installation standard training

Training on exterior base painting for houses

Hosted a Focus Group for feedback in 2025

The Company organized a feedback forum ESG Focus Group with suppliers and business partners annually for the 7th consecutive year, by In 2025, the Company invited experts to participate in discussed social and environmental supply chain management to create sustainable value with key business partners, such as SCG Ceramics Public Company Limited., Westcon Co., Ltd., Deco Enterprises Co., Ltd., Starmark Manufacturing Co., Ltd., Sahamosaic Industry Public Company Limited (Durafloor) and SECCO Co., Ltd. to exchange views on important issues. Additionally, there was an exchange of views various issues are:

- Product and Service Image (Quality of Products and Services)
- Fairness to Suppliers (Fair Business)
- Human Rights
- Environmentally Friendly Procurement Guidelines (Green Procurement)
- Impacts and Responses to Climate Change

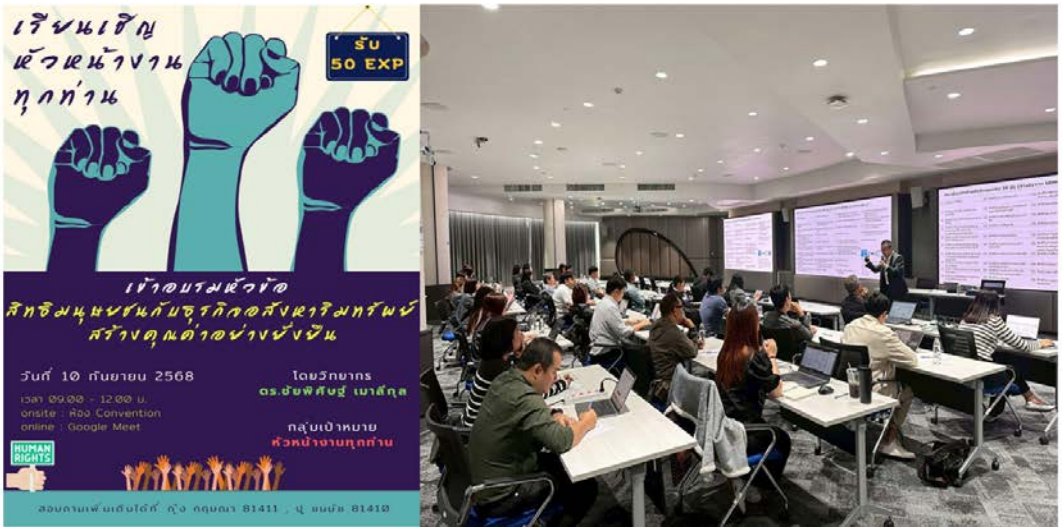
The Company has incorporated the voices of its partners, which are a crucial force in driving the organization towards ESG goals and sustainable growth, and is committed to developing comprehensive organization for the benefit of stakeholders, society, and the environment, while creating Eco-system a business ecosystem with quality and shared value for long-term mutual benefit.

Training for suppliers and contractors on social and environmental issues.

The Company involvement in initiatives on social and environmental impacts in supply chain as following:

1. Training for Suppliers and Contractors on Human Rights in the Real Estate Business.

The Company supports suppliers and contractors by sharing best practices to demonstrate its commitment to human rights within and outside the organization, such as fair treatment, non-discrimination, and workplace safety. This training focuses on developing skills in social supply chain management and risk management, social aspects (Social Risk Management). It supports suppliers and contractors in applying knowledge to ethically manage labour according to international standards, reducing supply chain risks, and helping to screen and prevent human rights violations for business continuity. A total of 117 suppliers and contractors participated in both online and onsite training, with an overall satisfaction level of 84%.



2. Supplier Training on Anti-Corruption

The Company invites suppliers SMEs to participated in lectures to raise awareness of corruption issues, including approaches to elevate transparent operational standards, and to expand the transparent business network to suppliers. by Support suppliers The Company's SMEs signed a declaration of intent with the CAC project to elevate SME suppliers in establishing a foundation for good corporate governance in Thailand and to enhance supplier potential and capabilities. This aims to collaboratively build a supply chain that aligns with the organization's sustainable development goals, while also considering responsibility towards all stakeholders.

3. Supplier Development and Training inGreenhouse gas emission reduction

The Company has joined the Thailand Carbon Neutral Network (TCNN) under the operation of the Thailand Greenhouse Gas Management Organization (Public Organization) TGO, a pioneering organization in greenhouse gas management, to demonstrate its intention and commitment to managing and reducing greenhouse gas emissions. The Company has a plan to manage Impacts environmental aspects in the supply chain, aiming to reduce other indirect greenhouse gas emissions (Scope 3), where most emissions come from transportation by construction material manufacturers. This also includes establishing recruitment criteria and Select suppliers with adaptive and flexible approaches to climate change and have approaches to reduce greenhouse gas emissions.

The Company recognizes the issue of climate change response and management, which suppliers still have limited understanding of. Therefore, the Company supports and develops training on "The CFO & CFP

Advantage: Leveraging Carbon Footprint for Competitive Edge and Sustainable Growth" and "Unlocking the advantage of business as well CFO & CFP: Enhancing Competitiveness and Sustainable Growth" by inviting suppliers to attend lectures to build knowledge on carbon footprint assessment CFO & CFP for management environment throughout the supply chain.

Additionally, the Company has supported suppliers in registering CFO & CFP, which will lead to the establishment of effective management guidelines for reducing greenhouse gas emissions at factory, industry, and global levels. It also promotes supplier potential and capabilities to collaboratively build an Environmental Supply Chain that aligns with the organization's sustainable development goals, while also considering social and environmental responsibility, with participants. Number of suppliers: 105 suppliers

Benefits for Suppliers	Benefits for the Company	Benefits for Environmental
● increase knowledge and understanding of carbon footprint assessment according to international standards. ● Green Innovation Development ● increased data exchange and green procurement.	● reduce supply chain risks arising from policy and legal changes, such as carbon taxes or the enforcement of green building standards. ● increase sales opportunities and build trust among conscious consumers environmental aspects.	● helps reduce environmental impact from organizational carbon emissions.

Procurement of environmentally friendly materials (Green Procurement) (GRI 204-1)

The Company believes that sustainable success must be based on systematic social and environmental responsibility in all business processes of the Company and its suppliers. Therefore, it has established a responsible sourcing policy to ensure that the Company's procurement or sourcing processes help reduce negative impacts on the environment, society, and economy throughout the supply chain, while creating value and sustainability for all stakeholders, and operating transparently and respecting human rights as a priority.

In 2025, the Company focuses on promoting supplier operations and supporting green procurement and the selection of construction materials with environmental standards. This is for procurement that considers environmental, social, and governance (ESG) principles, which not only helps reduce negative impacts but also promotes the responsible growth of suppliers and enhances the Company's long-term competitiveness.

The Company promotes supply chain traceability for key construction materials to prevent risks related to human rights violations, ecosystem destruction, and unsustainable resource use.

	2023	2024	2025
Proportion of spending on local suppliers (Thailand)	13%	14%	16%
Proportion of environmentally friendly construction material purchases out of total orders	N/A	54%	51%*

*In 2025, the proportion of procurement significantly decreased due to a reduction in construction projects.

Fair and Transparent Procurement

The Company is committed to conducting procurement with honesty and fairness, operating with transparency and good governance. It elevates transparency standards in procurement processes, reduces corruption risks, and promotes ethical business operations by establishing verifiable procurement principles, measures, and guidelines, and valuing all suppliers without discrimination. The Company has processes for price comparison and competitive bidding before procurement, with the construction project committee jointly considering procurement for transparency and fairness.

Promoting good liquidity for suppliers

The Company prioritizes fair business practices with its suppliers to promote cash flow liquidity and capital management for both suppliers and the Company. Therefore, it has established policies and guidelines for paying for goods and services to suppliers, fairly, accurately, transparently, and promptly, by making payments according to installments or credit terms specified in the contract conditions, and has communicated the policy mentioned above for mutual acknowledgment from the time suppliers are registered. The Company's average annual payment period to suppliers is as follows:

Details	according to the policy	2023	2024	2025
Average supplier payment period	30 business days	30 days	30 days	30 days

However, payment periods may not always align with the policy due to business-specific limitations and various additional factors that need consideration, such as the type of goods and services business, contract duration with suppliers, etc.

Additional explanation for research and development (R&D) expenses over the past 3 years

During 20232025, Supalai Public Company Limited allocated budgets to support internal Innovation Awards to foster a culture of creativity and innovation among employees. The total prize value was approximately THB 600,000 in 2023, and THB 440,000 per year in 2024 and 2025, aimed at encouraging ideas and projects with high potential to positively impact the business and customers.

Award-winning ideas and projects span several categories, including:

- Enhancing the efficiency of space utilization and building structures
- Developing sustainable water and energy systems
- Creating digital tools and systems to improve operational efficiency
- Collecting and analyzing customer satisfaction data to improve products and services

The business impact of these projects can be further leveraged, generating an estimated financial value of THB 11 million, demonstrating the potential of innovation to improve efficiency, reduce costs, and drive sustainable growth.

In summary, the Innovation Awards serve as a strategic tool for promoting a culture of innovation within Supalai, motivating employees, and supporting the companys ongoing development and competitiveness in the real estate market.

Information on organizations innovation culture development and promotion process

Process of developing and promoting the company's innovation culture

Process of developing and promoting the company's innovation culture : Yes

The process of developing and promoting an organizational innovation culture. Supalai Public Company Limited places significant importance on innovation development as a crucial mechanism for enhancing the quality of products, projects, and operational processes, as well as creating added value for customers, the organization, and the surrounding society. This is achieved by encouraging employees at all levels to continuously participate in inventing and developing innovations, guided by three main principles:
1. Enhance: To enhance the value of product and service quality, thereby elevating customer experience and satisfaction.
2. Reduce: To reduce redundant steps and working time in processes that are repetitive or prone to future problems, thereby increasing organizational efficiency and agility.
3. Create: To create psychological value and new experiences for customers, such as a sense of worth, trust, and a positive brand image.

Innovation Culture Promotion Project (Innovation Awards & Digital Awards)
The company continuously organizes the Innovation Awards and Digital Awards projects to provide a platform for employees to showcase their potential and creativity in developing innovations in products, services, and work processes. The focus is on applying new technologies and concepts to concretely enhance operational efficiency and elevate service quality. These projects serve as a platform for selecting outstanding innovative works each year through a systematic competition and evaluation process, aiming to identify innovations that can be practically implemented and further developed at the organizational level.

Criteria for Evaluating Innovative Works The evaluation of innovative works participating in the project adheres to three key components:
1. Benefits to Stakeholders: The work must generate benefits for the organization, employees, customers, society, and the environment at a fundamental or measurable level.
2. Creativity: The innovation must present new concepts or methods that differ from existing practices and can create added value for the organization.
3. Potential for Implementation and Scaling: The innovation must be practically implementable and capable of being further developed or scaled across other projects or departments within the company.

Employee engagement and continuous cultivation of an innovation culture. Annually, the company promotes projects through various internal communication channels to encourage widespread employee participation in activities and submission of innovative works. In 2025, the average project participation rate exceeded 23% of all employees, reflecting strong engagement and awareness of innovation within the organization. This process systematically and continuously instills an Innovation Culture, encouraging employees to think boldly, experiment, and apply new ideas to real work, which is a crucial foundation for long-term sustainable organizational development.
